

## FACULTY OF ARCHITECTURE AND DESIGN

Eskisehir Technical University, Faculty of Architecture and Design founded in 2011 by giving priority to the Universal ideas and values on design. Focal points of the faculty are to encourage critical and reflective thinking, to develop the investigative, aesthetic sensitivities, creative sides, vocational responsibilities, and self-confidence of the students to empower to become visionary, socially, and environmentally aware members of the local and global professional design community, to provide the capability of computer and information technologies to design processes. Nowadays, Faculty consists of Department of Architecture which is founded in 1984 at Department of Faculty of Engineering and Architecture, Department of Interior Design which is founded in 1993 at Department of Faculty of Fine Arts. Education in Industrial Design and Fashion Design departments started respectively in 2000 and 2001 at the School of Industrial Arts. These departments offer undergraduate and graduate programmes. During the training and education process, theoretical courses, workshops, seminars, conferences, exhibitions, fashion shows, sketches and trips for research and survey are handled. Distinguished academicians of the Faculty actively contribute to the industrial organizations and sector of the society and remain in contact with its environment. They also actively involved in research projects some of them are carried out in cooperation with the sector. Departments: Department of Architecture (\*), Department of Graphic Design (\*\*\*), Department of Industrial Design (\*), Department of Interior Design (\*), Department of Textile and Fashion Design (\*).

\* Optional Preparatory School Training \*\*Department for Student Service Courses, \*\*\*Not founded.

## DEPARTMENT OF INDUSTRIAL DESIGN

In globalized world, concept of Industrial design gets an important place in production, while products get importance both in function and in aesthetic by increasing competition in markets. Definition of industrial design, which is designing and making visual and functional definition of every mass-produced product, emphasizes the place of this science in industrial field. In Industrial Design Department, which established in 2000; computer aided design education which is a requirement of contemporary design education, is supported by software which are products of latest technology. Design studios, computer laboratories and workshops supply transition from theory to application. Students graduated from Industrial Design Department get the title of INDUSTRIAL DESIGNER. They can work as freelance designers and as designers in firms and government establishments' research and development departments and in design studios.

## DEPARTMENT OF INTERIOR DESIGN

The Department of Interior Design was established in 1991 to educate creative and modern interior designers. Students are admitted by the central student selection and placement examination system. In the department where education is carried out in accordance with the requirements of the age. The curriculum is based on the complementary and supporting characteristics of the technical, theoretical and practical courses. "Interior Design Project" and "Furniture Design" courses, where different

design problems and conceptual designs are evaluated and solved, form the basis of the educational program. In this scope, the designated spaces are evaluated in terms of practice, aesthetic and symbolic functions in accordance with the physical needs, mental characteristics and habits of the individuals. Graduated students can identify and research the problems related to the functional and quality of spaces; are able to design by utilizing creativity and aesthetic knowledge. Graduated students are also able to provide information on construction site supervision, building systems, building information about interior space, equipment, materials and equipment, and are equipped with experience to prepare the necessary drawings and documents related to the design. Students of the 4-year undergraduate education program graduate as members of the Chamber of Interior Architects with the title of "Interior Architect". Within this scope, they can design individual projects and applications, or they can find job opportunities in design studios or government offices.

Head of Department : Assoc. Prof. Dr. Onur ÜLKER  
Deputy Department Head : Asst. Prof. Dr. Özlem Kurt Çavuş

Architecture can be described as the design of the built or man-made environment. This environment is affected by natural, cultural, social, political, and economic conditions as well as physical. Design is a process of creative intervention, the purpose of which is to improve the built environment. This process is in people; require features such as a) an interest in the human condition, in so far as it is affected by and affects the built environment; b) the development of intellectual and creative qualities, critical abilities, the capacity to make value judgments and the motivation to learn; c) the acquisition of knowledge in the arts and sciences (as it shapes the built environment) and the development of analytical, creative, technical, managerial, organizational and communication skills. The Department of Architecture, Anadolu University-Eskişehir was founded in 1984 within the organizational structure of the faculty of engineering and architecture. By 1993, Anadolu University was divided into two distinct universities as a result of this the department of architecture was reorganized and has commenced education in 1994 with a brand-new spirit and incentive. In October 1999 the department of architecture has finally moved into newly purpose-built buildings at the İki Eylül Campus of the Anadolu University. Along with the Faculty of Architecture and Design, the Department of Architecture was separated from Anadolu University and affiliated with Eskişehir Technical University, which was established with the Decree-Law No. 7141 published in the Official Gazette dated May 18, 2018 and issued 30525. In our department, which has been moved to the same new building with all departments of the faculty since the 2022-2023 academic year, education is carried out in a closed area of 21,000 square meters, consisting of 3 Theoretical Classrooms, 2 Advanced Computer Aided Laboratories, 31 Design Studios, 1 Natural Printing Studio, 1 Fabrication Laboratory, Instructors' Rooms and Administrative Block. In the Design and Application Laboratory Building, there are model, woodwork, ceramics, fabric sewing, fabric weaving-printing, ironing studios, which are operated under the coordination of the Faculty of Architecture and Design. The department has 31 full-time and 18 part-time members of teaching staff including 8 professors, 3 Associate professors, 6 Assistant Professors, 7 senior lecturers, 7 Research Assistants. Each member of staff has his/her own well equipped and furnished office. Our department has the potential for offering architectural services (project design, application, and training in accordance with their fields of expertise) to both public and the industry due to the expertise staff and the facilities available. The decision-making body dealing with the departmental matters is composed of all faculty members of the department. The department is governed by one chairman and two deputy chairmen. One of the deputies is responsible for education and training and the other is responsible for administrative and academic activities in the department.

Head of Department : Prof. Dr. Aslı ÖZÇEVİK BİLEN  
 Deputy Department Head : Asst. Prof. Dr. Elif TATAR  
 Deputy Department Head : Assoc. Prof. Dr Özlem KANDEMİR

## DEPARTMENT OF BASIC DESIGN EDUCATION

The Department of Basic Design Education was established in 2020 within the Faculty of Architecture and Design. The purpose of its foundation is to expand the theoretical and practical knowledge of the design discipline within and outside the field, to increase interdisciplinary interaction within the faculty and to present the elective design courses as domain specific elective and elective courses that students from different departments of the faculty can together benefit from. In line with this purpose, the department aims to bring together students and faculty members from different fields of the design discipline and to present an interdisciplinary encounter ground. The Department of Basic Design Education, or TEB in short, is trying to enrich the relations of our faculty students with the design discipline, with over 50 different TEB coded courses offered since the 2022-2023 Fall semester. In the department, whose course contents and diversity are increasing with each passing period, the curriculum includes art, design, ceramics, serigraphy, typography, graphic design, computer aided design, workshop-based practice courses, painting, yoga, photography, art history and research in order to provide our students with different perspectives, through specialized courses.

Head of Department	: Asst. Prof. Dr. Fatma KOLSAL
Deputy Department Head	: Lecturer. Zeynep BASKICI KAPKIN
Deputy Department Head	: Lecturer. Serhan TUNCER

## COURSE CONTENTS

### **İÇT 219 Interior Infographic Design** **2+1 5,0**

Definition of Infographic Design; Types of Infographic Design; Basic Principles of Infographic Design, Considerations of Infographic Design; Historical Development of Infographic Design; Selection Of Appropriate Infographic Design; Design of Infographic Design: Infographic Design; types of Infographic Design: Pictograms; types of Infographic Design: Infographics; Introduction to Statistics Graphics; Reading Statistics Data; Visualization of Statistics Data.

### **İÇT 225 Interior Wayfinding Design** **2+1 5,0**

Definition of Wayfinding Design; Types Of Wayfinding Design; Principles Of Wayfinding Design; Considerations When

Designing Wayfinding Design; Historical Development Of Wayfinding Design; Selection Of Appropriate Wayfinding Design; Visualization Of Wayfinding Design Information; Types Of Wayfinding Design; Wayfinding design signage.

**İÇT 226 Comerical Kitchen** 2+1 5,0

Industrial Kitchen Sector; Industrial Kitchen Planning; Kitchen Appliances; Industrial Kitchen Design Rules; Industrial Kitchen Plumbing; Hygiene Rules; Hazard Analysis and Critical Control Points; Garbage and Waste Systems; Energy and Recovery; Case Study: Settlement Plans and Projects; Case Study: Creating a Model Project.

**EMİM 409 Conservation of Rural Heritage** 3+0 4,0

Rural Architectural Heritage Concept; Spatial Change and Transformation of Rural through Changing Production and Consumption Forms, Conservation Problems in Rural, Conservation Forms in Rural; Conservation of Rural Architectural Heritage in International Legal Frameworks and Examples from the World; Conservation of Rural Architectural Heritage in National Legal Frameworks and Examples from Turkey; Continuity of Rural Architectural Heritage.

**EMİM 203 Criticism and New Possibilities in Architecture** 3+0 4,0

Criticism in architecture; The relationship between philosophy and architecture; Frankfurt School; Space and representation; The concept of utopia; Historical change of utopian representations; Pre-modern urban utopias; Post-industrial utopias; 21st century utopias; New developments and possibilities in architecture.

**EMİM 205 Body, Space, Experience** 2+1 4,0

Body and movement / performance; Awareness of the body; Body and space; Experience and perception; Body in urban space, Bodily and spatial practices in daily life; New body, space, experience possibilities; Experimental body and space practices.

**EMİM 308 Soundscape** 3+0 4,0

Auditory perception; Soundscape Concept; Soundscape Approach; Soundscape Components: Keynotes, Signals, Soundmarks; Sound Types: Natural sounds, Human sounds, Technological sounds; Indoor Soundscape; Soundscape in Urban Areas; Soundscape Evaluation; Soundscape Types; Soundscape Routes; Soundwalk; Soundscape Maps, Soundscape Design; Soundscape Regulations and Standarts.

**EMİM 407 Space, Memory and Cultural Heritage** 2+1 4,0

Place, Space Notion; Memory Concept: Memory in different disciplines, Memory in architecture; Memory And Space Relations: The effects of spation transformation to the memory, The effects of changing memory to the spatial transformation; Spatial Representation of Memory: Memory spaces, Commemoration spaces, Negative Spaces; Conservation of Cultural Heritage; Memory in Conservation of Cultural Heritage: Revealing of spatial memory, Presentation of spatial memory.

**MTT 320 Performing Arts and Costume Design** 2+2 4,0

A View of Performing Arts: Theatre, Opera, Ballet, Film, TV Series; Dramaturg; Scenario Selection: Time and space research in the scenario, Character analysis of the selected play, Sketch studies for stage costume design, Technical drawings of sketch drawings, Material research, Dimension, Pattern preparation and model application, Cutting, Production; Accessory Design Suitable for the Scenario: Selection of accessories suitable for the character, Material research, Technical research, Application; Practical Costume Application Methods.

**MTT412 Artistic Textiles** 2+2 4,0

Textile Art and Its Development: Basic concepts of art, Basic concepts of textile art, Relationship between art and craft, Contemporary textile art in 1960 and later; National and International Contemporary Textile Art: National and international contemporary textile artists and art events, Artistic Textiles: Fiber art, The relationship of textilefashion-art, Wearable art; Interpretation of Technique and Material: Contemporary applications in artistic textiles; Conceptual and Aesthetic Values in Textile: Conceptual expression, Presentation and exhibition styles, Researching subjects and concepts, Artistic textile applications.

**MTT 318 Creative Approaches in Clothing Design** 2+2 4,0

Clothing Design and Fashion: Basic concepts; Relationship between Clothing Fashion and Art: Definition of art and basic concepts, Relationship between Contemporary textile art, clothing and fashion; Contemporary and Current Examples in Clothing Design: Wearable art, Leading designers and artists in wearable art, Creavite applications; Research in Creative Processes: Concept research, Visual research, Material research; Form Research: Contemporary trends, Form/A-form, Applications based on experimental methods.

**MTT 322 Art and Visual Culture** **2+2 4,0**

Concept of Art: Art, Craft, Design, Aesthetics, Beauty, Idea, Imitation, Originality, Creativity; Visual Culture: Visual, Expression, Perceptibility, Abstract, Visual culture elements, Media, Visibility, Visual arts; Visual Thinking: Abstraction, Embodiment, Meaning, Perception; Artwork: Interpretation, Art medium, Art world, Relationship between art and agenda.

**MTT 409 Fashion and Art** **2+0 3,0**

Modernity: Scientific revolution, Political revolution, Cultural revolution, Industrial Revolution; Modern Art: Autonomy of art, Avantgardizm; Modern Art Movements: Empressionism, Expressionisim, Cubism, Dada, Constructivism, Surrealism; Modern Insections of Fashion and Art: First fashion designers, Bourdieu and star fashion designers of modern period; Post-modernity: Dilemmas of modernity, Basics of postmodernity; Arts in Post-modern Period: Performance art, Land art, Conceptual art; Fashion in Post-modern Period: Structural transformation of Western fashion system, Postmodern fashion, Avantgarde fashion; Fashion Designers in Post-modern Period: Alexander Mcqueen, Hussein Chalayan, Anti-fashion; Exhibition of Fashion in Postmodern Period: Fashion museums, Consumption sites as museums.

**MTT 209 Environmental Sociology and Design** **2+1 4,0**

Environmental sociology: Nature and natural assets, ecology-environment, ecological problems, society, population, industry, design, energy, water and society, energy resources, energy, society and ecology, production-consumptionenvironment relationship, components of environmental pollution, environmental justice, environmental justice and design, design economics, sustainability, design for sustainability, waste management in design processes, environmental heritage.

**ESTÜ 133 Disability and Awareness** **3+0 3,0**

Basic Concepts and Definitions in Special Education, History of Special Education Legal Basis of Special Education, Disabled Individuals and Their Characteristics, Disability and Discrimination, Accessibility is a Human Right! Universal Design, Disability Friendly Approach, Social and Adaptation Skills of Individuals with Disabilities, Business and Vocational Skills and Employment in Individuals with Disabilities, Social Contact in Individuals with Disabilities.

**TEB 323 Collection Planning and Development** **2+1 4,0**

Fundamentals of collection planning in the fashion industry; merchandise plan, range plan and capsule collection definitions. Market, brand and target audience definitions; planning of the collection calendar. Creating the math of the collection. Storyboard creation and model development. Review and criticism of exemplary collection designs.

**TEB 328 Fashion Trends and Forecasting Methods** **2+1 4,0**

Understand key terms related to fashion trends and forecasting methods—introduction to fashion trends terminology, Cause and effect relationship of the leading fashion trends of the 20th century, Seasons and periods in clothing fashion; Spring/Summer, Autumn/Winter, Resort and Early Fall semesters, Global effects in the fashion forecasting process; the consumer, the seasons, social changes, technological innovations, subcultures, fashion leaders and the importance of geographic location, Understanding how to use primary fashion forecasting tools: Fashion magazines, websites, early production of the textile industry, fashion shows, fashion fairs and the concept of "shopping".

**TEB 429 Fashion, Identity and Style in Design** **3+0 4,0**

Fashion concept and definition, Fashion and design relationship, Accessories, Decoration, prestige items and clothing, The concept and definition of identity; social identity and individual identity, Clothing is a fashion object and a means of identity, Personal belongings, accessories, decoration objects, prestige products and identity relationships, Objects and places as a means of presentation of identity, The effect of objects on people and identity formation, Style creation studies and style applications as body, identity, and presentation.

**TRS 133 Teknik Resim** **1+3 6,0**

A common language is formed, through considering customs that is applied in the industry, at the technical drawing discipline where the knowledge on technical drawing is given to the interior design students who need these knowledge in their presentations. In this sense, introducing the tools, that are used for drawing technical drawings, scales, lines and its techniques, geometric drawings, sections, views, measurements and intersections are based respectively.

**İÇT 227 New Expansion at the Design** **2+1 5,0**

Design Education and Basic Concepts: Design, User, Design process, Design product; Creative Problem Solving; Design Thinking; Components of design thinking; Product design; Service Design; User experience; Interaction Design; User Interface Design; User Research in User Experience: User research approaches: Methods, Ethical codes; Interview Technique: Analysis of interview data, Reporting of data; Storytelling in User Experience and Design Thinking Processes; Good Design Criteria and Principles: Design organizations in the world, Design competitions, Case study from the history of design.

**İÇT 228 Form and Space in Interior Architecture****2+1 5,0**

Form and geometry definitions; Form-geometry relationship; Explanation of geometry types; Explanation of Euclidean forms in interior architecture and examination through sample space / product design; Explanation of parabolic forms and examination through sample space / product design; Explanation of hyperbolic forms and examination through sample space / product design; Explanation of fractal forms and examination through sample space / product design; Explanation of topological forms and examination through sample space / product design; Evaluating the results obtained from the analysis and making sample application studies.

**İÇT 442 Space Analyzing in Interior Design****2+1 5,0**

Space: Definition of space, Concepts of Space in interior design, Elements of interior design, Principles of design in interior space; Design: Definition, Design elements, Design methods; Perception: Definition of perception, Perception process, Perception psychology, Gestalt theories, Perception of interior spaces; Analysis: Definition of analysis, Goal of analyzing, Methods of analyzing, Space analyzing, Physical and psychological analysis in interiors.

**İÇT 229 Design Geometry and Form Analysis in Interior Architecture****2+1 5,0**

Design geometry definition and importance; Brief history of mathematics and geometry; Projective geometry; Relationship between geometry and digital design; Geometry types; Euclidean geometry and affine plane-space; Derivative and integral geometry; Definition and types of projection; Conjugate orthogonal projections; Basic projection drawings; Studying the concept of space geometry; Definition, properties and calculations of the concepts of point, line and plane; General definition and types of surfaces; Objects of surfaces; Definitions, types, basic elements, values, reduction to plane and intersection-combinations of objects and projection studies.
