## PROGRAM IN RAIL TRANSPORT MECHANIC TRAINING

As one of the most essential elements of economic and social life, transportation both in local and countrywide has relationships with various factors. The recent changes in daily life around the world generated a demand to live more comfortably, safely and use time more efficiently. The role of safe and fast railway transportation in industrial and economic growth is well understood in our country as well. The need to educate train drivers ,who take up significant missions in railroad transport, with the latest practices is regarded as one of the important national issues. The purpose of the program opened in Vocational School of Transportation is to train drivers who are highly skilled and equipped with technical information and appliances in the industry, and have a high sense of responsibility and mission. TCDD and Anadolu University signed a protocol, by which TCDD is expected to support this training in every aspect.

## PROGRAM IN TRANSPORTATION AND TRAFFIC SERVICES

Scientific and technological improvements of our times have effected society and human life in many ways and increased life standards with new technology and equipments. Transportation vehicles; have positive effects in economic, social and cultural improvements. The fact that the number of vehicles and drivers has increased has created the concept of "Traffic Safety". Traffic safety concept includes deaths, injuries, physical disabilities, social-economical losses, relatives of dead and wounded, and psychological, social effects, environmental pollution. Traffic accidents occurred without concern of time, person and location effect all people in society and therefore interest public opinion. In developed countries; there are many projects about traffic safety, and there are institutions educating people about traffic, and highway transportation,also educating experts and producing various research. Depending on the results of these researchs, new plans and social campaigns are being held. Besides the increase in number of motor vehicles and drivers, improvements in the country, the increase in population, unsystematic city planning increase the possibility of traffic accidents and causes difficulties for the solution of the traffic safety problem. Traffic safety; can be solved by the improvements in infrastructure and training of more people about traffic.Highway Transportation and Traffic Program held by Porsuk Vocational School aims at supplying the labor force necessary for highway transportation and traffic.
