

INSTITUTE OF GRADUATE PROGRAMS

The Graduate School of Sciences at Anadolu University was first established in 1982, but when this school became a part of the newly established Osmangazi University, the graduate school was re-founded in 1993. The main purpose of the graduate school is to offer MSc and PhD education at international standards and encourage students to carry out advanced research.

Director : Prof.Dr. Murat TANIŞLI
Deputy Director : Dr. Lecturer Hüseyin Ersin EROL
Deputy Director : Assoc. Prof.Dr. Tuğba ARAS
Secretary of Institute : Demet BAYRAKTAR

STAFF

Associate Professors:

Tuğba ARAS

Faculty Members:

İlker DEMİROĞLU

Research Assistants:

Ahmet Murat TÜRK

Elective Courses

| | | | |
|--------------|---|-----|-----|
| FBE601 | Design, Science and Communication | 3+0 | 7.5 |
| LEE501 | Open and Distance Education | 3+0 | 7.5 |
| LEE503 | Design of Online Learning Environments | 2+1 | 5.0 |
| LEE601 (Eng) | Technical English | 3+0 | 3.0 |
| LEE603 | Learning and Teaching in Higher Education | 3+0 | 7.5 |
| TAÇ701 (Eng) | Thesis Research Study | 3+0 | 7.5 |
| TAÇ801 (Eng) | Thesis Research Study | 3+0 | 7.5 |

DEPARTMENT OF PHYSICAL EDUCATION AND SPORTS

Head : Assoc. Prof.Dr. Deniz ŞİMŞEK

DOCTORATE DEGREE (PH.D)

PROGRAM IN FUNDAMENTAL AND INDUSTRIAL MICROBIOLOGY

PROGRAM

| I.Semester | | | | II.Semester | | | |
|---------------------|--|-----|------|--------------------|-------------------------------|-----|------|
| BiY505 | Bacteriology | 3+0 | 7.5 | BiY584 | Advanced Microbial Physiology | 3+0 | 7.5 |
| BiY549 | Modern Methods for Microbial Identification and Typing | 3+0 | 7.5 | BiY592 | Seminar | 3+0 | 7.5 |
| | <i>Seçmeli Dersler</i> | -- | 15.0 | | <i>Seçmeli Dersler</i> | -- | 15.0 |
| | | | ---- | | | | ---- |
| | | | 30.0 | | | | 30.0 |
| III.Semester | | | | IV.Semester | | | |
| BiY790 | Thesis | 0+1 | 30.0 | BiY790 | Thesis | 0+1 | 30.0 |
| | | | ---- | | | | ---- |
| | | | 30.0 | | | | 30.0 |

Elective Courses

| | | | |
|--------|---------------------------------------|-----|-----|
| BiY501 | Herbarium Techniques | 3+0 | 7.5 |
| BiY506 | Enzymatic Regulation | 3+0 | 7.5 |
| BiY507 | Biology of Lichens | 3+0 | 7.5 |
| BiY509 | Special Histology | 3+0 | 7.5 |
| BiY511 | Gene Regulation | 3+0 | 7.5 |
| BiY512 | Principles of Zoological Nomenclature | 3+0 | 7.5 |
| BiY514 | The Harmful Insects | 3+0 | 7.5 |
| BiY515 | Forest Ecology | 3+0 | 7.5 |
| BiY516 | Bioenergetics | 3+0 | 7.5 |
| BiY517 | Water Pollution and Biological Effect | 3+0 | 7.5 |
| BiY518 | Signal Transduction in The Cell | 3+0 | 7.5 |

| | | | |
|--------------|--|-----|-----|
| BiY519 | Limnology | 3+0 | 7.5 |
| BiY520 | Bacterial Plant Diseases | 3+0 | 7.5 |
| BiY521 | Biophotography | 3+0 | 7.5 |
| BiY522 | Investigation Methods of Ecosystems | 3+0 | 7.5 |
| BiY524 | Fishery Biology and Population Dynamics | 3+0 | 7.5 |
| BiY525 | The Collection Methods of Invertebrate Animals | 3+0 | 7.5 |
| BiY526 | Cytogenetics | 3+0 | 7.5 |
| BiY527 | Plant Microbiology | 3+0 | 7.5 |
| BiY528 | DNA Repair Mechanisms | 3+0 | 7.5 |
| BiY529 | Landscape Ecology | 3+0 | 7.5 |
| BiY530 | Plant Tissue Culture | 3+0 | 7.5 |
| BiY531 | Immunology | 3+0 | 7.5 |
| BiY535 | Mineral Feeding Physiology in Plants | 3+0 | 7.5 |
| BiY537 | Stress Physiology in Plants | 3+0 | 7.5 |
| BiY539 | Microbial Enzymes and Biotechnology | 3+0 | 7.5 |
| BiY543 | Plant Molecular Biology | 3+0 | 7.5 |
| BiY546 | Methods of Genetic Toxicology | 3+0 | 7.5 |
| BiY547 | Forest and Park Trees | 3+0 | 7.5 |
| BiY551 | Stem Cell Biology | 3+0 | 7.5 |
| BiY552 | Plant Science | 3+0 | 7.5 |
| BiY553 | The Ecology of Bird Communities | 3+0 | 7.5 |
| BiY555 | Birds of Turkey | 3+0 | 7.5 |
| BiY556 | Transmission Electron Microscopy and its Applications I | 3+0 | 7.5 |
| BiY557 | Transmission Electron Microscopy And its Applications II | 3+0 | 7.5 |
| BiY560 | Instrumental Analyses in Biochemistry | 3+0 | 7.5 |
| BiY561 | Animal Cell Culture | 3+0 | 7.5 |
| BiY562 | Molecular Biotechnology | 3+0 | 7.5 |
| BiY563 | Halophilic Microorganisms and Their Potential in Biotechnology | 3+0 | 7.5 |
| BiY565 | Extremophiles | 3+0 | 7.5 |
| BiY567 | In-Vitro Techniques | 3+0 | 7.5 |
| BiY571 | Taxonomy | 3+0 | 7.5 |
| BiY572 | Molecular Biology Methods | 3+0 | 7.5 |
| BiY574 | Foodborn Pathogen Microorganisms | 3+0 | 7.5 |
| BiY575 | Microorganisms and Biotechnology | 3+0 | 7.5 |
| BiY577 | Enzyme Technology | 3+0 | 7.5 |
| BiY578 | Arachnology | 3+0 | 7.5 |
| BiY579 | Plant Bacteriology | 3+0 | 7.5 |
| BiY581 | Permaculture | 3+0 | 7.5 |
| BiY582 | Cyanobacteria and Biotechnological Applications | 3+0 | 7.5 |
| BiY585 | Advanced Biochemistry and Metabolism | 3+0 | 7.5 |
| BiY586 | Systematics of Lichens | 3+0 | 7.5 |
| BiY593 | Toxicology | 3+0 | 7.5 |
| BiY594 | Nanomedicine and Application Fields | 3+0 | 7.5 |
| BiY703 | Insect Physiology | 3+0 | 7.5 |
| BiY703 (Eng) | Insect Physiology | 3+0 | 7.5 |
| BiY704 | Fundamentals of Ecotoxicology | 3+0 | 7.5 |
| BiY705 | Insect Behavior | 3+0 | 7.5 |
| BiY706 | Advanced Bioimaging Techniques | 3+0 | 7.5 |
| BiY707 | Advanced Mycology | 3+0 | 7.5 |
| BiY708 | Advantages and Disadvantages of Cell Culture | 3+0 | 7.5 |
| BiY709 | Soil Microfungi | 3+0 | 7.5 |
| BiY711 | Fauna of Turkey | 3+0 | 7.5 |
| BiY716 | Microfungus Identification Techniques | 3+0 | 7.5 |
| FBE510 | Ethics of Science and Research Techniques | 2+0 | 7.5 |
| FBE510-O | Ethics of Science and Research Techniques (Online) | 2+0 | 7.5 |
| TAÇ701 | Thesis Research Study Course | 3+0 | 7.5 |
| UBJ701 | Research in Area of Specialization | 3+0 | 4.5 |
| UBJ702 | Research in Area of Specialization | 3+0 | 4.5 |

PROGRAM IN ZOOLOGY

PROGRAM

| I.Semester | | | | II.Semester | | | |
|---------------------|-----------------------------|-----|-------|--------------------|------------------------|-----|-------|
| BiY523 | Zootaxonomy | 3+0 | 7.5 | BiY592 | Seminar | 3+0 | 7.5 |
| BiY712 | Research Methods In Zoology | 3+0 | 7.5 | BiY714 | Animal Ecology | 3+0 | 7.5 |

DEPARTMENT OF ENVIRONMENTAL ENGINEERING

Head : Prof.Dr. Aysun ÖZKAN

PROGRAM IN ENVIRONMENTAL MANAGEMENT (DISTANCE LEARNING)

PROGRAM

| | | | |
|------------------------|--------|------------------------|---------|
| I.Semester | | II.Semester | |
| <i>Seçmeli Dersler</i> | - 30.0 | Term Project | 3+0 0.0 |
| | - | <i>Seçmeli Dersler</i> | -- 30.0 |
| | ---- | | ---- |
| | 30.0 | | 30.0 |

Elective Courses

| | | | |
|--------|---|-----|-----|
| ÇYÖ501 | Domestic Wastewater Management | 3+0 | 7.5 |
| ÇYÖ502 | Hazardous Waste Engineering and Management by Decision Making | 3+0 | 7.5 |
| ÇYÖ503 | Legislation on Environmental Issues I | 3+0 | 7.5 |
| ÇYÖ504 | Legislation on Environmental Issues II | 3+0 | 7.5 |
| ÇYÖ505 | Bioenergy Production | 3+0 | 7.5 |
| ÇYÖ506 | Quality Management System Approach in Testing Laboratories | 3+0 | 7.5 |
| ÇYÖ507 | Industrial Wastewater Control | 3+0 | 7.5 |
| ÇYÖ508 | Drinking Water Quality and Control | 3+0 | 7.5 |
| ÇYÖ510 | Determining the Environmental Performance of Products and Processes | 3+0 | 7.5 |

| | | | |
|--------|---|-----|-----|
| ÇYÖ512 | Indoor Air Quality Measurement | 3+0 | 7.5 |
| ÇYÖ514 | Urban Air Quality Management | 3+0 | 7.5 |
| ÇYÖ516 | Ecosystem Ecology | 3+0 | 7.5 |
| UCS572 | Remote Sensing and Geographical Information Systems in Environmental Management | 3+0 | 7.5 |

DOCTORATE DEGREE (PH.D)

PROGRAM

| | | | | | | | |

| | | | 30.0 | | | | 30.0 |

Elective Courses

| | | | |
|----------|---|-----|-----|
| ÇEV601 | Special Topics in Environmental Engineering II | 3+0 | 7.5 |
| ÇEV604 | Environmental Organic Chemistry | 3+0 | 7.5 |
| ÇEV610 | Industrial Environmental Quality Management | 3+0 | 7.5 |
| ÇEV611 | Risk Assessment for Environmental Health | 3+0 | 7.5 |
| ÇEV612 | Transfer Mechanisms of Incineration Processes | 3+0 | 7.5 |
| ÇEV614 | Advanced Solid Waste Management II | 3+0 | 7.5 |
| ÇEV616 | Advanced Disinfection Techniques | 3+0 | 7.5 |
| ÇEV617 | Thermal Conversion Technologies | 3+0 | 7.5 |
| ÇEV619 | Environment Quality Development Plans | 3+0 | 7.5 |
| ÇEV620 | Transport and Fate of Pollutants in Water Systems | 3+0 | 7.5 |
| ÇEV621 | Advanced Techniques for Atmospheric Analyses | 3+0 | 7.5 |
| ÇEV623 | Global Warming Parameters and Control Techniques | 3+0 | 7.5 |
| ÇEV624 | Atmospheric Chemistry | 3+0 | 7.5 |
| ÇEV625 | Integrated Natural Resource Management | 3+0 | 7.5 |
| ÇEV626 | Nanotechnology Applications in Water and Wastewater Treatment | 3+0 | 7.5 |
| ÇEV627 | Environmental Biotechnology | 3+0 | 7.5 |
| ÇEV629 | Biodiversity and Protected | 3+0 | 7.5 |
| ÇEV631 | Electrochemical Water and Wastewater Treatment | 3+0 | 7.5 |
| ÇEV633 | Biological Treatment Of Industrial Wastes | 3+0 | 7.5 |

DEPARTMENT OF INDUSTRIAL ARTS

Head : Prof.Dr. Nilay ERTÜRK

MASTER OF SCIENCE (MS) DEGREE

PROGRAM IN INDUSTRIAL DESIGN

In globalized world, concept of Industrial design gets an important place in production, while products get importance both in function and in aesthetic by increasing competition in markets. Definition of industrial design, which is designing and making visual and functional definition of every mass produced products, emphasizes the place of this science in industrial field. In Industrial Design Department; which established in 2000; computer aided design education which is a requirement of contemporary design education, is supported by softwares which are products of latest technology. Design studios, computer laboratories and workshops supply transition from theory to application. Students graduated from Industrial Design Department get the title of INDUSTRIAL DESIGNER. They can work as freelance designers and as designers in firms and government establishments' research and development departments and also in design studios.

MASTER OF SCIENCE (MS) DEGREE

PROGRAM IN BIOTECHNOLOGY

Advanced Technologies Research Unit was founded in 2004 in order to plan, coordinate and to put in application the interdisciplinary research projects which will be performed according to the scientific and technological priorities of the 21st century. Mission of the Advanced Technologies Research Unit: -Determining the science and technology platform of Anadolu University -Performing interdisciplinary projects -Improving University-Industry collaboration -Tending to be a technology center Mission of the Advanced Technologies Research Unit: Providing Anadolu University to have an important position at the field of science and technology both in Turkey and in the world, and to be a center of excellence at certain fields. Advanced Technologies Research Unit has three sub-units: -Nanotechnology -Biotechnology -Documenting Cultural Heritage

PROGRAM IN CHEMISTRY (DISTANCE LEARNING)

| PROGRAM | | | |
|------------------------|---|--------------------|------------------------|
| I.Semester | | II.Semester | |
| <i>Seçmeli Dersler</i> | - | 30.0 | KiM598 |
| | - | | Term Project |
| | | | 3+0 |
| | | | 0.0 |
| | | | <i>Seçmeli Dersler</i> |
| | | | -- |
| | | | 30.0 |
| | | | ---- |
| | | | ---- |
| | | 30.0 | 30.0 |

Elective Courses

| | | | |
|--------|--|-----|-----|
| KiM585 | Name Reactions in Organic Chemistry | 3+0 | 6.0 |
| KiM586 | Sensor Technology | 3+0 | 6.0 |
| KiM587 | Alternative Reaction Systems | 3+0 | 6.0 |
| KiM588 | Computational Chemistry Applications | 0+3 | 6.0 |
| KiM589 | Adsorption | 3+0 | 6.0 |
| KiM591 | Thermal and Surface Characterization Methods | 3+0 | 6.0 |
| KiM593 | Applications of Modern Analysis Methods I | 0+3 | 6.0 |
| KiM594 | Applications of Modern Analysis Methods II | 0+3 | 6.0 |
| KiM595 | Analytical Method Development Validation | 3+0 | 6.0 |
| KiM596 | Chemistry of Main Elements | 3+0 | 6.0 |

MASTER OF SCIENCE (MS) DEGREE

PROGRAM IN ANALYTICAL CHEMISTRY

PROGRAM

| I.Semester | | | | II.Semester | | | |
|---------------------|---|-----|------|--------------------|-----------------------------------|-----|------|
| KiM523 | Complex Equilibria in Analytical Chemistry | 3+0 | 7.5 | KiM584 | Modern Analysis Methods II | 3+0 | 7.5 |
| KiM583 | Modern Analysis Methods I <i>Seçmeli Dersler</i> | 3+0 | 7.5 | KiM592 | Seminar <i>Seçmeli Dersler</i> | 3+0 | 7.5 |
| | | -- | 15.0 | | | -- | 15.0 |
| | | | ---- | | | | ---- |
| | | | 30.0 | | | | 30.0 |
| III.Semester | | | | IV.Semester | | | |
| KiM790 | Thesis | 0+1 | 30.0 | KiM790 | Thesis | 0+1 | 30.0 |
| | | | ---- | | | | ---- |
| | | | 30.0 | | | | 30.0 |

Elective Courses

| | | | |
|---------------|--|-----|-----|
| EKiM510 (Eng) | Organic Chemistry of Biomaterials | 3+0 | 7.5 |
| EKiM513 | Gas Chromatography and Applications | 2+1 | 7.5 |
| FBE510 | Ethics of Science and Research Techniques | 2+0 | 7.5 |
| FBE510-O | Ethics of Science and Research Techniques (Online) | 2+0 | 7.5 |
| KiM506 | Polymer Chemistry | 3+0 | 7.5 |
| KiM509 | Carbon-Carbon Bond Formation | 3+0 | 7.5 |
| KiM510 | Advanced NMR Techniques | 3+0 | 7.5 |
| KiM511 | Electrochemistry | 3+0 | 7.5 |
| KiM516 | Physical Organic Chemistry | 3+0 | 7.5 |
| KiM517 | Selected Topics in Inorganic Chemistry I | 3+0 | 7.5 |
| KiM521 | Adsorption | 3+0 | 7.5 |
| KiM522 | Bioanalytical Chemistry | 3+0 | 7.5 |
| KiM524 | Bioinorganic Chemistry | 3+0 | 7.5 |
| KiM525 | Quantum Chemistry | 3+0 | 7.5 |
| KiM526 | Microwave Organic Synthesis | 3+0 | 7.5 |
| KiM529 | Catalytic Chemistry | 3+0 | 7.5 |
| KiM533 | Electroanalytical Chemistry | 3+0 | 7.5 |
| KiM535 | Data Analysis in Chemistry | 3+0 | 7.5 |
| KiM536 | Chromatographic Techniques | 3+0 | 7.5 |
| KiM537 | Organic Macro Molecules | 3+0 | 7.5 |
| KiM539 | Quantitative Structure Property Relationship | 3+0 | 7.5 |
| KiM550 | Reagents In Organic Synthesis | 3+0 | 7.5 |
| KiM551 | Sensors and Their Applications | 3+0 | 7.5 |

| | | | |
|--------|---|-----|-----|
| KiM558 | Biochromatography | 3+0 | 7.5 |
| KiM560 | Alternative Reaction Systems | 3+0 | 7.5 |
| KiM561 | Novel Tendencies in Liquid Chromatography | 3+0 | 7.5 |
| KiM562 | Inorganic Polymers | 3+0 | 7.5 |
| KiM563 | Natural Product Synthesis I | 3+0 | 7.5 |
| KiM564 | Natural Product Synthesis II | 3+0 | 7.5 |
| KiM565 | Literature Search in Chemistry | 3+0 | 7.5 |
| KiM566 | Stereo Selective Reactions and Practical Approach | 3+0 | 7.5 |
| KiM567 | Applications of Computational Chemistry | 3+0 | 7.5 |
| KiM568 | Solvent-free Organic Synthesis | 3+0 | 7.5 |
| KiM569 | Structure Determination of Organic Chemistry | 3+0 | 7.5 |
| KiM701 | Physical Chemistry of Foods | 3+0 | 7.5 |
| TAÇ701 | Thesis Research Study Course | 3+0 | 7.5 |
| UKM701 | Research in Area of Specialization | 3+0 | 4.5 |
| UKM702 | Research in Area of Specialization | 3+0 | 4.5 |

PROGRAM IN INORGANIC CHEMISTRY

PROGRAM

| | | |
|---|---|----------------|
| ARY626 | Qualitative Research Methods | 3+0 7.5 |
| Position of Qualitative Research Among Scientific Research; Comparing Qualitative and Quantitative Research Approaches; General Characteristics of Qualitative Research; Data Collection Techniques in Qualitative Research: Observation, Document review, Interviews; Ethics in Qualitative Studies; Difficulties Faced in Qualitative Studies; Keeping Research Diary; Reliability and Validity in Qualitative Studies; Giving Feedback to Interviewers; Qualitative Research Design and Methods: Ethnography, Phenomenology, Building a theory, Case study, Action research; Qualitative Paper Assessment Criteria. | | |
| BEL501 | Terrestrial Photogrammetry and Laser Scanning | 2+2 7.5 |
| Architectural Surveys and Survey Methods: Horizontal transformation, Photoplan, Surveys in excavation sites and archaeological protected areas, Survey of art works; Photogrammetric Applications for the Examination and Conservation of Historical Centers and Protected Areas: Plan and section, Digital analysis of historical centres, Documentation of historical monuments, Problems in photogrammetric documentation of monuments, Digital use of traditional photogrammetry on architectural objects; Using Photogrammetric Methods for Surveying Global Deposits: Digital opportunities for the survey of a single photo, Quantity in photogrammetry, Finance and practical applications; Architectural Photogrammetry Applications: Deformation, Displacement, Standards and methodology for building surveys, Optimization in architectural photogrammetry. | | |
| BEL505 | Construction History Researches | 3+0 7.5 |
| History of Construction History Research; Works within the Scope of Construction History Research; Architectural Resources from the Archaic Age; Renaissance Period Resources; Modern Age Studies; Systematic Resource Evaluation; Evaluations of Disparities and Similarities; Research Methodology. | | |
| BEL507 | Dating Methods Used in Archaeology | 3+0 7.5 |
| Definition of Dating; Importance of Dating Studies; Sample Groups Used in Dating Works and Their Properties; Dating Methods; Radioactive Methods (C14, Potassium-Argon, Uranium Series, ESR, OSL/TL, Fission Tracks); Non-Radioactive Methods (Dendrochronology, Obsidian Hydration, Varv Method); Comparative Evaluation of Dating Methods: Sampling, in Time periods, Measurement precision, etc. | | |
| BEL509 | Dating by OSL/TL Methods | 3+0 7.5 |
| Luminescence Mechanism; Types of Luminescence: Optically stimulated, Thermal stimulated, Electroluminescence; Using Optically and Thermally Stimulated Luminescence Techniques as a Dating Method; OSL / TL Experimental Setup; Sampling Activities in the Archaeological Site; Sample Preparation Processes in the Laboratory; Equivalent Dose Measurement; Annual Dose Measurement; Equations and Approaches Used in Age Determination. | | |
| BEL511 | Application of SEM and X-ray Analysis Techniques on Archaeological Samples | 3+0 7.5 |
| Scanning Electron Microscope (SEM) and Operating Mechanism; SEM Imaging; Sample Preparation Process for SEM Imaging of Archaeological Samples; Chemical Analysis by SEM (EDX, WDX); SEM Analysis of Archaeological Finds; X-Rays and Application Areas; Analysis of Archaeological Finds by X-Ray Diffraction (XRD) and X-Ray Fluorescence (XRF) Techniques; Interpretation of the Results of Sample Analysis. | | |
| BEL513 | Archaeological Stratigraphy | 4+0 7.5 |
| Archaeology and stratigraphy; Stratigraphy and stratigraphic units; Archaeologic excavation; Stratigraphic theory: Stratigraphy, Principals of stratigraphy, stratigraphical series, Main concept of archaeological stratigraphy, Archaeological deposits as stratigraphic units, Interfaces as stratigraphic units; Stratigraphic excavation and stratigraphy: Strategy and process of excavation, Documentation of stratigraphical excavation, Documentation of stratigraphic units, Documentation of archaeological finds, Stratigraphic sequence, Correlation of stratigraphical units, Formation of stratigraphic sequence, Evaluation of stratigraphic sequence in phases; Analysis: Evaluation of stratigraphic sequence and excavation results, Dating the archaeological finds and stratigraphic units. | | |
| BEL599 | Term Project | 3+0 0.0 |
| BES504 | Sport Medicine | 3+0 7.5 |
| The history of sport medicine and its importance; Assessment of athletes and general principles of measurement, Assessment of athletes in different sports and disabled persons and measurement methods ,Nutrition of athletes, Doping and doping control of athletes. Health knowledge and its education, Inspection of athlete's health, Game rules, Equipment of sport, Field of sports, Warming, Cooling and Stretching activities. | | |
| BES505 | Protection Sport Accidents and Treatment Approaches | 3+0 7.5 |

Psychology; Exercise and Sport Psychology Has Undergone An Evolutionary Process of Knowledge; Affecting the Performance of Exercise and Sport Psychology Psychic Elements; Applications in Order To Increase Performance.

BES533 Introduction to Research Methods and Technics in Sports 3+0 7.5
Introduction to Research Methods and Technics in Sports: Methods and Techniques of Scientific Research in Sport; Should Be in A Scientific Research on the Content and Format of Knowledge, Skills, Attitudes and Behaviors; Research Problems, Objectives and Sub-Objectives, Importance and Assumptions; Research Models Frequently Used in the Field of Sports; To Be Considered in the Research Process, Ethical Principles, Rights and Responsibilities.

BES535 Movement Science and Performance Training 3+0 7.5
Performance Training: New approaches on performance training; Programming performance training for individual and team sports; Evaluating the sports performance at the laboratory and field environment; Motion: Motion forms; Motions performed that two and three dimensions; Theoretical approaches and modern systems on motion analysis; Processes of motion analysis; Using required tools of motion analysis; Examining of sports techniques via motion analysis: Specific motion analysis of individual and team sports; Examining training effects via motion analysis system; Reporting the outcomes of motion analysis on training effects.

BES536 Evaluation of Physical and Motor Fitness in School 2+1 7.5
Physical Fitness: Health-related physical fitness, The cardio-respiratory component, The musculoskeletal component, The morphological component, The motor component; Relationship Between BMI, Physical Fitness and Motor Skills; Assessment of Physical Activity Levels; Assessment of Physical Fitness: Existing field-based physical fitness test batteries for children and adolescents, EUROFIT battery of tests, FITNESSGRAM battery of tests, the ALPHA-FIT battery of tests, Brockport battery of tests.

BES538 Laboratory Experiences in Functional Evaluation of Skeletal Muscle 2+1 7.5
Anthropometry Applications; Electromyography (EMG) Applications; Kinematic Analysis Applications; Vibration Applications; Electromyostimulation (Electro-muscle stimulation) (EMS) Applications; Force Plate Measurement Applications; Pedobarography Measurement Applications; Hand Grip Pressure Applications; Isokinetic Dynamometer Applications; Hand Dynamometer Applications; Back Leg Chest Dynamometer Applications; Wingate Test Applications; Treadmill and Bicycle Ergometer Exercise Test Applications (Cardiopulmonary Exercises).

BES539 Motor Control of Human Movement 3+0 7.5
Basic Concepts of Motor Control; Perspectives of Neuroscience: Components of the nervous system, Nervous System, Neurons and Synapses as an Elaborate Communications Network; Sensory and effector systems for movement, Motor control functions of the spinal cord and brain, Integrative brain mechanisms for movement; Basic Concepts of Motor Control: Cognitive Science Perspectives, models Used for motor control Studies, Motor Control Changes throughout the Life Span: Changes in observable motor Performance, neurophysiological and information processing, Motor Control Adaptations to Training: Factors affecting the learning of motor skills.

BES540 Physical Activity and Health in Schools 3+0 7.5
Physical Activity: Determination of the level of physical activity, Recommendations on physical activity; The Effects of Physical Activity on Health at Different Levels; Physical Fitness: Components of Physical Fitness; Nutrition Level and Body Composition; Physical Activity and Physical Fitness for Schoolchildren and Adolescents; Physical Activity in Special Groups; Physical Fitness Through Physical Education and the Establishment of Physical Activity.

BES541 Comparative Physical Education 3+0 7.5
Historical Development of Physical Education in Turkey; Physical Education Concepts, Standards and Practices in Schools and Higher Education Institutions in Turkey; The Structure and Functioning of Physical Education Practices in Various Countries; The Similarities and Differences Between Physical Education Practices of Various Countries by Comparing/Contrasting them with Our Country; General Aspects and Evaluations.

BES544 Recreation Programs in Schools 3+0 7.5
Curriculum Development in Education: Types of education, Teaching, Learning, Education and teaching program, Curriculum Development in Historical View, Curriculum development in the scope of needs of society and individuals; Types of education; Recreational Activities in Schools: Classification of recreation activities according to different approaches, Recreational sports: Club sports, Extramural sports, Intramural sports, Informal sports, Instructional sports; Programming Concept in Recreation: History, Philosophy, Service Systems; Relationship Between Education and Leisure: History of leisure education, Leisure education need in society.

BES546 Recreation and Sport Practices for the People with Disabilities 3+0 7.5
The Meaning and Importance of Recreation and Sport for the People with Disabilities; Variety, Reasons and Classification of the People with Disabilities; The Effects of Recreative Activities and Sport for the People with Disabilities; Sport and

Recreative Activities: Recreation and sport practices for the people with intellectual disabilities, Recreation and sport practices for the people with orthopedic disabilities, Recreation and sport practices for the people with visual impairments, Recreation and sport practices for the people with hearing impairments; Examination of the Literature of Recreation and Sport Practices for the People with Disabilities.

BES555 Analysis of Sportive Technique 3+0 7.5

The Concept and Mechanics of Movement: Axes and Planes in Defining Movement, Kinetic and Kinematic Variables, the Concepts of Technique and Skill; Analysing Technique with Qualitative Methods: Video based Data Recording and Observation, Establishing Strengths and Weaknesses of the Technique, Giving Feedback on the Ideal Technique; Analysing Technique with Quantitative Methods: Synchronizing High speed Cameras, Surface Electromyography, Force Plate etc., Dividing Sport Specific Technical Skills into Phases, Analysing Technique with Basic Kinetic and Kinematic Methods.

BES556 Training Periodization in Team Sports 3+0 7.5

Periodization in Team Sports: Basic and history of periodization, The importance of periodization; Types of Periodization; Linear periodization, Undulated periodization, Block periodization; Load and Recovery Relationship of Training: General adaptation syndrome, Fitness-fatigue model; Periodization of Different Periods: Daily, Weekly, Termly, Yearly periodization; Periodization of Different Conditioning Parameters: Periodization of strength, speed and endurance.

BES557 Periodization Methodologies in Football 3+0 7.5

The Importance of Tactical Periodization: what is tactical periodization, What is importance in football; Methodology of Tactical Periodization: Principle of specificity, Principle of making tactical principles of play operational, Principle of disassembly and hierarchical organization of principles of play, Principle of horizontal alternation in specificity, Principle of complex progression, Principle of performance stabilization; Small-sided Games in Football: Changes of Number of players, Field size, Rules of games vs., effects on conditional parameters; Block Periodization: Six weeks periodization cycle, Overload and underload combined with small-sided games.

BES558 Current Approaches and Corrective Exercises in Fitness Applications 2+1 7.5

Self-Myofascial Release Applications; Posture Analysis; Proprioceptive Exercises; Resistance Training; Flexibility; Active Stretching; Stabilization; Mobilization; Plyometrics; Functional Movement Screening; Corrective And Protective Exercises; Training Load; Velocity Based Training; Acute-Chronic Work Load Ratio; Drill Categorization; Internal Load; External Load; Rating Of Perceived Exertion; Total Quality Of Recovery; Injury Risk Monitorization; Strength Asymmetry.

BES559 Match and Player Analysis in Team Sports 3+0 7.5

Match Analysis Methods: Time-Motion Analysis; Real Time Data Tracking; Player Form; Card Chart; League Table Preparation; Team And Player Statistics Tracking; Defence And Offence Analysis; Spacing; Running Distance Analysis; Offence Strategies; Game System Analysis; Home-Away Analysis; Scouting; Playing Time; Clip Editing; Reporting; Display; Analysis Programmes; Communication and Feedback for Player.

BES561 Introduction to Exercise Neurophysiology 3+0 7.5

Basic concepts on central nervous system: Neuroanatomy, Action potential, The evaluation of excitability and innervation terms; Macroscopic anatomy of central nervous system: Brain membrane and vein sinus anatomy, The ventricles of brain, The circulation of cerebrospinal fluid, The gross anatomy of central nervous system; The basic structure and functions of central nervous system: The basic structure and functions of truncus cerebri (medulla oblongata, pons, mesencephalon), The basic structure and functions of diencephalon (thalamus, hypothalamus, hypophysis, epithalamus), The basic structure and functions of formatio reticularis and cerebellum.

BES562 Evaluation of Physical Fitness in Individuals with Special Needs 3+0 7.5

Physical Fitness: Basic terms; Relationship of Physical Activity and Physical Fitness; Physical Activity and Health: Health assessment, Classifications; Health Related Physical Fitness; Performances Related Physical Fitness; Physical Activity in Individuals with Special Needs; Physical Fitness in Individuals with Special Needs; Evaluation of Physical Fitness in Children and Children with Special Needs.

BES563 Health and Exercise 3+0 7.5

Growth and development; Health and Hygiene Education; Physical Fitness, Health and Wellness: Health and well-being, Health benefits of physical activity; Health Assessment: Measurement tools used for assessment, Physical control and medical report; Effects of Exercise on Health; Cardiovascular System; Hormonal System; Energy Systems; Sports and Exercise in Children and Young People; Exercise Prescription for Sports and Exercise, Health and Physical Fitness in the Elderly.

BES564 Adapted Physical Education and Sport 3+0 7.5

History of disability sports, General rules of Paralympics games, Paralympics sport foundations, Definition of disability person and classification, Effect of exercise education in Disability persons, Physical adaptation programs for disability

persons, Dance activities for disability persons, Adapted sport activities for different disability persons, Sport accident and rehabilitation for disability athletes, Doping for disability athletes, Specific Olympic.

BES565 Electrophysiological Training Methods in Sports 2+1 7.5

Basic concepts of electricity and current terminology related to human physiology, The use of sportive performance of electrophysiology, Electrical muscle stimulation techniques and applications, Basic mechanisms of electrical muscle stimulation: Chemical mechanism: Action potential, Intensity-duration curve of electrical currents, Physiological mechanism, Neural mechanism, Electrical muscle stimulation parameters and regulations: Amplitude, Amplitude increase and decrease time, Frequency, Pulse duration, Work time, Electrodes.

BES566 Practical Application to the Study of VO₂ Kinetics 2+1 7.5

Mechanistic Bases of VO₂ kinetics: Model Characterization of VO₂ kinetics, Mean Response Time, Oxygen Consumption During Resting, Time Constant of Oxygen Consumption, Explanation via Exponential Function of Slow Component of Oxygen Consumption, Data Modeling; Test Protocols of Constant Sub-threshold, Test Protocols of Constant Supra-threshold, Effects of Training with Different Intensities on VO₂ Kinetics.

BES567 Oxygen Uptake Kinetics 2+1 7.5

Aerobic Energy Metabolism: Maximal Oxygen Consumption, Exercise Economy, Running Economy, Oxygen Debt; Oxygen Uptake Kinetics, VO₂, VO₂ Kinetics Concept; Constant Load Exercises: Sub-Threshold Exercises, Supra-threshold exercises, Phases of VO₂ Kinetics: First Phase (Cardiodynamic Phase), Phase II (Basic Phase), Phase III (Steady State Phase), Slow component of VO₂, Physiological Basis of Oxygen Transport and Use.

BES568 New Approaches and Models in Physical Education and Sports 3+0 7.5

Physical Education Curriculum and Constructivism: Constructivist approach, Constructivist game teaching, Tactical Game Approach Teaching: TOYA model components, TOYA teaching and learning at elementary level, Individual and Social Responsibility Model: Individual and social responsibility teaching themes, Strategies, Sports Education Model: Basic features of SEM, Issues to be considered in SEM curriculum, Classroom management and behavior development, Field Applications of Models.

BES569 Acute and Chronic Adaptation to Exercise at High Altitude 2+1 7.5

Physiological Effects of High Altitude: Acute Effects of Altitude on Maximal Oxygen Consumption, Heart Rate, Stroke Volume, Cardiac Output, Acute Effects of Altitude on Exercise Economy, Running Economy and Oxygen Debt; General Altitude Training Concepts; Live High Train Low, Live High Train High, Live Low Train High, Intermittent Hypoxia Training, Physiological Responses to Normobaric Normoxia and Normobaric Hypoxia.

BES570 Academic Writing in Social Sciences: Movement Education, Physical Activity and Sedentary Behaviour 3+0 7.5

Academic Writing as a Text; Field Specific Writing; Ethics of Academic Writing; IMRAD Technique: Introduction, Methods, Results, Discussion; Introduction Writing in Movement Education; Method Writing in Movement Education; Presentation of Results in Movement Education; Discussion of Findings in Movement Education; Tables and Graphs for Qualitative and Quantitative Data; Reference Writing Styles; Software for References: Mendeley, EndNote; Quality Journal Selection Process; Communication with the Editor and the Referee; The Importance of Learning the Referee Process as a Researcher.

BES571 Model Based Physical Education Teaching 3+0 7.5

Basic Concepts in Physical Education Teaching: Definition and importance of physical education, Definition and elements of curriculum, Instruction models, Direct teaching model: Theoretical foundations of direct teaching model, Direct teaching model features and applications, Individualized teaching model: Theoretical foundations of individualized teaching model, Individualized teaching model properties and applications, Cooperative Teaching Model: Theoretical foundations of cooperative teaching model, Cooperative teaching model features and applications, Peer Teaching Model: Peer teaching model theoretical foundations, Peer teaching model properties and applications, Field Applications of Models. 706

BES572 Sedentary Behaviour Epidemiology 3+0 7.5

Introduction to Sedentary Behaviour; Measurement of Sedentary Behaviour; The Descriptive Epidemiology of Sedentary Behaviour; Physiological Responses to Sedentary Behaviour; Sedentary Behaviour and Adiposity; Sedentary Behaviour, Diabetes, and the Metabolic Syndrome; Sedentary Behaviour and Cancer; Sedentary Behaviour and Depression; Sedentary Behaviour and Ageing; Sedentary Behaviour and Mortality; Models for Understanding Sedentary Behaviour; Understanding Sedentary Behaviour in Individual Level; Sedentary Behaviour Among Overweight and Obese People; Sedentary Behaviour and the Social and Physical Environment.

BES573 Psychology for Physical Education and Sport 3+0 7.5

Establishing a Positive Motivational Climate in Physical Education; Goal Setting in Physical Education; Measuring Perceived Motivational Climate in Physical Education; Experience of State Anxiety in Physical Education; Social and Emotional Learning in Physical Education; Facilitating Prosocial Behavior Physical Education; Group Development in the Physical Education Class; Promotion of Healthy Self-Concept; Self-Regulation and Strategic Learning; Promoting Motor Learning in Young Children; Promoting Motor Skills in School Children and Adolescents; Visuomotor Control of Movement Acquisition; Core-Based Motor Teaching.

BES574 Human at Extreme 3+0 7.5

BES575 Basic Strategies and Design in the Preparation of Physical Education Programs 3+0 7.5

Physical Education Program Design; Education and Instructional Design in Physical Education; Macro and Micro Level Education Design; Physical Education Program Dimensions and Design; Creating The Program Design Team And Deciding Program Design Approaches For The Draft Program To Be Prepared; Preparing A Physical Education Program Design: Determining the need for education, Arrangement of objectives, Selection and arrangement of content, Pilot implementation and development of Physical Education programs, Continuous evaluation of the instructional program put into effect.

BES576 Sport and Ergonomics 3+0 7.5

BES577 Theoretical Foundations of Program Development in Physical Education 3+0 7.5

Basic Concepts of Education; Education, Teaching, Teaching, Learning, Culture, Acculturation; Theoretical Foundations of Program Development: Historical and social foundations, Philosophical foundations, Psychological foundations; Elements of the Educational Program: Target, Content, Teaching-Learning process, Evaluation; Features of the Educational Program Physical education program review; Program Development Models; Taylor model, Taba model, Taba-Tylor model, MEB model; Physical Education Curriculum Development Studies in Turkey.

BES578 Upper and Lower Extremity Sports Injuries 3+0 7.5

BES579 Physical Activity and Population Health 3+0 7.5

Meaning of Education in Physical Education: Sports education; Approaches to Health and Well-Being: Biological approach, Behavioral approach; Theory, Model and Approaches for Physical Education and Well-Being: Planned behavior theory; Physically Trained Student and Health Literacy: A Global Political Developmental View; Physical Activity as a Preventive Therapy; Physical Education Models for Health Promotion; Physical Dimension of Health and Physical Education; Spiritual Dimension of Health and Physical Education; Cognitive Dimension of Health and Physical Education; Contemporary Issues: Investigating the Power of Educational Approaches in Health.

BES581 Scientific Approaches In Movement and Sport Education 1+2 7.5

What is Movement and Sports Education Research ?; Teacher as a Researcher: Physical Education Teacher, Academician; School as a Research Environment: University, Secondary School, High School; Research Needs in Schools; Research Process in Movement and Sports Education; Question, Aim and Hypothesis in Movement and Sports Education; Movement and Sports Education Literature; Theory Based Research in Movement and Sports Education; Research Methods in Movement and Sports Education; Data Collection Procedure and Process in Schools; Data Collection Ways in Schools: Quantitative Approaches; Data Collection Ways in Schools: Qualitative Approaches; Evaluation of Collected Dat.

BES583 Social Determinants of Physical Activity 3+0 7.5

Socio-economic Level; Revenue; Social Health System; Social Support; Social Exclusion; Immigrants; Social Solidarity; Social Norms; Social Behavior; Discrimination; Social Stress; Education; Age; School Structure; The Living Environment; Parks; Traffic; Public Transport System; Working Hours; Workers; Blue Collar; Social Variables and Psychology; Physical Activity in Preschool Education.

BES592 Seminar 3+0 7.5

BES601 Teaching Methodology in Physical Education and Sports 3+0 7.5

Education and Teaching; Learning and Teaching; Basic Concepts about General and Special Teaching Methods; Principles, Aims, Content, Learning and Teaching Processes of Physical Education and Sports Teaching; Planning and Performing Physical Education and Sports Activities; Writing Overall and Behavioural Objectives; Organization of Content; Teaching

Strategies, Methods and Techniques in Physical Education and Sports; Selection and Evaluation of Course Materials in Physical Education and Sports Teaching; Assessment of Students Success in Physical Education and Sports Teaching; Micro-Teaching Practices and Evaluation.

BES607 Sports for the Disabled 3+0 7.5

Program Organization and Management in Adapted Physical Education and Sports; Individualized Education Programs; Testing and Evaluation; Sports Organizations; Instructional Strategies for Adapted Physical Education; Disabled People: Mental retardation, Learning difficulties and attention deficiency, Behavioural disorders, Visual impairment and Deafness, Cerebral palsy, Traumatic brain injury, Amputations, Spinal cord disabilities; Developmental Considerations; Activities for the Disabled: Physical fitness, Rhythm and dance, Aquatics, Team sports, Winter sports activities; Enhancing Wheelchair Sports Performance.

BES612 Neuromuscular Adaptation and Fatigue 3+0 7.5

Introduction to Nervous System; Introduction to Muscle Physiology; Skeletal-Muscle Mechanisms; Muscle Physiology of Strength, Speed, Power and Endurance Performance; Definitions of Strength, Speed, Power and Endurance; Differences Among Muscular Strength, Endurance, and Power; Neural Activation in Strength, Speed and Power Performance; Motor Units; The Effect of Contraction Type on Motor Unit Activation; The Effect of Contraction Speed on Motor Unit Activation; Neuromuscular Adaptation in Physical Work; Definition of Fatigue; Causes of Fatigue; Fatigue in Strength, Speed and Power Performance; Recovery.

BES616 Medical Subjects in Sports and Health Organizations for Athletes 3+0 7.5

Health Care System for Athletes: Roles, Relationships and Organizations; Epidemiology of Sports Injuries; Injury Prevention: Environmental factors, Equipment, Condition; Evaluation and Rehabilitation in Sports Injury; Special Considerations: Diabetic athletes, Blood pressure disorders, Sudden death; Participation into Exercises in Different Groups: Risks and Benefits of Exercise; Contraindications; Pre-Exercise Evaluation Methods and Exercise Prescriptions; Pharmacology and Drug Taking; Child and Adolescent Athletes; General Health Condition and Environmental Injuries.

BES619 Training Theory I 3+0 7.5

The Concept of Training; Loading and Recovery; The Structure of Efficiency; The Concept of Performance: Performance Follow-Up, Evaluation of Performance, Factors Affecting Performance; Basic and Secondary Principles of Training; The Relationship between Loading and Resting; Recovery and Planning; Periodization; Structure of Microcycle; Structure of Mesocycle; Structure of Macrocycle; Single- and Multi-Periodization; Children and Training; Stages of Development and Training; Biomotor Characteristics and Training; Talent Selection and Talent Orientation; Anthropometry; Endurance Development; Physiology of Endurance; Maximal Oxygen Consumption; Anaerobic Threshold; Running Economy; Training Methods in Endurance Development .

BES620 Training Theory II 3+0 7.5

Strength Development: Physicomechanical bases of strength, Various types of strength, Measurement of Strength, Periodization of Strength, Strength in Various Sports; Speed Development; Physicomechanical Structure of Speed, Factors affecting Speed, Speed training exercises, Speed tests, Anaerobic strength and capacity; Flexibility Development: Flexibility and its physicomechanical characteristics, Various types of flexibility, Flexibility training; Training and Children; Training and Stages of Development; Biomotor Characteristics and Training; Talent Selection and Talent Orientation; Anthropometry, Training and Fatigue; Loading/Recovery/Fatigue; Control of Fatigue: Planning the training process; Control of Fatigue: Active/passive rest; Control of Fatigue: Nutrition and periodization; Form Training: Volume, intensity and frequency relations, Planning form training; Altitude Training and Periodization; Women Athletes and Training: Menstruation, repose and sleep.

BES626 Contemporary Approaches in Sport and Exercise Psychology 3+0 7.5

Contemporary Approaches in Sport and Exercise Psychology: Exercise Psychology: Definition, Emergence and Development; Sports Psychology: Definition, Emergence and Development; Differences in Exercise and Sport Psychology; Traditional and Contemporary Approaches To Exercise and Sport Psychology; Exercise and Sport Psychology Knowledge of How To Follow A Path That; What Suggestions As To What Cases Brought; Describes the Definition of Sports Psychologist.

BES627 Social Psychology of Sport 3+0 7.5

Social Psychology of Sport: Sociology, Psychology, Attitudes, Behavior, Social Effects, Social Cognition and Perception; Social Psychology and Social Psychology of Sport; Group Dynamics and Team Dynamics; Group Integrity; Social Loafing and Social Acceleration Theory Theory; Success in Sports and Target Research; Leadership, Groups and Group Communication in Leadership and Leadership Models and Their Properties.

BES628 Arousal Theories in Sport 3+0 7.5

Arousal Theories in Sport: Arousal Concepts and Definitions; Arousal in Sports Media; Stress and Coping in Sport; Anxiety in Sport: Anxiety Theories and Measurements; Competition; Relationship Between Anxiety and Performance in Sport;

Relationship Between Anxiety End Attention in Sport; Relationship Between Anxiety End Burnout in Sport; Anxiety Control; Fear And Anxiety in Top-Level Athletes Training Arrangements.

BES629 Research Methods and Techniques in Sports 3+0 7.5

Research Methods and Techniques in Sports: Sports Scientific Research Process Stages; Research Problem, Purpose and Sub-Objectives, Importance and Assumptions Literature To Be Aware of Specifications, The Research Model, The Universe and Sample, Data Collection Methods and Research Data Gathered in The Sports Field Is A Problem Scientific Research, According To The Methods and Techniques To Solve Advanced Proficiency.

BES630 Exercise Approaches for Special Groups 3+0 7.5

Exercise Approaches for Specific Groups: Exercise Management; Exercise As A Treatment; Children and Teenagers Exercise; Women in the Exercise; Exercise in the Elderly; Metabolic Syndrome and Exercise; Obesity and Exercise; Anemia and Exercise; Asthma and Exercise; Diabetes and Exercise; Hypertension and Exercise; Fibromyalgia and Exercise; Hyperlipidemia and Exercise; Chronic Fatigue Syndrome and Exercise.

BES631 Instructional Models for Physical Education 3+0 7.5

Basic Concepts About Teaching and the Relationship Between Learning and Teaching; Main Features of Teaching Models; Direct Instruction; Personalized System for Instruction (PSI); Cooperative Learning; Sports Education; Peer Teaching; Inquiry Teaching; Tactical Games; Teaching for Personal and Social Responsibility; Comparison of the Instructional Models.

BES632 In Biological Systems Methods of Analysis of Reactive Oxygen Species 3+0 7.5

In Biological Systems Methods of Analysis of Reactive Oxygen Species: Reactive Oxygen Species and Free Radicals Resources; The Effects of Free Radicals; Quantitative Analysis of Reactive Oxygen Species in Biological Systems, Methods; Analysis of Markers of Lipid Peroxidation; Analysis of Protein Oxidation Reagent; Analysis of DNA Damage Markers; Antioxidant Enzyme Analysis; Pro-Oxidant Effect of the Antioxidant Added.

BES633 Exercise Prescription 3+0 7.5

Exercise Prescription: Activity Models of Guidance and Risk Levels; Exercise and Quality of Life; Exercise Tests and General Principles; Assessment and Exercise Prescription Principles; VO₂ Based Exercise Prescription; By Cardiorespiratory Fitness Exercise Prescription; Exercise Prescription Based on Perceived Exertion; According To the Load of Exercise Prescription; Prescribing Exercise To Lose Weight; By Cardiovascular Endurance Exercise Prescription; Exercise Prescription for Muscle Strength; Exercise Prescription for Flexibility and Balance; Individual Evaluation and Testing.

BES635 Anti-Aging and Exercise 3+0 7.5

Anti-Aging and Exercise: Age Period and the Classification of the Aging Process; Theories Related To the Aging Process; Aging Physiology; Aging in the Process of Cardiopulmonary, Skeletal Muscle and Nervous System Changes: Old Age and the Effects of Exercise; Old Age, Illness And Exercise; In Old Age the Basic Principles of Exercise and Exercise Prescription; Cardiovascular Exercise Programs for Older Individuals; Aged for Muscle Strength Exercise Programs for Individuals; For Elderly Individuals for Flexibility and Balance Exercise Programs; Old Age, Risk Factors and Mesasures of Exercise in the Process Are Explained.

BES636 Pedobarographic Applications During Various Motor Tasks 2+1 7.5

Anatomy of the Foot and Ankle; Structure and Function of the Foot; Technology for Recording Kinetic Variables: Position transducer, Accelerometers, Force plates, Pressure insoles; Foot Plantar Pressure Measurement Systems: Platform systems, In-Shoe systems; Requirements for Foot Plantar Pressure Measurement: Target implementation requirements; Recent Trends in Foot Plantar Pressure Measurement: Wired system application, General wireless systems application.

BES637 Exercise and Oxidative Stress 3+0 7.5

Exercise and Oxidative Stress: Reactive Oxygen Species and Free Radical Concept; Antioxidant Defense System; Oxidative Stress; Mechanism of Free Radical Production During Aerobic and Anaerobic Exercise; Reactive Oxygen Species and Skeletal Muscle Function; Fatigue Mechanism and Delayed Muscle Pain Syndrome; Antioxidant Defense System in Response To Acute and Chronic Exercise; Exercise, Oxidative Stress and Antioxidant Supplementary.

BES638 Sportive Technical Analysis Applications 2+1 7.5

Kinetic and Kinematic Analysis Methods: Angle, Velocity, Acceleration, Angular and linear velocity, Joint moment and power; Organizing Three Dimensional Analyzing Environment: Camera placement, Marker placement, Volume calibration, Collecting and analyzing data; The Use of Surface Electromyography: Skin preparation, Normalization techniques, Collecting data and analyzing data.

BES646 Global Positioning System (GPS) and Sport Specific Testing 1+2 7.5

Basic Principles of Global Positioning Systems; Metabolic Power; Indoor and Outdoor Tests; Data Collection; Data Processing; Reporting; Theoretical and Practical Applications; Training Record; Physical Demand; Low Moderate High Intensity Activity; Injury Risk Index; Real Time Player Tracking; Applications of Different Sport Branches; Location; Acceleration Deceleration; Change of Direction; Hotspot Plots; Jump; Player Load; Collisions; Repeat High Intensity Efforts.

BES648 Assessment of Reaction Analyses with Neuro-Physiological and 2+1 7.5
Physiological Variables

Stress and Stages: Internal and external stress sources; Stress and its effects: Physiological effects of stress, Psychomotor (behavioral) effects of stress; Measurement of stress, Measurement of stress through neural changes and eye-movement changes, Advantages of EEG, Signal of EEG, Brain waves, Excitation potentials (UP), EEG and stress evaluations; Eye Movement Behavior: Gazing, Saccadic eye movements, Smooth pursuit eye movements, Eye tracking and sports performance.

BES649 Performance Monitoring in Sport 2+1 7.5

Basic Concept of Athlete Monitoring: Body Stress, Fatigue, Biochemical markers; Current Technologies in Monitoring Athlete: GPS technology, Heart rate telemetries, Questionnaires' based on computer technology; Measures of Fitness and Fatigue; Monitoring Different Conditioning Features; Athlete Monitoring and Evaluation Guidelines for Individual Sports; Athlete Monitoring and Evaluation Guidelines for Team Sports.

BES651 Training Load Monitorization and Field Test in Team Sports 1+2 7.5

Time Motion Analysis Via Global Positioning Systems: Sprint analysis (number and duration), Running speed analysis (max, min, avr), Physical activity record, Total running, Distance, Total running time, Load percents, Exertion points, Speed calculations; Training units calculations: F.I.T.T. principle, Metabolic power; Field Tests: Indoor and outdoor tests, Data collection, Data processing, Reporting, Theoretical and practical applications, Training record, Physical demand, Low-Moderate-High intensity activity, Injury risk index, Different pitch size trainings, Real-time player tracking, Applications of different sport branches, Location, Force, Angle, Direction, Dista

BES652 Physical Fitness in Individuals with Special Needs 3+0 7.5

Evaluation and Prescribing Principles: Physical fitness tests, Program design, Exercise program preparation; Cardiorespiratory Physical Fitness Measurements: Terms, Maximal and submaximal measurements; Preparing Cardio-respiratory Exercise Program; Muscular Physical Fitness Measurements: Terms, Muscular strength and endurance measurements, Muscular measurements in children and adults; Preparing Muscular Exercise Program; Evaluation of Body Composition; Weight and Body Composition Management; Flexibility Measurements; Flexibility Exercise Program Planning.

BES654 Fundamentals of Electroencephalography (EEG) and Signal Processing 2+1 7.5
Methods

BES655 Use of Eye Tracking Technology in Different Sports Branches 3+0 7.5

Anatomy and Physiology of the Oculo-Motor System: The structure of eye, The function of eye structure, The muscles of eye, The nerves of eye; Brain and Vision; The Eye Tracking System: What is eye tracking and how does it work?, The history of eye tracking researches; Eye Movements: Saccadic eye movements, Neurophysiology of saccadic eye movements, Fixations, Neurophysiology of visual fixation, The theoretical infrastructure of the quite eye and the quite eye, The quite eye in cognitive psychology / neuroscience; Eye Tracking Research in Different Sports Branches; An Evaluation of Eye Tracking in Computer Games and e-Game; The Eye-tracking in Sports Skills Training and Performance Analysis.700

BES657 Physical Education and Sports far Individuals with Special Needs 3+0 7.5

Motor Development and Learning: Concepts, Motor development theories, Motor learning; Evaluation of Physical Fitness and Motor Development; Body Awareness and Posture; Physical Education and Adaptation: Adapted physical education, activities and sports, Aquatic activities; Teaching Approaches in Physical Education: Basic learning principles; Methods of Reducing Problem Behaviors; Individualized Physical Education Program; Physical Education and Sports for Individuals with Special Needs.

BES661 Motivational Orientations in Sport 3+0 7.5

Basic Concepts Related to Physical Activities; Basic Concepts About Motivation; Relationship between Physical Activity and Motivation; Development Steps of Motivation; Developmental Stages of Motivation in Children; Success Surveys in Sport; Target Investigations in Sport; Intrinsic Motivation; External Motivation; Intrinsic and External Motivation in Exercise and Sport; Target Identification in Sport and Physical Activities; Self-efficacy as a determiner of exercise.

BES663 Program Development Models in Physical Education 3+0 7.5

Education, Philosophy and Educational Philosophy; Program Phenomenon in Physical Education and Scope of Program Development Concept; Program Development Theories in Physical Education; Program Development Models: Taylor model, Taba model, Oliva model, Schawab model; Mixed Models and Other Program Models in Physical Education; New Program Development Models in Physical Education.

BES692 Seminar 3+0 7.5

BES790 Thesis 0+1 30.0

BES890 Thesis 0+1 30.0

BES890-0 Thesis (Thesis Proposal) 0+1 30.0

BiL503 Object Oriented Programming 3+0 7.5

Comparison Between Traditional Programming Language And Object Oriented Programming Languages; Properties of Object Oriented Programming; Encapsulation; Data Hiding; Inheritance; Polymorphism; Programming With C++ and JAVA; Function Overloading; Inline Functions; Data Abstraction; Classes; Abstract Classes; Methods; Constructor; Destructor; Static Functions; Public; Private and Protected Functions; Pointers; References; Operator Overloading; Exception Handling; Visual Programming.

BiL504 Data Structure and Algorithms 3+0 7.5

Definition of Data; Linear Lists; Arrays; Stack; Queue; Linked Lists; Memory Allocation and Arrangement; Many Conjunction Lists; Tree Structures; Operation on the System; Search Methods; Sorting Methods; Merging Methods; Register and Minutes Concepts; Physical Register Arrangement; Addressing Methods; Indexed Arrangement in Ordered Register Regularity; Distributed Addressing; Pointers; Chain and Ring Structures.

BiL505 Data Systems: Analysis and Design 3+0 7.5

System Concept; System Analysis Principles; Organization And Management As A System; Management and Data; Data Production Process; Development of Data Systems; Data Management Systems; Decisions Support Systems; Analysis; Design; Application.

BiL506 Database Management Systems 3+0 7.5

Database Concept; Database Models; Relational Database Model; Hierarchical Database Model, Network Model; Logical Design of Databases; Physical Design of Relational Database Model; Integration of Relational Databases and SQL/DS; Distributed Databases; Object Oriented Database Management Systems; Expert Database Systems; Uncertainty In Database Systems; Office Data Systems; Application With ORACLE PL/SQL.

BiL507 Introduction to Operating Systems 3+0 7.5

Fundamental Concepts of Operating Systems; Services Provided By Operating Systems; Resource Management; Job Management; Job Scheduling; Time Sharing; Multitasking; Memory Management; Process Management; Virtual Memory; Paging; Interrupt Structures and Interrupt Processing; Arithmetic Processing Unit Management; Input/Output Inferior System; Register Management Inferior System; UNIX O/S Features and Internal Structure.

BiL509 Simulation and Modeling 3+0 7.5

Fundamental Concepts of Probability and Statistics; Discrete Simulation; Selecting Input Probability Distribution; Analog Computer Simulation; Generating Rational Number; Output Data Analysis; Statistical Methods For Comparing Alternative Systems; Simulation Languages and GPPS.

BiL510 Artificial Intelligence 3+0 7.5

Concept of Artificial Intelligence; Turing Test; Introduction to the Studies About Artificial Intelligence; Problem Solution And Searching Strategies; State-Space Approach; Problem Reduction Approach; Problem Representation; Search Techniques; Breadth-First Search; Depth-First Search; Iterative Deepening; Game-Playing; Knowledge Representation and Reasoning; Expert Systems and Rule Chaining; Vision; Natural Language Processing; Machine Learning; Artificial Neural Networks; Supervised Learning; Unsupervised Learning; Back propagation.

- BiL511 Computer Aided Design 3+0 7.5**
Using Computer For Design; Existing Computer Software to Be Used For Design; Designing Methods Using Autocad; Sample Designs.
- BiL513 Numerical Analysis 3+0 7.5**
Arithmetic Operations In Computers; Calculators; Errors And Algorithms; Finding Mid-Value Methods; Interpolation Methods; Lagrange; Hermite; Least Squares; Spline, Linear; Finite Distinctions; Numerical Derivation and Integration; Rounding Errors and Accelerating Convergence; Linear Equation Systems; Differential Equations; Runge-Kutta and Multi-Step Improvement Algorithms.
- BiL514 Decision Support Systems 3+0 7.5**
Decision Process and Knowledge in Managerial Decisions; Decision Making Process and System Approach; Critical Success Factors; Human's Intelligent Properties and Decision Forms; Management Process and Knowledge Support At Managerial Decisions; Models and Modeling Process; Using Models At Managerial Decisions; Static and Dynamic Models; Definiteness; Indefiniteness and Risk Environments; Mathematical Programming and Optimization; Simulation and Procedural Approaches; Decisions Support Systems (DSS) Structure and Properties; DSS Elements, Properties And Abilities of DSS; DSS Components; Setting Up Decision Support Systems; DSS Development Process; Users; Participants; Options of KDS Setup and Team Working; Decision Support System Tools; Database Systems; Dialog; Model and Database Inferior Systems; Programming Languages and Calculation Table Software; DSS Generators; Top Manager Data Systems; Expert Systems; Introduction to Artificial Intelligence; Sample Events.
- BiL517 Logic Design 3+0 7.5**
Logic Gates; Logic Variables; Number Systems; Data Representation; Computer Organization; Boolean Algebra; Logic Functions; State Tables; State Minimization; State Assignment; Karnaugh Maps; Instruction Formats and Addressing; Data Circuits (Coders, Multipliers); Flip-Flops; Clock-Mode; Sequential Circuits; Counters; Shift Registers.
- BiL518 Microprocessors 3+0 7.5**
Introduction to Eight Bit Microcontrollers; Motorola 68 HC11; Instructions and Machine Language; Addressing Modes; Advanced Programming; Indexing, Stacks; Procedures; Bit-Byte Processing; System Design With Microcontrollers; Memory Code Solution; Bus; Input/Output Units; Interrupts; Parallel Input/Output; A/D and D/A Processes; Serial Communication; Interrupt Systems; Real-Time Clock Program Timing; Working With COP Timing.
- BiL519 Advanced Algorithm Analysis 3+0 7.5**
Algorithm Analysis Techniques; Asymptotic Notation; Recursive Algorithms Design and Analysis; Randomized Algorithm Techniques; Greedy Algorithms; Dynamic Programming Techniques; Introduction to Graph Algorithms; Breath-First Search; Depth-First Search; Minimum Spanning Tree Algorithms; Shortest Path Algorithms; NP-Completeness and Undecidability; Approximation Algorithms.
- BiL520 Advanced Communication Technology 3+0 7.5**
Fundamental Concepts; Digital Technology; Sound and Image Compressing Methods; Data Communication Technology; Data Broadcasting Systems; Communication Satellites; Satellite Technology; Satellite Services; Use of Satellites; Advanced Television Systems; Digital Television; Advanced Radio Systems; Digital Radio; Computer Applications in Communication Technologies; Teleconference Systems; Multimedia Technologies.
- BiL521 Management Information Systems 3+0 7.5**
Information Technologies and Organizations; Developments in Computer Technologies; Roles of Information in Organizations; Strategic Effects of Development in Information Technologies; Internet and Organizations; Intranet; Electronic Management Environment; System Approach; System Concept; System Analysis; System Design; Database Management Systems; Management Information Systems; Concepts; Principles; Design; Application; Control and Improvement; Information Technologies Management; Trends in Information Systems.
- BiL522 Computer Organization 3+0 7.5**
Computer Hardware and Fundamental Structure of Software; Addressing Methods and Sequential Regularity of Machine Program; Processing Unit; Input-Output Organization; Memory; Arithmetical Operations; Pipelining; CISC, RISC and Heap Processor Samples; Computer Environment Units; Large Computer Systems.
- BiL523 Computer Networks 3+0 7.5**
OSI Reference Model and Fundamentals of Layered Network; TCP/IP Reference Model; Physical Layer; Data Communication; Transmission Media; Wireless Transmission; Communication Satellites; Data Link Layer; Error Detection and Error Correction; Stop-And-Wait Protocol; Sliding Window Protocol; Medium Access Sub layer; ALOHA; CSMA; Ethernet Protocol; Bridges; LAN; Network Layer; Routing Algorithms; Congestion Control Algorithms; IP Protocol.

Response and Request Objects; Form Elements, Application Objects; Session Objects; Server Objects; Cookies; File Operations; Vb script; Java script; Database Connections; Search Techniques; Application Areas.

BiL558 Parallel Programming 3+0 7.5

Parallel Programming Concept; Application Areas; Problems About Parallel Algorithms: Synchronization; Communication; Critical Sections; Synchronization Mechanisms: Semaphores; Monitors; and Others; Verification Methods and Application Examples; Communication Principles Based on Message Transmission; Rendez-Vous Structure; Parallel Programming Methods in Operating Systems; Parallel Programming Languages: CSP; OCCAM; ADA; and Others; Designing of Classic Parallel Programming Algorithms and Examining.

BiL559 Software Engineering 3+0 7.5

Computer-Based System Engineering; Project Management; Requirements Analysis; System Models; Software Prototyping; Software Design: Architectural Design; Object-Oriented Design; Function-Oriented Design; Real-Time Systems Design; User Interface Design; Multilanguage Software Design Principles; CASE; Management: Managing People; Teaming; Socio-Psychological Analysis; Software Cost Estimation; Program Productivity; Quality Management; Process Improvement.

BiL560 Data Access Systems 3+0 7.5

Increasing Scientific and Technical Information and Data Access Problem; Automation Data Access; Naming: Data Access (DA) Term, Information Science; Data Access System Concept: Main Concepts; Theoretical Bases; Elements; Approaches; Automation Text Processing: Automation Natural Language Analysis; Mechanic Dictionary; Automation Summarizing; Indexing Language and Embedded Systems: Definition and Structural Relations; Choosing Terms; Remembrance and Sensitiveness Devices; Synonymous Control; Word Forms Control; Classifying the Terms; United Terms and Idioms; Tasks and Roles; Term Measuring; Automation Classifying Approaches: Document-Defining Vectors; Measuring Similarity Among Documents; Heap Approaches.

BiL561 Fuzzy Neural Networks 3+0 7.5

An introduction to fuzzy logic, Operations on fuzzy sets, Fuzzy relations, Fuzzy implications Linguistic variables, The theory of approximate reasoning, Defuzzification methods, Inference mechanisms, The perceptron learning rule, The delta learning rule, Winner-take-all learning, Integration of fuzzy logic and neural networks, Fuzzy neurons, Hybrid neural nets, ANFIS, Gradient based training algorithms, Trainable neural nets for fuzzy IF-THEN rules, Fuzzy rule extraction from numerical data, Neuro-fuzzy classifiers, Applications of fuzzy neural systems

BiL562 Network Security 3+0 7.5

Introduction to Network Security; Problems; Terminology; Private Key Cryptography Techniques: DES, 3DES, AES, Public Key Cryptography Techniques: RSA, Diffie-Hellman, One-Way and Mutual Authentication Techniques; Message Integrity Techniques: MD-5, SHA-1, Digital Signatures; Network Security Standards: Secure-E-mail (PGP), S-MIME, SSL, TLS, IPsec.

BiL563 Fuzzy Logic 3+0 7.5

Fuzzy Sets and Basic Operations on Fuzzy Sets; Fuzzy Relation and Extension Principle; Linguistic Variables; Fuzzy Logic and Approximate Reasoning; Fuzzy Rule Base; Fuzzy Inference Engine; Fuzzifiers and Defuzzifiers; Fuzzy System Design for Function Approximation, Fuzzy Systems as Nonlinear Mappings; Design of Fuzzy Systems from Input-Output Data; Table Look-Up Scheme; Gradient Descent Training; Fuzzy Clustering.

BiL564 Data Acquisition and Mining 3+0 7.5

Data and knowledge representation, Data preprocessing, Data mining algorithms, Decision trees, Association rules, Clustering, Classification, Web mining, Text mining, Collaborative filtering, Privacy preserving data mining, Regression analysis

BiL565 Rough Sets Theory 3+0 7.5

Rough Sets; Information Systems; Discernibility Set Approach; Reductions and Process of Reduction Algebra; Decision Rules and Synthesis; Data Gathering and Digitalization; Discernibility Matrix and Functions; Decision Based Discernibility Matrix; Decision Based Discernibility Functions; Reduction Algorithms; Reductions by Using ROSETTA and Evaluating of Decision; To Use Genetic Algorithms, Johnson, Holte 1 and RSES Extended Algorithms in Reduction Process.

BiL566 Pattern Analysis 3+0 7.5

Mathematical and Statistical Foreknowledge; Pattern Types; Feature, Feature Extraction; Feature Selection, Optimal and Sub-Optimal Feature Selection Methods, Univariate and Multivariate Feature Selection Approaches, Classification and Classifier Types; Analysis of Recognition Performance; Various Pattern Analysis, Feature Selection and Classification Applications.

| | | |
|---|---|----------------|
| BiL567 | Introduction to Recommender Systems | 3+0 7.5 |
| Collaborative Recommendation: User- and item-based predictions, Ratings, Practical solutions; Content-Based Predictions: Content, Similarity-based retrieval; Knowledge-Based Predictions: Knowledge representation, Constraint- and case-based predictions; Hybrid Predictions: Hybridization opportunities, Monolithic and parallelized hybridization; Explanations in Recommender Systems: Explanations in constraint- and case-based predictions, Explanations in collaborative filtering; Evaluation: General evaluation, Popular evaluation, Evaluation data sets. | | |
| BiL569 | Big Data Systems | 3+0 7.5 |
| Big Data Infrastructure: Apache hadoop, MapReduce, Analysis tools, Interactive analysis tools, Scalable machine learning; Collecting and Transferring Big Data: Transferring bulk data from databases, Collecting streaming data; Storing Big Data: Apache HDFS, NoSQL and google bigTable, Apache HBase; Simple Data Processing: MapReduce framework, Implementing MapReduce applications; Big Data Analysis: SQL, Apache pig, Apache hive; Interactive Big Data Analysis: Google dremel, Dremel and impala; Machine Learning on Big Data: Scalable machine learning, Apache mahout, Machine learning algorithms, Evaluating models. | | |
| BiL571 | Advanced Neural Network Models | 3+0 7.5 |
| The Basic Perceptron and Linear Separability; Multilayer Perceptrons and the Backpropagation Algorithm; Optimization Methods: Gradient descent method, Conjugate gradient method; Least Squares; Weighted Least Squares; Radial Basis Function Networks; Wavelet Neural Networks; Fuzzy Neural Networks; Fuzzy Wavelet Neural Networks; Type-2 Fuzzy Neura Networks; Type-2 Fuzzy Wavelet Neural Networks. | | |
| BiL591 | Seminar | 3+0 7.5 |
| BiL592 | Seminar | 3+0 7.5 |
| BiL599 | Term Project | 3+0 0.0 |
| BiL604 | Information Technology Management | 3+0 7.5 |
| Information Technology Concept; ITM Resources: Manpower, Hardware, Software, Money and support systems, Management information systems, Computer networks; Internet, Intranet and Extranet Concepts; E-Society and Its Fundamental Properties; E-Government; E-Business: Intranet policies and strategies; Information Technologies and Applications; Database Management Systems: Concept, Analysis and Design; Decision Support Systems; Information Sharing Policies; Information Security Principles; Data Mining; Project Management: Concepts, Management software. | | |
| BiL605 | Distributed Computing Methods | 3+0 7.5 |
| Distributed Computaional Structures; Implementations of Different Algorithms in Popular Distributed Architectures; Shared Memory, Distributed Memory implementations; Emphasis on Map and Reduce Algorithm As Made Popular by Its Recent Applications in Scientific Computing | | |
| BiL606 | Natural Language Processing | 3+0 7.5 |
| General Introduction to Natural Language Processing Applications; Grammars and Parsing; Morphological Analysis; Semantic Notations; Entity Extraction and relations; Shallow Parsing; Syntactic and Semantic Analysis; Text Generation and Summarization; Ontology and Knowledgebase Creation; Sense Disambiguation; Statistical and Rule Based Approaches for NLP Using Machine Learning. | | |
| BiL607 | Advanced Information Retrieval Systems | 3+0 7.5 |
| Information Retrieval Problem: Automation in information retrieval; Term Information Retrieval (IR); Information Science; Indexing and Searching Techniques; Advanced Query Optimizations; Focus on Ranking Functions and Using Machine Larning to Learn the Ranking Functions for the Specific Problems. | | |
| BiL612 | Data and Text Mining | 3+0 7.5 |
| Data and Text Mining; Algorithms used in Data Mining; Application of Data Mining Applications to Text Mining; Classification and Clustering Algorithms; Rule-Based Systems. | | |
| BiL613 | Machine Learning | 3+0 7.5 |

Introduction to Learning Theory, Learning Algorithms and their Applications; Learning Theory; Estimation; Regression, Categorization with specific algorithms: Least squares, Maximum entropy, Hidden markov models, Artificial neural networks, Support vector machines.

BiL615 Special Topics in Information Technologies 3+0 7.5

Using Information Technologies in Distance Education Applications; Using Information Technologies in Medical Service Applications; Special Software Design Techniques for the Disabled People; Text-to-Speech, Speech-to-text conversion and applications.

BiL616 Pattern Recognition Applications 3+0 7.5

Mathematical Preliminaries; Pattern and Feature; Feature Extraction; Feature Selection; Classification; Linear and Quadratic Classifiers; Bayes Decision Theory; Subspace Methods; Principal Component Analysis (PCA); Linear Discriminant Analysis (LDA); Cluster Analysis; Combined Classifiers; Pattern Pre-Processing and Post-Processing; Recognition Performance Analysis; Various Pattern Recognition Applications.

BiL617 Cryptology 3+0 7.5

Classical Cryptography and Cryptoanalysis; Number Theory; Shannon Theory; Cryptographic Hash Functions; Iterative Hash Functions; Message Correction Codes; RSA and Prime Factorization Algorithms; Discrete Logarithm Method and Elgamal Crypto System; Elliptic Curves; Signature Methods.

BiL619 Advanced Discrete Mathematics 3+0 7.5

Linear Algebra; Subspace Fundamentals; Probability Theory and Random Variables; Principal Component Analysis; Nonlinear Optimization; Graphs; Trees; Path Problems; Planar Graphs; Pairing Problems; Coding Theory.

BiL620 Multi Agent Systems 3+0 7.5

Introduction to Intelligent Agents; Deductive Reasoning Agents; Practical Reasoning Agents; Reactive and Hybrid Agents; Multiagent Interactions; Communication; Working Together; Methodologies; Multiagent Decision Making; Applications of Multi Agent Systems.

BiL621 Text Analytics 3+0 7.5

Business Analytics; Text Analysis; Text Analytics; Text Representation: Preprocessing techniques, Feature extraction, Feature selection, Feature projection; Information Extraction from Text; Crawling; Indexing; Searching; Text Categorization; Text Clustering; Application of Text Algorithms over Big Data; Algorithm Selection and Evaluation; Multilingual Text Analytics; Semantic Analysis.

BiL623 Advanced Engineering Mathematics 3+0 7.5

Linear Equations; Laplace Transforms; Rectangular Systems and Echelon Forms; Matrix Algebra; Vector Spaces: Space, Subspace, Basis and dimensions, Linear transformations, Change of basis; Norms; Orthogonality; Gram-Schmidt Procedure; Discrete Time Signals; Fourier Analysis; Fourier Transforms; Time Frequency Analysis; Z-transforms and Filters; Determinants; Eigen Values; Eigenvectors; Probability: Combinatorics, Random variables, Conditional probability, Expectation, Limit theorems; Bayesian Learning Methods; Markov Chain; Monte Carlo; Optimization: Gradient descent algorithm, Newton method.

BiL692 Seminar 3+0 7.5

BiL790 Thesis 0+1 30.0

BiM790 Thesis 0+1 30.0

BiM890 Thesis 0+1 30.0

BiM890-0 Thesis (Thesis Proposal) 0+1 30.0

- BiY501 Herbarium Techniques 3+0 7.5**
 What is Herbarium? Collecting Plant Samples; Plant Drying Method; Sticking the Plant Samples on the Herbarium Cartons; Labeling the Plant Samples and Recording to Cartotext; Settling the Herbarium Material to Herbarium With a Specific Order; Herbarium Types; Preservation of the Plant Taxa; How Can We Benefit From the Herbarium?
- BiY502 Methods of Plant Identification 3+0 7.5**
 Collecting Plants; Studying Plant Specimens in Herbarium; Herbarium Techniques; Necessities When Making Herbarium Materials; How to Use Flora of Turkey and the East Aegean Islands; Key Types For Determining Plant Taxa; Determining Comparison Material; Publication Process After Determining the Plant Specimens.
- BiY505 Bacteriology 3+0 7.5**
 The Bacteria; What Are Bacteria; The Bacterial Cell; Growth and Reproduction; Differentiation; Metabolism; Energy Metabolism; Carbon Metabolism; Bacteria Genes; Bacteria Ophages; Bacteria in the Living World; Applied Bacteriology; Food-Bacteria; Feeding Animal; Biopol; Bacteria in Meolicine; Some Pratical Bacteri Ology; the Identification and Classification of Bacteria.
- BiY506 Enzymatic Regulation 3+0 7.5**
 Enzymes; Description; Biochemical Structures; Classification; Factors That Are Affecting the Enzymes Activities; Enzymatic Inhibitors; Competitive and Non-Competitive Inhibition; Determination of the Active Center In Enzymes; Co-Factors and Co-Enzymes; Allosteric Enzymes and the Regulation of Allosteric Enzyme's Metabolic Pathways; Synthesis; Gaining of Tertiary Structure And Release of Enzymes Will Be Taught.
- BiY507 Biology of Lichens 3+0 7.5**
 Historical Development of Lichenology; Anatomical and Morphological Features of Lichens: Cortex; Medulla; Algal Layer, Structure and Functions; Reproduction Mechanisms of Lichens; Sexual Reproduction; Types of Fructification; Vegetatif Reproduction; Isidia; Soredia; Blastidia; Physiological Features; Photosynthesis; Respiration; Unique Lichen Substances; Ecological Features; Biogeographical Features; Economical Usages of Lichens; Classification of Lichens.
- BiY509 Special Histology 3+0 7.5**
 Cardiovascular System; Blood Vessels; Lymphatic System; Reticuloendothelial System; Endocrine System; Urinary System; Reproductive System; Male Reproductive System; Female Reproductive System; Respiratory System; Excretory Respiratory Organs; Lungs; Digestive System; Stomach; Intestines; Pancreas; Liver.
- BiY510 Flora of Turkey 3+0 7.5**
 Historical Development on the Floristic Studies in Turkey: Algae; Liverworts; Fungi; Vascular Plants; What Is a Flora Element?; Floristic Regions in the World; Geographical Areas of Turkey: Their Topographic and Climatic Features; Composition of Flora of Turkey; Evaluation of Floristic Regions of Turkey (Euro-Sibirian, Mediterranean and Irano-Turanian): Their Features and Characteristic Taxa; Endemism: Endemic Taxa of Turkey and their Distribution Areas.
- BiY511 Gene Regulation 3+0 7.5**
 Evidence For Gene Regulation in the Cell and Related Methods; Gene Regulation at DNA Level; Amount and Types of DNA in Different Cell Types; DNA Loss; DNA Amplification; DNA Rearrangement; Tissue-Specific Expression of Proteins and Mrnas; Regulation at Trancription Level: Chromatin Structure; DNA Sequence Elements; Transcription Factors; Post-Transcriptional Regulation; Mrna Splicing; Life of RNA; Regulation of Translation; Gene Regularion and Cancer; Genetic Regulation of Immune System; Regulation of Mating-Type in Yeast.
- BiY512 Principles of Zoological Nomenclature 3+0 7.5**
 Zoological Nomenclature; Number of Words in Zoological Names; Criteria of Publication; Criteria of Availability; Date of Publication; Validty of Names; Formation and Emendation of Names; Taxa of the Family 'Group and Their Names; Taxa of The Genus 'Ggroup And their Names; Taxa of the Species 'Group and their Names; Authorship; Homonymy; the Type-Concept.
- BiY513 Advanced Cell Physiology 3+0 7.5**
 Macromolecular Structures That are Forming Cellular Organelles; Biochemistry of Membrane and Membranal Transportation; Connective Complexes in-Between Cells And Cellular Communication; Function and Structure of the Golgi Complex; Mitochondria; Lysosome and Peroxisome; the Role of Camp in the Regulation of Cellular Physiology; the Functional Mechanisms of Calcium-Calmodulin; Mechanisms of Cellular Differentiation Will Be Taught.
- BiY514 The Harmful Insects 3+0 7.5**

Introduction; Living and Nutrition of Insects; Parasits of Fur and Pelt; Ceratine Consuming Insects; Predatory Insects; Water Insects; Plant Insects; Harmful Insects of Wood; the Poisonous Insects; Patogenic Insects; Insects as Vectors of Diseases; Groups of Harmful Insect and their Damages.

BiY515 Forest Ecology 3+0 7.5

Introduction; Basic Principles of Ecology; Definition of Factors Forming Forest Ecosystems; Reciprocal Effects and Relations Between Factors Forming Forest Ecosystems; Yield Power of Forest Ecosystems; Prediction and Classification of Yield Power; Investigation of Forest Community According to Sociological Principles.

BiY516 Bioenergetics 3+0 7.5

Principles of Bioenergetics, Glycolysis and the catabolism of Hexoses, The citric acid cycle and control of ATP production, Oxidation of Fatty Acids, Amino Acid Oxidation and the production of urea, Oxidative Phosphorylation and Photophosphorylation. Carbohydrate Biosynthesis, Lipid Biosynthesis, Biosynthesis of Amino Acids, Nucleotides and Related Molecules Integre Integration and Hormonal Regulation of Mammalian Metabolism.

BiY517 Water Pollution and Biological Effect 3+0 7.5

The Factors That Cause Pollution in the Marine and Freshwater; the General Characteristics and Effects of Various Types of Pollutants on the Aquatic Environment; Chemical Pollution: Hydrocarbons, Pesticides; Detergents; Heavy Metals; Domestic Pollution; Aerobic and Anaerobic Mineralization; Radioactive Pollution; Red-Tide and Pollution; General Effects and Results of Eutrophication in the Standing Water; Bioaccumulation: Accumulation in Plants; Invertebrates and Vertebrates; Water Quality.

BiY518 Signal Transduction in The Cell 3+0 7.5

Types and Structure of Receptors Located on the Cell Membrane; Types and Structure of Ligands Bound Receptors; Mechanism of Signal Transduction Through the Cell Membrane; Mechanism of Signal Transduction in the Cell; Secondary-Messenger Molecules and Their Functions; Importance of Calcium Ion in Signal Transduction; SH2; SH3 and PH Domains of Proteins; MAP-Kinases; Termination of Signal; Signalling in the Nucleus; Nuclear Responses; Transcription Factors; the P53 Tumor Repressor; Cell Cycle Regulation; Cancer and Signalling Through Growth Factors.

BiY519 Limnology 3+0 7.5

Introduction to Limnology; Features of Freshwater and their Classification; Standing Water; Physical; Chemical and Biologic Features of the Standing Water; Thermal Stratification and Classification of Lakes; Running Water; Physical; Chemical and Biologic Features of the Running Water; Food-Chain Dynamics in the Water; the Major Groups of Organisms in Lakes and Streams; Phytoplankton; Zooplankt; Periphyton; Neuston; Nekton; Applied Limnology.

BiY520 Bacterial Plant Diseases 3+0 7.5

Introduction; Role of Bacteria in Plant Diseases; Classification of Plant Pathogenic Bacteria; Agrobacterium; Corynebacterium; Erwinia; Pseudomonas; Xanthomonas; Streptomyces; Symptoms of Bacterial Diseases; Identification of Plant Pathogenic Bacteria; Host-Pathogen Relations; Pathogenicity and Virulence Factors; Genetics of Bacterial Plant Diseases; Epidemiology of Bacterial Plant Diseases and Control of Disease.

BiY521 Biophotography 3+0 7.5

Variety of Photographic Cameras; Using Objectif for Photographic Cameras; Filters; Using Diafram; Obturator; Visor and Its Variety; Macro and Mikro Photography; Lighting and Periods; Arroneous Photography; Photographic Solutions; Films Developing; Card Developing; Measuring With Photograph; Photograph Reading.

BiY522 Investigation Methods of Ecosystems 3+0 7.5

Natural Selection and Speciation; Conditions for Life; Population Ecology; Community Organization and Structure; Ecosystem Dynamics; Diversity of Ecosystems; Definition of Genus and Characteristics of Elements Forming Ecosystem; Production of Organic Substance in Ecosystems; Energy and Material Flow and Their Depositions and Changes; Circulation of Food Substances; Investigation of Ecosystems.

BiY523 Zootaxonomy 3+0 7.5

The Principles of Animal Classification; Importance of Taxonomy; Category of Species; Categories of Subspecies; Taxonomy of Population; Theories of Classification; Aims of Classification; The High Categories; The High Taxa; Methods of Animal Classification; Taxonomic Collections; Methods of Identification; The Materials Point of Revision and Monography; Taxonomic Characters.

BiY524 Fishery Biology and Population Dynamics 3+0 7.5

The Factors that Effect on Efficiency of Fish Stocks in the Marine and Freshwater; Fish and Fisheries; Sampling and Statistical Methods for the Fishery Biology; Metric and Countable Features for the Fishery Biology; Studies of the Age;

Growth; Sexual Distinction and Spawning of the Fishes; the Relationships Between Length and Weight of the Fishes; Methods for Estimating the Potential Fish Population Dynamics of Aquatic Environment; Up Welling and Fish Production.

BiY525 The Collection Methods of Invertabrate Animals 3+0 7.5

Introduction; Biological Ecozones; Terrestrial Environment; Maritime Environment; Aquatic Environment; Collecting; Killing; Fixation; Preserving; Collections of the Main Invertabrate Animal Groups; Collection of Protozoa; Collection of Porifera; Collection of Coelenterata; Collection of Ctenophora; Collection of Plathelminthes; Collection of Rotifera; Collection of Nematoda; Collection of Annelida; Collection of Arthropoda; Collection of Mollusca; Collection of Echinodermata.

BiY526 Cytogenetics 3+0 7.5

Molecular Organization of Chromosome. Chromosome Morphology; Chromosome banding techniques. Structural and numerical chromosome mutations: Description and interpretation of mutations on chromosomes. Obtaining and Marking of the Prophase and Promethaphase Cells. Determination Prosedure about Number and Size of Ginosimes without the Use of Karyotype Analyze. Slide Preparation Procedures Invitro and In vivo Cytogenetic Investigations: Investigation and evaluation of mitosis and meiosis chromosome on plant; Investigation and evaluation of mitosis and meiosis chromosome on animal.

BiY527 Plant Microbiology 3+0 7.5

Introduction; Microorganisms as Saprotrophs and Plant Pathogens; Penetration of Pathogens Into Host; Mechanical and Chemical Barriers to Infection; The Hypersensitive Reaction; Microbiology of Flowers; Microbiology of Seeds; Microbiology of Fruits; Microbiology of Living Leaves; Microbiology of Stems; Microbiology of Roots and Mycorrhizas; Decomposition of Plant Litters; Industrial Fermentations of Plant Litter.

BiY528 DNA Repair Mechanisms 3+0 7.5

Mutations: Spontaneous v.s induced mutations, Gametic v.s somatic mutations, Other categories of mutations; Mutations arise in different ways: Tautomeric shifts, Base analogues, Alkylating agents, Apurinic sides and other lezions, UV Radiation and Thymine dimers; DNA Repair Systems: Photoreactivation repair, Excision repair, Proofreading and Mismatch repair, Double strand break repair in Mammals

BiY529 Landscape Ecology 3+0 7.5

Natural Ecological Factors Forming Structure of Landscape and Their Relation; Climatic Factors; Definition; Ecological Importance and Functions in Landscape; Soil Factor; Definition; Ecological Importance and Functions in Landscape; Relief Factor; Definition; Ecological Importance and Functions in Landscape; Biotic Factors and their Ecological Importance; Plant as Structure Element of Landscape; Definitions of Air Pollution; Water Pollution; Soil Pollution; Radiation Pollution and Noise Pollution; Ecological Importance and Reciprocal Relation of Landscape Elements; Basic Knowledge Concern to Ecological Need of Plants.

BiY530 Plant Tissue Culture 3+0 7.5

Culture of Plant Cells; Tissues and Organs; A Plant Tissue Culture Laboratory; Aseptic Techniques; Nutritional Components of Tissue Culture Media; Protoplast Fussion; Protoplast Isolation; Protoplast Culture; Callus Culture; Embryo and Ovul Culture; Meristem Culture; Anther and Pollen Culture; Secondary Products From Cultured Cells and Organs; Rekombinant DNA Isolation; Organogenesis.

BiY531 Immunology 3+0 7.5

Introduction; Cells and Organs of Immun System; Properties of Antigens; Immunglobulins; Polyclonal and Monoclonal Antibodies; Immun Response; The Complement System; Immune Tolerance and Autoimmunity; Antigen-Antibody Reactions; Serological Reactions; Agglutination; Precipitation; Immunoelectrophoresis; Notralisation; Fluoresent Antibodies; Enzyme-Linked Immunosorbent Assay; Radioimmunoassays.

BiY535 Mineral Feeding Physiology in Plants 3+0 7.5

Element Concepts in Plants; Necessary Elements for Vascular Plants; Research Methods for Plant Nutrition; Types of Different Elements in Soil; Incoming the Mineral Elements to Plant and Transportation; Transportation of Mineral Elements in Plants; Circulation of Mineral Elements; Functions of Necessary Mineral Elements and Mineral Deficiency Symptoms; Köklerin Tuz Alinimini Etkileyen Faktörler; Temperature; Light; Airing Position; pH; Interactions Among Ions; Growing; Plant Nutrition From Leaves.

BiY537 Stress Physiology in Plants 3+0 7.5

Stress Terminology; Responses of Plants to Stress Factors; Levels of Expression; Submolecular Level; Free Radicals (FR) and Related Active Oxygen (AO) Species. Ual Functions of FR and AO; Protection; Amage; Signalling; Regulation of FR and AO; Molecular Level; Secondary Metabolits Involved in Stress; Polysaccharids; Stress Proteins; Normal Cell

BiY562 Molecular Biotechnology 3+0 7.5

Introduction to Recombinant DNA technology, Molecular biological systems, Manipulation of prokaryotic gene expression, gene expression from strong and regulable promoters, expression of fusion proteins, types of expression vectors, Protein Engineering; Methods of directed mutagenesis in protein engineering, addition of disulphide bonds, Molecular Diagnostics of human diseases based on DNA and DNA sensors; polyclonal and monoclonal antibody production, PCR based diagnostics; Diagnosis of Malaria and sickle cell anemia, Fundamentals of microbial production of therapeutic human proteins, Human gene therapy, patents and patent analysis in Biotechnology.

BiY563 Halophilic Microorganisms and Their Potential in Biotechnology 3+0 7.5

Definition of Halophilic organisms; Halophilic Archaea; Halophilic Bacteria; Halophilic Eucarya; Isolation and cultivation of halophilic microorganisms; Microbial biotechnology; Halophilic Archaea in biotechnology; Halophilic Bacteria in biotechnology; Halophilic Eucarya in biotechnology; General Overview.

BiY565 Extremophiles 3+0 7.5

Extremophile Microorganisms and Techniques Used to Handle Them; Thermophiles; Psychrophiles; Alkaliphiles; Acidophiles; Halophiles; Barophiles; Radiation-Resistant Microorganisms; Applications with Extremophiles; General Overview.

BiY567 In-Vitro Techniques 3+0 7.5

Cell line techniques, cell adhesion, Cell proliferation, Cell differentiation, Energy metabolism of cell, In-vitro cell proliferation techniques, Cytotoxicity techniques, Mutagenicity and toxicity techniques, Flow-cytometry, In-situ hybridization, Cell dye and preparation techniques, Fluorescent- imminofluorescent dye techniques, apoptosis techniques.

BiY571 Taxonomy 3+0 7.5

Taxonomy and Systematic: Development of species concept, Classification systems, Rules of nomenclature; Viruses, Viroid and Prions; Diagnostic Characters and their classification of Archaea and Bacteria: Techniques and applications; Classification of Eucarya: Current methods and classification systems of microorganisms Algae, Fungi, Plants.

BiY572 Molecular Biology Methods 3+0 7.5

Methods in Protein Analyses: Micro methods in protein chemistry, Qualitative protein methods, Protein purification, Affinity chromatography, Spectrophotometric methods, Electrophoretic methods; Methods in Nucleic Acid Analyses: DNA analysis, DNA isolation and purification, RNA analysis and purification, PCR methods, Hybridisation methods, Cloning and genetic transfer; Serological Methods: Antibody production, Antibody-antigen reactions, ELISA, radio immune and fluorescence assays; Microbial Methods.

BiY574 Foodborn Pathogen Microorganisms 3+0 7.5

Aeromonas; Bacillus Cereus; Brucella; Camplobacter Fefuni; Clostridium Perfringens; Clostridium Botulinum; Pathogenic Escherichia Coli; Listeria Monocytopenes; Pseudomonas; Yersinia Enterocolitica; Salmonella; Shigella; Staphylococcus Aureus; Streptococcus; Other Pathogenia and Toxigenic Bacteria; Toxigenic Fungi and their Mycotoxins; Protozoan and Helminthic Parasites; Selective Isolation Techniques.

BiY575 Microorganisms and Biotechnology 3+0 7.5

Isolation of Cultures; Screening for Activities; Culture Preservation and Inoculum Development; Small-Scale Liquid and Solid-State Fermentations; Cell and Enzyme Immobilization; Continuous Culture; Methods for Biocatalysts and Biotransformation; Raw Materials Selection and Medium; Development for Industrial Fermentation Processes; Purification and Characterization of Proteins; Biological Biocontrol; Polyhydroxyalkonoates; Antibiotic Resistance Mechanism of Bacterial Pathogens; Genetics of Bacteriocins Produced by Lactic Acid Bacteria and their Use in Novel Industrial Applications.

BiY577 Enzyme Technology 3+0 7.5

Structure and functions of the enzymes, catalysis mechanisms of the enzymes and enzyme kinetics, enzyme activity units and fundamental of activity measurements, classification of the enzymes and characteristic enzyme reactions, inactivation and control of the enzymes. Sources of the enzymes, principles of the enzyme production from microorganisms, enzyme extraction, isolation from different sources and industrial applications.

BiY578 Arachnology 3+0 7.5

Taxonomy of Arachnida; Scorpionida: Taxonomy, Morphology, Anatomy, Biology, Ecological specifications: Solifugae: Taxonomy, Morphology, Anatomy, Biology, Ecological specifications: Acarina: Taxonomy, Morphology, Anatomy, Biology, Ecological specifications, Struggle methods; Opiliona: Taxonomy, Morphology, Anatomy, Biology, Ecological

specifications: Pseudoscorpionida: Taxonomy, Morphology, Anatomy, Biology, Ecological specifications: Araneae: Taxonomy, Morphology, Anatomy, Biology, Ecological specifications: Arachnida venoms and effects.

BiY579 Plant Bacteriology 3+0 7.5

Plant associated bacteria: Molecular phylogeny and genomics; beneficial bacteria: Rhizobium-legume symbioses, nitrogen fixing bacteria, epiphytic bacteria, bacterial endophytes; Rhizosphere bacteria: plant growth promoting rhizobacteria, systemic resistance and root colonization; Plant pathogenic bacteria: Agrobacterium, Clavibacter, the soft rot Erwinia, Pseudomonas, Xanthomonas, Ralstonia, Burkholderia, Acidovorax and Herbaspirillum.

BiY581 Permaculture 3+0 7.5

Introduction to Permaculture (Ecological Design): The philosophy of permaculture, Ethics, Concepts and themes in permaculture, Methods in Permaculture: Analysis, Observation, Data overlay, Flow charts, Zone and sector analyses, Design: Ecological systems and their characteristics, usage of ecosystem principles in design, design of sustainable agroecosystems, Ecological Cycling in Design; Usage of Biotic and Abiotic Factors in Permacultural Applications: Climatic factors, Plants, Water factor, Soil factor, Strategies for Different Ecological Environments: Humid Areas, Drylands, Wetlands, The Strategies of an Alternative Global Nation.

BiY582 Cyanobacteria and Biotechnological Applications 3+0 7.5

Cyanobacteria and Morphological Diversity, Biodiversity of Marine Cyanobacteria, Biodiversity of Freshwater Cyanobacteria, Cyanobacteria of Extreme Environments, Cyanobacterial Associations, Molecular Identification Methods of Cyanobacteria, Potential Applications of Cyanobacteria in Biotechnology, Cyanobacterial Bioactive Compounds, Cyanobacterial Bioplastics, Cyanobacterial Consortia for Bioremediation Purposes, Cyanobacterial Alternative Energy Sources, Cyanobacteria as Biofertilizers, Cyanobacteria as a Healthy Food Source, Cyanobacterial Emulsifiers

BiY583 Methods of Ecological Analysis 3+0 7.5

Introduction to Ecological Analysis: Basic Principles, Importance and necessity of ecological analyses; Quantitative Ecology; Application Related to Climatic Factors, Application Related to Plant and Soil Factors; Determination of Biological Diversity and Species Richness: Simpson index, Shannon diversity index, McIntosh diversity index; Floristic Quality Index: Basic principles and methods, Relationships between ecological factors and floristic quality index; Water Quality Index; Conservation Priority Areas; Analysis and evaluation; Applications Related to Classification Methods of Vegetation; Evaluation of the Data.

BiY584 Advanced Microbial Physiology 3+0 7.5

Introduction to Microbial Physiology, Macromolecular Synthesis and Processing: DNA, RNA, and protein synthesis, cell structure and function, bacterial growth, environmental effects and strategies, Genetic Adaptation I: Bacterial genomes, plasmids and mutations, Genetic Adaptation II: Transposable elements and genetic exchange, Regulation of Enzyme Activity and Gene Expression, Energy and Metabolism: Carbohydrate metabolism, Energy production and metabolite transport, metabolism of substrates other than glucose, Fermentation pathways, photosynthesis and inorganic metabolism, bacterial cell division, Microbial Stress Responses, Bacterial Differentiation, Host-Parasite Interactions.

BiY585 Advanced Biochemistry and Metabolism 3+0 7.5

Metabolism of Carbohydrates: Energy metabolism of glucose, Pyruvate metabolism, Biosynthesis of carbohydrates, Regulation of metabolism; Production of NADH and NADPH: Citric acid, glyoxylate and phosphogluconate cycles; Electron Transport Chain: Mitochondrial electron transport, Oxidative phosphorylation, Photosynthetic electron transport; Metabolism of Fatty Acids: Catabolism and biosynthesis of fatty acids, Regulation of metabolism; Metabolism of Amino Acids: Nitrogen cycle, Biosynthesis and catabolism of amino acids, Urea cycle; Integration and Coordination in Metabolism: Overall strategies of metabolism, Metabolic control by hormones.

BiY586 Systematics of Lichens 3+0 7.5

Taxonomic Classification of Lichens; Important Taxonomical Characteristics Used for the Identification of Lichens; Classical, Chemotaxonomic and Molecular Methods Used for the Identification of Lichens; Collection of Lichens: Field study and collection methods; Use of Different Keys in Lichen Identification; Identification of Crustose, Foliose and Fruticose Lichens; Designing Different Types of Identification Keys; Describing Lichens, and Defining Diagnostic Characteristics of Lichens; Lichens Used as Herbarium Samples: Entry into database and use of preservation techniques.

BiY591 Advanced Molecular Biology and Genetics 4+0 7.5

Cell Chemistry: Chemical equilibrium, Biochemical energetics; Proteins: Biosynthesis, Folding, Post-modifications after folding, Functions and regulation of proteins; Nucleic Acids: Organizations, Functions and regulation of nucleic acids; Cell Structure and Function: Transport of molecules, Signal transduction, Organization and movement of the cell; Cell Growth and Development: Cell cycle and regulation; Genetic Mechanisms: Genome replication, gene mutations and recombination mechanisms, DNA repair; Applications of Molecular Genetics: Physical and genetic mapping, Identification of genes, DNA sequencing techniques, Transcriptome and the proteome studies.

| | | |
|---|--|----------------|
| BiY592 | Seminar | 3+0 7.5 |
| BiY593 | Toxicology | 3+0 7.5 |
| Introduction to Toxicology: Description, History and classification; The Effects of Toxic Substances; Entrance Ways of Toxic Substances to the Organism, Their Distribution and Excretion; The Metabolism of Toxic Substances; Toxicokinetics; Mechanisms of Toxic Action; Genetic Toxicology; Chemical Carcinogenesis; Teratogenesis; Systemic Toxicology: Neurotoxins, Liver toxins, Renal toxins, Respiratory toxins, Haematotoxicity, Immunotoxicity; Drug Toxicity; Environmental Toxic Substances. | | |
| BiY594 | Nanomedicine and Application Fields | 3+0 7.5 |
| BiY599 | Term Project Course | 3+0 0.0 |
| BiY601 | Microbial Laboratory Techniques | 3+0 7.5 |
| General Information, Cultural Counting Methods, Microscopic Counting Methods, Standard Based Counting Methods, Metabolism Based Counting Methods, Other Counting Methods, Biochemical Tests, Media and Sterilization; Indicator Microorganisms, Taking Sample for Analysis and Preparation of Samples for Analysis; Hydrophobic Grid Membrane Filter Technique; Direct Epifluorescence Microscopy Technique; Electric Impedance Method; Bioluminescence Method. | | |
| BiY602 | Water Microbiology | 3+0 7.5 |
| Microbiology of Source Water; Freshwater Microbiology; Marine Microbiology; Microbiology of Drinking Water; Waste Water Microbiology Deep-Sea Microbiology Hydrothermal Vents; Methods in Water Microbiology; Sampling Methods; Determination of Biomass; Isolation Methods; Identification; Viability Using Staining Techniques; Microbial Activity Measurements; Radio Isotopes and Microelectrodes. | | |
| BiY603 | Environmental Pollution and Plants | 3+0 7.5 |
| Evaluation of Environmental Pollution; Morphological; Anatomical and Physiological Effects of Air Pollution on Plants; Morphological; Anatomical and Physiological Effects of Water Pollution on Plants; Physiological; Morphological and Anatomical Effects of Soil Pollution on Plants; Description of Biomonitor and Bioindicator Organisms; Their Features and Uses for Determination of Environmental Pollution; Databanks; Their Purposes and Methods. | | |
| BiY604 | Recombinant DNA Technology | 3+0 7.5 |
| What is Gene Cloning; What are used for Gene Cloning; Purification of Fragments by Restriction Enzymes; Analyzes of Fragments; Ligation; Transformation; Selection of the Cell Having Recombinant DNA; Why is the Gene Cloning is Important; What are the Areas That Recombinant DNA can be used for. | | |
| BiY605 | Animal Tissue Culture | 3+0 7.5 |
| Advantage and Disadvantage of Tissue Culture; Using Technical Materials of Tissue Culture; Investigation Techniques of Tissue and Cell Culture; Peculiarity of Cel Culture Laboratory; Interactions of Cell; Cell and Human Interactions; Damaging for Tissue and Cell Culture; Some Special Solutions for Cell Culture; Serums for Cell Culture; Isolation of Tissue and Cell; Primer Cell Culture; Cell Lines; Keeping and Storing Cells; Investigation Techniques of Cultured Cells. | | |
| BiY606 | Yeast Science | 3+0 7.5 |
| Introduction and History of Yeast; History of Yeast Classification; The Architecture of Yeast Cell; Nutrition and Metabolism of Yeast; Nutritional Requirements; Regulation of Metabolism; Cell Biology of Yeast; Cell Growth and Division in Yeast; Cell Cycle; Sexual Reproduction in Yeast; Isolation and Identification of Yeast; Yeast Genetics and Genetic Manipulation; Yeasts in Industry. | | |
| BiY607 | Oceanology | 3+0 7.5 |
| Historical Development of Oceanology; Biological Oceanography: Classification of Marine Environment; Classification of Marine Organisms; Organic Matter Yields of Marines. Marine Resources and Their Benefits: Biological Resources; Chemical Resources; Geological Resources; Physical Resources. Chemical Oceanography; Physical Oceanography; Geological Oceanography; Some Subjects from Practical Biological Oceanography; Fouling and Boring Organisms; Main Tools Needed in Oceanographic Research. | | |

- BiY620 Forest Vegetation of Turkey 3+0 7.5**
 Three Phytogeographical Areas of Turkey, Climates and Other Characteristics of these Three Areas of Turkey, Floristical and Syntaxonomic Analyses of Plant Associations Belong to Forest Vegetation Under the Influence of Climate; Main Rock; Soil and Biotic Factors Affected By Oceanic; Black Sea and Central Anatolia Region.
- BiY621 Advanced Molecular Genetics 3+0 7.5**
 Heredity and the phenotype: An Introduction to Genetics, Mendelian an Genetics: The Molecular Basis of Heredity, DNA Structure and Analysis, Translation and proteins; Genomics: Chromosome structure and DNA sequence organization, Organization of Genes in Chromosomes; Genetics of organisms and populations, Developmental Genetics, Genetics and Behavior, Population Genetics
- BiY622 Soil Biology 3+0 7.5**
 Soil ecosystem and properties; Soil organisms; Soil bacteria Actinomycetes, fungi, algae, lichens, viruses Soil fauna, protozoa, worms, pot worms, arthropods, vertebrates; Microbial interactions, competition; The opposite interaction, hunting, co-existence; Mutual benefit Enzyme properties and soil functions; Soil ecosystem development; Decomposition of soil; Organic matter and carbon cycle; Soil nitrogen cycle; Microbiological fertilizer and biocontrol; Soil phosphorus cycle; Soil sulfur cycle, Some trace elements; Microbial transformations
- BiY624 Use of Bioindicators in Environment 3+0 7.5**
 Determination of Environmental Conditions by Using Plants and Animals: Which kind of organisms are useful for this purpose?; Physiological and Morphological Effects of Pollutants on Living Organisms: Changes on the distribution patterns of organisms due to environmental pollution, Some methods and their application on the determination of sulphurdioxide and heavy metal; Determination and Monitoring of Special Habitats of Living Organisms: Lichens and Algae.
- BiY625 Special Microscopic Techniques 3+0 7.5**
 Introduction of High Technology Observation Tools For Biological Studies; Technical Preparation of Microscope, Special Fitness of Microscope; Using a Microscope and Study Principles; Preparation of Biological Materials For Fluorescence Microscope; Co focal Microscope and Scanning Microscope; Techniques of Single and Double Immunochemical Staining; Techniques of Biological Macro graphing; Using Special Microscopic Techniques for Observation And/Or Results; Techniques of Discussions For Microscopy.
- BiY626 Enviromental Microbiology 3+0 7.5**
 Soil Microbiology and Environmental Microbiology Biogeochemical Cycles; Aquatic Microbiology; Air Microbiology; Microorganisms and some novel pollution problems; Xenobiotia molecule; Recalcitrant halocarbons; Poly chlorinateo biphenyl and dioxins; Synthetic polymers; Alkyl benzyl sulfonates; Oil pollution; Crude oil Biodegradation; Pesticides; Microbial Accumulation of Heavy Metals and Radio Nualides Bioremediation.
- BiY627 Ecophysiology 3+0 7.5**
 Introduction; Ecological Factors and their Effects on Plants; Metabolism Physiology in Plants; Translocation in Plants; Biochemical Explanation of Photosynthesis and Respiration in Plants; Nutrition Methods in Plants; Growth; Growth Substances and Their Functions in Plants; Functions of Hormones During Seed Growth; Germination and Germination Types of Plant Seeds; Conditions of Seed Germination and Eliminating the Germination Obstacle; Seed Germination Properties of Economically Important Plants.
- BiY628 Genetic Regulation of Development 3+0 7.5**
 Introduction; Differentiation and Proliferation: Regulation of cell cycle and related molecules; Genetic control of Nematode development: Control Genes And Cell Behavior; Genetic Control Of Drosophila Development: Regional differentiation during embryogenesis, Neurogenesis, Homologous of Drosophila in mammals; Neurogenesis in Mice; Myogenesis in Mammals: Transcription factors and their functions; Oncogenesis.
- BiY629 Molecular Taxonomy 3+0 7.5**
 The Past and Future of Taxonomy; Methods of Systematic; Molecular Taxonomy; Molecular Systematic in Classification of Species; Partial Evolutionary Changes of Local Populations; Variation at DNA Level; Recognition With DNA (DNA Fingerprint); Satellite's DNA in Molecular Taxonomy; Sequences of Ribosomal RNA; Molecular Taxonomy Studies in Various Species.
- BiY630 Modern Methods in Plant Taxonomy 3+0 7.5**
 Cytotaxonomy; Concept and Application Methods; Chemotaxonomy; Concept and Application Methods on the Different Plant Groups; Molecular Biological Methods in Plant Classification: Algae, Mosses and Vascular Plants; Numerical Methods in Taxonomy; Descriptions and Geometric Models; Grouping; Ordination and Discrimination Functions; Pyhlogenetic (Cladistic) Systematic; Introduction of Phylogenetic Methods and their Applications.

BiY631 Ecological Economics 3+0 7.5

What is Ecological Economics?: Basic principles and concepts; The history of ecological economics; Analytic vision for ecological economics; Valuation and Decision-Making Process in Ecological Economics: Ecosystem services, their function and evaluations; Relationship Between Ecological Conservation and Economy; Sustainability in Nature: Indicators of sustainability; Carrying capacity; Human impacts on nature: Ecological footprint and its importance; Calculation; Consumption; Relationships Between Economic Development and Sustainability of Natural Sources: Ecological macroeconomics; Economics of resources; Cost-benefit analyses in nature; Environmental Economy; Environmental Politics; Environmental Planning.

BiY632 Biochemistry of Cancerogens and Mutanges 3+0 7.5

Enzymatic Activation of Polycyclic Aromatic Hydrocarbons; Monoxygenases, Arylhydrocarbon Hydrolases, Cytochrome P-450 Mechanism, NADPH- Cytochrome P450 Reductase System; Epoxide Hydrolases; (Mechanisms, Inductions Etc.); Conjugation Enzymes; Glutathione-S Transferases; Sulfotransferases; UDP-Glucuronil Transferases, Conjugation Reactions; and Carcinogenity Relations; Nucleosid and Nucleotid Alkylating; Invitro Alkylating of Nucleic Acids; in Vivo Alchylation of Nucleic Acids; Bifunction; Alkylating Agents; Circular Alchylation Agents.

BiY633 Economic Botany 3+0 7.5

Classification of Economic Botany; Nutritive Plants; Grain Plants; Vegetables; Plants With Edible Roots; Stems; Leafs; Fruits and Seeds; Plants Having Oil; Seeds Having Oil; Fruits; Fleshy Fruits; Baccate Fruits; Drupe Fruits; Aggregate Fruits; Dry Fruits; Plants That Contain Sugar; Starch and Oil; Flavoring Plants; the Stimulation Plants; Industrial Plants; Pharmacologic and Ornamental Plants.

BiY634 Evolution of Microbial Pathogens 3+0 7.5

Origin of life and earth as a microbial habitat; General concepts of microbial evolution: Studying evolution using genome sequence data; Population dynamics of bacterial pathogens; Microbial adaptation; Pathogenicity islands and evolution; Evolution of microbial pathogens and environment; Evolution of soil pathogens; Evolution of bacterial toxins; Evolution of bacterial resistance; Evolution of enteric pathogens; Evolution of human fungal pathogens.

BiY635 Characteristic Behaviour of Animal Groups 3+0 7.5

The Science of Behavior; Etholoji; Hereditary Behavior; Learned Behavior; Social Behavior; Nest-Building Behavior of Invertebrate Animals; Nest-Building and Mating Behavior of Pisces; Migration Behavior of Pisces; Characteristic Nest-Building Behavior of Birds; Dating Behavior of Birds; Characteristic Feeding Behavior of Birds; Community Behavior in Mammals.

BiY636 Biochemistry of Free Radicals 3+0 7.5

Free Radicals and Reactive Oxygen; Super oxide Radicals; Peroxide Radicals; Biochemical Mechanisms of Free Radicals; Free Radical Enzymes; Glutathione Peroxides; Catalase; Glutathione Reductase; Glutathione-S-Transferase; Free Radicals and Cancer; Free Radicals and Antioxidant Defense Mechanism.

BiY637 Aquatic Entomology 3+0 7.5

Classification of Aquatic Insects; Aquatic Insect Orders and Their Morphologic and Biologic Features: Collembolan; Ephemeroptera; Odonata; Plecoptera; Orthoptera; Hemiptera; Megaloptera; Neuroptera; Coleoptera; Diptera; Lepidoptera; Trichoptera; Hymenoptera; Define Methods of Aquatic Insects; Biological Features of Temporary and Permanent Water; Morphological and Physiological Adaptations of Aquatic Insects; Sampling Techniques; Economic and Ecologic Importance of Aquatic Insects.

BiY638 Archaeobacteria 3+0 7.5

Cell Biology; Euryarchaeota; Extreme Hemophilic Archae, Archae Producing Methane; Thermoplasmates, Hyper thermopilic Euryarchaeota; Crenarchaeota; Habitat and Energy Metabolism; Sulfolobales and Thermoproteales, Desulfurococcales; Living in High Temperature; Isolation Methods of Archaeobacteria.

BiY640 Basic Virology 3+0 7.5

Virology and Viral Diseases; General Properties of Viruses and Their Classification; The Virus Host; Quantification and Visualization of Viruses; Host Response to Viral Infection; Replicating and Measuring Biological Activities of Viruses; Characterization of viral genomes; Manipulation of viral genomes; Bacteriophages; Lytic viruses; Lysogeny and Phage Lambda; Animal viruses; Plant viruses; Viroids and Prions.

BiY641 Soil Science 3+0 7.5

Topics and Aim of Soil Science; Main Structure of Soil; Formation and Factors in This Matter; Rocks and Minerals Forming Soil; Decomposition Events Forming Soil; Physical Properties of Soil; Physicochemical Properties of Soil and Soil Organic Material; Chemical Properties of Soil; Biological Properties of Soil; Soil Yield; Main Soil Properties Affecting Yield.

BiY642 Protein and Nucleic Acid Analysis Techniques 3+0 7.5

Molecular analysis of nucleic acids, Restriction enzymes, Restriction and modification of nucleic acids, Marking and identifying nucleic acids, DNA sequence analyses, Micro-array and super-array techniques, Protein purification, Purification techniques, electrophoretic techniques, proteomix.

BiY644 Intracellular Traffic 3+0 7.5

Biosynthetic pathways; Transport of newly synthesized proteins; Vesicular and tubular clusters; Trans- golgi network (TGN); Secretory vesicles; Endocytic pathway; Endosomes and peroxisomes.

BiY645 Biochemistry of Nucleic Acids 3+0 7.5

Biological Functions of Nucleic Acids; Discovery of Nucleic Acids; and Biochemical Formation of Nucleic Acids; Isolation and Characterization of Nucleic Acids; Structures of RNA; Viral Nucleic Acids; Nuclease and their Relationship to Enzymes; Biosynthesis of Mononucleotides; Replication and Biosynthesis of DNA and Biosynthesis of RNA: Transcription; Translation (Biological Function of RNA to Produce Proteins); Catabolism of Nucleic Acids Will Be Taught.

BiY646 Eutrophication in Lakes 3+0 7.5

What is the Eutrophication?; Cultural Eutrophication; Natural Eutrophication; Sources of Nutrients; Prediction in Lake Eutrophication; Importance of Phosphorus as a Limiting Nutrient; General Effects of Eutrophication on the Aquatic Ecosystem and the Problems to Man Associated With These Effects; Community Interactions and Eutrophication; Controlling Eutrophication: Biological Control in Lakes; Chemical Control in Lake;s Mechanical Control in Lakes.

BiY647 Human Biochemistry 3+0 7.5

Constituents of Cells; Functions of These Chemicals; Proteins; Lipids; Carbohydrates; Nucleic Acids; Dissolved Materials; Membranes; Metabolism and It's Control Mechanism; Mitochondria; Bioenergetics; Thermodynamic; Electron Transport; Nucleus; Gene Expression; Plasma Membranes; Synthesis of Proteins; Surface of Cell; Transport; Specification of Cells; Jessel System; Digestion System; Nutrition; Digestion an Absorption; Function of Liver; Amino acid; Lipid and Carbohydrate Metabolisms; Hormonal System; Immune System; Immune Response; Preservation; Sensitivity; Cell System; Illness of Immune Systems; Nervous System and It's Properties; Structure of Nerve Cells; Chemical Flow; Illness of Nervous System.

BiY648 Applied Mycology and Biotechnology 3+0 7.5

Fungi; Applied Mycology and Biotechnology; Applied Mycology and Biotechnology for Agriculture; Applied Mycology and Biotechnology for Food; Filamentous Fungi Biotechnology; Fungal solid state fermentation; Fungal enzymes; Organic acids; Secondary metabolites; Yeast Biotechnology; Strain improvement in fungi; Detection of toxigenic molds.

BiY649 Plant Genetic Resources 3+0 7.5

Biodiversity; Its Disappearances and Importance; Conservation of Ecosystems; Factors Threatening Plants; Natural Factors; Artificial Factors; Plant Gene Resources; Its Importance; In-Situ (In Natural Habitats) Conservation; Ex-Situ (Out Of Natural Habitats) Conservation; Endemic Plants; Botanical Garden; Seed Banks; Plant Reproduction Techniques; Main Principles in Plant Growth.

BiY651 Vegetation Research Methods 3+0 7.5

Floristic Methods; Braun-Blanquet Method; Calculation of Contans Degree; Finding the Differential Species; Position of Plant Associations Which Sociological Units Were Not Described; Describing the Plant Species and Charasteric Plants; Importance of Alliance; Different Sampling Methods Using for Vegetation Studies; Statistical Methods; the Concept of Ecologic Group; the Nomenclature Code of Plant Association; Counting Methods for Environmental Vegetation Researc; Mapping Natural Environment and Vegetation.

BiY652 Microbiyal Genomics 3+0 7.5

What Is The Genome and Genomics - Principles of Genomic Molecular Structure; Role of Other Related Scientific Fields Such as Proteomics and Bioinformatics; Methods And Techniques Used In Genomics; Alternative Approaches In Genome Projects; Evaluation of Results From Genome Projects; Observation and Study of Microbial Projects Already Finished Such As E. Coli O157:H7, E.Coli K-12, Deinococcus Radiodurans, Enterococcus Faecalis and Bacillus Subtilus.

BiY653 Advanced Molecular Biology 3+0 7.5

Genes: Genes are DNA, The interrupted gene, The content of the genome, Clusters and repeats; Proteins: Messenger RNA, Protein synthesis, Using the genetic code, Protein localization; Gene expression: Transcription, The operon, Regulatory

circuits, Phage strategies, DNA: The replicon, DNA replication, Recombination and repair, Transposons, Retroviruses and retrotransposons, Rearrangement of DNA; The Nucleus: Chromosomes, Nucleosomes, Promoters and enhancers, Activating transcription, Controlling chromatin structure, RNA splicing and processing, Catalytic RNA, Immune diversity; Cells: Protein trafficking, Signal transduction, Cell cycle and growth regulation, Oncogenes and cancer, Gradients, Cascades, and signaling pathways.

BiY654 Ecological Genetics 3+0 7.5

Ecological Genetics: Why does ecological genetics work?; Markers and Sampling in Ecological Genetics: Methods of data generation, Principles of sampling, Within-population sampling, Among-population sampling, Power analysis; Genetic Diversity and Differentiation: Factors influencing diversity and differentiation, Use of genetic diversity statistics; Gene Flow and Mating System: Factors governing gene flow, The importance of biological and environmental factors on gene flow; Intraspecific Phylogenies and Phylogeography: Homology, gene trees, and species trees, Speciation and hybridization.

BiY655 Natural Antimicrobial Agents and Food 3+0 7.5

Introduction; Nisin; Bacteriocins; Natamycin; Organic Acids; Antimicrobials from Plants; Natural Antifungal Agents; New Food Additives.

BiY656 Chemotaxonomy 3+0 7.5

Importance of Taxonomy, Classification methods, Classic Taxonomic Methods, Taxonomic Characters, Biogenetic Classification of Plant Constituents, Classification Methods According to Chemical Constituents, Chemotaxonomy and Biochemical Systematics, Correlation between Chemo and Classic Taxonomy, Affinity of Chemotaxonomic Parameters with Systematics.

BiY657 Food, Human Health and Probiotics 3+0 7.5

Introduction to Probiotics and Prebiotics; Development of Probiotic Food Ingredients; Taxonomy and Biology of Probiotic; Primary Sources of Probiotic Cultures; Genetic Engineering of Probiotic Bacteria; Immunochemical Methods for Detection of Probiotics; Genetically Modified Probiotics; Use of Probiotics in Food; Probiotics as Biopreservatives for food; Probiotics in Cancer Prevention.

BiY658 Cell Regulation 3+0 7.5

Introduction; Cell Cycle and Function; Regulation of Cell Cycle and Function; Differentiation Mechanisms of Cell According to Their Structure and Function; Occurrence of Cell Types During Developmental Stage; Cell Death and Apoptosis.

BiY659 Cancer Genetics 3+0 7.5

The Genetic Bases of Cancer: Regulation of gene expression, Genetic controls of cell cycle, Tumor suppressor genes, Proto-oncogenes and oncogenes, Genes for metastasis, Genes related apoptosis; The Causes of Carcinogenesis: Epigenetic changes, The role of chromosome and gene mutations, Carcinogens, Inheritance of familial cancer; Cancer Cytogenesis; New Development and Approaches to Cancer Genetics.

BiY660 Medical Genetics 3+0 7.5

Introduction to Human Genetics; Genetic Mechanisms for Humans: Mendelian inheritance, Sex-linked inheritance, Gene linkage, Multiple allelic inheritance, Multifactor inheritance, Maternal inheritance; Chromosomal Disorders: Autosomal disorders, Gonosomal disorders; Single Gene Inheritance: Autosomal dominant and recessive gene diseases, X-linked diseases; Multifactorial Diseases; Investigation Methods of Medical Genetics: Cytogenesis and molecular analysis, Prenatal diagnosis; Genetic Counseling.

BiY661 The Molecular Basis of Cell Differentiation 3+0 7.5

Definition of Cells Differentiation; Fundamental Factors in Cell Differentiation; Growth Factors and Signal Molecules: Cell membrane receptors and proliferate response, Ligand receptor relations, Phosphorylation of growth factors; The Cell Differentiation in Early Embryonic Stage: The molecules involved in the Process of Development and Differentiation; Mechanism of Gene Activation in Cell Differentiation: The gene expression in differentiated cells, Constancy of the Genome in differentiated cells; Differentiation of Cancer Cells: Proto-Oncogenes functions in development and cell differentiation, Biological effects of Oncogenesis in the process of transformation.

BiY662 Basis of Molecular Evolution 3+0 7.5

What is Molecular Evolution; Structure of Gene; Mutations and their Types; Dynamics of Genes in Populations: Mechanism of Evolution: Natural selection, Random genetic drift, Genetic polymorphism; the Neutral Mutations and Evolution; Evolutionary Changing in Nucleotide Sequences: Indirect estimation of the number of nucleotide substitutions, Rates and patterns of nucleotide substitution, Causes of variation in substitution rates; A Case of Positive Selection; Molecular Clocks; Molecular Phylogeny; Evolution by Gene Duplication; Evolution by Transposition; Genome Organization and Evolution.

BiY663 Araneology 3+0 7.5

Taxonomy and specification of Aranea: Morphology; Anatomoy: Endoskeleton, Exoskeleton; Biology of spiders, Ecological specifications; Metabolism; Digestion systems; Circulation systems; Respiration systems; Neural systems; Spider Webs: Structure and evolution; Locomotion and prey capture; Reproduction: Female and Male reproductive organs; Development; Venomous spiders: Venoms and effects.

BiY664 Ecological Restoration 3+0 7.5

Introduction to Ecological Restoration Concept: Philosophy of Ecological restoration; Concepts and themes in ecological restoration; Effective and Sustainable Use of Natural Sources: Waste management; Usage of water; Recycling of wastes; Productivity; Rehabilitation of Ecosystems by Using Natural Sources: Environmentally friendly green technologies and their applications; Phytoremediation; Basic concepts; Advantages and disadvantages; Wetlands: Importance and characteristics of wetlands; Constructed wetlands; Usage areas of constructed wetlands.

BiY665 Advanced Biochemistry and Biochemical Techniques I 3+0 7.5

Carbohydrates; Nucleic acids and water-soluble vitamin metabolisms; The structure of water-insoluble vitamins; Lipid biosynthesis; Carbohydrate biosynthesis; Clinical enzymology; Glycolysis; Glikolisiz; Hexoses degradation; Gluconeogenesis; Citric acid cycle; Regulation of the citric acid cycle; Roxidative phosphorylation; Regulation of oxidative phosphorylation; Lipid oxidation; Urea cycle; homogenization, centrifugation, separation techniques; Electrophoresis technique; Enzyme immunoassay measurement methods; Basic principles of flow cytometry; Foundations of spectrophotometry; Absorption laws; High-performance liquid chromatography; Imaging techniques.

BiY666 Advanced Biochemistry and Biochemical Techniques II 3+0 7.5

Interaction between proteins and ligands: Immune response and specialized regulatory properties of proteins; Molecular motors; Enzyme kinetics; Allosteric effect; Kinetic tests; Bioenergetics and anaplerotik reactions; Glioksilat cycle; Porphyrin synthesis and degradation of hemoglobin production; Glikoconjugates; Carbohydrate analysis; DNA methylation; Fosfotidilinozoits; Eikosoits; Synthesis of saturated fatty acids and unsaturated fatty acids; Cholesterol and other lipids are transported and degradation of purine and pyrimidine synthesis; Cholesterol; steroids and izoprenitlerin synthesis; Enzyme activities and purifying methods of measurement

BiY667 Actinomycetes in Biotechnology 3+0 7.5

Physiological Biochemical and morphological Properties of Actinomycetes; Genetic properties of Actinomycetes; Ecology of actinomycetes; Actinomycete Diversity; Isolation of Actinomycetes from Environmental Sources; Classification of Actinomycetes; Identification of Actinomycetes; Pathogenic Actinomycetes; Actinomycete Biotechnology; Actinomycetes and Lignin Degradation; Actinomycetes and their Antibiotics; Actinomycetes and enzymes.

BiY668 Advanced Protein Biochemistry 3+0 7.5

Amino Acids,Peptides and Proteins:Definition and classification,Polypeptides and proteins,Protein size, Composition and properties,Determination of primary structure;Protein Structure:Structure of peptide bonds, Secondary structure,Tertiary structure,Quaternary structure; Biological Functions of Proteins:Myoglobin, Hemoglobin,Cooperative binding,Sickle-cell anemia;Protein Purification:Homogenate preparation,Centrifugation, Dialysis,Chromatography applications,Electrophoresis; Enzymes:Naming of enzymes,Kinetic properties of enzymes, Characteristics of enzyme reactions,Enzyme inhibition, Coenzymes, Allosteric enzymes,Cellular regulation of enzymes, Abzymes, Ribozymes.

BiY669 Biology of Lichenicolous Fungi 3+0 7.5

What are lichenicolous fungi? Interactions of lichenicolous fungi with lichens; Saprotrophic interactions; Biotrophic and necrotrophic interactions; Gall forming lichenicolous fungi; Host specificity; The reasons for host specificity; The diversity of lichenicolous fungi; Important taxonomical characters for the identification of lichenicolous fungi; Classification of lichenicolous of fungi; Identification of lichenicolous fungi.

BiY671 Statistical Analyses in Biology 3+0 7.5

Introduction: Aim and scope, Importance and use of statistical analyses in biology, Basic concepts; Statistical Software: SPSS programme, SPSS menu, Methods of data entry into SPSS programme; Decision Making: Choosing appropriate analysis; Statistical Analyses; Descriptive Statistics; Some non-parametric tests: Chi-square test; Some Parametric tests: z and t tests, One and two way variance analyses (ANOVA), Covariance analysis (ANCOVA), Simple and multivariate linear regression and correlation analyses, Multivariate variance analysis (MANOVA), Cluster analysis, Discriminant Analysis; Interpretation of the results.

BiY672 Advanced Biochemistry and Bioenergetics 3+0 7.5

Biochemistry: Definition, Macromolecules; Enzymes: Classifications, Kinetic properties of enzyme reactions, Membranes, Membrane Transport: Chemistry of Different Reactions: Oxidation- reduction reactions, Group-transfer reactions, Hydrolysis reactions, Nonhydrolytic cleavage reactions, Isomeriation and rearrangement reactions, Bond formation

reactions using energy from ATP; Concepts of Bioenergetics: Standard free energy change, Measurement of ΔG , ATP and phosphoanhydride bonds, Other reactive biomolecules for energy transfer.

BiY673 Molecular Industrial Biotechnology 3+0 7.5

Fermentation Technology; Commercial Production of Microorganism; Molecular Analysis and Amplification Techniques; Production of Gene Probes; The Expression of Foreign DNA in Bacteria; Yeast Cloning and Biotechnology; Cloning Genes in Eukaryotic Cell Lines; Biosensors; Protein Engineering; Vaccination and Gene Manipulation; Metagenomics in Biotechnology; Industrial Enzymes for Biopolymer Degradation.

BiY674 Molecular Microbial Ecology Techniques 3+0 7.5

Introduction to Molecular Microbial Ecology; Molecular Techniques in Microbial Ecology; Isolation of Nucleic Acids; DNA and RNA Extraction from Soil; Amplification; Polymerase Chain Reaction (PCR); Quantitative PCR of Environmental Samples; Detection of Microbial Nucleic Acids by Polymerase Chain Reaction in Aquatic Samples; Fluorescence In Situ Hybridization (FISH); Denaturing Gradient Gel Electrophoresis (DGGE); General overview.

BiY675 Microbial Biofilms 3+0 7.5

What is Biofilm?: Quorum sensing and microbial biofilms, Effect of quorum sensing on biofilm, Biofilms in disease, Tissue-related biofilm diseases, Chronic otitis media, Osteomyelitis, Biomedical implant-related infections, Oral biofilms, Ecological significance of plant-associated biofilms, Nutrient sources for biofilm formation, Biofilms in wastewater treatment systems, Biofilms in freshwater, Catalytic biofilms, Determination of biofilm formation in biofilm-forming microorganisms.

BiY676 Comparative Animal Physiology 3+0 7.5

Comparative Eco-physiology: Cellular approaches, The importance of water; Comparative Neurophysiology and Endocrinology: Nervous systems, Biological clock, Physiology of sense, Endocrine physiology; Comparative Muscle Physiology: Comparative Metabolic Physiology: Feeding and digestive physiology, Energy metabolism, Thermoregulation mechanisms; Comparative Cardio-Vascular Physiology: Vascular physiology in vertebrata and invertebrata; Comparative Urinary Systems: Water and salt physiology, Urinary physiology in invertebrata, Urinary physiology in vertebrata; Reproductive Physiology in Vertebrata and Invertebrata.

BiY677 Fungal Systematic 3+0 7.5

Introduction; History of Fungal Systematics; Categories; Nomenclature of Fungi: Naming of taxa, Some Rules of Nomenclature; Evolutionary Relationship of Fungi; Classification Systems in Fungi; Zoosporic Fungi; Chytridiomycota; Zygomycota; Ascomycota; Basidiomycota; Deuteromycota: Blastomycetes, Coelomycetes, Hyphomycetes; Fungi-related Studies in Turkey.

BiY678 Significance of Plant Secondary Metabolites in Biotechnology 3+0 7.5

Ecological Stress Factors: Biotic factors, Abiotic factors; Molecular Response Mechanisms in Stress Conditions: Homeostasis of Macromolecules and Ions; Synthesis of Protector Molecules; Generation Mechanisms of Reactive Oxygen Species; Plant Secondary Metabolites, Duties of Secondary Metabolites; Defense against Stress Conditions: Defense against herbivores, Defense against microorganisms; Metabolic and Advanced Ecological Functions; Usage of Secondary Metabolites: Secondary metabolites used as drug substances, as nutrition ingredients, as agricultural pesticide and as cosmetic products.

BiY679 Food Mycology 3+0 7.5

Culture Media and Isolation Methods Used in Food Mycology; Fungi in Food; Heat Resistant Fungi; Identification of Foodborne Fungi; Important Mycotoxins and Fungi Producing These Mycotoxins; Control of Foodborne Fungi: Cultural methods, Molecular methods; Control of Mycotoxins in Food: Analytical methods, ELISA applications, Fast methods; Limitations Related to Foodborne Fungi; Limitations Related to Mycotoxin Contamination in Food.

BiY681 Enzyme Analyses and Activity Detection Methods 3+0 7.5

Biochemical structure of enzymes: Enzyme nomenclature, Classification; Major principles of enzymatic analyses, Defining the initial velocity, Description of enzymatic activity and its measurement in a test tube; Activity measuring conditions, Internal and external factors that influence the enzymatic activity, Calculation of enzymatic activity, Units for measurement of enzymatic activity; Methods for detection and calculation of the specific activity; Fundamentals of enzyme kinetics: Factors influencing the enzyme kinetics, Types of enzyme kinetics, Detection methods for enzyme activity and inhibition; Enzyme activity measurement and calculating kinetic analyses: Detailed evaluation of kinetic analysis samples.

BiY683 Advanced Cell Investigation Methods 3+0 7.5

Techniques of investigation of a whole cell: Investigation with Fixation and Vital investigation, Cell cultures, Techniques used in analyses of cell components, Fractionating the cell on its Components, Homogenization Techniques; Cell

Visualization Methods; Recombinant DNA Technology and Fields of Application; Classical cell applications; Hybridization methods and investigation the cell on PCR.

BiY684 (Eng) Fundamentals of Epigenetics 3+0 7.5

Mechanisms of DNA methylation in mammals; Mechanisms of histone modifications; The epigenetics of non-coding RNA; Analysis of gene-specific DNA methylation; Methods for assessing genome-wide DNA methylation; Assessing epigenetic information; Epigenetics of eukaryotic organisms: Drosophila epigenetics, Mouse models of epigenetic inheritance, Metabolic regulation of DNA methylation in mammals; Stem cells and cellular differentiation; Epigenetics of X chromosome inactivation; Aging epigenetics; The effects of diet on epigenetic processes; Cancer epigenetics.

BiY685 (Eng) Environmental Physiology of Animals 3+0 7.5

Definition of ecophysiology; Fundamental mechanisms of ecophysiology: Water, ions, and osmotic physiology, Animal water balance, Osmoregulation and excretion, Metabolism and energy supply, Respiration and circulation metabolisms, Temperature and its effects, Nervous and muscle systems, Hormones and chemical control systems; Physiological adaptations in aquatic animals; Physiological adaptations in terrestrial animals; Physiological adaptations in parasitic animals; Effects of environmental stress on animal physiology: Physiological adaptations at the molecular and genome level.

BiY692 Seminar 3+0 7.5

BiY703 Insect Physiology 3+0 7.5

Introduction: Definition of insect physiology, History of insect physiology; Integument Morphology in Insects; Nutrition Physiology in Insects; Organ Systems in Insects: Neurophysiology, Muscle physiology, Morphology of digestive system and physiology, Intermediary Metabolism, Morphology of circulation system and its physiology, Chemical Composition of Hemocyte and Hemolymph; Respiratory physiology: Structure and Function of the Tracheae: Adipose tissue in insects, Hormonal system in insects.

BiY703 (Eng) Insect Physiology 3+0 7.5

Introduction: Definition of insect physiology, History of insect physiology; Integument Morphology in Insects; Nutrition Physiology in Insects; Organ Systems in Insects: Neurophysiology, Muscle physiology, Morphology of digestive system and physiology, Intermediary Metabolism, Morphology of circulation system and its physiology, Chemical Composition of Hemocyte and Hemolymph; Respiratory physiology: Structure and Function of the Tracheae: Adipose tissue in insects, Hormonal system in insects.

BiY704 Fundamentals of Ecotoxicology 3+0 7.5

Introduction to Ecotoxicology: Historic Need, Current Need, Goals; Major Classes of Contaminants: Inorganic Contaminants, Organic Contaminants, Radiation; Factors Influencing Bioaccumulation: Chemical Features Influencing Bioavailability, Biological Features Influencing Bioaccumulation; Molecular Effects and Biomarkers: Organic Compound Detoxification, Metallothioneins, Stress Proteins, Oxidative Stress and Antioxidant Response, DNA Modification, Enzyme Dysfunction and Substrate Pool Shifts; Cells, Tissues and Organs: General Cytotoxicity and Histopathology, Gene and Chromosome Damage, Cancer, Examples.

BiY705 Insect Behavior 3+0 7.5

Insect Anatomy and Morphology; Development of Insects; Species Diversity of Insects; His-tory of Insect Behaviour; Behaviour Diversity and Its Origin; Control of Behaviour; Pro-grammed and Integrated Behaviour; Spatial Alignment; Finding Food and Nutrition; Defense; Physical Communication; Chemical Communication; Mechanical Communication; Reproduc-tive Behaviour; Parental Behaviours and Social Life.

BiY706 Advanced Bioimaging Techniques 3+0 7.5

Light and Basic Principles of Microscopy: Electromagnetic and visible spectrum, Resolution, Magnification and visuaalization; Optical microscopy: Limiting factors, Bright field, Phase-contrast, Dark field and fluorescent microscopes, Recent developments in optical microscopy; Modern Fluorescent and Confocal Microscopy; Electron Microscopy (TEM, SEM); Atomic Force Microscope (AFM) and Super Resolution Microscopy (STED) Differences and Advantages; Microscopic Preparation Techniques; Microscopic Staining and Contrast Enhancement Techniques; Histochemistry and Immunohistochemistry.

BiY707 Advanced Mycology 3+0 7.5

Introduction; History of Mycology; Somatic Structure of Fungi: Hyphal structure of fungi, Special somatic structures; Lifestyles of Fungi: Fungi in bioluminescence; Number and Distribution of Fungi; Reproduction Types in Fungi: Sexual reproduction spores, Asexual reproduction spores; Sexual Availability of Fungi: Homothallic fungi, Heterothallic fungi; Relations of Fungi with Human: Some products derived from fungi, Mycotoxins, Toxic macrofungi; Fungiculture.

| | | |
|--|---|-----------------|
| BiY708 | Advantages and Disadvantages of Cell Culture | 3+0 7.5 |
| Cell Culture: Description of the cell culture, History of cell culture technology, Tissue culture; Main Types of Cell Cultures: Primary culture, Secondary cell culture; Cell Culture Laboratory Equipments: Basic equipment, Expanded equipment; Cell Culture Contamination: Some consequences of contamination, Major cell culture contaminants, Chemical contamination, Biological contamination, Cross contamination; Cell Culture Basics; Cell Lines; Media: Types of cell culture media; Advantages of Cell Cultures; Disadvantages of Cell Cultures. | | |
| BiY709 | Soil Microfungi | 3+0 7.5 |
| Isolation Methods of Soil Microfungi; Isolation of Heat Resistant Microfungi; Diagnosis of Microfungi with Traditional Methods: Culture media, Preparation, Identification and use of resources; Diagnosis of Microfungi with Molecular Methods: DNA isolation, Important gene regions and Amplification of gene regions, DNA sequence analysis, Evaluation of the sequence; Aspergillus; Penicillium; Fusarium; Rhizopus; Alternaria; Cladosporium. | | |
| BiY710 | Advance Molecular Genetic Methods | 4+0 7.5 |
| Methods of Nucleic Acid Labeling; DNA Isolation and Analysis Methods; RNA Isolation and Analysis Methods: Mirna Analysis Methods; Chromosome Staining and Analysis Methods; DNA Cloning Methods; Polymerase Chain Reaction (PCR) Methods; Methods of Obtaining Transgenic Organism; Genomic and Transcriptomics Study Methods: Microarray, Sequencing Methods; In Vitro Mutagenesis Method; Mutagenicity and Antimutagenicity Methods. | | |
| BiY711 | Fauna of Turkey | 3+0 7.5 |
| General Presentation of Turkey's Fauna, which is Considered One of the Richest Faunas in the World; Geological and Climatic Factors That Reveal the Abundance of Turkey's Fauna; Comparing Fauna of Turkey in Different Geological Eras and at Present: Endemic animals in Turkey and distribution of the endemic animals, The species which are endangered and extinct; International and National Projects and Agreements About the Fauna of Turkey; Conservation Activities for Biodiversity in Turkey. | | |
| BiY712 | Research Methods In Zoology | 3+0 7.5 |
| Description Methods to Wild Animals; Catching Methods of Vertebrata; Collection of Mammals: Types of traps, Swimming techniques and fixation, Skeleton extraction; Collection of Birds: Type of traps, Swimming techniques and fixation, Skeleton extraction; Collection of Fish, Amphibians and Reptilians; Type of Traps, Conservation Methods: Marking and monitoring methods of wild animals; Research Methods of Benthic Invertebrates: General characteristics of benthic invertebrates and sampling methods, Bentic invertebrates which are sensitive and tolerant to pollution, and identification methods. | | |
| BiY714 | Animal Ecology | 3+0 7.5 |
| Basic Principles of Animal Ecology: Ecological terms, Ecological research criteria; Ecological Factors: Abiotic factors, Biotic factors, Intraspecific factors, Sex and reproduction, Interspecific factors (Relationships between species); Principles on the Effects of Ecological Factors: Development temperature and thermal constant in animals; Classification of Ecosystems: Energy in ecosystems, Energy flow, Necessary substances for animals, Substance cycle; Population and Behavioral Ecology: Factors that effect population size; Ecophysiology: General homeostatic mechanisms in animals, Thermoregulation, Osmoregulation; Conservation Biology. | | |
| BiY716 | Microfungus Identification Techniques | 3+0 7.5 |
| BiY790 | Thesis | 0+1 30.0 |
| BiY890 | Thesis | 0+1 30.0 |
| BiY890-0 | Thesis (Thesis Proposal) | 0+1 30.0 |
| CAM513 | Metallic Glasses | 3+0 7.5 |
| Introduction; The Types of Metallic Glass Alloys, Structure of Metallic Glasses, Formation Theories of Metallic Glasses, Investigations on Behaviour and Properties of Non Crystalline Phases, Theoretical Mechanism of Deformation and Fracture, Effects of Crystallisation on the Mechanical Properties, General Application Fields of High Temperature Metallic Glasses. | | |

- ÇEV526 Integrated Waste Management Economics 3+0 7.5**
The Selection and Application of Suitable Techniques; Technologies and Management Programs to Achieve Specific Waste Management Objectives; Cost-Benefit Analysis on the Selection of Some Disposal Alternatives; Life Cycle Inventory; Basic Environmental Effects on Sanitary Landfilling and Incineration and Their Economic Evaluation.
- ÇEV527 Advanced Solid Waste Management I 3+0 7.5**
Integrated Solid Waste Management: Solid Waste Generation, Separation at the Source and Storage, Solid Waste Collection Systems, Analysis of Collection Systems, Unit Operations Used for the Separation and Processing of Solid Wastes; Transfer and Transport of Solid Wastes: Types of Transfer Stations; Recycling Processes; Recycling / Recovery Systems; Biological and Chemical Conversion Technologies: Aerobic and Anaerobic Composting Processes and Technologies, Energy Recovery of Biological Conversion Processes.
- ÇEV528 Industrial Air Pollution and Control 3+0 7.5**
Planning Industrial Air Pollution Survey; Sources, Inventories, Emission Factors Field Sampling for Various Industrial Pollutants; Air Quality Monitoring Studies for Industrial Areas; Various Strategies Related to Industrial Pollution Control; Air Pollution Control at Combustion and Non-Combustion Emission Sources; Control of Fugitive Emissions; Control Technologies for Pollutants at Gaseous and Vapor Phase and Control Equipment Design; Control Technologies for Particulate Pollutants and Dust Collector Design; Control Costs; Economic Analysis.
- ÇEV530 Anaerobic Biotechnology for the Treatment of Wastes 3+0 7.5**
Basic Principles of Anaerobic Biotechnology; Advantages and Disadvantages of Anaerobic Biotechnology over Aerobic Biotechnology; Basic Process Microbiology; Kinetics and Stoichiometry of Anaerobic Reactions; Protocol of Anaerobic Treatability; Management Concepts; Basics of Process Design; Alkalinity; Nutrition and Trace Element Requirement; Toxicity and Microbiological Adaptation; Energy Production in Anaerobic Systems; Examples of Anaerobic Treatment of Industrial; Agricultural; Solid and Hazardous Wastes.
- ÇEV531 Statistical Analysis of Engineering Data 3+0 7.5**
Basic Statistical Concepts; Regression and Correlation Analysis; Analysis of Variance; Identification of the Method for Experimental Studies; Reduction of Experimental Errors During Experimental Data Collection; Determination of the Relations Between Parameters that Affect Experimental Results; Analysis in Experimental Design; t, f and χ^2 Tests; Establishing Mathematical Models; Testing of Hypothesis Related to Mathematical Modeling and Related Rules of Decision; Factorial Design and Applications Related to Engineering Topics; Computer Aided Data Analysis Systems and Data Evaluation; Utilization of Software in Data Analysis.
- ÇEV533 Nonpoint Source Pollution 3+0 7.5**
Point and Nonpoint Sources in Water Pollution: Definition of the nonpoint source pollution; Its characterization; Sources and Causes; Transport Routes of Pollutants from Diffuse Sources; Hydrological Aspects of Nonpoint Source Pollution; Erosion and Soil Loss; Nonpoint Source Pollution Management; Watershed Management; Pollution Control; Best Management Practices; Modeling of Nonpoint Source Pollution; Model Classification; Characteristics of the Models Used in Nonpoint Source Pollution Modeling and Their Comparison.
- ÇEV535 Groundwater Pollution and Treatment 3+0 7.5**
Formation of Groundwater; Introduction to Groundwater Geochemistry: Solution Equilibrium; Carbonate Chemistry; Weathering; Redox Processes; Origins and Scenarios of Groundwater Contamination; Pollutant Transport: Retardation of the Chemicals; Dispersion and Diffusion; Flushing and Aquifer Clean-Up; Physical/Chemical Interactions of Pollutants With Soil Matrix and Water; In-Situ and Ex-Situ Treatment Technologies.
- ÇEV536 Natural Treatment Systems 3+0 7.5**
Definition, Aim and Characteristics of Natural Treatment Systems; Types of Natural Treatment Systems; Wetlands: Natural Wetlands; Wetlands in Turkey and their Environmental Potentials; Constructed Wetlands; Surface Flow Systems; Subsurface Flow Systems; Aquatic Plants and Plant Selection; Fundamental Considerations in the Application of Natural Treatment Systems; Wastewater Characteristics; Treatment Mechanisms Applied; Public Health; Slow-Rate and Rapid Infiltration Systems; Design Principles of Natural Treatment Systems; Case Studies.
- ÇEV539 Life Cycle Assessment 3+0 7.5**
Life Cycle Assessment (LCA): Concept and history; LCA Methodology: Goal and scope, Definition, Inventory analysis, Impact assessment; LCA and ISO 14000 Relation; Life Cycle Analysis Softwares and Applications.
- ÇEV540 Modelling of Environmental Systems 3+0 7.5**
Modeling and General Principles; Characteristics of Natural Systems with Respect to Modeling; Modeling of Well-Mixed One-dimensional Systems; Advection and Dispersion; Modeling of One-dimensional Streams; Modeling of Two-dimensional Systems like Lakes and Oceans; Numerical Solutions; Presentation of the QUAL2E Model and Applications.

ÇEV541 Water Treatment Technologies and Applications 3+0 7.5

Selection of Process for Water Treatment; Factors influencing the choice, Evaluating process options, Examples of treatment process; Filter Media; Filter Bed and Materials; Flow Through Porous Media; Rapid/Slow Sand Filters; Specifications and Operations; Ion-exchange and Adsorption; Theory, Materials and Reactions, Adsorption Kinetics, Columns, Regeneration; Adsorption of Organic Compounds; GAC/PAC Adsorption Systems; Membrane Filters and Design; Chemical Oxidation; Use of Oxidants for Water Treatment and Applications.

ÇEV542 Nitrogen and Phosphorus Removal from Municipal Wastewater 3+0 7.5

Nitrogen Removal: Source of nitrogen in wastewater, Principles of nitrification and denitrification and options, Combined nitrification/denitrification systems; Physical/chemical nitrogen removal processes: Breakpoint chlorination, Air stripping of ammonia, Selective ion exchange; Phosphorus removal: Sources of phosphorus in wastewater, Principles of chemical phosphorus removal and options, Principles of biological phosphorus removal mechanisms; Affecting Factors and Systems.

ÇEV543 Accreditation Process of Test Laboratories 3+0 7.5

General Definitions in Accreditation Process; Fundamentals of TS EN ISO/IEC 17025: Short history of accreditation, Developments of accreditation, Comparison with ISO 9001-2000; Advantages of Accreditation; Scope of TS EN ISO/IEC 17025: Main scope, Reference standards and documents, Terms and definitions, Management conditions, Technical conditions; Accreditation Practices: Preparation of documents, Preparation of standard operation procedure (SOP), Uncertainties.

ÇEV544 Metal Pollution and Environment 3+0 7.5

Introduction to Metal Pollution: General evaluation of metal pollution, Definitions and topics; Metal Pollution in Water: Aquatic ecosystems, Toxic materials, Metal concentration in river, lake and ocean waters, Heavy metals in aquatic organisms; Metal Pollution in Soil and Sediment: Sources, Reasons, Accumulation, Pollution results; Metal Existence in Air: Causes and solutions, Cycle of elements; Relationship between metals and microorganisms: Metal extraction.

ÇEV545 Advanced Microbial Ecology 3+0 7.5

Introduction to Microbial Ecology: Microbial variety and definitions, Microorganism nutrition; Factors affecting microorganisms: Physical, Chemical, Biological Factors; Types of Microorganism Surroundings: Terrestrial and aquatic environments; Microbial Interaction: Competition, Succession, Antimicrobial materials; Microorganism Relations: Symbiotic relation, Interrelations between microorganisms, Other cooperations; Biogeochemical Cycles: Chemical element, Soil and petroleum formation; Pathogenic Organisms: Bacterial, viral, fungal diseases; Pollution Microbiology: Toxins, Aerosols, Metals, Radiation.

ÇEV546 Advanced Treatment Techniques 3+0 7.5

Electrochemical Engineering and Applications; Electrochemical Technologies and Water Pollution; Electrochemical Technologies and Air Pollution; Electrochemical Reactors and Electrodes Used in Pollution Control; Transfer Processes in Electrochemical Reactors; Performance Criteria for Electrochemical Reactors; Cost of Electrochemical Processes; Removal of Organic Compounds by Electrochemical Methods; Removal and Recovery of Metals; Removal of Inorganic Compounds; Sterilization of Water and Wastes; Electrochemical Applications for Nuclear Wastes; Removal of Gaseous Pollutants and Electrochemical Methods for their Conversion to Useful Products.

ÇEV547 Special Waste Management 3+0 7.5

Terminology and Definitions; Principles of Waste Management; Electrical and Electronic Waste Management; Healthcare Waste Management; Waste Oil Management; Waste Vegetable Oil Management; Waste Batteries and Accumulators Management; Waste Tire Management; Excavation Soil, Construction and Demolition Waste Management; Nuclear Waste Management; Planning of Special Waste Programs: Using different decision making techniques; Case Studies.

ÇEV549 Advanced Techniques in Hazardous Waste Management 3+0 7.5

Principles of Hazardous Waste Management: General definitions, National and international legislations, Characterization and Monitoring of Contaminated Sites with Hazardous Wastes; Risk Management; Advanced Treatment and Disposal Methods: Soil vapor extraction, Distillation, Solvent extraction, Supercritical fluid extraction, Biological methods, Phytoremediation, Stabilization and solidification, Thermal methods; Case Study related to Hazardous Waste Treatment.

ÇEV551 Industrial Processes and Pollution Prevention 3+0 7.5

Pollution Control and Prevention Techniques in Industrial Processes: Pollution prevention and waste minimization concepts, Terminology, National and international legislation; Waste Minimization and Resource Conservation Based on Cleaner Production: Pollution prevention strategies, Physical, chemical, biological and thermal techniques; Life Cycle Assessment; Industrial Symbiosis: Industrial symbiosis concept and best available technologies, Eco-efficiency in industrial processes, Eco-industrial parks strategies; Case Studies on Pollution Prevention Techniques.

| | | |
|---|---|----------------|
| ÇEV552 | Contaminated Site Remediation | 3+0 7.5 |
| ÇEV553 | Green Building Certification Programs and Applications | 3+0 7.5 |
| Green Buildings: Basic concepts, History of green buildings; Green Building Certification Programs: Energy Star, BREEAM, LEED; LEED Certification Program: Structure of the program; Certification Rating Systems; Investigation of LEED Certified Buildings; Cost of Green Buildings; LEED for New Construction; LEED for Existing Buildings; Green Building Application for New or Existing Buildings. | | |
| ÇEV555 | Different Decision Making Techniques in Environmental Management | 3+0 7.5 |
| Decision Making Problems: Decision components, Basic concepts and definitions; Multi-Criteria Decision Making: MCDM components, MCDM problem types, MCDM methodology; Evaluation Methods for MCDM Problems; Analytical Hierarchy Process; Analytical Network Process; ELECTRE Method; PROMETHEE Method; Linear and Nonlinear Programming; Application of Different Decision Making Methods; Software on Waste Management and Energy Management. | | |
| ÇEV557 | Scientific Research Processes | 3+0 7.5 |
| Scientific Concepts; Student-Advisor Communication; Building Research Questions/Hypothesis and Development; Information Needs and Sources; Approaches for Precision Searching; Academic Database ve Fair Use; Thinking Critically About Information Sources; Ethical Use of Sources and Plagiarism - Applications on Turnitin or Ithenticate Programs; Time Management in Research Processes; Scientific Activities and Products: Congress, Symposium, Workshop, Project, Article, Poster, Presentation; Different Applications in Data Processing-SigmaPlot; Different Applications in Presenting Results-Prezi; Different Applications in the Processing of Bibliography-Endnote. | | |
| ÇEV559 | Environmental Biogeochemistry | 3+0 7.5 |
| Basic Concepts of Biogeochemistry: Beginning of life, Formation of soil, Chemical structure of water resources; Environmental Biogeochemistry: Biogeochemical Processes in Terrestrial and Aquatic Ecosystems, Interaction between seasonal and regional variations of biogeochemical cycles, Interactions with anthropogenic environmental perturbations and biological biogeochemical cycles, Effects of natural processes and perturbations on the behavior and bioavailability of pollutants; The role of biogeochemistry in environmental management concepts and tools: Ecosystem services, Environmental matrices, Biogeochemistry in EU Directives and Turkish environmental legislation. | | |
| ÇEV561 | Small Scale Drinking and Potable Water Treatment | 3+0 7.5 |
| ÇEV592 | Seminar | 3+0 7.5 |
| ÇEV601 | Special Topics in Environmental Engineering II | 3+0 7.5 |
| Current Subjects and Nationwide and Local Problems Will Be Covered in This Course. | | |
| ÇEV604 | Environmental Organic Chemistry | 3+0 7.5 |
| Basic Concepts of Organic Chemistry; Classification of Chemicals; Solid / Liquid / Gas Phase Equilibrium Partitioning: Molecular interaction and thermodynamics, Vapor pressure, Activity and solubility, Partitioning between air / water and organic solvent, Organic liquid-water partitioning, Organic acids and bases, Sorption processes; Transformation Processes: Abiotic Processes, Hydrolysis, Redox, Photochemical; Biotic Transformation Processes; Transport Processes: Advection, Diffusion; Receptor Modeling; Recent Studies on Synthetic Organic Pollutants. | | |
| ÇEV610 | Industrial Environmental Quality Management | 3+0 7.5 |
| Management of Air and Water Quality; Solid Wastes; Hazardous and Toxic Wastes at Industrial Facilities; Industrial Hygiene and Risk Management; Quality of Work Environment at Industrial Facilities and its Effect on the Health of Workers; Worker Health-Worker Safety Procedures; Environmental Impact Assessment (EIA) Studies; Environmental Quality Management Systems (EQMS) - ISO 14000 Applications; Legislation and Standards Related to Conservation of Environmental Quality; Quality Monitoring and Evaluation Studies; Procedures Applied in Impact Assessment and Regulation; Studies Toward Conservation and Improvement of Environmental Quality. | | |
| ÇEV611 | Risk Assessment for Environmental Health | 3+0 7.5 |

Introduction to Risk Assessment: Risk, Defining environmental risks; Elements of Risk Assessment: Hazard assessment, Dose-response assessment, Exposure assessment, Exposure routes, Ways of exposure, Risk characterization; Contaminant-specific Conditions: Risk assessment for carcinogens, Risk assessment for noncarcinogens; Limitations of Risk Assessments: Sources of uncertainties, Dealing with uncertainties; Risk Communication; Case Studies in Environmental Health Risk Assessment.

ÇEV612 Transfer Mechanisms of Incineration Processes 3+0 7.5

Design and Engineering Principles of Incineration Processes; Destruction and Removal Efficiency; Excess Air, Temperature and Turbulence Effects on Flow Regime; Steady-State Mass and Heat Transfer; Combustion and Chemical Kinetics.

ÇEV614 Advanced Solid Waste Management II 3+0 7.5

Thermal Conversion Technologies: Fundamentals of Thermal Processing, Combustion Systems, Pyrolysis Systems, Gasification Systems; Environmental Control Systems; Air Pollution Control, Water Pollution Control, Ash Disposal; Energy Recovery Systems; Sanitary Landfills: Landfill Siting Considerations, Landfill Design, Control of Leachate, Energy Recovery Processes of Landfill Gas; Restoration and Rehabilitation of Landfills.

ÇEV616 Advanced Disinfection Techniques 3+0 7.5

Investigation of Disinfection and Sterilization in the Laboratory; Various Methods: Filtration; Interilization; Sterilization; Tyndalization; Sterilization With Chemical Addition; General Disinfection And Affecting Factors; Type of Disinfectant; Type of Microorganism; Disinfection Duration; Ultraviolet Radiation; Fluorine; Chlorine; Hypochlorite; Alcohols; Techniques Based on Photoactivation; Electrochemical Disinfection; Disinfection With Electrooxidation; Bacteria Removal by Electroadsorption; Disinfection With Electrocoagulation; Disinfection With Ultrasound.

ÇEV617 Thermal Conversion Technologies 3+0 7.5

Fundamentals of Thermal Processing: Stoichiometric Combustion, Excess Air Combustion, Heat released from combustion; Materials and Heat Balance for the Combustion of Solid Waste; Combustion Systems: Types of combustion systems; Heat Recovery Systems; Pyrolysis Systems; Gasification Systems: Description of the gasification process, Gasifier Types; Environmental Control Systems; Energy Recovery Systems: Flow diagrams.

ÇEV619 Environment Quality Development Plans 3+0 7.5

Pollution Prevention Concept; Properties and Fates of Environmental Contaminants: Organic chemicals, Metals, Contaminant transport and transformation processes; Industrial Activities and Environment: Air pollution, Solid wastes, Hazardous wastes, Water pollution, Energy usage; Resource depletion; Improved Manufacturing Operations: Process development and design; Pollution Prevention Economics: Organizing the program, Preliminary assessments, Plan development; Reclamation Technologies: Environmental Management Systems; Environmental Audit Mechanisms.

ÇEV620 Transport and Fate of Pollutants in Water Systems 3+0 7.5

Fundamentals of Pollutant Transport in Water Systems (Streams, Lakes, Marine Environment); One-dimensional and Two-dimensional Transport; Continuity and Momentum Equations; Diffusion and Dispersion of Pollutants; Analytical and Numerical Solutions; Behavior of Pollutants in Water Systems; Conservative and Nonconservative Behavior; Degradation Reactions (Hydrolysis, Photolysis, Biodegradation); Other Mechanisms (Volatilization, Settling).

ÇEV621 Advanced Techniques for Atmospheric Analyses 3+0 7.5

Atmospheric pollutants, organic and inorganic pollutants present in liquid, solid and gaseous phases in the atmosphere. Pre-treatment procedures for the atmospheric samples and advanced techniques applied for the extraction of samples. Analytical techniques such as GC, GC-MS, LC, LC-MS for the determination of organic pollutants and their working principles, calibrations; Analytical techniques such as UV-VIS, AAS, GFAAS, ICP, ICP-MS for the determination of inorganic pollutants and their working principles, calibrations; Qualitative and quantitative Instrumental analysis; standard reference materials, accuracy and precision calculations in quality control analysis.

ÇEV623 Global Warming Parameters and Control Techniques 3+0 7.5

Cause-Effect Relations for Global Warming/Cooling and Different Views; Historical Earth-Temperature Profile; Greenhouse Effect and the Greenhouse Agents; Global Climate Systems; Natural Radiative Energy Interactions; Earth Energy Balance; Equivalent Carbon Dioxide Concentration and Earth Carbon Balance; Deforestation Issues; Relationships between Population and Economic Growth, Global Energy, Temperature and Carbon Cycle, and the Related Models; New Technology Designs and Principles for Controlling Global Temperature Changes; International Economic Allocation Models such as Carbon Tax, etc. for the Contributors of Global Warming Agents; Forecasting Capabilities of the Models and Evaluation of Scenario-Based Data for the Future; International Protocols.

ÇEV624 Atmospheric Chemistry 3+0 7.5

Introduction: Description of atmosphere, Composition of air, Solar radiation, Importance of atmospheric reactions; Atmospheric trace compounds: sulfur-containing compounds, nitrogen-containing compounds, halogen-containing

compounds; Atmospheric ozone; particulate matter: Stratospheric aerosols, tropospheric aerosols, carbonaceous particulates, mineral dust; Overview of stratospheric chemistry: Chapman reactions, nitrogen oxide cycle, ozone; Overview of tropospheric chemistry: Photochemical cycles of NO₂, NO and Ozone, Chemistry of methane, Tropospheric ozone budget, Chemistry of nonmethane organic compounds, chemistry of biogenic hydrocarbons; Acid rain: Formation and fate of inorganic and organic acids in the troposphere.

ÇEV625 Integrated Natural Resource Management 3+0 7.5
Description of Natural Resource; Fading and Inexhaustible Natural Resources; Importance of Natural Resource; Concept of Management; Biotic and Abiotic Resources Management; Sustainable Living; Sustainable Ecosystems; Threat Factors for Natural Resource; Integrated Natural Resource Management Principles and Tools; Variable-Sized Analysis and Methods; Resource Management Practices in Different Areas.

ÇEV626 Nanotechnology Applications in Water and Wastewater Treatment 3+0 7.5
Relation Between Nano Materials and Water and Wastewater treatment; Present and Prospective Applications of Nanotechnology in Water and Wastewater Treatment; Adsorption Applications in Drinking and Wastewater in Nanotechnology; Nanotechnological Membrane Preparation and Their Application Processes in Water and Wastewater Treatment; Nanotechnology Applications in Water and Wastewater Treatment for Disinfection; Nanosensors in Water and Wastewater Treatment.

ÇEV627 Environmental Biotechnology 3+0 7.5
Introduction to Environmental Biotechnology: General definitions and notions; Chemical Microbiology: Chemical components and function of cell, General biochemical reaction mechanisms; Biokinetics: Reaction kinetics and biokinetic levels; Treatment Microbiology: Biological treatment processes; Bioreactors; Nutrient Removal: Nitrogen removal, Phosphorus removal; Production of Biofuel: Bioethanol production, Biogas production; Bioremediation; Current literature surveys about environmental biotechnology

ÇEV629 Biodiversity and Protected 3+0 7.5
Description of Biodiversity: Genetic diversity, Species diversity, Ecosystem diversity, Processing diversity; Importance of Biodiversity; Loss of Biodiversity; Protection of Biodiversity: Protection efforts and methods, National and international responsibilities, Protected areas, Conventions; Threat to Biodiversity; Turkey's Biodiversity; Methods for Sustainable Use for Biological Resources.

ÇEV631 Electrochemical Water and Wastewater Treatment 3+0 7.5
Basic Concepts in Electrochemistry; Electrocoagulation: reactions, electrode materials, electro-Fenton methods, applications in water and wastewater treatment, an experiment in the lab.; Electrochemical oxidation(EO): indirect EO, direct EO, electrode materials, electrochemical oxidation of organic compounds, electrochemical oxidation of inorganic compounds, electrochemical disinfection, applications in water and wastewater treatments, an experiment in the lab.; Electrochemical Reduction: electrochemical reduction of metals, electrochemical reduction of inorganic and organic nitrogen compounds; Electroflotation: principles; Electrodialysis: principles, main calculation.

ÇEV633 Biological Treatment Of Industrial Wastes 3+0 7.5
Industrial Wastes Definition and Types of Industrial Wastes; Existing Pollutants in Industrial Wastes: Heavy metals, Pesticides, Polycyclic aromatic hydrocarbons, Chlorinated hydrocarbons, Petroleum hydrocarbons, Detergents, Antibiotics, Dyes, Oils, Xenobiotic compounds, Polymers, Explosives; Biological Treatment Definition and Types of Biological Treatment; Biological Treatment Strategies: In-situ biological treatment, Ex-situ biological treatment; Biological Treatment Application Methods: Bacterial biological treatment, Mycoremediation, Phytoremediation, Nanobiotechnology, Biosensors.

ÇEV692 Seminar 3+0 7.5

ÇEV790 Thesis 0+1 30.0

ÇEV890 Thesis 0+1 30.0

ÇEV890-0 Thesis (Thesis Proposal) 0+1 30.0

- ÇYÖ501 Domestic Wastewater Management 3+0 7.5**
 Domestic Wastewater Management: Centralized / Decentralized Wastewater Management; Wastewater Quantity and Characteristics: Wastewater flow characteristics, Calculation of flowrates, Wastewater characteristics, Grey water; Decentralized Wastewater Management Systems: Cesspool, Septic tank, Imhoff tank, Sand filters; Decentralized Wastewater Management Systems: Screens, Grit chamber, Settling tanks, Activated sludge, Disinfection.
- ÇYÖ502 Hazardous Waste Engineering and Management by Decision Making 3+0 7.5**
 Definition of Hazardous Waste Engineering and Management; Legal Status Related to Hazardous Wastes; Classification and Characterization of Hazardous Wastes; Hazardous Waste Transport Mechanism; Risk Analysis of Contaminated Sites with Hazardous Wastes; Pollution Prevention and Waste Minimization Approach in Hazardous Wastes; Transportation of Hazardous Wastes; Physical, Chemical and Biological Treatment Methods; Thermal Methods; Construction, Operation and Closure of Hazardous Waste Landfills; Healthcare Medical Waste Management and Case Study; Multi Criteria Decision Making; Benefit/Opportunity/Cost/Risk Analysis; Planning of Hazardous Waste Management by Decision Making Techniques.
- ÇYÖ503 Legislation on Environmental Issues I 3+0 7.5**
 Environmental Legislation and its Purpose; Water Pollution Control Directive; Announcement of Notification for Administrative Procedures, Announcement of Notification for Sampling and Analysis Methods, Municipal Wastewater Treatment Directive, Announcement of Notification for Sensitive and Less Sensitive Water Areas, Announcement of Notification for Wastewater Treatment Plans Technical Procedures for Wastewater Treatment Plants, Quality Directive of Swimming Pool Water, Announcements Notifications and Circulars Related to All Subjected Directives, Notices and Data Flow Related to Regulation legal devising.
- ÇYÖ504 Legislation on Environmental Issues II 3+0 7.5**
 Legislation on Wastes; Regulation on the Waste Management Directive; Regulation Directive on the Control of Packaging Wastes; Regulation Directive on the Waste Incineration; Regulation Directive on Landfills; Directive on the Control of Waste Electric and Electronic Devices; Regulation Directive on the Control of Batteries and Accumulators Control; Regulation Directive on the Control of Waste Oil and Waste Vegetable Oil; Regulation Directive on the End-of-Life Tires; Regulation Directive on the Control of PCB and PCT Wastes; Regulation Directive on the Control of Healthcare Medical Wastes; All Notifications and Circulars are related to These Regulations Directives; Licensing Procedures for Waste Management; Data Processing on the Legislation.
- ÇYÖ505 Bioenergy Production 3+0 7.5**
 Overview of Bioenergy Generation Production: Definition, Principles and limitations; Process Microbiology: Environmental factors; Kinetics and Modeling: Basic elements, Modeling of energy generation production; Anaerobic Reactor Configurations for Bioenergy Production: Classification of anaerobic bioreactors; Molecular Techniques: Fundamentals of molecular techniques; Bioenergy Recovery from Sulfate-Rich Waste Streams: Sulfate-reducing bacteria; Bioenergy Generation Production from Residues of Biofuel Industries; Biohydrogen Production: Biological hydrogen production, Dark fermentation; Microbial Fuel Cell: Evaluation of MFC performance and design; Biogas Processing: Biogas production.
- ÇYÖ506 Quality Management System Approach in Testing Laboratories 3+0 7.5**
 Concept of Quality Concepts: Total quality management, Standard and standardization; TS EN ISO/IEC 17025 Standard: History, Benefits; Concept of Accreditation Concept: Accreditation steps, International scale; Accreditation System Setup for a Laboratory: Scope, Reference to standards, Terms and descriptions; Management Requirements: Points to consider in management requirements; Technical Requirements: Points to consider in technical requirements; Internal and External Quality Control: Audits, Quality control cards, Conformity tests.
- ÇYÖ507 Industrial Wastewater Control 3+0 7.5**
 Selection of Treatment Process: Analysis of production process, Waste characterization, Determination of candidate technologies, Economic analysis; Industrial Wastewater Properties: Priority pollutants, Metals, Colours, Phosphorus-containing compounds, Nitrogen-containing compounds, Other pollutants, Pollution Prevention: General approach, Benefits of preventing pollution, Reducing pollution, Pollution prevention benefits, Recycling, Re-use, Industrial wastewater treatment methods: Equalization, Chemical methods, Biological Methods.
- ÇYÖ508 Drinking Water Quality and Control 3+0 7.5**
 Quality of Drinking Water; Drinking water standards; Problems Related with to Water Sources and Suggested solutions; Water sources, Selection of water sources and classification, Diseases can that can be transmitted infected with water; Unit Basic Operations and Processes Applied in Water Treatment; Aeration, Rapid mixing-slow mixing, Sedimentation, Softening, and Filtration systems, Disinfection; Problems Related with Water Distribution Network system and Pumping System.
- ÇYÖ510 Determining the Environmental Performance of Products and Processes 3+0 7.5**

Environmental Performance Determination Methods: Eco-labels, Environmental Product Declarations (EPD), Life Cycle Assessment (LCA), Life Cycle Cost Analysis (LCC); LCA Concept and Methodology: Definitions of goal and scope definition, Inventory analysis, Impact assessment, Interpretation; LCA Software Tools: Sample LCA studies; Criteria Used for Determining the Environmental Performance of Products; Global Warming, Ozone depletion, Photochemical ozone formation, Acidification, Eutrophication, Ecotoxicity, Human toxicity.

ÇYÖ512 Indoor Air Quality Measurement 3+0 7.5

Importance Factors of Indoor Air Quality; Indoor Air Pollutants and Their Sources; Comfort Parameters Affecting Indoor Air Quality and Their Relations with The Pollutants; Indoor Air Quality Measurement and Sampling Methods: Equipments and techniques for measurement and sampling studies, Extraction and analysis methods after sampling; Effects of Poor Air Quality and Sick Building Syndrome.

ÇYÖ514 Urban Air Quality Management 3+0 7.5

Factors Effecting Air Quality in Urban Settlements; Components of an Air Quality Management System; Clean Air Action Plans (CAAP): Turkish legislation on preparation of CAAPS, Developing an action plan, Determination of air quality in cities, Monitoring the air pollution, Source characterization, Emission inventories and modeling, Exposure assessment and effects on health effects, Geographical Information System applications; Air Pollution Abatement Measures: Strategies to reduce air pollution from due to residential heating, Strategies for traffic related air pollution, Strategies for industrial air pollution; Case Studies of Urban Air Quality Management From in Mega-Cities.

ÇYÖ516 Ecosystem Ecology 3+0 7.5

Concept of Ecosystem: Biological structure, Basic concepts of ecology; Biosphere and Ecosystem: Food chains, Trophic levels, Energy flow, Biogeochemical cycles, Ecological competition; Ecological Factors: Biotic factors, Abiotic factors, Edaphic factors; Ecosystem Development: Biodiversity, Succession, Climax; Big Ecosystems: Territorial ecosystems, Water ecosystems; Environmental Problems: Air pollutants, Water pollutants, Other pollutants.

ÇYÖ599 Term Project 3+0 0.0

DYS000 Qualifying Exam 0+0 0.0

EDB501 Academic Writing Skills 3+0 7.5

Origins of Scientific Writing: Types of scientific papers, Manuscripts and thesis; Parts of the Manuscript: Title page, Introduction, Methods, Results, Discussion, Conclusion, Acknowledgement, References; Presentation of the Results Effectively in Different Ways: Tables, Figures; Bibliography: Using EndNote software in the bibliography; Ethics: Rights and permissions, The right to become an author and author ranking; Cover Letter: Cover letter preparation; Other Issues: Use of abbreviations, Submitting the manuscript, Evaluation of manuscript writing.

EEM501 (Eng) Advanced Power System Analysis and Smart Grids 3+0 7.5

Utilization of Electric Power; Power System Economics; Electricity Markets; Energy Management Systems; Control of Transported and Distributed Power; Introduction to Smart Grid and Power Grid Operation; New Technologies for Electric Grid; Measurement Technologies: Generation, Transmission, Distribution, and End-user; Wide Area Monitoring System (WAMS); Advanced Metering Infrastructure (AMI); Phasor Measurement Units (PMU); Smart Grid Operations; Renewable Energy Generation; Renewable Energy Integration in Smart Grid; Challenges of Smart Grid.

EEM502 (Eng) Antenna Engineering 3+0 7.5

Antenna fundamentals: Maxwell's equations, Antenna parameters, Friis and radar formula; Radiation Integral and Simple Radiators; Array Theory; Basic Antenna Types: Wire, Microstrip antennas, Broadband antennas; Parallel Plate, Rectangular, Circular and dielectric waveguides; Introduction to Computational Electromagnetics and Method of Moments (MOM); Computer Aided Design (CAD) tools.

EEM504 (Eng) Random Variables and Stochastic Processes 3+0 7.5

Random variables: Introduction to concepts; Probability distribution functions; Probability density functions; Joint probability functions; Functions with random variables; Solutions of function sets; Averages: Expected values of random variables; Conditional expected values; Moments; Chebyshev and Schwarz inequalities; Moment generating functions; Chernoff bounds; Characteristic functions; Vector random variables, joint distributions and densities, means of random vectors, covariance matrices, diagonalization of covariance matrices ; Decision and estimation theory: Parameter estimation; means and covariance matrices of random vectors; Random sequences: Linear systems and random sequences; Large number theory; Stochastic processes: Important stochastic processes; Random input linear systems; Classification of random processes; Mean square calculus: Continuity and derivatives; Stochastic integrals; Stochastic differential equations;

Ergodicity; Karhunen-Loeve expansion; Stationary processes and sequences: White noise; Stationary processes and linear systems; Wide sense stationarity; Vectoral processes; State equations; Estimation theory: Orthogonality and linear estimation; Kalman filters; Wiener filters. Random variables: Introduction to concepts; Probability distribution functions; Probability density functions; Joint probability functions; Functions with random variables; Solutions of function sets; Averages: Expected values of random variables; Conditional expected values; Moments; Chebyshev and Schwarz inequalities; Moment generating functions; Chernoff bounds; Characteristic functions; Vector random variables, joint distributions and densities, means of random vectors, covariance matrices, diagonalization of covariance matrices; Decision and estimation theory: Parameter estimation; means and covariance matrices of random vectors; Random sequences: Linear systems and random sequences; Large number theory; Stochastic processes: Important stochastic processes; Random input linear systems; Classification of random processes; Mean square calculus: Continuity and derivatives; Stochastic integrals; Stochastic differential equations; Ergodicity; Karhunen-Loeve expansion; Stationary processes and sequences: White noise; Stationary processes and linear systems; Wide sense stationarity; Vectoral processes; State equations; Estimation theory: Orthogonality and linear estimation; Kalman filters; Wiener filters.

EEM507 (Eng) Integrated Optical Waveguides 3+0 7.5

Wave Equation; Boundary Conditions for Dielectric Interfaces; Reflection and Phase Shift; Electromagnetic Analysis of the Planar Waveguide: Eigenvalues for the slab waveguide, Guided modes in a waveguide; Dispersion in Waveguides; Wave Equation for Optical Fibers; Power Confinement in a Step-index Fiber; Attenuation and Nonlinear Effects in Waveguides; Wave Equation Analysis of a Rectangular Waveguide; Perturbation Approach and Effective Index Method; Beam Propagation Method for Analyzing Optical Waveguides; Coupled Mode Theory; Device Simulations Using Beam Propagation Method.

EEM508 (Eng) Reliability Analysis in Power System 3+0 7.5

Introduction, reliability definitions, historical development and reliability-cost analysis, Basic probability theory, Component reliability functions, Failure rate models and function and parameter estimation from available past data, System reliability evaluation, Time dependent reliability evaluations for mission-oriented systems, Continuous Markov Chains, Limiting state probability evaluations, frequency and duration, Approximate reliability calculations, Electric power generation and transmission system reliability assessment, Electric power distribution system reliability assessment, Monte-Carlo Simulations.

EEM509 (Eng) Radio Frequency and Microwave Circuits 3+0 7.5

Transmission Lines and Smith Chart; Resonators; Impedance Matching Networks; Scattering Parameters; Passive Microwave Devices: Filters, Splitters, Couplers, Isolators, Hybrids; Transistor Amplifiers and Oscillators; Phase Locked Loops (PLLs), Mixers and Detectors; Noise, Distortion and non-linearity calculations for communications systems; Computer Aided Design (CAD) Tools.

EEM511 (Eng) Introduction to Machine Learning 3+0 7.5

Linear and Polynomial Regression, Logistic Regression, Regularization, Maximum Likelihood, Loss Function, Perceptron, Gradient Descent, Back Propagation Algorithm, Bias Variance Tradeoff, Unsupervised Learning, K-Means Clustering, Self-Organizing Map (Kohonen Maps), Learning Vector Quantization, Support Vector Machines, Dimension Reduction Techniques, Principal Component Analysis (PCA), Applications of Classification and Clustering Problems.

EEM527 (Eng) Advanced Power Electronics Circuits 3+0 7.5

Industrial Applications of Power Electronics; Brief Review on Converters; Various Industrial Applications of Converters. Motor Speed Drives; High Voltage DC Transmission and Utility Applications; Harmonic Standards; Converter Harmonic Mitigation Techniques; Gate and Base Drive Circuits; Snubber Circuits; Component Temperature Control and Heat Sinks; Design of Magnetic Materials.

EEM528 (Eng) GPU Computing 3+0 7.5

Introduction to GPU Programming: PC and GPU Architecture, What is GPGPU, Introduction to CUDA: CUDA API and SDK, CUDA threads; Programming Model: Kernels, Thread hierarchy, Heterogeneous programming, Computing capability; Memory: Memory hierarchy, Device memory, Global memory, Shared memory, Asynchronous access; Asynchronous Concurrent Execution: Concurrent execution between Host and Device, Overlap of data transfer and kernel execution, Concurrent data transfers, Synchronous Calls; Introduction to OpenCL: Basics, Comparison of CUDA and OpenCL.

EEM530 (Eng) Hardware Security and Trusted Circuit Design 3+0 7.5

Security and Protection Aspects in Hardware Design: Vulnerability in digital logic design; Cryptographic Algorithms; Cryptographic Processors: Processor design for block ciphers and public-key algorithms; Side-Channel Attacks and Countermeasures: Power and timing attacks, Fault-injection attack; Fault-Tolerant Computing: Error-correcting codes; Hardware Trojan Horse: Formal methods for secure hardware, Detection strategies; Security of Reconfigurable Devices: Code obfuscation, Random number generators; Hardware metering: Physical unclonable functions; Trusted Computing Platform; Anti-Counterfeiting Methods; Intellectual Property Protection.

EEM534 (Eng) Data-Communication Networks 3+0 7.5
Overview on ISO Model; TCP/IP Stack Base Applications; Wireless Networks and Recent Protocols on Wireless Communications; Security on Networks; Network Security and Vulnerability; Data Security; New Trends and Technologies on Fast Communications; ATM Network Principles; Gigabit Ethernet, 10-Gigabit Ethernet; Voice Over IP Protocols; Fast Multimedia Information Transfer Preliminaries.

EEM541 (Eng) Linear Systems Theory I 3+0 7.5
Linear Spaces and Linear Transformations; Mathematical Description of Continuous- and Discrete-time Systems (Modeling); Input-Output Modeling; Impulse and Pulse Response; Transfer Matrices; State Variables and State-Space Modeling; System Response; Solution to the State Equations of Continuous- and Discrete-Time Linear Time-Varying and Time-Invariant Systems; Similarity Transforms; Controllability and Observability; Stability; Input-Output Stability; Internal Stability.

EEM545 (Eng) System Modeling 3+0 7.5
Systems and Models; Examples of Models; Models for Systems and Signals; Principles of Physical Modeling; Some Basic Relationships in Physics; Bond Graphs; Computer-Aided Modeling; Introduction to Identification; System Identification as a Tool for Model Building; Program Packages for Identification; Simulation and Model Use.

EEM546 (Eng) Fundamentals of Robotics 3+0 7.5
Introduction to the Fundamental Concepts of Robotics; Description of Local Positions; Orientation and Frames; Transformation Arithmetic; Manipulator Kinematics; Link Description; Actuator Space; Joint Space and Cartesian Space; Inverse Manipulator Kinematics; Algebraic Solution and Geometric Solution; Jacobians; Velocities and Static Forces; Manipulator Dynamics; Trajectory Generation; Control Of Manipulators.

EEM547 (Eng) Fundamentals of Detection and Estimation 3+0 7.5
Random Vectors: Joint distribution and densities, Multiple transformation of random variables, Multidimensional Gaussian distribution, Conditional distributions, Conditional expected values; Parameter Estimation: Linear estimation of vector parameters, Smoothing, prediction and filtering, Maximum likelihood estimators, Significance testing, Hypothesis testing, Bayesian analysis, Confidence intervals; Stochastic Processes: Stationary processes, Ergodicity, systems with stochastic inputs; Spectral Analysis: Correlations and spectra, Linear systems, Factorization and innovations, Matched filter, Spectral representation and Fourier transforms; Karhunen-Loeve Expansion; Queuing Theory and Markoff Processes.

EEM548 (Eng) Power System Protection 3+0 7.5
Principles of Protection of Power Systems: System grounding, Circuit breakers, Fuses, Relay input sources, Optical voltage and current transducers; Fundamental Protection Concepts: Differential, Directional impedance, etc.; Generator Protection: Differential, Negative sequence, Loss of excitation, etc.; Motor Protection: Grounding fault, Locked rotor, Undervoltage, Phase rotation, etc.; Bus Protection; Reactor Protection; Capacitor Bank Protection; Transformer Protection: Differential, Sudden pressure, Over temperature, Low oil, etc.; Line Protection: Directional comparison, Blocking, etc.; Types of Faults in Power Systems.

EEM549 (Eng) Advanced Electrical Machinery 3+0 7.5
Synchronous and Induction Motors; Doubly Fed Induction Motor; High Frequency Motors; Linear Machines; Braking Motors; Motors with External Rotors; Oscillating Motors; Poly-phase Commutator Motors; Schrage Motors; Single-Phase Commutator Motors; Brushless Motors; Hysteresis Motors; Reluctance Motors; Step Motors; Repulsion Motors; Universal Motors; Permanent Magnet Synchronous Machines.

EEM551 (Eng) Control Design Methods 3+0 7.5
Performance Criteria; Design and Compensation Techniques Using Frequency Response Methods; Minor-Loop Design; Improving System Performance By Feed-Forward Control; Controllability; Observability; and Canonical Forms; Relations Between Modern and Classical Techniques; Luenberger Observer; State Feedback; Pole-Zero Assignment Methods.

EEM552 (Eng) Micro-Nanodevices and Thin Film Applications 3+0 7.5
Semiconductor Materials: Material properties, Charge carriers and transport, Generation and recombination, Doping; Solid State Devices Basic Physics: Schrödinger equation, Semiconductor quantum wires-wells-dots; Microelectronic Device Structures: MOS field effect transistor, Bipolar junction transistor, Device operation through energy band diagrams; Thin Films: Fabrication techniques, Vacuum technology, Growth mechanisms, Film characterization techniques, Surface treatments, Thin film solar cells; Nanotechnology: Nanomaterials and nanodevices, State-of-the-arts devices, Future trends; Sustainable Energy Production Technologies.

EEM553 (Eng) Digital Control Theory 3+0 7.5

Discrete-Time Systems; Z Transform; Sampling; Reconstruction; Digital to Analog and Analog to Digital Transformations; Open-Loop and Closed-Loop Discrete-Time Systems; Sampled Data Systems; Response of Discrete-Time Systems; Stability; Digital Controller Design; Pole Assignment; State Estimation; Quantization Errors.

EEM554 (Eng) Nonlinear Control Systems 3+0 7.5

Lyapunov Stability; Advanced Stability Analysis; Stability of Perturbed Systems; Input-Output Stability; Periodic Orbits; Perturbation Theory and Averaging; Singular Perturbations; Analysis of Feedback Systems; Feedback Control; Exact Feedback Linearization; Lyapunov Based Design.

EEM561 (Eng) Machine Vision 3+0 7.5

Introduction: Human and computer vision systems; Cameras and Optics; Light and Color; Stereo and Range Images; Segmentation; Feature Detection and Mapping: Edge detection, Line fitting, Template matching; Multi-Resolution Representations and Applications; Machine Learning Overview: Clustering, Classification; Subspace Methods: PCA, ICA; Recognition: Feature extraction, Object detection and recognition; Motion and Tracking: Feature Tracking.

EEM562 (Eng) Signal Coding 3+0 7.5

Principles of Signal Representation and Codes; Scalar and Vector Quantization; Quantizer Optimization; Lossless Coding and Entropy; Huffman-Shannon Type Coders; Dictionary Techniques; Predictive Coding; Optimum Prediction Filter Design; DPCM, Sigal Space Representations; Transforms; KLT; Orthogonal and Biorthogonal Systems; Basis Signals and Projections; Sub band Decomposition; Wavelet - Sub band Filter Relation; Wavelet Design; Transform and Wavelet Coding; International Standards Relating to the Covered Subjects.

EEM564 (Eng) Artificial Neural Networks 3+0 7.5

Learning and Generalizing; Perceptron and Linear Decomposition; Multi-Layered Perceptron and Nonlinear Decomposition By Back Propagation Algorithm; Hopfield Model and BAM; Self-Organizing Mapping and Unsupervised Learning Models; Simulated Annealing and Boltzman Machine.

EEM565 (Eng) Image Processing 3+0 7.5

Introduction to Image Processing; Two-Dimensional Discrete-Time Signals; Fourier Representation; Two-Dimensional Sampling and Restoration; Two-Dimensional Anti-Aliasing Techniques; Image Representations; Image Transforms; Basis Vector - Basis Image Relations; Optimum Transforms and Representations; Transforms Such As KLT, DCT, Etc, Dithering, Imaging and Color Spaces; Morphology; Edge Detection and Other Binary Image Operations; Image Enhancement; Projection Based Restoration; Image Reconstruction; Image Segmentation and Object Extraction.

EEM566 (Eng) Pattern Recognition 3+0 7.5

Introduction to 1-D, 2-D and Multi-Dimensional Pattern Recognition; Bayes Decision Theory; Decision Boundaries; Classifiers and Discriminating Functions; Parameter Estimation; Clustering; Specification Selection; Image Grammar and Language; Artificial Intelligence in Pattern Recognition; Applications of Artificial Neural Networks.

EEM567 (Eng) Advanced Computer Architecture 3+0 7.5

Introduction: Technological trends, Cost and performance; Quantitative Principles of Computer Design; Instruction Set Architecture Design: Classifying ISAs, Role of compilers, MIPS Architecture; Pipelining: Data and control hazards; Pipelining Implementations and Multicycle Operations, MIPS R4000 Pipeline; Instruction Level Parallelism: Dynamic scheduling and branch prediction, Overview of superscalar, Loop unrolling; Static Branch Prediction; Memory hierarchy Design and Caches: Cache performance, Cache design issues, Main memory design issues; Overview of Interconnection Networks: Connecting two computers, Connecting more than two computers, Examples of interconnection Networks.

EEM592 (Eng) Seminar 3+0 7.5

EEM599 (Eng) Semester Project 3+0 0.0

EEM603 (Eng) Function Space Methods in Engineering 3+0 7.5

Sequences; Series; Limit; Continuity; Differentiation; Riemann Integral; Proof Methods; Lebesgue Spaces; Fourier Series; Fourier Transformations; Hardy Spaces and Engineering Applications of Hardy Spaces; Optimization Methods; Optimization Applications in Engineering.

EEM604 (Eng) Optimization in Power Systems 3+0 7.5

Optimisation Theory; Classification of Mathematical Programming Methods; Hydro-electric and Thermal Plant Modelling; Economic Dispatch of Thermal Units; Transmission Losses; Unit Commitment Problem in Interconnected Network; Methods of Load Forecasting; Optimal Power Flow; Cost Models for Planning.

EEM605 (Eng) Power Systems Stability 3+0 7.5

Stability Definitions; Simulation Methods; One-Machine System Stability; Swing Equations; Equal Area Criteria; Multi-Machine System Stability; Mathematical Models of Synchronous Machine; Phase Models; (d-q-0) Model; State-Space Models; Excitation and Prime Mover System Models; Stability Analysis.

EEM606 (Eng) Parallel Computer Architecture 3+0 7.5

Introduction: Why parallel architecture, Convergence of parallel architectures; Fundamental Design Issues; Shared Memory Multiprocessors: Cache coherence, Memory consistency, Synchronization; Snoop-Based Multiprocessor Design: Single-Level Caches with an Atomic Bus, Multilevel Cache Hierarchies, Split-Transaction Bus, Case Studies; Scalable Multiprocessors; Directory-Based Cache Coherence: Directory Protocols, Memory-Based Directory Protocols, Cache-Based Directory Protocols, Synchronization; Hardware/Software Trade-Offs; Interconnection Network Design: Interconnection Topologies, Routing, Switch Design, Flow Control, Case Studies.

EEM607 (Eng) Parallel Computing 3+0 7.5

Introduction: What is parallel computing?, The scope of parallel computing; Models of Parallel Computers: Parallel architectures, Interconnection networks, Routing and communication cost; Basic Communication Operations: One-to-All and All-to-All Broadcast, One-to-All and All-to-All Personalized Communication, Circular shift; Performance and Scalability of Parallel Systems: Performance metrics, The Scalability of Parallel Systems, The Isoefficiency Metric; Parallel Programming: Parallel Programming Paradigms, Message-Passing Programming Paradigm, Shared-Address-Space Programming Paradigm, Data-Parallel Languages; Dense Matrix Algorithms; Solving Sparse Systems of Linear Equations; Sorting; Parallel I/O.

EEM608 (Eng) Advanced Linear Control Design 3+0 7.5

Elements of convex analysis; Special algorithms for convex optimization: cutting-plane algorithms, ellipsoid algorithms, Ritz approximations; Controller design specifications and approaches: multi-criterion optimization; Robustness specifications.

EEM609 (Eng) Multivariable Control Systems I 3+0 7.5

Review of linear algebra: Invariant subspaces, matrix dilation problems; Linear dynamical systems: Lyapunov equations, balanced realizations; Performance specifications: Hilbert and Hardy spaces, Induced system gains; Stability and performance of feedback systems; Performance limitations; Model reduction by balanced truncation and Hankel norm approximation; Model uncertainty and robustness.

EEM610 (Eng) Multivariable Control Systems II 3+0 7.5

Linear Fractional Transformation; Structured Singular Values; Parameterization Of Stabilizing Controllers; Algebraic Riccati Equations; H-2 Optimal Control; Linear Quadratic Optimization; H-Infinity Control; Controller Order Reduction.

EEM617 (Eng) Special Topics in Systems Theory 3+0 7.5

Some Current Special Topics in Systems Theory: Finite-dimensional and infinite-dimensional systems, Controllability and observability of infinite-dimensional systems, Systems described by partial differential equations, Systems described by delay-differential equations, Pointwise and distributed time-delay systems, Retarded and neutral systems, Controllability and observability of time-delay systems, Pointwise and distributed parameter systems, Discrete-event and hybrid systems, System identification.

EEM618 (Eng) Power Quality Analysis 3+0 7.5

Definition of Power System Transients; Transient Events During Normal Operation; Transient Events During Faults; Monitoring Methods of Transients and Detection of Quality Features; Analysis Methods Using DFT and Wavelet Transforms; Analysis of Power Quality Using Symmetrical Sequence Components; Simulation Methods and Applications; Analysis of Example Systems Through Simulations.

EEM619 (Eng) Wireless Communication 3+0 7.5

Wireless Channel Modeling: Path loss and shadowing; Statistical Fading Models; Time Diversity: Coding and Interleaving; Antenna (Spatial) Diversity; Frequency Diversity; Direct-Sequence Spread Spectrum; Multi-Carrier Systems: OFDM; Narrowband Cellular Systems; CDMA: Generation of Pseudonoise Sequences, Power Control, Handoff, Averaging; Capacity of Wireless Channels.

EEM620 (Eng) Special Topics in Control Engineering 3+0 7.5

Some Current Special Topics in Control Engineering: Decentralized and hierarchical control, Control of infinite-dimensional systems, Stabilization of infinite-dimensional systems, Infinite-dimensional controllers, Stabilizing controller design, Robust control, Robust servomechanism problem, Control of time-delay systems, Time-delay controller design, Distributed control, Optimization in control, Control of discrete-event and hybrid systems, Supervisory control.

EEM621 (Eng) Nano and Micro-Fabrication Techniques 3+0 7.5

Cleanroom Environment, Safety and Processing; Micrometrology and Materials Characterization; Material Properties, Crystal Structure and Growth of Silicon; Thin-Film Materials and Processes: PVD, CVD, PECVD, ALD, Metallic thin films, Oxide and nitride thin films, Polymer films; Advanced Thin Films; Pattern generation and optical lithography; Wet, Dry and Ion Beam Etching; Thermal Oxidation; Nano and Micro-Fabrication Equipment.

EEM623 (Eng) Advanced Digital Signal Processing 3+0 7.5

Signal Models; Adaptive Filtering; Signal Spaces: Orthogonality; Hilbert and Banach Spaces; Projection Theorem Representation and Approximation: Least squares fitting; Minimum Mean Square Estimation; Wiener Filtering; Lp Optimization Linear Operators and Matrix Inversion; Matrix Factorizations: LU Factorization; Cholesky Decomposition; Unitary Matrices; Householder Transformation; Givens Rotations Eigenvalues and Eigenvectors: Matrix Diagonalization; PCA; Eigenfilters; Signal Subspace Techniques Singular Value Decomposition and Its Applications; Special Matrices and Their Applications: Toeplitz and Circulant Matrices; Durbin Algorithm; Lattice Filters.

EEM624 (Eng) Advanced Topics in Deep Learning 3+0 7.5

Machine Learning Basics; Deep Feedforward Networks: Gradient based learning; Optimization for Deep Models; Convolutional Neural Networks; Model-free Deep Reinforcement Learning; Model-based Deep Reinforcement Learning; Inverse Reinforcement Learning; Recurrent Neural Networks; Markov Decision Processes; Monte Carlo Methods; Linear Factor Models; Deep Generative Models: Variational autoencoders, Representation learning, Generative adversarial networks.

EEM625 (Eng) Advanced Topics in Digital Systems I 3+0 7.5

Combinational Logic Circuits; Sequential Logic Circuits; Finite State Machines; Logic Synthesis; Logic Simulation; Timing Analysis; Hardware Description Languages; VHDL; Hardware Software Codesign Methodology; Power; Performance; Security; Side-channel Resistant Design; Advanced Architectural Design; Partitioning; Hardware to Software Interfacing Techniques; Memory; Scratchpad; Cache; High-Level Synthesis; Data Types for HLS; Loops for HLS; Verification; Test; Design Space Exploration; Efficient Hardware Accelerator Design; Advanced FPGA Applications.

EEM641 (Eng) Sensor Array Signal Processing 3+0 7.5

Introduction: Sensor array geometry and mathematical model, Narrowband model and assumptions; Direction of Arrival Estimation: Classical methods, Spectral-MUSIC, Root-MUSIC, ESPRIT, Min-Norm, Stochastic and deterministic maximum likelihood methods, Spatial smoothing, Virtual array, Array interpolation, Cramer Rao lower bound; Array Signal Processing for Communications: Beamspace processing, Delay-and-sum beamforming, Filter and-sum beamforming, Capon, MVDR beamforming, Robust beamforming; Source Localization: Triangulation, Least squares methods, Error ellipse, Stansfield, Maximum likelihood methods, Time-difference of arrival techniques for source localization.

EEM642 (Eng) Linear Systems Theory II 3+0 7.5

Polynomial Matrices; Multi-Input Multi-Output (MIMO) Poles and Zeros; Minimal Realization of MIMO Systems; Equivalent Systems; Identification By Markov Parameters; State Feedback; State Observers; Static and Dynamic Output Feedback; Pole Assignment; Servomechanism Problem; Diagonalization; Composite Systems; Mathematical Description; Controllability; Observability; Stability; Controller Design.

EEM643 (Eng) Estimation Theory 3+0 7.5

Deterministic Least-Squares Parameter Estimation and the RLS Adaptive Filter Algorithm; Stochastic Least-Squares Parameter Estimation: Least-squares estimation and linear least-squares estimation, MAP estimation; ML estimation and Cramer-Rao lower bound, Innovations process; Wiener Theory For Scalar Processes: Continuous-time and discrete-time Wiener smoothing, Continuous-time and discrete-time Wiener-Hopf equations and causal Wiener filters., Application to prediction and additive white-noise problems; The Discrete-time Kalman Filter: Predicted estimator, Time and measurement-update, Filtered estimator forms, Linearized and extended Kalman filters, Kalman Filter For Smoothed Estimators: Bryson-Frazier formulas; Array Algorithms.

EEM645 (Eng) System Identification 3+0 7.5

Systems and Models; Signal Spectra; Singular Realization Behavior and Ergodicity Results; Simulation and Prediction; Modal Sets; Modal Structures and Identifiability; Nonparametric Time and Frequency Domain Methods; Transient Response Analysis and Correlation Analysis; Frequency Response Analysis; Parameter Estimation Methods; Using Frequency Domain Data to Fit Linear Models; Convergence and Consistency; Consistency and Identifiability; Asymptotic Distribution of Parameter Estimates; Subspace Methods for Estimating State Space Models.

| | | |
|---|--------------------------------------|-----------------|
| EEM646 (Eng) | Fuzzy Systems | 3+0 7.5 |
| Fuzzy Control from an Industrial Perspective; Capabilities and Restrictions of Fuzzy Control; Knowledge Based Controllers; Classical Set Theory; Mathematics of Fuzzy Control; Fuzzy Sets; Fuzzy Relations; Approximate Logic; Representation of a Rule Set. Fuzzy Knowledge Based Controller (FKBC) Design Parameters; Structure of FKBC; Rule Base; Knowledge Base; Decision Mechanism; Fuzzification and Defuzzification Methods; Nonlinear Fuzzy Control; FKBC Types; Adaptive Fuzzy Control; Stability of Fuzzy Systems. | | |
| EEM651 (Eng) | Signal Transforms | 3+0 7.5 |
| Concept of Signal Space; Signal Representations; Orthogonal Spaces and Transforms: Least-squares representation, decorrelation, 2D expansions; Short-time Fourier Transforms and Frames; Subband decomposition, Filterbank structure and implementation constraints; Time-frequency Representations and Wavelets; Relations of Discrete Wavelets and Subband Decomposition, Wavelet Design - Filterbank Design; Compression and Efficient representation applications. | | |
| EEM652 (Eng) | Optimal Control | 3+0 7.5 |
| Pontryagin's Minimum Principle; Hamilton-Bellman-Jacobi Equations; Calculus of Variations; Fundamental Concepts; Functionals of a Single Function; Functionals Involving Several Independent Functions; Piecewise-Smooth Extremals; Constrained Extrema; Optimal Control Problems; Necessary Conditions; Minimum-Time and Minimum-Energy Problems; Singular Intervals; Linear Quadratic Optimal Control; Finite Horizon and Infinite Horizon Problems. | | |
| EEM656 (Eng) | Large-scale Systems | 3+0 7.5 |
| An Overview of Large-Scale Systems; Interconnected Systems; Decentralized Systems; Hierarchical Systems; Multi Time-Scale Systems; Stability of Large-Scale Systems; Decentralized Fixed Modes; Decentralized Control; Hierarchical Control; Multi Time-Scale Control; Disjoint and Overlapping Decompositions; Constrained Optimization and Decentralized Optimal Control; Robust Controller Design Methods for Large-Scale Systems. | | |
| EEM657 (Eng) | Control of Robotic Systems | 3+0 7.5 |
| Robot Dynamics; Fundamental Control Methods Applied to Robotic Systems; Control Problems for Robot Manipulators; Position and Velocity Control; Multi-Input Multi-Output Control Systems and Robotics Applications; Cartesian Based Control Systems; Computed Torque Method; Robust Control for Robot Manipulators; Adaptive Control; Force Control; Hybrid Position and Force; Industrial Robot Control Systems. | | |
| EEM658 (Eng) | Adaptive Control | 3+0 7.5 |
| Real-time Parameter Estimation; Least-squares and Regression Models; Estimating Parameters in Dynamical Systems; Self-Tuning Regulators; Model-Reference Adaptive Systems; Properties of Adaptive Systems; Stability; Convergence; Robustness; Averaging; Auto-Tuning; Gain Scheduling; Design of Gain-Scheduling Controllers; Nonlinear Transformations; Practical Issues and Implementation. | | |
| EEM660 (Eng) | Discrete Event Systems | 3+0 7.5 |
| Introduction to Discrete Event Systems; Modelling Methods: Petri nets, Automata, Formal languages; Mathematical Formalisms; Types, and Properties of Modelling Methods; Supervisory Control Design: Forbidden state control approach for all modelling methods, Structural and behavioural control approaches for Petri nets. | | |
| EEM661 (Eng) | Advantage in Cryptology | 3+0 7.5 |
| Public-key cryptography: RSA systems, discrete logarithm systems, elliptic curve systems; Finite field arithmetic; Elliptic curve arithmetic: elliptic curves, point representation and the group law, point multiplication, Koblitz curves; Elliptic curve cryptography; Implementation issues, applications of elliptic curves: factoring, primality test. Public-key cryptography: RSA systems, discrete logarithm systems, elliptic curve systems; Finite field arithmetic; Elliptic curve arithmetic: elliptic curves, point representation and the group law, point multiplication, Koblitz curves; Elliptic curve cryptography; Implementation issues, applications of elliptic curves: factoring, primality test. | | |
| EEM667 (Eng) | Statistical Signal Processing | 3+0 7.5 |
| Signal Modeling; Least Squares Method; Pade Approximation; Stochastic Models; ARMA; AR; MA Models; Levinson Recursion; Lattice Filters; FIR and IIR Filters; Wiener Filter; FIR and IIR Types; Spectrum Estimation; Parametric and Nonparametric Methods; Minimum Variance Spectrum Estimation; Maximum Entropy Methods; Frequency Estimation; Adaptive Filters; FIR; IIR and Recursive Types. | | |
| EEM692 | Seminar | 3+0 7.5 |
| EEM790 (Eng) | Thesis | 0+1 30.0 |

| EEM890-0 | Thesis (Thesis Proposal) | 0+1 30.0 |
| EKiM510 (Eng) | Organic Chemistry of Biomaterials | 3+0 7.5 |
| <p>Carbohydrates: Monosaccharides, Polysaccharides, Synthesis and reactions; Lipids: Basic properties, Fatty acids, Triglycerides, Terpenes, Steroids, Reactions and synthesis; Amino Acids, Peptides, and Proteins: Reactions and synthesis, Primary, secondary and tertiary structures of proteins, Structures and functions of enzymes; Nucleic acids: Nucleosides, Nucleotides, DNA, RNA.</p> | | |
| EKiM511 | Advanced Organic Chemistry I | 3+0 7.5 |
| <p>Basic Concepts: Electronegativity, Hybridization, Molecular orbital theory, Bond formation, Formal charge and oxidation steps, Acid-base theory; Stereochemistry and Conformational Analysis; Reaction Thermodynamics and Kinetics; Nucleophilic Substitution Reaction Mechanisms (SN1, SN2); Elimination (E1, E2, E1Cb) and Addition Reaction Mechanisms; Carbonyl Compounds: Addition reactions, α-Position reactivity, Condensation reactions; Reactions of Carboxylic Acids and Their Derivatives; Conjugated Unsaturated Systems; Aromaticity and Reactions of Aromatic Compounds.</p> | | |
| EKiM513 | Gas Chromatography and Applications | 2+1 7.5 |
| <p>Fundamental Principles of Gas Chromatography; Components of Gas Chromatography; Injection Systems; Columns: Types of columns, Column Materials; Detectors; Mass spectrometer; Ionization: Electron impact, Chemical ionization; Mass Analyzer: Magnetic sector, Quadrupole, Time of flight, Ion trap; Analysis: Selecting and preparation of samples, Method development for temperature programming, Qualitative analysis, Quantitative analysis, Structural analysis with mass spectrometer.</p> | | |
| ENM501 | Design and Analysis of Experiments | 3+0 7.5 |
| <p>Introduction to Design of Experiments; One Factor Variance Analysis-ANOVA; Model Adequacy Checking; Blocking and Confounding; Introduction to Factorial Design; 2k Design; Fractional Factorial Design; 3k Factorial Design; Mixture Design and Analysis; Response Surface Method.</p> | | |
| ENM502 | Production Management Systems | 3+0 7.5 |
| <p>Concept of Computer Aided Production Management; Production Lines and Their Modeling; Using Analytical and Heuristic Approaches in Assembly Line Balancing; Pull and Push Production Systems; Just in Time Production (JIT) Approach; Kanban Systems and Design of Kanban Systems; Alternative Systems to Kanban; Optimum Production Technology Approach; Group Technology and Cellular Manufacturing; Design and Application of Flexible Manufacturing Systems; Production Systems Scheduling and New Trends in Control.</p> | | |
| ENM503 | Advanced Techniques in Linear Programming | 3+0 7.5 |
| <p>Theoretical Foundation of Linear Programming and Simplex Algorithm: Big M, Two-Phase, Single-Artificial Variable, Dual Simplex, Revised Simplex Algorithms; Duality Theorem and Its Applications; Sensitivity Analysis and Parametric Programming; Goal Programming and Its Applications; Data Envelopment Analysis and Its Applications; Cutting Planes; Bounded Variable Technique; Interior Point Algorithms.</p> | | |
| ENM504 | Decision Making Methods | 3+0 7.5 |
| <p>Decision Analysis; Decision Analysis Basic Concepts; Decision Making Under Certainty; Uncertainty and Risk; Bayes Decision Theory; Decision Tree; Utility Theory; Multi Criteria Decision Making; Analytical Hierarchy Process; ELECTRE; Decision Model Applications.</p> | | |
| ENM505 | Sequencing and Scheduling | 3+0 7.5 |
| <p>Role of Sequencing and Scheduling; Classes of Scheduling Problems; Single Machine Scheduling; Parallel Processing and Batch Sequencing Assembly Line Balancing Problem; Network Based Scheduling; Manpower Scheduling; Common Scheduling Problems and Heuristics: Backward-forward Heuristic; Early and Late Penalties; Common Due Date; Scheduling with Meta-Heuristics: Simulated Annealing and Taboo Search.</p> | | |
| ENM508 | Reliability of Systems | 3+0 7.5 |

The Concept of Reliability; Obtaining Reliability Function; Weibull Distribution; Utility Time of Elements; System Reliability as a Function of Component Breakdown; Reliability Block Diagrams and Failure Trees; Abrasion and Reliability; Reliability of Serial and Parallel Systems; Network Reliability; Measurements and Tests of Reliability; Applications of Reliability in Manufacturing and Service Systems.

ENM509 Supply Chain Management 3+0 7.5

Basic Concepts of Supply Chain and Logistics Systems; Using Mathematical Models and Numerical Techniques in the Analysis of Supply Chain and Logistics Systems; Analyzing Basic Components of Supply Chain: Procurement, Inventory, Production and Transportation; Structural Analysis of Production and Inventory Systems; Modeling Stochastic Supply-Timed Inventory Systems and Solution Approaches; Modeling Multi-Stage Inventory Systems and Solution Approaches; Coordination of Material, Information and Financial Flows in Supply Chain; SCOR Model.

ENM512 Research Techniques in Human Engineering 3+0 7.5

Introduction to Human Factors Engineering: Definition, Scope, and Aims; The Importance of Human Factors Engineering with Respect to Industrial Engineering and Management; Evolution of Working; Evolution of the Supply of Performance; Anatomical and Mechanical Structure of the Human Body; Analysis of Working Environments with Respect to Anthropometry; Working Conditions; Designing Workplaces According to Ergonomics Principles; Machine System Protections; Work Accidents; Shift Working.

ENM514 Mathematical Programming 3+0 7.5

Importance of Modeling, Difficulties in Solving Process; Linear Modeling Examples; Integer Linear Modeling Examples; Network Models; Fundamental Solution Techniques for Linear Models; Fundamental Solution Techniques for Integer Linear Models; Non-Linear Modeling Examples; Fundamental Solution Techniques for Non-Linear Models; Introduction to GAMS and Lingo Software; Rules to Express a Model Using GAMS; Solving a Model With GAMS and Interpreting Solution Report; Tricks About Modeling and GAMS.

ENM515 Energy Systems 3+0 7.5

Basic Concepts in Thermodynamics: Internal Energy; Enthalpy; Open and Closed Systems; Entropy and Exergy; Power Cycles; Power Cycles; Solar Energy: Passive Solar Systems; Active Solar Systems; Geothermal Energy: Heating; Ground Source Heat Pumps; Power Generation; Wind Energy: Wind Measurements and Power Estimation; Wind Energy: Wind turbines; Economic Analysis of Energy Systems.

ENM516 Multi Criteria Decision Making 3+0 7.5

Multi Criteria Decision Making (MCDM) Terminology; MCDM Concepts; Relation between Multi Criteria and Multi Objective Decision Making; Methods for Discrete MCDM Problems; Multi Attribute Utility Theory; Analytic Hierarchy Process and Analytic Network Process; Outranking Procedures; ELECTRE I Method, ELECTRE III Method, Promethee Method; Theories of Interactive Methods; Interactive Approaches to Linear and Quasiconcave Utility Functions.

ENM517 Special Topics in Facilities Planning 3+0 7.5

Facilities Planning Process; Quantitative Models for Facilities Planning; Facility Location Models; Constructing Iso-Cost Contour Lines; Special Facility Layout Planning Models and Design Algorithms; Machine Layout Models; Conventional Storage Models; Automated Storage and Retrieval Systems; Order Picking Systems; Fixed-Path Material Handling Models; Waiting Line Models; Simulation Models.

ENM518 Metaheuristics 3+0 7.5

Optimization: Models and methods; Basic Concepts in Metaheuristics: Performance analysis for metaheuristics; Single Solution Based Metaheuristics: Local search, Simulated annealing, Taboo search, Iterated local search, Variable neighborhood search, Guided local search; Population Based Metaheuristics: Evolutionary algorithms, Scatter search, Ant colony optimization, Particle swarm optimization, Bees colony, Artificial immune system.

ENM519 Strategic Choice and Planning in International and National Context 3+0 7.5

Basic Concepts of Strategic Management: Vision, Mission, Strategy, Policy; Strategic Management in Business: Definition, Purpose and characteristics of strategic management, Strategic management process and phases; Competitive Analysis Providing Strategic Choice and Decision-Making in Competitive Environment and Portfolio Analysis; Structure of the Strategy Implementation Process and Style of Planning; Review, Evaluation and Control of Strategies; Analysis of the Problems Faced by National and International Firms to Select Market; Market Entry Modes; Joint Venture; Direct Foreign Investment; International Strategic Alliances.

ENM520 Advanced Management Technics 3+0 7.5

Basic Concepts of Advanced Management; Classical approaches, Scientific management, First managerial theories, Bureaucracy approaches, Human relations and Behavioral science approaches; First Contributions to the Theory of Organization and Decision-Making; Systematist Thought and the Emergence of Open Systems Approach; Modern

Examples of extremal problems; Mathematical modeling; Convex sets and convex functions; Directional derivative; Subdifferential; One-variable unconstrained optimization; Line search without using derivatives; Bisection search method; Newton's method; Multidimensional search using derivatives; Method of steepest descent; Multivariable method of Newton; Subgradient Optimization.

ENM604 Constrained Optimization 3+0 7.5

General Definition of Constrained Optimization Problems; Convexity Properties; Optimality Conditions for Constrained Optimization Problems; Fritz John Optimality Conditions, Karush-Kuhn-Tucker Optimality Conditions; Definition of the Dual Problem and Formulation; Duality Theorems; Lagrangian Duality; Saddle Point Optimality; Solution Methods in Constrained Optimization; Subgradient Methods; Cutting Plane Method; Penalty Function Methods; Augmented Lagrangian Penalty Functions; Augmented Lagrangian Method of Multipliers; Modified Subgradient Method.

ENM605 Operations Research in Healthcare 3+0 7.5

Fundamentals of Operations Research; Modeling; Assignment Problems: Nurse-to-patient assignment problems; Healthcare Planning: Demand forecasting, Location selection, Capacity planning; Queue Management and Design; Healthcare Systems Scheduling Problems: Patient scheduling, Nurse scheduling; Workforce and Workload Models; Workload Balancing; Application of Decision Making Methods.

ENM606 Multi-Objective Optimization 3+0 7.5

Fundamentals of Decision Making in Multi-objective Environment; Ordering Relations in Vector Spaces; Cones; Ordering Relations and Cones; Various Concepts of Efficient Solutions in Multi-objective Optimization; Pareto Optimal Points and Pareto Optimal Solutions; Characterization of Efficient Solutions; Scalarization Methods: Epsilon constraints method, Benson method, Conic scalarization method; Comparison of Different Scalarization Methods; Goal Programming.

ENM608 Fuzzy Sets and Systems 3+0 7.5

The Concept of Fuzziness and Linguistic Variables; Mathematical Expression of Fuzziness; Definition of Membership Function; Construction of Membership Functions; Fuzzy Numbers and Variables; Fuzzy Set Operations: Algebraic operations, α -cuts; Convex Fuzzy Sets; Transpose Techniques; Analysis of Decision Models in Fuzzy Environments; Fuzzy Decision Models; Fundamental Application Areas of the Fuzzy Set Theory in Industrial Engineering.

ENM610 Finance Engineering 3+0 7.5

Introduction to Brownian Motion: Properties and financial applications; Stochastic Processes with Jump; Poisson Process; Options; Options as an Instrument of Volatility; Tools for Volatility Engineering: Volatility swaps and volatility trading pricing; Tools in Financial Engineering: Classical Black- Scholes option pricing model, Merton's three asset option pricing model; Jump - Diffusion Option Pricing; Cox- Rubenstein Model; Optimal Portfolio and Consumption Models; Scheduled and Unscheduled Stochastic Events.

ENM612 Data Mining with Mathematical Programming 3+0 7.5

Overview of Data Mining; Data Mining Problems: Clustering, Classification, Association analysis; Clustering Problems and Solution Methods: Mathematical programming to solve clustering problem; Classification Problems and Solution Approaches: Approaches based on mathematical programming, Robust linear programming, H-polyhedral separation, Max-min separation, Support vector machines; Classification Approaches Based on Polyhedral Conic Functions (PCF): Polyhedral conic functions algorithm, Integer programming model, Kmeans clustering for large-scale problems; Association Analysis Problems and Solution Approaches.

ENM614 Material Handling and Warehousing Systems 3+0 7.5

Fundamental Concepts of Material Handling: Importance and scope of material handling in manufacturing, Principles, Unit load; Material Handling Systems: Vehicles, Conveyors, Carousels, Automated guided vehicles (AGV); Warehousing: Importance of warehousing, Components, Operations; Warehouse Site Selection; Warehouse Design: Stock keeping unit (SKU), Storage methods, Racking systems, Warehouse layout; Automated Storage and Retrieval Systems (AS/RS); Efficiency in Material Handling and Warehousing; Measurement of Warehouse Performance; Modeling and Simulation of Material Handling and Warehousing Systems.

ENM616 Ergonomics and Occupational Biomechanics 3+0 7.5

Ergonomics; Human Body: Motion system, Neural system, Energy expenditure, Muscular and skeletal systems; Applied Anthropometry; Topics Related to Work Physiology and Biomechanics; Principles of Ergonomics at Work; Engineering Anthropometry and Its Applications; Energy Expenditure at Work; Work Design: Principles of work design; Occupational Disorders; Low-Back Disorders.

ENM618 Advanced Techniques in Simulation 3+0 7.5

General Principles of Simulation; Modeling of Complex Systems; Establishment of Reliable and Valid Simulation Models; Comparison and Evaluation of Alternative System Structures; Variance Reduction Methods; Experimental Design and

Optimization; Simulation of Manufacturing and Material-Handling Systems with ARENA Program; Simulation of Computer Systems; Simulation of Computer Networks.

ENM620 Heuristics and Matheuristics in Operations Research 3+0 7.5

Mathematical Modeling: Location problems, Vehicle routing problems, Location-routing problems, Scheduling problems; Heuristics: Construction heuristics, Improvement heuristics; Metaheuristics: Simulated annealing, Ant colony algorithm, Genetic algorithm, Variable neighborhood search, Adaptive large neighborhood search; Decomposition Matheuristics: Cluster first route second approaches, Two phase approaches, Partial optimization approaches, Rolling horizon approaches; Improvement Matheuristics: One-shot approaches, MILP models for local optimization; Multi objective matheuristics.

ENM627 Dynamic Programming 3+0 7.5

Theory and Practice of Dynamic Programming; Sequential Decision Making Over Time; Optimal Value Function and Bellman's Functional Equation for Finite and Infinite Horizon Problems; Introduction of Solution Techniques: Policy iteration, Value iteration, and Linear programming; General Stochastic Formulations; Markov Decision Processes; Dynamic Programming Applications: Network flow, Resource allocation, Inventory control, Equipment replacement, Scheduling and queueing control.

ENM629 Mathematical Statistics 3+0 7.5

Parameters and Characteristics; Statistical Estimator: Requirements, Methods of construction, Distributions of statistical estimators; Design of an Experiment and Analysis of Variance; Regression and Correlation Models; Conditional Distribution; Residual Analysis in Linear and Nonlinear Regression; Basic Concepts of Nonparametric Statistics; Location Function and Location Model; Tolerance Limits; Tests Based on Binomial Distribution; Contingency Tables; Nonparametric Methods Based on Ranks; Nonparametric Regression Methods; Statistics of Kolmogorov-Smirnov Type; Tests on Independent Samples.

ENM692 Seminar 3+0 7.5

ENM790 Thesis 0+1 30.0

ENM890 Thesis 0+1 30.0

ENM890-0 Thesis (Thesis Proposal) 0+1 30.0

ENT501 Industrial Design I 3+0 7.5

Scale; Function; Aesthetic; General Design Methods; Project Planning; General Design Strategy of Organization and Relationship Between Policies; Principles and Methods Valid in Plan that Produced for a New Product; Project Applications; Analysis of Design Language in Product Design Processes; Design Challenging Conditions; Interaction Analysis; Cultural Analysis.

ENT502 Industrial Design II 3+0 7.5

Rapid Prototyping Methods and Applications; Formal and Functional Analysis of Potential Trends; Development of Alternative Solutions and Evaluation of Methods Used in Testing Steps; Using High Technology for Product Development end Sample Analysis; Examining Design and Cost Relation.

ENT503 Design Management 3+0 7.5

Establishment of Design Units in Industrial Production; Examining the Designer's Role in this Establishment From Sketch Phase to Prototyping; Management of Design Group; Determining the Design Policy in Company; Comparison of Design Management Processes With Different Production Systems and Different Cultures.

ENT504 Portfolio Presentation Techniques 3+0 7.5

Personalization Methods in Preparation and Presentation of Portfolio; Evaluation of Works By Exchanging Ideas in Group Criticizing Meetings and Proposing New Solution Methods; Interactive CD Or URL Portfolio Works; Modern Portfolio Presentation Techniques.

ENT506 Media and Design 3+0 7.5

Concept of Communication; Theories and Principles of Communication; Communication Methods; Visual and Audio Visual Tools and their Usage; Effects of Visual and Audio Visual Tools; Future of Communication and its Possible Effects on Design; Multimedia and Internet; Communication By Means of Widespread Usage of Intranet and Such Networks and Communicating Feature of Design.

ENT507 Quality in Industrial Design 3+0 7.5

What is Quality?; How Can Quality Can Be Achieved in Design?; Aims and Needs of Off-Line Quality Control Methods; Developing Quality in Design; Quality Function Deployment and Taguchi Method; Reflection of Customer Needs and Requirements to the Design and Customer.

ENT508 Product Identity 3+0 7.5

Defining the Development Process of Product Identity in Industrial Production; Role of the Corporate Identity in the Product Identity; Effects of Cultural Structure and Technological Development on Product Identity; Brand Concept and Creation Process of a Brand.

ENT509 Cultural Problems 3+0 7.5

Definition of Culture; Human and Culture; Affects of Notion of Culture on Design; Definition of Design and Industrial Design as a Cultural Notion; Cultural Problems in Design and Solutions; Intercultural Relationships and Deviations on Design Dimension.

ENT510 New Approaches in Design 3+0 7.5

German Expressionism; New Expressionism; Late Modernism; Pop Culture and Anti-Design, Postmodernism; New Design; Deconstructionist; Kitch; Minimal Design, Design and Emotion; Phenomenological Approach; Conceptual Design.

ENT511 Advanced Computer Aided Manufacturing 3+0 7.5

Applications of Computer Aided Manufacturing; Production Applications of STL Modules; Modeling and Analysis; CNC Machines And Analysis of Production Formats, Computer Aided Applications on Worknc; Molds and Molding Technologies; Real Production of Application Models.

ENT512 Role of Sector in Product Development 2+2 7.5

Product Development Process; Product Planning; Defining Customer Needs; Product Features; Concept Development; Concept Evolution; Concept Testing; Product Architecture; Industrial Design; Design for Manufacturing; Prototyping; Product Development Economics; Procet Management.

ENT513 Creation of Brand and Market Strategies 3+0 7.5

Product Identity Concept in Design; Corporate Identity Concept in Design; Brand Concept: Creating a brand, Presentation of a brand, Brand and target market adaptation, Brand definition; Brand and Product Relation; Marketing Concept; Evaluation of Marketing Methods; Marketing the Brand: Collecting market data, Evaluating market data; Determining Marketing Strategies; Adaptation of Brand and Marketing Strategies; Testing Marketing Strategies: Collecting data, Evaluating data; Modifications on Marketing Strategies According to Gained Information.

ENT514 Theory and Origins of Sustainable Design 3+0 7.5

Historical Evolution of Sustainable Design: Human-environment relations before industrial revolution, 1960-1980 period, 1980-2000 period, 2000 to today; Sustainable Design Approaches: Green design, Ecodesign, Sustainable design, Life cycle assessment, Product service systems; Environmental Criteria; Paradigm Shift for Industrial Design; Social and Ethical Criteria; Perception of Sustainable Design and Risks; Education for Sustainable Design; Research for Sustainable Design.

ENT515 Technical Analysis in Design 3+0 7.5

ENT516 Form and Meaning in Product Design 3+0 7.5

ENT518 Remote Design Research 3+0 7.5

ENT519 Advanced Presentation Techniques I 2+2 7.5

First Step of Visualizing the Design; Sketch and Sketch Applications; Sketching Techniques; Black Lead Pencil; Marker; Pastel; Gouache; Colored Pencil; Presentation Posters; Aim; Definition; Dimensions and Poster Samples; 3D Presentation Techniques; Modeling and Prototyping Methods; Modeling Applications; Prototyping and Evaluations.

| | | |
|---|---|-----------------|
| ENT520 | Advanced Presentation Techniques II | 2+2 7.5 |
| Personalization Methods in Preparation and Presentation of Portfolio; Evaluation of Works by Exchanging Ideas in Group Criticizing Meetings and Proposing New Solution Methods; Interactive CD Or URL Portfolio Works; Modern Portfolio Presentation Techniques. | | |
| ENT521 | Computer Aided Design I | 2+2 7.5 |
| Pixel and Vector Based Software; Menus and Virtual Tools Used in Two Dimensional Software; Image File Formats: Jpg; Jpeg; Bmp; Psd; Tiff; Tga; Resolution; Creation of Image Files; Determining the Size and Resolution; Processing; Recording; Transferring Images to Virtual Medium; Scanning; Preparing Images for Print; Plot Settings and Plotting. | | |
| ENT522 | Computer Aided Design II | 2+2 7.5 |
| Introduction of the Concept of Designing in a Virtual Medium; Assistant Virtual Tools Used in Fashion Design; Introduction and Using of these Tools; Using the Virtual Tools for Production; Joining Design and Production Processes in Virtual Medium; Introduction and Use of Production Oriented Software; Applications and Evaluations. | | |
| ENT523 | Visualisation | 3+0 7.5 |
| Concept of Visualization: What is visualization, Source, Message, Channel, Target, Feedback, Human factor in visualization; Perception; Signs; Elements of Visualization; Visualization; Tools of Visualization and Usage of Them; Importance of Visualization in Design; Product and User Relations; True Presentation of Product Itself to User; Importance of Visualization in Product and User Interaction; Ergonomics and Visualization. | | |
| ENT525 | Advanced Computer Aided Industrial Design I | 2+2 7.5 |
| CAD/CAM Concepts (Computer Aided Design and Manufacturing Concept), CAID Design Steps and Software, Catia V5 Interface- Catia V5 Basic Structure, Integration Catia, V4-V5, Sketcher Modules, Basics of Geometrical-Dimensional Analysis, Basic of Solid Modeling, Assembly Design, Generative Drafting, Interactive Drafting, Photo-Realistic Render. | | |
| ENT526 | Advanced Computer Aided Industrial Design II | 2+2 7.5 |
| Definition of parametric surfaces in NURBS-MESH concept; Types of 3D images; Ligts and Materials; Selection of Appropriate visualization Methods; Works of Render Images; 3D vector based software Applications; Interactive Visualization in 3D; Generation of interactive 3D images. | | |
| ENT527 | Automotive Industry and Design | 3+0 7.5 |
| Development of Industrial Design in World Automotive Industry: Band system (mass production), Periods of war, Economic crisis; Innovation Trends: New lines, Advances in body and engine technology, End of the unlimited stylism period in the US; Towards the Oil Crisis and Economic Models; Increase in Type of Models and Emergence of New Manufacturers; Development of Automotive Industry in Turkey: First automotive products in Turkey, Import substitution and first domestic manufacturing, Export-oriented industrialization policies, Search for new design, New investors and manufacturers. | | |
| ENT528 | Sustainable Design Practice | 3+0 7.5 |
| Non-Sustainable Design; Life Cycle of Products: Raw material, Production, Transportation, End of Life; Sustainable Design in Local and Global Context; Local and Global Social Problems and Designer Responsibilities; Design for Social Innovation; Research for Sustainable Design Practice; Ecodesign Practice; Sustainable Design Practice; Guidance Software for Sustainable Design Practice. | | |
| ENT529 | Ocular Culture and Design Thinking | 3+0 7.5 |
| Linear History of Visuality: Image, Techné and causality principles, Methods of record and appearance of image forms; Non-linear History of Visuality: Technique, Technology, Consumption society, Production paradigm, and economics and politics of image; Design Tools and Image: Thinking practice, Mind and representation problem, Abstraction, Meaning, Language, Schema, Form, Geometry, Mechanics, Electronics, Binary representation, Plasticity; Static Meaning and Being; Linear thinking and rhizomatic thinking. | | |
| ENT592 | Seminar | 3+0 7.5 |
| ENT790 | Thesis | 0+1 30.0 |
| FBE510 | Ethics of Science and Research Techniques | 2+0 7.5 |

General Principles of Ethics and Application Fields: Theoretical introduction to ethics, Theory of ethics, Philosophy of ethics of science; Ethics of Scientific Research: Basic principles of scientific ethics, Ethical evaluation in scientific research; Publication Ethics in Production of Information: Description of scientific authorship, Ethics and law, Legal property rights, Reasons, Kinds and prevention of scientific misleading; Research Methods and Techniques: Investigation of research process, Investigation of research methods, Finding required literature about the subject, Obtaining data and evaluation, Methods of report writing.

FBE510-O Ethics of Science and Research Techniques (Online) 2+0 7.5

General Principles of Ethics and Application Fields: Theoretical introduction to ethics, Theory of ethics, Philosophy of ethics of science; Ethics of Scientific Research: Basic principles of scientific ethics, Ethical evaluation in scientific research; Publication Ethics in Production of Information: Description of scientific authorship, Ethics and law, Intellectual property rights, Reasons, Kinds and prevention of scientific misleading; Research Methods and Techniques: Investigation of research process, Investigation of research methods, Finding required literature about the subject, Obtaining data and evaluation, Techniques of report writing.

FBE601 Design, Science and Communication 3+0 7.5

Industrial Revolution in the Middle Ages: Structure of Modern Science; Kepler, Mechanical Science and Philosophy; Research on Design Problems; Concepts of the New Movements; Formation of Modern Science; Organization of Scientific Initiative and Communication; Structure of Scientific Revolutions; Concept of Nature and Modern Life: Inner Logic of Design Thinking; Technique of Replication and Corporations; Design, Communication and Perception.

FiN528 Sport Finance 3+0 7.5

Financial issues in sport; basic financial concepts; financial systems and how they operate; business structure; financial statements; approaches to financial planning; obtaining funding; capital stocks-bonds; capital budgeting; short-term financial management; inventory and production management; taxation and legal issues; spending earnings.

FiZ501 Mathematical Physics 3+0 7.5

Formal Definitions of Vectors; Scalars and Invariants; Orthogonal Transformations; Cartesian Tensors; Vector and Tensor Fields; Generalized Coordinates; General Coordinate Transformations; Gradient; Divergence; Curl and Laplacian in Generalized Coordinates; Formal Properties of Matrices; Eigenvalue Problem; Cayley-Hamilton's Theorem; Functions of Matrices.

FiZ503 Ion Exchange 3+0 7.5

Crystal Systems; Analysis of Crystal Structures; Classification of Crystals According to Their Bound-structures; Metallic Crystals; Ionic Crystals; Covalent Crystals; Molecular Crystals; Packing in a Crystal; Faraday's Laws of Electrolysis; Molar Conductivity; Arrhenius' Theory; Debye-Hückel's Theory; Ionic Mobility; Transportation Coefficients; Ionic Conductivities; Ions in any Solution; Activity Coefficients in Ionic Media.

FiZ505 Physical Adsorption 3+0 7.5

Introduction to Physical Adsorption; Historical; Adsorption Isotherms; Adsorption Forces; Thermodynamics of Adsorption; Adsorbents; Porous and Nonporous Solids of High Surface Area; Classification of Pore Sizes; Micropores, Mesopores and Macropores; External and Internal Surface; Particle Size Distribution; Relationship Between Specific Surface and Particle Size Physical Adsorption of Gases by Nonporous Solids; Type II Isotherm; BET Model; Mathematical Nature of the BET Equation; Application of the BET Equation to Experimental Data; Point B Method; Determining the Molecular area; Step Like Isotherms.

FiZ507 Quantum Mechanics and Molecular Spectroscopy 3+0 7.5

General Formalism of Quantum Mechanics; The Harmonic Oscillator; Angular Momentum in Quantum Mechanics; Spin; Identical Particles Systems; Perturbation Theory; Quantum Mechanics Explanation of Molecular Structure; The Absorption and Emission of Electromagnetic Wave by Molecules; Rotational and Vibrational Spectrum of Two-Atom Molecules; Microwave Spectroscopy; Vibrational Spectroscopy.

FiZ508 Quantum Mechanics 3+0 7.5

Schrödinger Wave Equation; Eigenfunction and Eigenvalues; One Dimensional Potentials; General Formalism of Wave Mechanics; Operators in Quantum Mechanics; N-Particle Systems; The Schrödinger Equation in Three Dimensions; Angular Momentum and Spin; Spherical Symmetric Potential; Approximate Methods and Perturbation Theory; Symmetry and Transformations; Identical Particles; Scattering Theory.

FiZ509 Instrumental Analysis Methods 3+0 7.5

Physical Properties of Matter and Electromagnetic Waves; Absorption Rules; Uv-Vis Spectroscopy; Vibrational Spectroscopy; Infrared Spectroscopy; Raman Spectroscopy; Nuclear Magnetic Resonance Spectroscopy; Mass Spectroscopy; Molecular Spectroscopic Applications.

FiZ510 Evolution of Stars 3+0 7.5

Birth of Stars; Interstellar Environment; Gravitation; Stellar Formation; The Virial Theorem; The Hertzsprung-Russell Diagram; Evolution of Stars on the Main Sequence; Advanced Levels On Stellar Evolution; Evolution of the Sun as the Main Sequence Stars; Evolution of Small, Medium and Massive Stars; Nuclear Reactions on Stars; Hydrogen Flash and red Giant Level; Helium Flash; Carbon Flash; Neon Flash; Oxygen Flash; Silicon; Sulphur and Magnesium Flash; Death of Stars; White Dwarfs; Physical Formation of White Dwarfs; Degenerate Electron Gases; Falling Luminosity and Internal Structure; Collapse of Nuclei and Supernovae Explosion, Classification of Supernovae; Physical Structure of Nebula; Properties of Type II Supernovae Explosions; Properties of Type Supernovae Explosions; Neutron Stars; Binary Pulsar Systems; Observed Rotational Rate Increase; Physical Structure of Neutron Stars; Rotation and Magnetic Fields of Neutron Stars; Pulsars; Neutron Stars Comparison With Pulsars; Producing

FiZ512 High Energy Astrophysics 3+0 7.5

Analysis of Light; Atoms and Sub Atomic Particles; Stimulation and Ionisation; Electromagnetic Spectrum; Radio Astronomy; X-ray and γ -ray astronomy; Ultraviolet and Infrared Astronomy; Neutral Hydrogen and Molecular Line Astronomy, Optical Astronomy; Theoretical Astronomy. Cosmic Ray Physics; Ionisation Losses and Non-relativistic Treatment; Relativistic Case and Ionisation Losses; Ionisation Losses of Electrons; The radiation of accelerated Charged Particles; Bremsstrahlung; Non-relativistic and Thermal Bremsstrahlung; Relativistic Bremsstrahlung. Interactions of High Energy Photons; Photoelectric Absorption; Compton Scattering; Electron Positron Pair Production; Cherenkov Radiation; Electron-Positron Annihilation and Positron Production Mechanism. Nuclear Interactions; High Energy Protons; Cosmic Ray Nuclei; Nuclear Emission Lines; Cosmic Rays in Atmosphere. Detectors For High Energy Particles; X-ray and γ -rays; Study of High Energy Particles; Gas-Filled Detectors-Proportional Counter

FiZ514 Electromagnetic Wave Theory 3+0 7.5

Complex Vectors; Complex Algebra; Complex Representation of Time-Harmonic Scalars; Real Vectors; Complex Vectors; Time Averages; Maxwell Equations; Maxwell Equations for Time-Harmonic Fields; Lorentz Force Law; Poynting's Theorem; Uniform Plane Waves; Uniform Plane Waves in Free Space; Polarization; Plane Waves in Dissipative Media; Reflection and Transmission of Waves; Boundary Conditions; Reflection and Transmission at a Dielectric Interface; Reflection by Perfectly Conducting Planes.

FiZ515 Analysis of the X-ray Spectrum 3+0 7.5

X-Rays; The Properties of the X-Rays; Production of the X-Rays; Continuous Spectrum; Characteristic Spectrum; Crystalline Structures; Directions and Planes in the Lattice; Diffraction Theory; Bragg's Law; Directions of the Diffraction; Diffraction Methods; Diffraction by the Atoms; Diffraction by the Electrons; Diffraction by the Unit Cells; Calculations of the Intensities; Experimental Methods in X-Ray Diffraction; Laue Method; Rotating Crystal Method; Powder Method; The Use of Diffraction Pattern.

FiZ522 Geometric Algebra and Applications 3+0 7.5

Vectors, Complex Numbers and Matrices: Pauli Spin Matrices and Spinors; Geometric Algebra and Applications: Subspaces, Bivectors, Three-vectors, Quaternions, Multi-vectors, Inner, Outer and Geometric Product, Matrices Representation of Cl_2 and Cl_3 ; Algebraic Operations in Geometric Algebra: The Rank and Inverse of Multi-vector, Pseudoscalar, The Dual of Multi-vector, The Projection and Perpendicular Component of Multi-vector; Reflection Operations in Geometric Algebra: Reflection Operations in Euclidian Plane, Reflection Operations in Euclidian Space; The Rotation Operations in Geometric Algebra: Rotation Operations in Euclidian Plane, Rotation Operations in Euclidian Space; Geometric Algebra Application in Physics: Mechanic, Electromagnetism, Quantum, Molecular Physics.

FiZ523 Optoelectronic Physics I 3+0 7.5

Quantum Mechanics and Statistical physics of Electrons; Classical description of physics, Quantum description of physics, The Schrödinger equation for electrons, The free electron problem, Filling of electronic states: statistics, Scattering of electrons, Electrons In Crystals: Semiconductor Bandstructure; The challenge of solid state electronics, Periodicity of a crystal, Basic lattice types, Electrons in a periodic potential, Metals, Semiconductors, and Insulators, Holes in semiconductors, Bandstructures of some semiconductors, Modification of bandstructure, Doping Of Semiconductors; Intrinsic carrier concentration, Doping: donors and acceptors, Carriers in doped semiconductors, Modulation doping, Transport And Optical Properties In Semiconductors; Scattering in semiconductors, Velocity-Electric field relations, Very high field transport: breakdown, Carrier transport by diffusion, Transport by drift and diffusion, Optical properties of semiconductors, Charge injection and quasi-f

FiZ524 Optoelectronic Physics II 3+0 7.5

Junctions In Semiconductors: P-N Diodes; Device demands, The unbiased p-n junction, P-N junction under bias, The real diode: consequences of defect, High voltage effects in diodes, Modulation and switching: ac response, Application of diodes, Semiconductor Junction With Metals And Insulators; Metals as a conductors: interconnects, The Schottky barrier diode, Ohmic contacts, Insulator-semiconductor junctions, Application and technology issues, Optoelectronic Devices.

FiZ525 Some Biophysical Techniques Connected With Waves 3+0 7.5

Microscope and Some Special Microscope Techniques, Light Microscope, Compound Microscope, Immersion Microscope, Acoustic Microscope, UV Microscope, Polarization Microscope; Electron Microscope, Electron Waves, Electrostatics Lens, Magnetic Lens; X-Rays and Applications, X-Rays Spectrum, Absorption of X-Rays, X-Rays Diffraction; Ultrasound and Applications, Absorption of Sound, Acoustic Impedance; Holography; NMR and Applications, Resonance Principles, Fundamental Concepts, Spin Magnetic Moment of Electron; Doppler and Applications.

FiZ526 Classical Mechanics 3+0 7.5

Kinematics of a Particle; D'alambert Principle and Lagrange's Equations; Simple Applications of Lagrange Formulations; Calculus of Variations; Hamilton's Principle; Symmetry Properties of Conservation Theorems; Two-Body Central Force Problem; Virial Theorem; Kepler's Problem; Rigid Body Kinematics; Euler's Angles; Euler's Equations.

FiZ527 Advanced Statistical Physics 3+0 7.5

Main Principles of Statistical Physics: Statistical distribution, Statistical independence, Liouville theorem, Statistical matrix, Distribution in quantum statistics, Energy, Entropy, Permanent increment principle of entropy; Thermodynamic Magnitudes: Temperature, Pressure, Work and heat amount, Heat function, Free energy and thermodynamic potential, Adiabatic process and the process of Jule-Thompson; Gibbs Distribution: Gibbs and Maxwell distributions, Free energy and Gibbs distribution, Thermodynamic perturbation theory, Gibbs distribution of system with variable number of particles, Finding out thermodynamic rules from Gibbs distribution; Theory Of Ideal Gas: Boltzman distribution, Unbalanced ideal gas, Monoatomic gas, Twoatomic gas, and polyatomic gas; Fermi And Bose Distribution: Fermi distribution, Bose distribution, Degenerated electronic gas, Degenerated Bose gas, Radiation of black substance; Non-Ideal Gas: Serial development according to the density, Formula of Van Der Waals, Totally ionized gas; Balance Circumstances of Phase: Critical points, Properties of substances close to the critical points; Fluctuation: Gauss distribution, Fluctuations of thermodynamic magnitudes, Fluctuations in ideal gas, Formula of Poisson.

FiZ528 Adsorption Technology 3+0 7.5

Adsorption as a process; Basic Concepts, Regeneration, Practical Guidelines, Moving Bed, Experimental Design and Testing, Adsorption Forces, Porosity, Surface Function Groups, Isostere, Isobar, Classification of Adsorption Isotherms: Equilibrium Models, Single Component Adsorption, Multi Component Adsorption, Adsorption Kinetics: External Diffusion, Internal Diffusion, Diffusion Model; Surface Diffusion Model, Combined Diffusion Model Concept of Differential Reactor; Theoretical Considerations, Materials, Equilibrium Studies, Kinetic Studies, Conclusions.

FiZ529 Thin Film Characterization 3+0 7.5

Importance of Materials Characterization; Techniques of Structural Characterization: X-ray analysis, Texture coefficient, Grain size, Morphological analysis, Determination of thickness; Optical Characterization of Materials: Optical properties, Optic band gap, Determination of direct and indirect band gap; Optical Constants: Some dispersion relations, Refractive index, Extinction coefficient, Absorption coefficient, Transmission, Reflection, Optical conductivity, Complex dielectric function; Electrical Characterization of Materials: Resistivity measurement techniques, Conductivity type measurement techniques, Hall and magnetoresistivity mobility measurement techniques.

FiZ530 Thin Film Technology 3+0 7.5

The Preparation Methods of Thin Films; Vacuum Technology: Kinetic theory of gases, Gas transport and pumping, Vacuum pumps, Vacuum systems, The role of the vacuum in the thin film technology; Evaporation Processes: The physics and chemistry of evaporation, Evaporation processes and applications; Chemical Vapor Deposition (CVD): Thermodynamics of CVD, Thermal CVD processes; Sputter Deposition Processes: Sputter sources, Sputter coating systems; Sol-Gel Coatings: The sol-gel process; Spray Pyrolysis Method.

FiZ531 Amorphous Material Physics 3+0 7.5

Theory of Electronic States in Amorphous Materials: Theoretical methods, The density of states, Anderson localization; Amorphous Materials: Definition of amorphous materials, Amorphous metals, Liquid metals and semi-metals, Amorphous semiconductors, Amorphous germanium and silicon, Alloys, Glassy materials, Ceramics; Amorphous Material Physics: Structural properties, Optical properties, Optical band gap, Electrical properties.

FiZ532 Particle Physics 3+0 7.5

Discoveries of Particles; Classification of Particles and Their Interactions; Introduction to Quantum Electrodynamics; The Feynman rules for QED; Parton model; Quantum Chromodynamics; Weak Interactions of Leptons and Quarks; Electroweak Unification; Introduction to Gauge Theories.

FiZ533 Special Function in Physics I 3+0 7.5

Differential Equations in Physics; Solutions of the Equations Using Separation of Variables and Green's Function; Sturm-Liouville Theory; Legendre Polynomials; Associated Legendre Polynomials; Laguerre Polynomials; Hermite Polynomials; Bessel Functions; Hypergeometric Functions; Physical Applications.

FiZ537 Fundamentals of Impedance Spectroscopy 3+0 7.5

Basic Definitions, and History; The Importance of Interfaces, Impedance-Related Functions, History, Elementary Analysis of Impedance Spectra; Physical Models for Equivalent Circuit Elements, Simple RC Circuits, Selected Applications of IS; The Electrical Analogs of Physical and Chemical Processes; The Electrical Properties of Bulk Homogeneous Phases, Mass and Charge Transport, Interfaces and Boundary Conditions, Grain Boundary Effects, Current Distribution, Porous and Rough Electrodes, Physical and Electrochemical Models; The Modeling of Electrochemical Systems, Equivalent Circuits, Modeling Results.

FiZ538 Special Functions in Physics II 3+0 7.5

Partial Differential Equations in Physics; First Order and Second Order Partial Differential Equations; Heat Equations; Wave Equations; Green's Functions; Time Independent And Time Dependent Green's Functions; Solutions of the Differential Equations by Separation of Variables and Green's Function Technique; Integral Equations; Fredholm and Volterra Type Integral Equations; Calculus of Variations.

FiZ539 Dynamics and Relativity 3+0 7.5

Galilean Relativity, Conservation Laws In Physics; Central Forces? Problems; Mechanical Vibrations and Waves; Systems of n Particles; Solid Body Motion; Rotation and translation, Collisions; Problems in physics, Scattering of Particles and Applications; Special Relativity; Space-Time Geometry; 4-vectorial operations, Relativistic Dynamics; General Relativity, Principle of equivalence, Curved space.

FiZ540 Characterization of Solids 3+0 7.5

Electromagnetic spectrum, Interaction with material, Structural analysis with x-ray diffraction spectroscopy, Electrical characterization, Surface analysis with scanning electron microscope, Structural analysis with transition electron microscope, Photoluminescence, Electroluminescence, Magnetoresistance, IR, Raman.

FiZ541 Semiconductors 3+0 7.5

Crystal Structure of Solids and Energy Bands; Semiconductor Materials and Their Properties; Doping of Semiconductors; Carrier Transport in Semiconductors; Generation and Recombination of Carriers; Direct and Indirect Band Transitions; Photoconductivity; The p-n Junctions; Solar Cells.

FiZ542 Electromagnetic Theory 3+0 7.5

Boundary Value Problems in Electrostatics; Multipole Expansions; Electrostatics Problems in Dielectric Media; Boundary Value Problems in Magnetostatics; Maxwell Equations; Poynting Theorem; Conservation of Energy and Momentum.

FiZ543 Condensed Matter Physics I 3+0 7.5

Phonons and Lattice Dynamics, Electrons in solids, Electron-Phonon Interactions, Electron-Electron and Electron-Lattice Impurity Interactions, Transport Theory, Plasmons, Polaritons and polarons.

FiZ544 Condensed Matter Physics II 3+0 7.5

Classification of materials, Introduction to magnetic materials, Magnetic susceptibility, Langevin diamagnetism, Paramagnetism, Ferromagnetism, Antiferromagnetism and ferrimagnetism, Measurement techniques for magnetic properties.

FiZ545 Characterization Methods of Porous Solids and Powder Minerals 3+0 7.5

Gas Adsorption: Physisorption of gases by clays and zeolites, Energetics of physisorption, Interpretation and classification of physisorption-isotherms, Vacuum Volumetric Measurement (Manometry): Calibration of sample cells, Outgassing the adsorbent sample, Adsorption equilibrium, Temperature, Pressure, Volumetric sorption analyzer instruments (Autosorb-1C and Nova concepts), Determination of surface area from Langmuir and BET theories, Thermal Properties of Clays and Zeolites: Volumetric and structural changes on dehydration, TGA/DTA/DSC applications, Chemical (XRF) and Structural (XRD) Properties of Clays and Zeolites.

FiZ546 Infrared Detection Systems: Physics and Technology 3+0 7.5

Electromagnetic spectrum and infrared radiation: Atmospheric transmission and windows; Radiometry: Planck's Law; Black body radiation; Solid angle, radiance, emissivity; Optical detection processes; Thermal detectors: Bolometers; Pyroelectric detectors; Thermoelectric detectors; Photon detectors: MCT photodiodes; Schottky barrier photodetectors; Hetero-junction internal photoemission detectors; Blocked impurity band detectors; Homo-junction internal photoemission

detectors; Quantum well and quantum dot photodetectors; Type-II superlattice photodetectors; Detector parameters: Responsivity, noise, signal-to-noise ratio, noise equivalent power;

FİZ547 Lab VIEW: Graphical Programming Language 3+0 7.5

Introduction to graphical programming language LabVIEW; Front panel; Block diagrams; Working with virtual instruments and error correction; Virtual instruments and sub-virtual instruments: Loops; Structures; Sequences; Graphs; Data collection; Analysis and presentation.

FİZ549 Hypercomplex Numbers in Physics 3+0 7.5

Hypercomplex Numbers and Their Basic Properties: Complex numbers, Split-complex numbers, Dual numbers, Basic operations, Matrix representations of hypercomplex numbers, Hyperbolic numbers in physical applications; Quaternions and Their Physical Applications: Real, Complex, Dual, Hyperbolic and split quaternions, Basic operations, Matrix representations of quaternions, Quaternionic representation of physical quantities; Octonions and Their Physical Applications: Real, Split and hyperbolic octonions, Basic operations, Matrix representations, Octonionic representation of physical quantities; Sedenions: Definition, Basic operations, Sedenions in physical applications.

FİZ550 Geometry and Topology in Physics 3+0 7.5

Vector Spaces; Topological Spaces; Differentiable Manifolds; Vectors and Tensors on a Manifold; Lie Derivatives; Exterior Forms; Exterior Derivatives; Inner Product Operators; Riemannian and non-Riemannian Geometries; Metric Tensor; Metric Compatibility; Connections; Riemann Tensor; Ricci Tensor; Torsion; Levi-Civita Connection; Connection with Torsion; Covariant Derivatives; Cartan Structure Equations; Bianchi Identities; Hodge Operator; Applications in Physics.

FİZ551 Plasma Physics 3+0 7.5

Introduction: Occurrence of plasmas in nature, Definition of plasma, Concept of temperature, Debye shielding, Plasma parameters, Criteria for plasmas, Applications of plasma physics; Single-Particle Motions; Plasmas As Fluids: Introduction, Relation of plasma physics to ordinary electromagnetics; Waves in Plasma: Representations of waves, Plasma oscillations; Kinetic Theory: Equations of kinetic theory; Sheaths.

FİZ552 (Eng) Quantum Physics 3+0 7.5

Origins of Quantum Physics, Blackbody radiation and photoelectric effect, X Rays, Compton scattering, Atomic spectra, Bohr atom - quantization of energy; Particle-Wave Mechanics; Schrödinger Equation, Particle in a box and standing waves, Finite square well, Expectation values of classical observables, Quantum theory of atoms, Hydrogen atom, Spin and magnetic moments - Stern-Gerlach, Angular momenta and spin addition rules - Spin-Orbit, Molecules; Solids, Crystal structure, Free electron vs. fermi gas theory of electrical properties, Band theory of solids and semiconductors.

FİZ553 Molecular Modelling 3+0 7.5

Basic concepts in molecular modelling; Molecular mechanical models; Hartree Fock method; Basis sets; Semi-empirical methods; Structural geometric optimizations; Density functional theory and its applications; Vibrational frequencies; Determination of scaling factors; Applications of GaussView program; Applications of Gaussian program; Comparison of theoretical and experimental data for sample molecules.

FİZ554 Surfactants in Aqueous Solutions 3+0 7.5

Introduction to Surface Active Agents (Surfactants); Properties of Surfactants; Classification of Surfactants: Cationic, Anionic and nonionic surfactants; Ecological Effects of Surfactants; Micelle Formation: Critical micelle concentration, Hydrophobic and hydrophilic groups, Effects of parameters such as pH and Temperature in micelle formation; Phase Behaviors of Surfactant Systems; Colloidal Forces; Adsorption of Surfactants on Interfaces; Cationic Surfactant Adsorption on Clays; Organoclays.

FİZ556 Experimental Techniques in Particle Physics 3+0 7.5

Passage of Radiation Through Matter: Ionization, Multiple scattering, Cherenkov radiation; Ionization Detectors: Multiwire proportional chambers, Drift chambers, Time projection chambers; Scintillators; Photomultiplier Tubes; Semiconductor Detectors; Photographic Emulsions; Detector Design and Sub-detectors: Trackers, Calorimeters, Spectrometers; Triggers; Statistics and the Treatment of Experimental Data: Probability Distributions, Measurement errors, Parameter estimation, Hypothesis testing; Detector Simulations; Particle Accelerator Concepts.

FİZ592 Seminar 3+0 7.5

FİZ601 Clay and Clay Minerals I 3+0 7.5

Definitions; Factors Controlling the Properties of Clay Materials; Clay-Mineral Composition; Nonclay-Mineral Composition; Classification and Nomenclature of Clay Minerals; Structures of Clay Minerals; Kaolinite Minerals; Halloysite Minerals; Montmorillonite Minerals; Definition of Structures By X-Ray Diffraction; Electron Microscope.

FiZ602 Clay and Clay Minerals II 3+0 7.5

Ion Exchange Through Clays; Cation-Exchange Capacity, Causes of Cation Exchange; Theory of Cation Exchange; The Nature of Water Adsorbed by Clays; Clay-Water System; Heat of Wetting; Time Factor; Definition of Specific Surface Area in Clays; Hydration and Dehydration Through Clays; Dehydration Curves; Differential Thermal Analysis.

FiZ604 Selected Topics in Zeolite Molecular Sieves 3+0 7.5

Physical Properties of Zeolite Crystals; Optical Properties; Dielectric Properties; Electrical Properties; Thermochemistry; Zeolite Water; Ionchange Reactions in Zeolites; Ion Exchange Theory; Hydrogen Exchange in Zeolites; Cation Sieve Effects in Zeolites; Adsorption on Zeolites; Heat of Adsorption; Character of the Adsorbed Phase in Zeolites; Adsorption Separation of Gas Mixtures.

FiZ605 Selected Topics on Clay and Clay Minerals I 3+0 7.5

The Properties and the Structures of Clay and Clay Minerals; Structure and Composition; Clay-water Systems; Miscellaneous Properties; Clays in Ceramic Industry; Plasticity; Drying Properties; Firing Properties; Clays in Petroleum Industry; Search for Petroleum; Producing Operations; Investigation of Usability on Various Branches of Industry.

FiZ606 Selected Topics in Electromagnetic Wave Theory 3+0 7.5

Waveguides and Resonators; Paralel-Plate Waveguides; Rectangular Waveguides and Resonators; Dielectric Slab Waveguides; Coaxial Lines; Transmission Lines; Transmission-Line Equations; Impedances; Generalized Reflection Coefficient and Smith Chart; Antennas; Vector and Scalar Potential Functions; Fields of Antennas; Linear Antennas; Rayleigh Scattering; Fourier Optics and Holography; Doppler Effect; Plane Waves in Anisotropic Media.

FiZ607 Optical Properties of Semiconductors I 3+0 7.5

Energy States in Semiconductors; Band Structure; Impurity States; Band Tailing; Excitons; Donor-Acceptor Pairs; Perturbation of Semiconductors by External Parameters; Pressure Effects; Temperature Effects; Electric Field Effects; Magnetic Field Effects; Absorption; Fundamental Absorption; Higher Energy Transitions; Exciton Absorption; Transitions Between a Band and an Impurity Level; Intraband Transitions; Free Carrier Absorption; Hot-Electron-Assisted Absorption.

FiZ608 Optical Properties of Semiconductors II 3+0 7.5

Relationship Between Optical Constants; Absorption Coefficient; Index of Refraction; Kramers-Kronig Relations; Reflection coefficients; Absorption Spectroscopy; Radiative Transitions; Van Roosbroeck-Shockley Relation; Radiative Efficiency; Fundamental Transitions; Transitions Between a Band and an Impurity Level; Donor-Acceptor Transitions; Intraband Transitions; Nonradiative Recombination; Auger Effect; Surface Recombination.

FiZ610 Selected Topics on Clay and Clay Minerals II 3+0 7.5

Dielectric Properties of Clays; Variation Of Permittivity Versus Humidity; Frequency of Electric Field; Cole-Cole Diagrams; Various Physicochemical Properties of Clays; Adsorption-Desorption Properties; Ion Exchange Properties; Effects of Various Factors on Adsorption Properties of Clays.

FiZ611 Selected Topics in Solid State Physics 3+0 7.5

Metal-Semiconductor Contacts; Energy-Band Relation; Surface States; Current Transport Mechanisms; Thermionic Emission Theory; Diffusion Theory; Tunneling Current; Characterization of Potential Barrier; Current-Voltage Measurement; Activation Energy Measurement; Capacitance-Voltage Measurement; Photoelectric Measurement; Barrier Height Adjustment; Ohmic Contact.

FiZ612 Dielectric Physics 3+0 7.5

Behavior of Dielectrics in Static Electric Fields; Electric Susceptibility and Permittivity; Dielectric Polarization; Polarization Vector and Molecular Quantities; Clausius-Mosotti's Equation and Lorenz's Local Field; Dipole Moments in Solutions; Mosotti's Catastroph; Onsager's Local Field; Electric Susceptibility of Dipolar Gases; Dielectric Theories of Kirkwood and Fröchlich; Behavior of Dielectrics in Alternative Electric Fields; Dielectric Polarization in Alternative Electric Fields; Debye's Absorption and Dipolar Dispersion; Cole-Cole's Diagram; Cole-Cole's Equation; Cole-Davidson's Equation; Kramer-Kronig's Equations.

FiZ614 Selected Topics in Classical Mechanics 3+0 7.5

Legendre Transformations and Hamilton Equations of Motion; Conservation Theorems and Physical Meaning of Hamilton's Equations; Some Applications of Hamilton's Equations; Canonical Transformations; Hamilton-Jacobi Theory; Vibrating Systems; Diatomic Molecule.

FiZ616 **Group Theory and Applications to Physics** **3+0 7.5**
Symmetry Elements and Operations; Point Groups; Non-Degenerate Representations; Matrices; Degenerate Representations; Applications to Molecular Bonding; Applications to Molecular Vibration.

FiZ617 **Lie Groups and Physical Applications** **3+0 7.5**
Basic Structure Blocks; Set; Group; Symmetry Operations; Symmetry Operations and Group; Extra Definitions; Subgroups; Classes; Matrices; Matrices and Symmetry Operations of Square; Matrix Representations of a Group; Field; Linear Vector Spaces; Algebra; Bases; For a Group; For Field; For a Vector Space; For An Algebra; Isomorphism; Homomorphism; Irreducible and Reducible Matrix Representations; Discrete Groups; Orthogonal Groups; O+3; Orthogonal Transformation and Orthogonal Group; Physical Applications; Lie Group U(n) and SU(n) Groups; U(n) and SU(n) Generators; SU(2) and SU(3) Generators; Rotation and Angular Momentum; Linear Representations of A Lie Group; Quantum Mechanics and Group Theory; Physical Applications.

FiZ619 **Conduction Mechanisms in Solids** **3+0 7.5**
Basic Concepts Related to Electrical Conduction; Energy Band Model; Tunneling Model; Hopping Model; Electrical Properties; Formation of Traps; Charge Carrier Injection from Contacts; Electrical Contacts; Types of Electrical Contacts; Charge Carrier Injection through Potential Barriers from Contacts; Conduction Mechanisms in Solids; Ionic Conduction; Tunnel or Field Emission; Ohmic Conduction; Space Charge Limited Conduction; Poole-Frenkel Emission; Schottky Emission.

FiZ621 **Selected Topics in Adsorption Technology** **3+0 7.5**
Gravimetric Differential Reactor for Adsorption Studies; Experimental Results and Discussion, Materials, Equilibrium Isotherm, Kinetic Studies, gravimetric Differential Reactor for Water Adsorption Studies; Experimental Results, Experimental Procedure, Equilibrium, Kinetic Analysis, Combined Diffusion Differential Reactor Models; Liquid-Solid Systems, Gas-Solid Systems, Ds-Dp Determination, Thermodynamics Analysis of Adsorption Systems: Methods and Models, Experimental Procedure, Method of Approach.

FiZ622 **Selected Topics of Advanced Statistical Physics** **3+0 7.5**
Solids: Solids at low temperatures, Solid at high temperatures, Debye's interpolation formula, Thermal expansion of solids, Phonons, Quantum liquid, Bose spectrum, Super influent, Fermi spectrum, The electron spectrum of metals, The electron spectrum of solid insulators, Phonon creation and annihilation operators, Negative temperatures; Non-ideal gases: Deviation of gases from the ideal state, Expansion in powers of the density, Van der Waals? formula, Completely ionized gases, Degenerated Bose gas, Degenerated Fermi gas, Thermodynamic quantities for a degenerate plasma; Phase Equilibrium: Conditions of phase equilibrium, The Clapeyron-Clausius formula, The critical point, The law of corresponding states; Solutions: Systems containing different particles, The phase rule, Weak solutions, Osmotic pressure, Mixtures of ideal gases, Mixtures of isotopes, Gases and liquids; Fluctuations: The Gaussian distribution, The Gaussian distribution for more than one variable, Fluctuations of the fun

FiZ623 **Selected Topics in Mathematical Physics** **3+0 7.5**
Fourier Series; Average Value of a Function Complex Form of Fourier Series; Parseval Theorem; Power; Root; Logarithm and Trigonometric Functions of a Complex Number; Integral Transformations; Laplace and Fourier Integral Transformations; Gamma; Beta and Error Functions; Elliptic Integrals and Functions; Quaternions.

FiZ624 **Selected Topics in Semiconductors** **3+0 7.5**
Quantum Theory of Electrons in Periodic Lattices; Bloch theorem; Kronig-Penney Model; Crystal Momentum and Effective Mass; Electrons and Holes; Free-Electron Approximation; Tight-Binding Approximation; Constant Energy Surfaces and Brillouin Zones; Insulators; Semiconductors and Metals; Uniform Semiconductors in Equilibrium; Intrinsic and Impurity in Semiconductors; Statistics of Electrons and Holes; Ionization Energy of Impurity Centers; Conductivity; Hall Effect and Magnetoresistance; Ellipsoidal Energy Surfaces; Excess Carriers in Semiconductors; Continuity Equation; Drift Mobility and Haynes-Shockley Experiment; Recombination Mechanisms.

FiZ627 **Selected Topics in Ion Exchange** **3+0 7.5**
Ion Exchange Procedures: Batch Operation; Column Process; Continuous Process; Types of Ion Exchangers; Synthetic; Natural; Cellulose; Ion Exchangers; Active Coals; Ion Exchange Membrans and Liquid Ion Exchangers; Properties of Ion Exchangers; Humidity Content and Density; Particle Size; Cross-Linking; Porosity; Swelling; Ion Exchange Capacity; Selectivity; Application Fields of Ion Exchangers.

FiZ629 **Electromagnetic Wave Theory** **3+0 7.5**
Spin: The spin operator, Spinors, The wave functions of particle with arbitrary spin; Identity of particles: The principle of indistinguishability of similar particles, Exchange interaction, Symmetry with respect to interchange, Second quantization (the case of Bose statistics), Second quantization (the case of Fermi statistics); Addition of angular momentum: 3j-sembols,

Calculation of matrix elements of tensors, 6j-symbols; The theory of elastic collisions: The general theory of scattering, The unitary condition for scattering, Born's formula, The quasi-classical case, Scattering at high energies, The scattering of slow particles, Resonance scattering at low energies; Inelastic collisions: Elastic scattering in the presence of inelastic processes, Inelastic scattering of slow particles, Breit and Wigner's formulae, Inelastic collisions between fast electrons and atoms, Scattering from the molecules.

FI Z630 Magnetic Properties of Solids 3+0 7.5

Landau quantization and de Haas Alphen Effect, Integer quantum Hall Effect (IQHE), Fractional Quantum Hall Effect (FQHE), Geometric Magnetoresistance (GMR), Magnetic Anisotropy, Magnetostriction.

FI Z631 Organic Semiconductor Physics 3+0 7.5

Introduction to the physics of organic semiconductor, Organic materials, Organic semiconductors and electronic properties of interfaces between organic semiconductors and metals, Electrical conductivity mechanism in organic semiconductors, Optical properties of organic semiconductors, Organic thin film transistors, Organic light emitted diodes, Organic solar cells.

FI Z632 Classical Electrodynamics 3+0 7.5

Electromagnetic Waves in Conducting and Non-conducting Media; Wave Guides; Multipole Radiation; Electromagnetism and Special Theory of Relativity; Motion of Charged Particles in Electromagnetic Field; Radiation from Moving Charges.

FI Z633 Band Theory in Semiconductors 3+0 7.5

Group theory and character tables for band theory, Effective mass theory, Plane wave approximation at band theory, K.p method, Pseudo-potential method.

FI Z634 Gravitation and Cosmology 3+0 7.5

Concept of Absolute Space-time; Special Theory of Relativity; Minkowski Space-time; Lorentz Transformations; Geometric Structures in Gravitation; Connection Structure and Curvature; General Theory of Relativity; Einstein Field Equations; Derivation of Field Equations by Variation Principle; Generalized Theories of Gravitation; Theories of Gravitation with a Scalar Field; Schwarzschild Solutions.

FI Z635 Ultra Cold Atomic Gases 3+0 7.5

The non-interacting Bose Gas; The Weakly Interacting Bose Gas; Atomic Properties; Trapping and Cooling of Atom; The Magneto Optical Trap; Interactions Between Atoms; Basic Scattering Theory; Theory of the Condensed State; Ground State of a Trapped Condensates; Energy, Chemical Potential and Virial Theorem; TF Approximation; Density and Momentum Distribution; Attractive Potential; Dynamics of the Condensate; Release of Trap and Expansion of The Gas; Solitons; Microscopic Theory of the Bose Gas; Excitation in a Trapped Gas; Interference and the Josephson Effect; The Bose Einstein Condensation in Optical Lattice; The Bose Einstein Condensation in Low Dimension; Rotating Condensates; Quantized Vortices; Superfluidity; Quantum Hydrodynamics; ; Trapped Clouds at nonzero Temperatures; Mixtures and Spinor Condensates, Fermionic Condensates, The BCS Transition

FI Z636 Molecular Beam Epitaxy: Instrument and Application 3+0 7.5

Components of molecular beam epitaxy (MBE) instrument: Vacuum chamber; Vacuum pumps; Effusion cells; Reflection high energy electron diffraction (RHEED) technique: Operation and applications; Temperature readers; Residual gas analyzer (RGA); Epitaxial film deposition parameters: Material flux measurements; Growth parameters calibration; Application and usage areas of epitaxial films

FI Z637 Fundamental Properties and Gas Adsorption Applications of Naturel Adsorbents 3+0 7.5

Fundamental factors in designing adsorbents: Potential energy of adsorption; Heat of adsorption; Effects of adsorbate properties on adsorption (Polarizability (?); Dipol moment (μ) and quadrupole moment (Q)); Basic considerations for sorbent design: Polarizability (?); Electronic charge (q) and van der Waals radius (r); pore size and geometry; Investigation of adsorption behavior on natural zeolites: Structure and cations sites of natural zeolites; Natural zeolites and Molecular Sieving Properties; Unique adsorption properties of natural zeolites; Interactions of adsorbate with cation site; charge and ionic radius; Adsorption applications of various gases on natural zeolites

FI Z638 Fundamentals of Semiconductor Device and Technology 3+0 7.5

Semiconductors: Fundamentals, doped-undoped structures; Fermi level; Electron and hole densities; Devices and operation basics: P-n junction; metal-oxide semiconductors (MOS); Bipolar junction transistors (BJT); Metal-oxide semiconductor field effect transistors (MOSFET); Elements of quantum mechanics: Black body radiation and atom models; Wave-particle duality; Basic formalism and Schrödinger equation; Particle in a box and quantum mechanical confinement; Energy-band theory; Kronig-Penney model; Particle motion and effective mass; E-k diagrams; Semiconductor hetero- and multi-

junctions; Structures with quantum wells: Quantum wells; Calculations of the conduction bandenergy levels; Intersubband transitions; Design details of quantum well; infrared Quantum wire and quantum dot structures;

FiZ639 Physical Mechanisms of Variables Stars 3+0 7.5

Types and Physical Properties of Variable Stars; Orbital Cycle: White dwarf and red dwarf, Keplerian motion; Ellipsoidal Variations; Mass Transfer; Bright Spot; Spectral Characteristics; Emission and Absorption Lines; Disc spectrums; Eclipse Mapping; Physical Properties of Interaction Mechanisms: Accretion disc models, Siphons, Winds, Streams, Flickering, Oscillations.

FiZ640 Structural Properties of Accretion Disc in Binary Stars 3+0 7.5

Accretion as a Source of Energy: The Eddington limit, The emitted spectrum, Accretion theory and observation; Accretion in Binary Systems: Interacting binary systems, Roche Lobe overflow, Roche geometry and binary evolution; Disc Formation; Accretion Discs: Radial disc structure, Steady thin discs, Dwarf novae; Accretion onto Compact Objects: Boundary layers, Accretion columns; Thick Discs: Limiting luminosity, Dynamical stability; Accretion flows: Astrophysical applications.

FiZ641 Gas Adsorption Applications of Clay Type Naturel Adsorbents 3+0 7.5

Gas Adsorption by Clays: Structural features of layer silicates, Silicates with two-layer sheets and silicates with three-layer (Kaolinite, smectites and sepiolite), Physisorption of gases by kaolinite, Physisorption of gases by smectites: Adsorption of non-polar molecules and adsorption of polar molecules, Adsorption applications of various gases on clays.

FiZ642 Infrared and Raman Spectroscopy 3+0 7.5

Electromagnetic Wave and Matter Interaction; Molecular Vibrations; Vibration of Diatomic Molecules: Vibrational spectra of diatomic molecules, Rotational spectra of diatomic molecules; Infrared Spectroscopy: Basic concepts in infrared spectroscopy, Modes of vibration, Infrared spectrometer, Methods of infrared spectrum, Analysis of molecular structure by infrared spectroscopy; Raman Spectroscopy: Classical and quantum theory, Raman spectrometer, Methods of Raman spectrum, Analysis of molecular structure by Raman spectroscopy.

FiZ643 Matrix Isolation Techniques and Applications 3+0 7.5

Introduction to the Matrix Isolation Technique: Setting up a matrix isolation laboratory; Basic procedures for matrix preparation; Matrix Isolation Infrared Spectroscopy: Molecular conformational studies with matrix isolation infrared spectroscopy; Hot Vibrational Conformational Processes of Matrix-Isolated Molecules Induced by NIR-Laser Light; UV-Induced Photochemistry and Photoisomerization of Matrix-Isolated Molecules: Practical Examples.

FiZ644 Nuclear Magnetic Resonance Spectroscopy 3+0 7.5

Introduction to NMR Spectroscopy and Resonance; Definition of Chemical Shift; Investigation of Spin-spin Interactions; Investigation of Proton-proton Interactions; Dynamic NMR Spectroscopy; ¹³C NMR Spectroscopy; Pulsed NMR Spectroscopy; ¹³C NMR and Chemical Shifts; Multi Pulsed NMR Experiments; Introduction to Two-dimensional NMR Spectroscopy; Interpretation of NMR Spectra.

FiZ645 Semiconductor Device Technology 3+0 7.5

FiZ646 Principles of Plasma Discharges 3+0 7.5

Introduction: Plasmas and sheaths, Discharges; Basic Plasma Equations and Equilibrium: Field equations, current and voltage, The conservation equations, Boltzmann's equation, Debye length; Atomic Collisions; Plasma Dynamics: Diffusion; Particle and Energy Balance in Discharges; Capacitive Discharges: Homogeneous model, Inhomogeneous model; Inductive Discharges: Inductive source configuration; Direct Current Discharges.

FiZ647 Natural Zeolites 3+0 7.5

FiZ652 Recommended Course Content 3+0 7.5

FiZ658 Characterization of Porous Materials 3+0 7.5

Introduction: Gas adsorption; Physical Adsorption Forces; Adsorption Isotherms; Measurement of Adsorption Isotherms; Adsorption Mechanism; Adsorption Hysteresis; Surface Area from the Langmuir and BET Theories; Other Surface Area

Methods; Micropore Analysis; Mesopore Analysis; Pore Size and Surface Characteristics of Porous Solids By Mercury Porosimetry; Chemical Adsorption.

FİZ658 (Eng) Characterization of Porous Materials 3+0 7.5

Introduction: Gas adsorption; Physical Adsorption Forces; Adsorption Isotherms; Measurement of Adsorption Isotherms; Adsorption Mechanism; Adsorption Hysteresis; Surface Area from the Langmuir and BET Theories; Other Surface Area Methods; Micropore Analysis; Mesopore Analysis; Pore Size and Surface Characteristics of Porous Solids By Mercury Porosimetry; Chemical Adsorption.

FİZ692 Seminar 3+0 7.5

FİZ790 Thesis 0+1 30.0

FİZ890 Thesis 0+1 30.0

FİZ890-0 Thesis (Thesis Proposal) 0+1 30.0

FKG510 Pharmacobiotechnology 3+0 7.5

General definitions of biotechnology, history, drugs and therapeutics obtained by fermentation techniques, industrial production of antibiotics and points to consider, microbial transformation techniques, microorganisms used in microbial transformations, mediums, practice and natural products used as raw materials.

FKL501 Experimental Pharmacology 3+0 7.5

Mentality experimental approaches, knowledge, information and its importance, Methods of information retrieving, magnetic media and internet and their importance for experiments, relationship of knowledge-question-hypothesis, importance of information prior to experimental manipulations, materials and experiments, importance of control group, experiments and planning, pharmacological manipulation techniques, in vivo manipulations, in vitro models, data collection and handling, calculations of data and importance of statistics, evaluation, interpretation of results, documentation, application of an experimental technique.

FTK501 Advanced Toxicology 3+0 7.5

General Concept and Principles in Toxicology: General Knowledge About Poisons: Intake, Absorption and the excretion of poisons, Metabolism of toxic substances: The Mechanisms of Effect of the Toxicants: Special Toxic Effects: Mutagenesis, Carcinogenesis and teratogenesis: Systemic Toxicology: Selective Toxicity: The Factors Affecting Toxicity: First Aid and Treatment Procedures in Acute Intoxications: Drug Toxicity: Drug Dependence: Factors causing dependence, Dependence types: Substances with Doping Effect Used in Sports.

HAB521 Academic Writing Skills I 3+0 7.5

Origins of Scientific Writing: Types of scientific papers, Manuscripts and thesis; Types of Article: Original research, Review article (PRISMA), Case report, Technical note, Letter to the editor; Thesis: Part of the Thesis, First section (front pages), Main section (introduction, method results, etc.), Last section, References and Attachments; Ethics: Rights and permissions, Ethics committee approval; Practical Use of Office Programs in Thesis Writing: Practical applications of Word and excel; Presentation of Findings in Different Shapes: Tables and figures.

HAB522 High-intensity Interval Training (HIIT) in Team Sports 3+0 7.5

High-intensity Interval Training (HIIT): Work interval intensity and duration, Relief interval intensity and duration, Exercise modality, Number of repetitions, Number of series, As well as the between-series recovery duration and intensity; Aerobic High-intensity Training; Speed Endurance Maintenance Training; Speed Endurance Production Training; Repeated Sprint Training; High-intensity Training Test Parameters: Laboratory testing, Field testing.

HAB523 Academic Writing Skills II 3+0 7.5

Parts of The Manuscript: Title page, Introduction, Methods, Results, Discussion, Conclusion, Acknowledgement, References; Other Topics: The abbreviations and usage; Applications of Software Used in Article Writing: Use of Photoshop program (presentation of findings), Use of some software (Endnote) in bibliography; The Cover Letter: Cover letter

preparation; Answer to the reviewers: How to answer to the comments of reviewers; Ethics: The right to become a writer and author ranking.

HAB524 Talent Identification And Development In Sports 3+0 7.5

Biomotor Abilities in Development Stages: Speed, Strength, Endurance, Flexibility, and coordination development in children; Multi-development and Specialization; Talent Identification and Orientation Proper to Sports in Children; Talent Identification Models in Children: Different schools for talent identification, The aspect in Turkey for talent identification; Long-term Aims of Talent Identification.

HAB526 Training Principles For Spine, Upper, and Lower Extremities 3+0 7.5

Composition, Structure, and Biomechanical Behaviour of Connective Tissue; Posture and Body Mechanics; Training Specific to Proprioception and Functional Movement; Maintaining Training for Acute and Chronic Injuries of Spine, Pelvis, Head, Shoulder, Elbow, Wrist, Hand, Foot, Ankle, Knee, Hip, and Sacroiliac Joints in Sports; Evaluation of Throwing, Kicking, Gait, Running, and Sprinting Mechanics, Injury Prevention Training in Physically Active Individuals.

HAB527 Antioxidants and Athletics Performance 3+0 7.5

Radical Concept and Properties: Reactive oxygen species, Reactive nitrogen species; The Sources of Radical Production and Mechanism, The Effect of Exercise on Radical Production and Oxidative Stress, Radical Production And Cellular Protection: Antioxidant strategy, Antioxidant defense system, Antioxidant function of vitamins, Reversible and Irreversible reactions of antioxidants, Nutrient sources of antioxidants, Positive and negative effects of antioxidant supplementations to sportive performance, Pro-oxidant effect of antioxidants.

HAB528 Current Trends In Strength Training 3+0 7.5

New Trends in Training Intended for Strength Training: Combined training, Complex training, Contrast training, Compound training, Functional training, Eccentric training; Training with Current Devices Supported to Strength Development: Velocity based training, Isoinertial training, Electromyostimulation training, Vibration training.

HAB529 Scientific Fundamentals Of Training 3+0 7.5

Training Structure; Loading and Adaptation; Volume and Intensity; Effects of Training: Immediate, Residual, and Cumulative Effects; Structures, Types, Effective Factors, and Training in terms of Muscular Strength, Speed, Endurance and Flexibility; Training Structure: Unit, Session, Microcycle, Mesocycle, Phase, Period and Macrocycle Training Samples; Training Control Methods: Field and Laboratory Performance Tests.

HAB531 Body Composition and Performance 3+0 7.5

Body Composition; Body Fat Mass, Fat Free Mass; Body Composition Assessment: Total body, Body segmen; Common Techniques To Assess Body Composition; Hydrostatic Weighing, Bioelectrical Impedance Analysis, Air-Displacement Plethysmography, Dual-Energy X-ray Absorptiometry, Skinfold and Girth Measurements; Effect of Body Composition on Performance Sports; Individual Sports, Team Sports

HAB532 Sports for Disability Persons 3+0 7.5

History of disability sports, General rules of Paralympics games, Paralympics sport foundations, Definition of disability person and classification, Effect of exercise education in Disability persons, Physical adaptation programs for disability persons, Dance activities for disability persons, Adapted sport activities for different disability persons, Sport accident and rehabilitation for disability athletes, Doping for disability athletes, Specific Olympic.

HAB533 Motivation in Sport 3+0 7.5

Definition of motivation concept: Definition of spur, incentive, motive and need, Development of motivation, Personal motivation and corporation communication, Development of motivation theory, Process and concept theory in motivation, Usage techniques of motivation in sport, Encouragement tools which are getting motivation, Easy motivation methods which are using in corporation motivation, Important components in athlete motivation.

HAB534 Movement And Training Principles 3+0 7.5

Human Body and Functional Movements: Axes, Joints, Upper and lower extremity movements; Growing stages in children; Peak Height Velocity; Basic Movement Concepts and Mechanics; Types of Muscular Activities; Energy Systems; Maximal Oxygen Consumption; Homeostasis; Steady State; Oxygen Debt; Liquid Requirement, Thermoregulation; Internal and External Factors Influencing Training; Basic Principles and General Structure of Training.

HAB535 Functional Anatomy 3+0 7.5

HAB536 Experimental Approach to Exercise Neurophysiology 3+0 7.5

| | | |
|---------------|--|----------------|
| HAB537 | Introduction to Exercise Neurophysiology | 3+0 7.5 |
| HAB538 | The Fundamentals of Kinesiological Electromyography | 3+0 7.5 |
| HAB539 | Physiology I | 3+0 7.5 |
| HAB540 | Physiology II | 3+0 7.5 |
| HAB541 | Physical Appropriateness | 3+0 7.5 |
| HAB542 | Experimental Applications in Sportive Performance | 3+0 7.5 |
| HAB543 | Talent and Talent Identification for Sports in Children | 3+0 7.5 |
| HAB544 | Advanced Training Theory | 3+0 7.5 |
| HAB545 | Basic Training Theory | 3+0 7.5 |
| HAB546 | Monitoring Training and Performance in Athletes | 3+0 7.5 |
| HAB547 | Movement Science and Performance Training | 3+0 7.5 |
| HAB548 | Training Periodization in Team Sports | 3+0 7.5 |
| HAB549 | Analysis of Sportive Technique | 3+0 7.5 |
| HAB550 | Current Approaches and Corrective Exercises in Fitness Applications | 2+1 7.5 |
| HAB551 | Periodization Methodologies in Football | 3+0 7.5 |
| HAB552 | Practical Application to the Study of VO2 Kinetics | 2+1 7.5 |
| HAB553 | Match and Player Analysis in Team Sports | 3+0 7.5 |

| | | |
|---------------|---|----------------|
| HAB555 | Electrophysiological Training Methods in Sports | 2+1 7.5 |
| HAB557 | Oxygen Uptake Kinetics | 2+1 7.5 |
| HAB559 | Acute and Chronic Adaptation to Exercise at High Altitude | 2+1 7.5 |
| HAB561 | Exercise and Oxidative Stress | 3+0 7.5 |
| HAB592 | Seminar | 3+0 7.5 |
| HAB622 | Oxidative Stress Responses to Aerobic Exercise | 3+0 7.5 |
| | Hemoastase: The balance between oxidative stress and antioxidant defense system; Free Radical Production Mechanisms: Mechanism of free radical production during aerobic exercise, Structure of mitochondria, ATP production, Electron transport chain, Complex structures; Acute Aerobic Exercise And Free Radical Production; Chronic Aerobic Exercise And Free Radicals; The relationship between radical production and aerobic exercise with intensity, frequency and volume. | |
| HAB623 | Oxidative Stress Responses To Resistance Exercise | 3+0 7.5 |
| | Mechanisms of Free Radical Production: Mechanism of free radical production during resistance (anaerobic) exercise, Production of xanthine and NADPH oxidase, Prostanoid mechanism, Ischemia reperfusion mechanism, Phagocytic respiratory burst activity, Acute resistance exercise and free radical production, Chronic resistance exercise and free radical; The relationship between radical production and intensity, frequency and volume of resistance exercise training. | |
| HAB624 | Muscle Damage Paradigm | 3+0 7.5 |
| | Muscle Damage: Understanding the mechanism of muscle damage, Paradigm of exercise-induced muscle damage, Relationship between muscle damage and oxidative stress; Problem of muscle damage level; Types of muscle contraction: The relationship between different muscle contractions and muscle damage; Relationship between muscle damage, oxidative stress and performance; Muscle damage and antioxidant supplementation: The effect of acute and chronic antioxidant supplementations on muscle damage and oxidative stress level. | |
| HAB625 | Physiological Basis Of Human Performance | 3+0 7.5 |
| | Physiological Changes related with Training: Cardiorespiratory Adaptations, Muscular Adaptations, Biochemical Adaptations, Effects of Different Training Types to Human Performance, Athlete Training, Top Level Athlete Training, Physiological Principles of Athletic Training in Adults: Fitness and Effects of Fitness to Performance, Importance of Weight Control in Performance. | |
| HAB626 | Fundamental Of High-Level Performance | 3+0 7.5 |
| HAB627 | Training Periodization | 3+0 7.5 |
| | Periodization Concept and Different Periodization Approaches; Microcycle, Mesocycle and Macrocycle Structures in Training Related to Loading and Fatigue; Active/Passive Rest; Relationships Among Loading, Recovery and Supercompensation; Adaptation to Training; Periodization in Team and Individual Sports; Periodization Strategies; Single- and Multi-Periodization, Problems and Solutions in Periodization; Tapering; Detraining and Retraining. | |
| HAB629 | Advanced Anatomy in Sports | 3+0 7.5 |
| | Basic Terms of Kinesiology and Anatomy; Terms of Movement; Basic Anatomical Stance; Axis; Platform; Range of Motion; Tissue Mechanics; Neck Mechanics; Shoulder Mechanics; Thoracic Mechanics; Lumbar Mechanics; Hip Mechanics; Knee Mechanics; Mechanics of Resistance Training; Mechanics of Musculoskeletal Injury; Mechanics of Running; Mechanics of Hit; Mechanics of Kick; Applications to Daily Life; Mechanics of Lifting; Mechanics of Balance; Gait Analysis; Mechanics of Footwear. | |

| | | |
|--|---|----------------|
| HAB630 | Adaptation to Strength Training | 3+0 7.5 |
| <p>Characteristics of Neuromuscular System particular to Strength Training; Myogenic Effects of Strength Training and Neurogenic Effects of Strength Training; Alterations in Men related with Strength Training; Alterations in Women related with Strength Training; Alterations in Elder People related with Strength Training; Strength Training Specific to Sports; Effects of Nutrition to Strength Training Adaptation.</p> | | |
| HAB632 | Biostatistics | 3+0 7.5 |
| <p>Biostatistics: Statistical decision theory: Hypothesis testing, Parametric and non parametric approaches, With large sample hypothesis testing, Hypothesis testing with small samples; Strength Testing; Chi Square Distribution: Chi square tests; Simple Linear Regression and Correlation Techniques, T Test; Analysis of Variance; Analysis of Covariance; Random Block Design; Factorial Experiments; Multivariate Statistical Tests; Factor Analysis; Multivariate Analysis of Variance; Multivariate Analysis of Covariance.</p> | | |
| HAB633 | Training Theory I | 3+0 7.5 |
| HAB634 | Adaptation to Strength Training | 3+0 7.5 |
| HAB635 | Exercise Prescription | 3+0 7.5 |
| HAB636 | Training Theory II | 3+0 7.5 |
| HAB637 | Anti Aging and Exercise | 3+0 7.5 |
| HAB638 | Exercise Approaches for Special Groups | 3+0 7.5 |
| HAB639 | Performance Monitoring in Sport | 2+1 7.5 |
| HAB640 | Sportive Technical Analysis Applications | 2+1 7.5 |
| HAB641 | Biomechanics of Musculoskeletal System I | 3+0 7.5 |
| HAB642 | Global Positioning System (GPS) and Sport Specific Testing | 3+0 7.5 |
| HAB643 | Neuromuscular Adaptation and Fatigue | 3+0 7.5 |
| HAB644 | Biomechanics of Musculoskeletal System II | 3+0 7.5 |
| HAB645 | Training Load Monitorization and Field Test in Team Sports | 1+2 7.5 |

| HEE602 | Signal Processing in Receivers of Satellite Based Navigation System | 3+0 7.5 |
| HEE610 | Systems of Modern Gas Turbine Engines | 3+0 7.5 |
| | Engine Control Systems in General; Thermal Management for Engines; Internal Air System; Active Clearance Control; Lubrication System Design and Operation; Fuel System Design and Operation; Speed and Thrust Control; Introduction to FADEC System; Future Trends in FADEC System Design; Thrust Reverser Control System; Engine Servo Control System; Mechanical Engine Controls; Variable Geometry System; Clearance Control System; Hydromechanical Control Unit; Power Management System; EEC Control System; Engine Condition Monitoring System; Engine Vibration System; Engine Electrical Wiring Harnesses. | |

| | | |
|---|---|-----------------|
| HEE611 | Space Propulsion Systems, Sensors and Instruments | 3+0 7.5 |
| Spacecraft Propulsion Systems: Applications, Classifications; Characteristic Parameters: Thermodynamics, gas dynamics and nozzles, Propulsion systems, Liquid propulsion systems, Solid propulsion systems, Hybrid propulsion systems, Other non-chemical propulsion systems, Electric propulsion systems, Ramjet and Scramjet; Space Propellants; Fundamentals of Orbital Mechanics: Introduction to Earth observation, Electromagnetic waves; Theory of the Earth Observation System; Sensors: Sensor electronics, Optical space sensor systems, Infrared sensors, Sensors for satellites status detection, Microwave sensor systems. | | |
| HEE613 | Soft Computing in Aviation | 3+0 7.5 |
| Learning and types of learning, optimization techniques, introduction to neural networks, single layer perceptrons, multi-layer perceptrons, backpropagation algorithm, implementation of neural networks on control problems, fuzzy sets, operations on fuzzy sets, fuzzy relation and composition, fuzzy inference systems, fuzzy controllers, adaptive neuro-fuzzy inference systems (ANFIS), radial basis functions (RBF), genetic algorithms, other derivative-free global optimization methods. | | |
| HEE692 | Seminar | 3+0 7.5 |
| HEE790 | Thesis | 0+1 30.0 |
| HEE890 | Thesis | 0+1 30.0 |
| HEE890-0 | Thesis (Thesis Proposal) | 0+1 30.0 |
| HiD501 | Watershed Hydrology | 3+0 7.5 |
| Overland Flows; Sediment Transport by Overland Flows; Subsurface Storm flow; Unsaturated Flow and Groundwater Flows; River Flow Modeling, Computer Models for Watershed Hydrology. | | |
| HTK501 | Air Traffic Management and Aircraft Performance I | 3+0 7.5 |
| Air Traffic Management System; Aircraft Performances for Air Traffic Environment: Mission profile, Mission profile and aircraft movements, Air traffic control services in mission profile; Definitions of Speeds and Weights; Aero-Propulsive Models; General Equations of Motions; Level Flight Performances: Specific level flight performances for flight operations; Climb Performances: Specific climbing performances for flight operations; Descent Performances: Specific descending performances for flight operations; Take-off and Landing Performances: Specific take-off and landing performances for flight operations; Turning Performances: Specific turning performances for flight operations; Aircraft Trajectory: Trajectory prediction with Eurocontrol BADA model. | | |
| HTK502 | Models and Simulation in Air Traffic Management I | 3+0 7.5 |
| Fundamentals of Simulation and Modelling; Discrete-event Simulation Methodology; Taxonomy and Comparison of ATM Simulation Tools; Data Collection and Processing; Model Construction: Airport and airspace modeling; Experiment Design: Construction of baseline and alternative scenarios; Simulation: Test and production runs, Troubleshooting; Applications: Capacity and delay analysis, Conflict detection and resolution; Post Simulation Analysis: Analysis of results, Documentation, Animations and presentation; Verification and validation of simulation models. | | |
| HTK504 | Air Traffic Flow Management and Airspace Capacity Analysis | 3+0 7.5 |
| Components of Air Traffic Management: Airspace management, Air traffic services, Air traffic flow management; Functions of Air Traffic Management: Organization, Planning-Control, Co-ordination; Staffing; System of Air Traffic Management; Categorization of Problems in Air Traffic Management; Capacity: Definitions; Factors Determining Capacity: Airspace, Technical equipment, Aeroplane, Human performance, Procedure; Capacity Models; Literature Review; Scheduling Algorithm Method for Flow Planning; Short-term and Medium-term Conflict Models. | | |
| HTK505 | Multi-Criteria Decision-Making | 3+0 7.5 |
| Basic concepts: Decision-making, Decision process, Model, Types of models; Mathematical Programming: Model studies, Solution methods, Multi-criteria; Multi-Objective Decision Making: Criteria, Objective; Analytical Hierarchy Process: Sub-Criteria, Alternatives, Divided comparison, Spare analyses, Sensitivity analysis; Analytical Network Processes: Cluster, | | |

Element, Internal dependence, External dependence, Un-weighted Matrix, Limit matrix; TOPSIS: Positive ideal solution, Negative ideal solution; ELECTRE: Normalization, Concordance indexes, Dominancy; Utility Functions.

HTK506 Statistical Analysis for Air Traffic System 3+0 7.5

Using Statistical Analysis in Air Traffic System Problems; Data Collection and Analysis; Basic Statistical Concepts: Summary of numerical knowledge, Probability, Sampling, Point forecast, Period forecast, Hypothesis testing, Correlation and regression analysis, Variance analysis; Using Softwares in Analysis; Flight Data Statistics Analysis for Specific Airport: Data collection, Categorization, Analysis, Reports.

HTK507 Research Methods for Air Traffic System 3+0 7.5

History of Research on Air Traffic Control Problems: Researches in the USA, NASA and FAA, European research and strategies, Researches in Turkey; Research Requirements and Needs; Vision of Research and Development; R&D Politics and Strategies; R&D Methodologies; R&D Resources: Human resources, Finance, Technical infrastructure, Technology-Knowledge, Regulations, etc.; Innovation and Entrepreneurship; Industrial and Intellectual Property Rights; R&D Culture and Education; R&D Organization and Collaboration; Development of R&D Software; Strategic Management of R&D; Relationship Between R&D and Economic Growth; Examination of New Developments in Air Traffic System; Research Cases.

HTK508 Human Factors in Air Traffic Control 3+0 7.5

Discussion of Relationship Between Safety and Human Factors in Air Traffic Management; General Concepts and Definitions; Safety Culture; Controller Performance and Affecting Factors: Individual differences, Information processing, Situational awareness, Organizational climate, Team work, Stress, Shiftwork, Workload; Human Error: Importance of human error in aviation, Definition and classification; Error Models; Communication: Communication process, Communication models and modes; Working Environment: Ergonomics, Equipment and tools, Automation, Human-Machine interface; Human Factors in Future Systems; Examination of Cases Related to Human Factors .

HTK509 Real Time Simulation and Data Analysis in Air Traffic Control 3+0 7.5

Basic Concepts: Definition of simulation, Using simulation in aviation, Air traffic management, air traffic control services, Non-radar control, Radar control, Area control services, Approach control services, Aerodrome control services; Simulation: Simulation techniques, Simulation requirements, Stage of preparing simulation, Real-time simulation, Using real-time simulation in education, Using real-time simulation in research, Methods for simulation techniques in non-radar environment, Methods for simulation techniques in radar environment; Assessment: Assessment and rating in simulation education, Exercises evaluation and assessment.

HTK510 Advanced Aircraft Controls and Navigation I 3+0 7.5

Basic Concepts; Introduction to Aircraft Dynamics: Static stability and control, Dynamic stability and control, Lateral modes; Advanced Dynamics and Simulation Modelling for Aircrafts; Basic Navigation Techniques; Modern Control and Navigation Techniques for Air Vehicles: Linear techniques, Non-linear techniques and optimal control techniques, Sensor fusion, Modern avionics systems, Flight testing and system identification, Case studies and projects.

HTK511 Air Traffic System and Evaluation Criterion 3+0 7.5

Concept of System; Concept of Transportation ve Systems; Air Transportation System and Sub-Systems; Elements of Air Transportation System; Importance of Air Transportation System; Definition of Air Traffic System; Functioning of Air Traffic System: Inputs of air traffic system; Processes in Air Traffic System, Outputs of Air Traffic System, Environment of Air Traffic System; Genel Specifications of Air traffic System; Place and Importance of Air Traffic System in Air Transportation System; Air Navigation Service Providers; Figures of Merit for Air Traffic Control Systems; Comparison of Air Navigation Service Providers Based on Figures of Merit.

HTK512 Performance Based Navigation and Design Methods 3+0 7.5

Basic Definitions, The Concept of Performance Based Navigation (PBN): Lateral performance, Vertical performance; Specifications of Navigation; Required Navigation Performance (RNP); Types of RNP; RNP in the En-route and Terminal Control Area, Infrastructure of Navigation Aids; The Application of Navigation: Route Design Based on RNP and Point Merge System (PMS); RNP and PMS SIDs and STARs; Application of Performance-Based Route Design in Simulation Environment.

HTK513 Quantitative and Qalitative Research Methods in Air Traffic Control 3+0 7.5

Introduction; History of Scientific Research; Related Concepts and Definitions; Quantitative Research Methods; Qualitative Research Methods; Mixed Research Methods; Scientific Re-search Ethics and Integrity; Quantitative Research Methods in Air Traffic Control; Qualitative Research Methods in Air Traffic Control; Sample Problems and Solutions, Reporting and Presentation; Discussions.

HTK515 Human-Computer Interactin in Air Traffic Control 3+0 7.5

History of Human and Computer Interaction; Related Concepts and Definitions; Human Perception, Ergonomics, Cognition, and Psychology; User-Centered Design; Task Analysis in User Interface Design; Principles of User Interface Design; Components of User Interface Design; Interface Programming; System Evaluation; Accessible Design; Ergonomic issues in air traffic control, Ergonomic issues for equipment, Ergonomic issues for displays; Related Studies.

HTK517 Scientific Research Projects in Air Traffic Control 3+0 7.5
Aims of Scientific Research Projects; Introduction to Scientific Research Projects; Project Abstract; Project Purpose; Project Scope; Project Literature; Original Value of Projects; Project Management; Project Work Packages; Project Opportunities; Added-Value of Projects; Success Criteria for Project; Project Budget; Project Management; Analysis and Evaluation of Current Projects; Evaluation of Student Projects; Discussion of Projects.

HTK519 Dynamic Airspace Management 3+0 7.5
Introduction to Airspace Concepts: Demand and Capacity Relations in Air Traffic System; Airspace Structures: Adaptable airspace, Generic airspace, Conventional low altitude airspace, High altitude airspace, Super-density airspace structures; Dynamic Air Space Structures: Dynamic route planning, Dynamic sectorization; Simulation and Modelling of Dynamic Airspace Structures in the Air Traffic System; Next-Gen and SESAR Examples of Dynamic Air Space Management.

HTK520 Air Traffic Management and Environmental Impacts 3+0 7.5
ATM and Environmental Impacts: Understanding of environmental issues relevant to aviation, The impacts of aviation on air quality and climate change; ATM and Environmental Impacts: Operational parameters, Aircraft emissions, Noise, Environmental impacts around airports, Landing and Take-off cycle, Environmental impacts during approach and climb phase, Noise abatement procedures; Environmental Assessment: The calculation of aircraft emissions, Emission estimation tools; Flight Efficiency; ATM factors affecting flight efficiency, Horizontal flight efficiency, Vertical flight efficiency; Operational improvements: CDO and CCO concepts, Direct routing.

HTK521 System Analysis and Design 3+0 7.5
System Concept and General System Theory: Introduction and Definitions; Information System and Information System Types: Information System Development Process, System Analyst Duties and Capabilities; Preliminary Investigation and Feasibility Analysis, System Proposal Preparation and Presentation, Systems Analysis, Difference Between the System Life Cycle and System Development Methodology; Systems Design; Systems Implementation, Process of Transition to a New System.

HTK522 Airspace Capacity and Traffic Flow Optimization 3+0 7.5

HTK524 Use of Decision Models for the Solutions of Air Traffic Management Problems 3+0 7.5

HTK592 Seminar 3+0 7.5

HTK601 Air Traffic Management and Aircraft Performance II 3+0 7.5
Introduction to Air Traffic Management and Aircraft Performance ICAO Annex 6; g Factor; Maximum Structural Weights; Maneuvering Envelope; Engine Limitations; Take-off Performance and Limitations, The factors of effecting performance; Cruise Performance, Cruise speeds, Cruise range and endurance, The factors of effecting cruise performance; Landing Performance and Limitations, The factors of effecting landing; Weight and Balance, The determination of center of gravity; Mission Profile, Operational analysis of flight phases; Pre-flight; Determination of Fuel; Aircraft Airworthiness.

HTK603 Models and Simulation in Air Traffic Management II 3+0 7.5
Simulation Models in Air Traffic System Problems; Fundamentals of Simulation; Definitions; Real Time Simulation, Fast time simulation; TAAM Tool; Fast Time Simulation Tools for Air Traffic System Problems, SIMMOD, Definition of air traffic system capacity problems, Analysis of traffic structure, Exportation of sample airspace and airport data to SIMMOD environment, SIMMOD modelling for air traffic flow, SIMMOD outputs, Analysis of outputs.

HTK604 Aviation Safety Management Application 3+0 7.5
Basic Concepts: Safety Culture; Basic Safety Management Rules and Procedures; The Effects of Safety Management Applications on Operators; Incident and Accident Investigations; Safety Policy: Policy Statement; Organizational Structure and Procedures; Safety Promotion: Culture; Training and Communication; Risk Management: Risk Identification; Risk Mitigation; Risk Assessment; Human Factors and Error Models; Safety Assurance: Internal and External Audits; Corrective Actions; Assessment of Safety Management Efforts.

| | | |
|---|---|-----------------|
| HTK605 | New Concepts and Visions in Air Traffic | 3+0 7.5 |
| <p>Related Literature of Air Traffic Management, Literature databases, Projects, ATM research and development seminars; Milestones of Air Traffic Management; The Structure of Modern Air Navigation System; New Projects and New Concepts, SESAR, Next-gen; The Problems Classifications of Air Traffic System; Technical Solutions of Airspace Management and Airport Design, Solutions of flow management, Airspace management strategies</p> | | |
| HTK606 | Advanced Aircraft Controls and Navigation II | 3+0 7.5 |
| <p>Introduction to Aircraft Dynamics, Basic principles, General Equations of Unsteady Motion, Longitudinal stability, Lateral stability; Navigation, Navigation techniques; Evaluation of real traffic environment, Aircraft Control, Open and Closed Loop Controls, Effects of Human Pilots; Advanced Aircraft Dynamics and Simulation Models, Analysis of current models; Sample Application for Each Students; Real time simulation for sample models; Real Time Trajectory Generation and Analysis; Conflict Detection and Resolution Models.</p> | | |
| HTK607 | Measuring of Quality and Customer Satisfaction in Air Traffic Control Services | 3+0 7.5 |
| <p>Basic Concepts: Service, Air traffic control services, Quality, Customer; Service Quality: Significance of Measuring Service Quality, Models in measuring of service quality, Total perceived service quality, SERQUAL, SERVPERF; Customer Satisfaction: Inner Customer, Customer, Customer loyalty, The relationship between satisfaction and quality; Measurement Technics: Methods of Accepted All Over the World, Use of scales, Making of scale and assessment.</p> | | |
| HTK609 | Air Traffic Management and Environment | 3+0 7.5 |
| <p>Fundamental Combustion Thermodynamics; Emission Types: NO_x, HC and CO; Greenhouse Gases; Contrails; Emission Mechanisms; Emission Regulations; Emission Inventory Investigations: ICAO, SAGE, AERO2K, DLR; Emission Measurements; Emission Abatement Techniques in Engines; Emission Analyses with Flight Data; Engine Power and Emissions; Effect of Flight Phase on Emissions: Cruise, Climb, Descent; Emission Estimations Based on Airport; Effects of Continuous Descent Approach on Aircraft Emissions and Fuel Consumption; Noise.</p> | | |
| HTK610 | Cost Analysis in Air Traffic Management | 3+0 7.5 |
| <p>Concept of Air Traffic Management; Developments and Innovations in Air Traffic Management in the World and Turkey; Place of Air Traffic Management in Air Transport; Service Principles in Air Traffic Management; Air Traffic Service Providers and General Features; Costs of Air Traffic Service Providers; Air Traffic Service Charges; Users and Customers in Air Traffic Management; General Characteristics of Air Traffic Management Users; Economic Characteristics and Cost Structures of Air Traffic Management Users; The Impact of Air Traffic Management on User Costs; Efforts to Reduce Costs Related to Air Traffic Management.</p> | | |
| HTK611 | Artificial Intelligence Applications in Air Traffic Control | 3+0 7.5 |
| <p>Definitions and Introduction; Concept of Artificial Intelligence; Artificial Intelligence Technologies; Expert Systems; Structure of Expert Systems; Artificial Neural Networks and Learning; Multilayer Perceptron; Artificial Neural Networks Applications; Genetic Algorithms; Functioning of Genetic Algorithms; Fuzzy Logic; Artificial Intelligence Applications for Air Traffic Control Systems; Neural Network Applications for Air Traffic Control Systems; Genetic Algorithm Applications for Air Traffic Control Systems.</p> | | |
| HTK613 | Universal Design in Air Traffic Control | 3+0 7.5 |
| <p>Definitions; Introduction to Universal Design; History of Universal Design; Related Concepts and Definitions; Equitable Use; Flexibility in Use; Simple and Intuitive Use; Perceptible Information; Tolerance for Error; Low Physical Effort; Size and Space for Approach and Use; A Community of Learners; Learning Climate; Applications; Universal Design Approach for Air Traffic Control Systems; Analysis and Discussions.</p> | | |
| HTK615 | Critical Questioning in Air Traffic Control | 3+0 7.5 |
| <p>Definitions and Aims; Introduction to Critical Thinking, History of Critical Thinking; Foundations of Critical Thinking; Creative Thinking; Higher-Order Thinking; Reasoning; Problem Solving; Decision Making; Analysis; Synthesis; Evaluation; Socrates Questioning; Decision Making Structure for Air Traffic Control Systems; Problem Detections and Solution Methods; Analysis of Solution Methods; Evaluations.</p> | | |
| HTK692 | Seminar | 3+0 7.5 |
| HTK790 | Thesis | 0+1 30.0 |

HTK890 Thesis 0+1 30.0

HTK890-0 Thesis (Thesis Proposal) 0+1 30.0

içT503 Design Theory I 2+0 7.5

The Design Concept; Design history, The Historical requirements, the contemporary formation The periodical Design, Knowledge, the knowledge theories, Design. The technical-technological relations, Design periodical Levels, Bauhaus and The faults, The Deficiencies. London Design Conference; Design-Art Conflict Design Theories; Dialectic Design, Pragmatics, Performance Tree Theory, Indicator Science Theory, Analytical Theories, Traditional Theories, The Basic Concept of The Design; The period the quantity , the quality, The phenomenon, the concept, the content, the abstract, the abstraction, the inspiration, the inversion. The creative, the aesthetic object, the aesthetic exceeding, The entropy, Eeurytm. The Design-Site Requirements; The Design-Ecology, The Design-Usefulness The Site; The past, the present, the future-Designs.

içT504 Design Theory II 2+0 7.5

The analysis of the design period. The Design Steps; The problem, the Procedure and the method related to the problem. Collecting Again; The Research and the Sources Finding. Designing. Intellectual Animations, the Intellectual Simulation Techniques, Finding-Inspiration. Inspiration Finding Methods; Model (Design Summery), Model Development, Decision-Production; Perception Concept, General Approaches, Jung Concept, Freud Concept, Pavlov Concept, Gestalt Concept. Inventional Methods; Analogies, Brain Discussion, Synectic Technique, Lateral Technique. Design and Modern Trends; Performance, Happenings, Process Art, Action Art, Installation, postmodernism and design.

içT507 Furniture design and Conceptual Approaches 3+0 7.5

Different design methodologies on furniture design. Relation between designer-user-manufacturer according to manufacturing process. Interface between user and space.

içT513 Design Studio I 3+0 7.5

Forming a Design Problem that is Caused by Special Conditions with Different Reasons, Independents From Space, Time and has a Theoretical Base; Analyzing this Design Problem through Different Approaches and Theories that would be Gotten by Literature Researches; Developing Proposal for Solution to this Defined Design Problem through a Contemporary Approaches; Computer Aided Design and Presentation.

içT514 Design Studio II 3+0 7.5

Forming a Design Problem through an Approach that Criticises Present Physical Environment, Defines Strong Spatial Relations; Analyzing this Design Problem through Different Approaches and Theories that would be Gotten by Literature Researches; Developing Proposal for Solution to this Defined Design Problem through Contemporary Approaches; Computer Aided Design and Presentation.

içT517 Professional Ethics 3+0 7.5

Definition and Fundamentals; Ethics in Society and Universal Values; Definition of Social Responsibility; Ethics in Interior and Furniture Design: Ethical Values in Design Process, Ethical Values in Application Process, Ethical Values in Among Colleague; Privacy: Privacy and the Sanctity of Private Lives; Ethics in Visual and Print Media for Interiors; Principles in Professional Ethics.

içT518 Continuity in Interior and Environmental Design 3+0 7.5

The concept of sustainability: Reasons, which make this concept; change in the public sense, change in the physical conditions and the reflections of these to the design. The need of sustainability in the physical environment; theories of urban design, Heidegger and the philosophy of architecture, Shultz and the theory of place, Lynch and the image of the city. The lesson will be supported with research, develop and evaluate in Eskisehir example.

içT519 Phychology and Space 3+0 7.5

Psychology-Space Relations; Need to Territorial Space, Personality-Identity, Personal Distance, Social Distance, Territory, Privacy, Psychology of the User: Space Effects People, Examples on the Topic, House, Sacred Place and Working Space, Commercial Spaces; Analysis of Different Spaces and Users on this View; Psychology of the Designer, Different Designers and Their Approach.

içT521 20th Century Interior Design History 3+0 7.5

Industrial Revolution and social-economic and technological changes in this period. Modernism (1856-1914) Avant-Garde (1915-1933)- Art Deco (1925-1945) After War Period (1945-1960) Anti Design Period (1965-1976) Postmodernism and influences of these periods on interior design.

içT524 Human/User Centered Space Design 3+0 7.5

Contemporary Approaches to the Concept of Design: Origin of design, Historical overview of the perception of design; Design as a Process; Design Thinking: Design thinking in the historical process; Elements of Design Thinking; Human/User-Centered Design: User experience; Design Experience; Contextual Analysis of Factors Affecting the Experience; Designing Experience Environments: Analysis of theoretical approaches and case studies concerning experience environments.

içT525 Material Design 3+0 7.5

Main Concepts of Material Design: Material, Component, Structure; Use of Materials in Interior Design: Finishing, Lighting, Equipment, Furniture; Material Types: Organic materials, Inorganic materials, Composite materials; Material Relations: Material and functionality, Material and aesthetics; Design Approaches: Modular design, Hybridization, Functional improvement, Aesthetical improvement; Techniques in Material Design: Molding, Forming, Subtraction, Addition, Multiplication, Disassembly, Compacting, Curing, Melting, Finishing.

içT527 Computer Aided Manufacturing and Practice 3+0 7.5

içT528 Composite Material Technology 3+0 7.5

Research of Wooden Composite Materials Used in Interior Spaces; Plates produced by making wood chips or small-sized strips, Plates produced by transforming wood into fiber; Research of Plastic and Wood Composites: Examination of Layered Composite Materials: Examination of Laminated Composites: Test Techniques in Composite Materials: Production Regulations of Carbon Composite Materials: Use and Research of Bearing Wood Composites in Building Sector: Investigation of Adhesives and Binder Technologies Used in Composite Production: Concrete in Construction Sector and Its Application Areas: Investigation of Production Technology of Ceramic Matrix Composites.

içT529 Design Studies 3+0 7.5

Design Problems; Design and Design Processes: Designer approaches to solving design problems, Innovative design methods; Design and Innovation relationship; Design Thinking; Empathise, Define, Ideate, Prototype, Test; Designer Responsibility; Social Responsibility Dimension of Design; Design Management: Criticism in the fields of design management, development of communication language used by management and design fields, interdisciplinary design management and decision making ability.

içT531 Interior Space 3+0 7.5

Interior Space Ergonomics: Lighting Methods; Design Problems; Design and Design Processes: Designer approaches in solving natural lighting problems, Innovative design methods in artificial lighting; Relationship between Anthropometry and Design: Kitchen Ergonomics: Relationship between Material Size and Ergonomics: Relationship between Noise and Acoustics in Interior Space: Furniture Ergonomics and Design Dimensions: Total Quality Management and Ergonomics: Office Design and the Concept of Ergonomics: Criticism of existing offices, Examination and interpretation of open office designs: Ergonomic Studies Related to Community and Space Psychology in the Pandemic Period.

içT552 Corporate Identity and Space Design 3+0 7.5

Identity, Perception and Meaning Concepts; Symbolic Aesthetics and Expansions; Corporate Identity: The concept of corporate identity, The importance of corporate identity, Development of identity, Applications in the historical process, Corporate image and strategy; Brand and Space Experience; Reflection of Corporate Identity to Visual Identity: Visual application guides, Place identity, Architectural and interior design identity; Commercial Space Analysis: Commercial spaces offering service, product and experience.

içT592 Seminar 3+0 7.5

içT601 Design Researches Workshop I 3+0 7.5

Conceptual, And Theoretical Approaches To Design Concept: Historical view to fundamental questions of the design; Interdisciplinary relations, and interactions, Intellectual infrastructure of the design, Problems And Expansions To Be Occurred In The Near Future: Critical readings, Making infrastructure to an article via researching, determining, and evaluating design problems.

içT602 Design Researches Workshop II 3+0 7.5

Interaction of technology, and design concepts: Interaction of technology and human, design concept, development process of the design and usage of the technology for the application, New Tendency On The Design: New concepts, approaches, and production facilities, Making infrastructure to an article via researching, determining, and evaluating design problems.

içT603 Spatial Relationships and Interfaces 3+0 7.5

Theoretical approach on space and relations: Researching relationships between humans and relationship between places together through sociology, Relation, contradiction and harmony concepts; Reading of existing physical environment and place: Interdisciplinary different approaches and different readings, Historical and cultural continuity concepts and contributions of historical process to spatial reading, Requirements of multi-aspect readings; spatial relationship and spatial continuity: Different dimensions of spatial relationship, Concepts of spatial continuity and innerface at different scales, All innerfaces from scale of city to interior spaces, places, doors, windows, walls, halls,city walls, streets, avenues, etc.; Importance of spatial continuity and concept of integrated design at the spatial design,Importance of evaluating the interior design with these approach; Supporting this lesson with visual material and studies that are made by students through decisions and evaluations at the different scales.

içT605 Globalisation, Identity and Design 3+0 7.5

Culture as a dimension of globalisation. Importance of the culture in terms of the globalisation. Making infrastructure of the globalisation in the process of the Modernism-Postmodernism. Global culture and efficiency of the design. Importance of the global ethic, social ethic, cultural ethic in the design process. Culture-Identity and Design relations. Effects of the globalisation from personal identity to social identity and identity problem on design approaches.

içT606 Aesthetic Criticism on Interior Design 3+0 7.5

Appreciation judgement and norms (emotional, subjective, enjoyment, like), Value judgment and norms (social, objective), Reflection (Success at the reflecting truth, Success at reflection effect.), Expression (Success at expression and transfer, Originality, Sincerity, The power of the dream, Social, moral value of the reflex.), Aesthetic (Limitation with religious, moral, political, traditional values, limitation with only aesthetic.), Formal criticism, "New criticism" on Interior Design, Criticism in terms of design principles. (Balance, unity, wholeness, harmony, domination, reconciliation, originality.) Constructivist criticism (personal constructivism, social constructivism), Postmodern criticism (Postmodern information "chaos", Postmodern present, "Endness", Postmodern constructivism, "Isolation", Criticism of Noncriticism, ?Aesthetic and Nonaesthetic? dimensions and criticism.

içT607 Earthquake Security and Space Design 3+0 7.5

Living With Earthquake Consciousness: Earthquake security and space design; Nonstructural damages and life safety, Historical analysis based on concepts of spatial relationships and innerfaces, and house to reduce the nonstructural damages: Houses in ancient settlement, Houses in traditional Turkish city settlement, The effects of westernization period on the house space design and its usage, Changings on houses in the period of the republic, evaluation, conclusion, and suggestions for making data to the design problem.

içT609 Analytical Approach on Interior Design 3+0 7.5

Analytical Method: Definition, Process, Approaches in the historical process, Fields of the usage and the technics; Part-Whole with time, flexibility, structural component, short-term transformations, analysing of evolutionary long-term nontransformation principle, Analytical Evaluation Of The Visual And Spiritual Approaches On Interior Design; Analysing and Evaluating data.

içT611 Consumption and Design 3+0 7.5

Relationship between Production, Consumption and Design: Effects of production on design, Effects of consumption on design, Effects of design on consumption; Relationship between Producer, Consumer and Designer: Common design, Custom design, User design; Production Types: User production, Custom production, Mass production; Relationship between Consumption and Needs; Relationship between Consumption and Marketing; Need for Change in Products: Consumer trends, Market trends; Product Life Cycle: Production, Consumption, Disposal; Alternative Methods in Product Change: Repair, Do it yourself, Design it yourself, Reuse, Upcycle, Recycle.

içT612 Formation of Determination of Semantic Quality in Interiors 3+0 7.5

Interior Space: Definition, Components, Physical and semantic limitations; Semantic Subjectivity and Objectivity; Psychological Factors on Social and Cultural Body; Developing New Methods in Interior Design; Use of New Methods in Data Analysis.

içT613 New Museology-Cultural Heritage and Museum Space Design 3+0 7.5

Conceptual Change of Museum and Its Definition in the Historical Process: The concept of new museology: current expansions of museology science; Contemporary Museum and Its Relations with Cultural Heritage: Concepts of tangible and intangible cultural heritage and their effects on museum space design; Diversity of Interventions for Adaptations of Cultural Heritage Buildings to Contemporary Museum Function; Designing Museum Space as an Experience Environment:

Design input for the museum space; Changing Design Approach for Museum Space from Modern to Postmodern Period: Characteristics of the concept of postmodern museum and analysis of other innovations related to understanding of contemporary museum.

içT615 Lighting Design and Technology 3+0 7.5

Definition of General Concepts of Interior Lighting Technology: Lighting Arrangements; Designer approaches in solving natural lighting problems, Innovative design methods in artificial lighting; Relationship between Lighting and Design: Effective Use of Lighting and Energy: Relationship between Visual Comfort and User: Relationship between Lighting and Sustainability in Interiors: Lighting Ergonomics and Design Measures: Design of Technical and Aesthetic Lighting Arrangements: Office Lighting and Application Designs: Kitchen Lighting and Criticism to Existing Designs: Use and Interpretation of Natural Lighting Technology with Sustainable Techniques: Light Pollution.

içT616 Bending Furniture Design and Manufacturing Technology 3+0 7.5

Definition of General Concepts of Bending Furniture: Bending Furniture Regulations; Using the steaming method, using lamination technology; Mechanical Properties of Bending Furniture: History of Bending Furniture and Its Effects in Our Country: Types of Solid Wood Used in Bending Furniture Technology: New Design Approaches in Bending Furniture: Design Analysis in Bending Furniture Examples Made in the 1900s: Modularity and Sustainability in Bending Furniture: Preparing a New Bending Furniture Design.

içT621 Housing and Changing Boundaries of the House 3+0 7.5

Home, House and Housing; Forces Determining the House Form: Physical Forces, Social Forces; House and its environment; Boundary and the house, Inside-outside, inside-inside relationships, Historical development and borders; Conditions of Modernity: House and housing during the first half of the 20th century, House and its changing boundaries, Period samples; Modern Movement in Turkey: Changing relationships different examples of the period, Bahçelievler sample; Literature Studies and Spatial Analysis with Students.

içT692 Seminar 3+0 7.5

içT790 Thesis 0+1 30.0

içT890 Thesis 0+1 30.0

içT890-0 Thesis (Thesis Proposal) 0+1 30.0

İNŞ503 Advanced Foundation Engineering 3+0 7.5

Subsurface Exploration; Retaining Walls; Sheet Pile Walls; Braced Cuts; Piles for Lateral Deformation; Anchored Wall; Shallow Foundations; Footing; Mat Foundations; Deep Foundations; Pile Foundations; Drilled-Pier and Caisson Foundations; Foundations on Difficult Soil; Reinforced Earth Structures; Soil Improvement Techniques.

İNŞ504 Soil Modeling 3+0 7.5

Introduction to Soil Modeling; Stress; Stain And Effective Stress; Elastic and Plastic Deformations; Yielding; Hardening and Plastic Flow; Ideal Elastic Behavior; Least-Plastic Behavior; Equilibrium and Compatibility; Relationships Between States of Stress and States of Strain; Two Dimensional States of Stress; Mohr's Circle of Stress; Principal Planes and Principal Strain Paths and Invariant; Elastic-Plastic Constitutive Modeling Soils; Soil Plasticity, Failure Criteria; Cauchy Elasticity and Modeling; Hyper Elasticity and Modeling; Critical State Model.

İNŞ505 Slope Stability Analysis 3+0 7.5

Introduction to Slope Stability; Sampling and Laboratory Testing For Studies of Slope Stability; Field Assessment of Slope Stability; Methods of Stability Analysis; Slope Instrumentation and Monitoring; Types of Instrument; Planning and Design of the Monitoring Systems; Improvement of Slope Stability; Unloading; Buttressing; Drainage; Reinforcement; Retaining Walls; Vegetation; Surface Slope Protection; Soil Hardening; Rock Slope Stabilization Methods.

İNŞ508 Stochastic Methods in Hydrology 3+0 7.5

Principles of Probability Theory; Determination of Probability of Coincidence Events; Distribution of Variability Coincidence; Distribution of Frequencies; Principles of Statistics; Probability Distribution Function; Sampling Distributions

and Statistic Hypothesis; Control of Hypothesis; Correlation and Regression; Hydrologic Processes; Classification of Stochastic Processes; Models of Flow Series; Stochastic Methods of Conservation Reservoir

İNŞ509 River Hydraulics 3+0 7.5

Channel Flow and Its Classifications; Description; Types of Flow; River Morphology and Regime; River Survey; Open Channel and their Properties; Kind of Open Channel; Channel Geometry; Geometric Elements of Channel Section; Velocity Distribution in a Channel Section; Energy and Momentum Principles; Energy in Open Channel Flow; Specific Energy; Specific Force; Critical Flow; The Section Factor for Critical Flow Computation; Control of Flow; Flow Measurement; Flow Measuring Structures; Basic Parameters of Two-Phase Flow; Properties and Motion Forms of Fluid and Sediment; Dimensionless Parameters of Two-Phase Flow; Determination of Discharge of Bed Load; Suspended Load and Total Sedimentation; Sand Waves.

İNŞ510 Economic Analysis of Engineering Systems 3+0 7.5

Goals of Engineering Economy; Usage of Resources; Basic Concepts of Engineering Economy; Determination of Choices; Unknown's And Risk; The Effect of Time at Engineering Economy; Parameters of Economic Analysis; Principles of Economic Comparison; Benefits; Determination of Benefits; Expenses; Environmental Impact Assessment; Studies of Environmental Impact Assessment; Optimization; Decision.

İNŞ511 Flood Control 3+0 7.5

Flood Types; Historical Information About Floods; Damages and Losses Brought About By Floods; Relation Floods to Time; Flood Warnings; Remedies of Defense From Floods; Mathematical Modeling of Floods; Rainfall-Runoff Analysis; Infiltration Models; Hydrograph and Derivation of Unit Hydrograph; Flood Routing Trough Reservoir and Channels; Design of Spillway; Flood Measurement; Economic Analysis of Flood Control Project.

İNŞ513 Dams 3+0 7.5

Introduction; Aims of Dams Construction; Hydrology in Dams; Element of Dam Engineering; General; Embankment dam and Types and Characteristic; Concrete Dam Types and Characteristic; Spillways; Outlets and Ancillary Works; Site Assessment and Selection of Dam Type; Load on Dams; Dam Outlet Works; Introduction; The Design Flood; Flood Routing; Sedimentation in Reservoirs; Cavitation; Gates and Wolves; Classification of Gates; Crest Gates; Hydrodynamic Forces Acting on Gates; Spillway; Motion of the Sediment in Dams; Properties of Rock in Foundation; Estimation of Dam Reservoirs Volume.

İNŞ514 Planning and Design of Dams 3+0 7.5

Introduction; Classification of Dams; Parts of Dams; Planning of Dams; Feasibility Study; Planning Study; Construction of Dams; Evaluation of Time Schedule and Required Equipment; Diversion of River Flow; Foundation Treatment; Concrete Gravity Dams; Stability Criteria; Forces Acting on Gravity Dams; Arch Dams; Type of Arch Dams; Design of Arch Dams; Buttress Dams; Design of Buttress Dams; Effect of Dams to Environments and Ecology; Sediment in Dams; Dam Geology; Dam Foundations; Derivation; Outlet Structures; Spillways; Dams Models; Heightening of Dams; Maintenance and Operation of Dams; Measurement Made on Dams and Failure of Dam.

İNŞ519 Water Resources Systems 3+0 7.5

Water Resources; Introduction; Historical Perspective on Water Resources; A Perspective on Earth and Universe; Water in the Earth Atmosphere System; Principles of Flow of Water; Water Economics; Water Law; System Analysis; Uncertainty and Reliability Analysis; Water Resources Quality; Water Quality; Lakes and Reservoirs; Groundwater; Wetland; Water Resources Supply System; Surface Water Resources System; Groundwater System; Water Treatment System; Water Distribution; Wastewater Collection Systems; Irrigation Systems; Importance of Water Resources Development; Sources of System and System Analysis; Cost-Benefit Analysis; Classical Optimization Methods; Linear Programming; Dynamic Programming; Simulation Sampling Methods; Multi-Purpose Programming; Decision Theory; Cost-Benefit Analysis According to Project Objectives and Feasibility Study.

İNŞ520 Advanced Groundwater Hydrology 3+0 7.5

Definitions and Equations of Groundwater Flow; One and Two Dimensional Steady Groundwater Flows and Their Analytical Solutions; One Dimensional Unsteady Groundwater Flows and Their Analytical Solutions; Numerical Solutions of Flow Equations: Finite Difference and Finite Element Methods; Unsaturated Flows Well Hydraulics; Introduction to Groundwater Contaminant Transport.

İNŞ522 Matrix Methods for Computing Structural Systems 3+0 7.5

Structural Analysis Versus Actual Response; Principle of Virtual Displacements; Principal of Virtual Forces; Betti's Law; Influence Coefficients. Force and Displacement; Transformations; Transformations of Member Flexibility and Stiffness; Fixed end Forces; Automated Matrix Displacement and Force Methods of Structural Analysis; Releases; Substructures; Nonlinear Analysis; Introduction To Finite Element Method (R).

iNŞ526 Construction Management 3+0 7.5
General Definitions and Introduction to Construction Management; Organizations of Construction Companies; Construction Field Management; Organization and Documentation; Project Management and Organization; Project Planning; Resource Analysis and Resources Management; Construction Machinery Usage; Internal Project Communication; Risk Management; Construction Bankruptcy; Construction Contract Systems and Type of Construction Contracts; Disagreement and Resolving Methods; Labor Relations and Labor Safety.

iNŞ528 Construction Cost Analysis and Estimating 3+0 7.5
Introduction to Construction Cost; Bidding Legislation: Bidding law and Applications; Bidding Types; Qualification for Projects; Preparing Optimum Bid Proposal; Bid Bond; Performance Bond; Exact Ending Cost; Project Acceptance; Punishment Application; Blueprint Reading; Quantity Takeoff; Estimate Application; Bidding Information Systems; Computer Based Bidding Management; Relationship Between Cost and Productivity; Cost Estimate Data Base Management.

iNŞ531 Contract and Cost Management 3+0 7.5
Introduction to Contract Management; Turkish Construction Contract Law; Construction Contract Evaluation; Contract Strategy; Contract Documents; Contract Selection; Contractor Rights; Effect Factors for Decision Support Level; Contract Types; Build Operate Transfer; Design Build Operate Transfer and Finance Build Operate Contract Applications; Resolving Methods for Contract Conflicts; Court Decisions; Contract Risk Evaluation.

iNŞ536 Law in Construction Projects 3+0 7.5
Introduction to Law in Construction Sector, Origins of the Construction Disputes, Construction Claims, Categories of Construction Problems, Resolution of Disputes, Productivity Dispute Relations, Disputes Arises From Project Change Orders, Reflections of Disputes to Parties.

iNŞ539 Introduction to Finite Elements 3+0 7.5
Approximate solution methods: Finite Difference, Finite Element Construction the solution by the Finite Element Method One and Two dimensional problem applications Time dependent one dimensional problems Introduction to nonlinear and three dimensional problems.

iNŞ540 Advanced Highway Materials 3+0 7.5
Nature, Sources And Uses of Bituminous Materials; Production And Classification of Asphalt; Detailed Analysis of Chemical Composition of Asphalts; Chemical And Physical Properties of Asphalt; Tests On Asphalt; Rheology And Behavior of Asphalt; Classification And Properties Of Mineral Aggregates; Tests On Aggregates; Calculation Methods For Aggregate Mixes; Types of Asphalt Aggregate Mixtures And Their Uses In Pavements; Significant Properties And Design of Asphalt Aggregate Paving Mixtures; Modified Asphalt Mixtures; Surface Treatments; Intensive Laboratory Studies And Field Application;

iNŞ541 Advanced Pavement Design 3+0 7.5
Theories, Principles And Practice In The Structural Design And Construction of Highway And Airport Pavements Including Stabilization Techniques; Pavement Types, Wheel Loads And Design Factors; Stresses In Flexible Pavements; Stresses In Rigid Pavements; Vehicle And Traffic Consideration; Climate, Environment; Materials Characterization; Sub grades; Bases And Sub bases; Bituminous Surfaces; Design of Pavement Evaluation Performance Evaluation Surveys And The Design of Asphalt Mixtures; Rigid Pavement Design; Design of Flexible Airport Pavements; Design of Flexible Highway Pavements; Design of Rigid Airport Pavements; Design of Rigid Highway Pavements; AASHTO Design Methods; Shell Method.

iNŞ542 Neural Network Applications In Transportation Engineering 3+0 7.5
Formal Definition of Artificial Neural Networks; Simple Introduction To Neural Networks; Types of Artificial Neural Networks; Application Fields of Artificial Neural Networks; Some Basic Neural Network Theories; Kohonen Networks; Vector Quantization And K-Means; Self Organizing Map; Learning Vector Quantization; Other Kohonen Networks; The Architecture; That Means Layers And Neurons In Artificial Neural Networks; Back-Propagation Algorithm; Some Major Drawbacks of The Back-Propagation Algorithm; Applications of Artificial Neural Networks In Science; Special Applications of Neural Networks In Transportation Engineering; Applications of Some Computer Programs With The Related Subject; The Evaluation Techniques of These Computer Programs.

iNŞ543 Theory of Elasticity 3+0 7.5
Analysis of Stress and Strain; Fundamental Equations in Theory of Elasticity; Stress Problem; Displacement Problem; Compatibility Conditions; General Theory of Plane Elasticity; Plane Stress (Thin Plate Problem); Plane Strain (Long Cylinder Problem); Solutions in Cartesian Coordinates; Stress Functions; Airy Stress Function; Boundary Conditions; Polynomial Solutions; Biharmonic Functions; Examples: Fourier Series Solutions; Examples: Solutions in Polar Coordinates; Examples.

Globalization; The Structure of the International Construction Industry; International Strategic Alliances; International Construction Project Finance; International Standards; FIDIC Contracts; Disputes and Resolution Methods; Risk Management in International Construction Projects; Cultural Differences in International Construction Projects; Human Resources Management in International Construction Projects; Models Used in Multi-National Companies; Project Management in different Countries; Case Studies.

iN\$555 Advanced Concrete Technology 3+0 7.5

Introduction; Concrete Making Materials; Cements; Types of Cements; Portland Cement; Aggregates; Admixtures; Mixing Water; Concrete Casting; Cold Weather Concrete; Hot Weather Concrete; Mass Concrete; Roller Compacted Concrete; Self-Compacted Concrete; Preplaced Aggregate Concrete; Underwater Concrete; Geopolymer Concrete; Fiber Reinforced Concrete.

iN\$556 Plastic Design of Steel Structures 3+0 7.5

Introduction to Limit States Design; Comparison with Allowable Stress Design; Resistance Of Cross-Section Under Simple and Combined Forces; Interactions; Stability Controls; Limit Loads for Structural Systems; Mechanism and Step-By-Step Methods and Examples; Connections

iN\$557 Soil Structures and Ground Improvement Techniques 3+0 7.5

Introduction; Retaining Structures; Earth Pressures; Effects of External Loads; Rigid Support Systems; The Mechanics and Construction of Reinforced Earth; Flexible Retaining Structures; Anchors; Calculation of Steel And Shot Crete Retaining Structures; Deep Vibro Techniques; Dynamic Compaction; Cement Grouting; Jet Grouting; Compaction Grouting; Lime And Lime/Cement Columns; In Situ Soil Mixing.

iN\$558 Hydrology of Floods and Droughts 3+0 7.5

Hydrology of Floods: Introduction, The factors affecting flooding, rainfall-runoff relationships, methods of flood forecasting, regional flood frequency analysis, the displacement of flood, flood management. Hydrological drought: Input, Low flow and drought periods, low-flow analysis, analysis of the dry period, drought management.

iN\$559 Hydrologic Modeling 3+0 7.5

Basin delineation and determination of basin characteristics using Geographic Information Systems; Introducing hydrologic model types; Examples and computer applications; Hydrologic modeling routines; Precipitation, soil; runoff, routing; Model calibration and validation concepts; Manual and automatic calibration; Objective function, optimization; Goodness of fit tests for model performance

iN\$560 Bituminous Mixtures Design and Technology 3+0 7.5

Selection of Aggregates and Binders for Asphalt Mixtures; Engineering Properties of Bituminous Mixtures and Their Relation to to Pavement Performance; Conventional Mix Design Methods: Marshall design method; Developments in Bituminous Mixtures Technology: SUPERPAVE mix design method; Type of Bituminous Mixtures: Asphalt concrete mixtures, Surface coating, Stone mastic asphalt (SMA), Porous asphalt pavements, Sullury seal, Mastic asphalts; Methods of Recycling Asphalt Pavement; Mixture Production and Construction; Quality Control; Pavement Performance and Management; Pavement Maintenance and Rehabilitation.

iN\$561 Pavement Maintenance-Rehabilitation and Recycling Strategies 3+0 7.5

Flexible and Rigid Pavement Structure; Layers and Properties of Pavement; Properties of Subgrade Soil, Pavement Drainage; Pavement Distress: Definition, Development of mechanism; Preventative Maintenance Practices: Sealing cracks, Full-depth repair, Seal coating, Technology and tools, Examples of preventative maintenance program; Techniques for Reconstruction of Pavement; Recycling Pavement Materials: Recycling methods of asphalt pavements: Cold planning, Hot recycling, Hot in-place recycling, Cold in-place recycling, Full-depth reclamation.

iN\$562 Applications of Soil Dynamics 3+0 7.5

Introduction to Soil Dynamics; Properties of Dynamically Loaded Soils: Laboratory tests, Field tests; Foundation Vibration, Dynamic Bearing Capacity of Shallow Foundations; Lateral Earth Pressure and Designing Retaining Walls under Dynamic Loads; Settlement Analysis under Dynamic Loads; Machine Foundations on Pile Foundations; Seismic Analysis of Slopes and Fill.

iN\$563 Advances in Sediment Transport Research 3+0 7.5

Properties of Sediment; Hydraulics of Open Channel Flow; Characteristics of Turbulent Flow; Sediment Movement: State of the art in the initiation of granular material movement, Measures of sediment transport, Relationship between movable bed and turbulent flow, Up-to-date sediment transport rate calculations; Experimental Investigation of Sediment Transport in Laboratory and Field, New Methods; Interaction Between Sediment Transport and Erosion/Deposition and Details about Such Engineering Projects.

Introduction; Needs for Testing Concrete; Quality Control of Concrete in Structures; Types and Basic Properties of Concrete; Design for Testing; Types of Tests on Concrete: Standard tests; Cube and cylinder tests, Destructive tests; Core test, Cast-in-place cylinder test, Semi-destructive tests; Pull-out test, Pull-off test, Break off test, Penetration resistance test, Internal fracture test, Nondestructive tests; Rebound hammer test, Ultrasonic pulse velocity test; Electric Resistance of Concrete; Radar Imaging of Concrete; Evaluation of Test Results; Relevant Standards and Specifications.

iN\$626 Cross-Cultural Management in International Construction Projects 3+0 7.5

Basic concepts of culture; Dimensions of culture; Organizational culture; National culture; High context?low context cultures; Monochronic?polychronic cultures; Cultural differences in international construction projects; Multicultural project teams in construction projects; Models used in multicultural organizations; Doing business with different cultures in construction projects; Cross-cultural communication; Cultural differences and project success in construction projects; Effects of cultural differences on management practices; Culture shock; Cross-cultural training; Cross-cultural management in international construction projects.

iN\$627 Advanced Labor Health and Job Safety Management 3+0 7.5

Health and safety in construction; Workplace safety; Accident investigation and prevention; Occupational illnesses; Construction safety training methods; Types of construction accidents; Minor injury, major injury and fatal accident scenarios; Preparation of cartoons and animations; Investigation and analysis of construction accident statistics; Case studies.

iN\$628 Knowledge Management in Construction 3+0 7.5

Basic concepts of knowledge; Types of knowledge; Knowledge conversion processes; Fundamentals of knowledge management; Knowledge management strategies; Knowledge management tools; Knowledge management techniques and technologies; Knowledge management systems; Success in knowledge management; Knowledge management applications; Classification of knowledge in construction industry; Knowledge management cycle in construction projects; Knowledge transfer and knowledge sharing in construction projects; Knowledge management methods of construction firms; Advantages of knowledge management to construction firms; Barriers to knowledge management in construction projects; Knowledge management applications in construction projects.

iN\$629 Pavement Management Systems 3+0 7.5

Introduction to Pavement Management; Inventory Techniques; Distress surveys, Pavement condition surveys, Strength surveys, Friction survey, Ride quality survey; System Maintenance Strategies; Needs determination, Linear programming in pavement management; Rehabilitation and Maintenance Strategies; Priority Programming in Rehabilitation and Maintenance: Prioritization by weighting and combining, Prioritization by analytical hierarchy process; Project Selection Techniques; Project level design, A framework for pavement design, Physical design inputs; Variability, Reliability and Risk in Pavement Management System; Generating Alternative Design Strategies.

iN\$630 Experimental and Computational Methods to Characterize Bituminous Materials 3+0 7.5

Introduction to the Design and Performance Prediction of Asphalt Mixtures; Experimental and Computational Methods Used to Characterize Mechanical Properties and Performance of Bituminous Materials; Performance Modeling at Different Length Scales, Micro and Mezzo Scale Characterization; Characterization of Mix Microstructure; Internal Micro-structure; Mechanisms of Distresses and Techniques to Characterize Distresses: Fatigue cracking, Moisture damage, Permanent deformation.

iN\$631 Design of Seismic Isolated Structures 3+0 7.5

Introduction: Basic concepts, History of seismic isolation; Principles of Seismic Isolation: Earthquake response spectra, Effects of seismic isolation, Linear and bilinear isolation systems, Energy dissipation; Analysis Methods in Isolated Structures: Modification of response spectrum, Time history analysis method; Isolator Devices: Friction pendulum systems, Lead rubber bearings; Mechanical Properties of Lead Rubber Bearings: Effect of loading history, Effect of velocity, Heating of lead core; Design of Elastomeric Bearings: Stability of elastomeric bearings, Design of reinforcing shims, Checks for design earthquake; Testing of Seismic Isolators; Prototype testing, Acceptance criteria.

iN\$632 Design of Ductile Steel Structures 3+0 7.5

Common Properties of Steel Materials; Plasticity; High and Low Cycle Fatigue; Material Models; Applications of Plastic Analysis (Capacity Design and Pushover Analysis); Ductile Behavior of Moment Frames Under Lateral Forces; Behavior of Beam-to- Column Connection and Their Ductile Design; Principles of Ductile Moment Frame Design; Seismic Limit State Approach; Seismic Load Reduction and Displacement Amplification Factors; Seismic Design Procedures in Modern Standards; Stability and Plastic Rotation Capacity of Steel Beams; Cyclic Beam Buckling; Passive Energy Dissipation Systems and Their Application in Structures.

iN\$633 Hydrological Forecasting and Early Warning Systems 3+0 7.5

Role of Real-Time Flood Forecasting and Warning in Flood Risk Management, Principles and Theory Underlying Flood Forecasting Methods, Overall System Design; Hydrological Data Systems: Monitoring systems, Data collection, Data processing, Data archiving; Precipitation Forecasting: Rainfall observations, Radar, Satellite products, Models; Real-Time Flood Forecasting Methods: Empirical, Transfer function, Rainfall runoff models, Flood routing models; Uncertainty in Flood Forecasts; Early Warning Systems: Flood forecast translation, Improvements in decision support systems; Data Assimilation: Combining data from different sources, Application of Kalman and ensemble Kalman filter; Case Studies for Real-Time Flood Forecasting and Warning Practice.

iN\$635 Seismic Performance Assessment of Buildings 3+0 7.5

Structural System: Structural members, Structural irregularities; Seismic Behavior of Buildings: Seismic hazard assessment, Strong ground motion properties, Structural damage, Non-structural damage; Structural Member Behavior: Material models, Moment curvature analysis, Interaction diagrams and surfaces; Structural Analysis: Linear elastic analysis, Modal analysis, Pushover analysis, Time history analysis; Condition Assessment: Building geometry, Member details, Material properties; Performance Assessment of Existing Buildings: Walk-down assessment, Preliminary assessment, Detailed assessment; Strengthening Methods; Component strengthening, System strengthening.

iN\$636 Experimental Design in Geotechnical Engineering 3+0 7.5

Explanation the Systematic of Experiments; Specification of Boundary Conditions; Presentation of Instrumentation Equipment; Triaxial Compression Tests and Analysis of the Results; Shear Box Experiment and Analysis of the Results; Standard Penetration Test and Related Correlations; Plate Load Test and Pile Load Test; Other In-situ Tests; CPT, CPTu, DMT, PMT, FVT; 3 Dimensional Design and Printer Technology; Problems Encountered in Experimental Studies; Case Studies for Laboratory Experiments; Case Studies for In-situ Experiments; Design of Experimental Model.

iN\$637 Remote Sensing and Geographic Information Systems Applications in 3+0 7.5
Water Resources

Principles of Remote Sensing and Geographic Information Systems: Digital image interpretation and spatial data analysis; Mapping of Surface Water Systems; Determination of Evaporation, Soil Moisture and Snow Patterns; Hydrologic and Hydraulic Processes: Data collection, Data processing; Hydrologic/Hydraulic Modeling: Determination of flood magnitudes and flood risk zones, Developing decision support tools for water resources; Statistical Data Analysis/Uncertainty; Case Studies of RS/GIS Applications in Water Resources Management.

iN\$639 Experimental Design in Structural Engineering 3+0 7.5

Introduction to Modal Testing; Applications of Modal Testing; Philosophy of Modal Testing; Fundamentals of Vibrations; Classification of Vibrations and Analysis Procedures; Free and Forced Vibration of Single Degree of Freedom Systems; Free and Forced Vibration of Multi Degree of Freedom Systems; Fourier Series Expansion; Fast Fourier Transform; Determination of Natural Frequencies and Mode Shapes; Vibration Measurements and Applications; Instrumentation; Data Acquisition Systems; Digital Signal Processing, Windowing, Filtering; Modeling, Model Refinement; Structural Damages and Identification Procedures.

iN\$643 Seismic Isolator Tests, Characterization and Modeling 3+0 7.5

Introduction to seismic isolation; Isolator devices; Mechanical characteristics and modeling of isolators; Code provisions for seismic isolation; Isolator tests: Prototype tests, Production control tests; Identification of isolator properties from test results: Computation of post-yield stiffness, Computation of equivalent damping ratio, Computation of equivalent friction coefficient, Comparison of existing definitions for computations; Sensitivity of isolator characteristics to loading protocol and environmental conditions: Loading rate, Axial load level, Low temperature.

iN\$692 Seminar 3+0 7.5

iN\$790 Thesis 0+1 30.0

iN\$890 Thesis 0+1 30.0

iN\$890-0 Thesis (Thesis Proposal) 0+1 30.0

iST505 Econometric Analysis 3+0 7.5

Simultaneous-Equation Models; Simultaneous Dependence of Economic Variables; Consequences of Simultaneous Relations; Solution to the Simultaneous-Equation Bias; Identification: the Problem of Identification; Formal Rules for Identification; Identifying Restrictions; Tests for Identifying Restrictions; Simultaneous-Equation Methods; Reduced-Form Method or Indirect Least Squares; The Method of Instrumental Variables; Two-Stage Least Squares; Mixed Estimation Methods; Mixed Estimation Methods; Restricted Least Squares; Pooling Cross-Section and Time-Series Data; Durbin S Generalized Least Squares; Theil and Goldbergers Mixed Linear Estimation; The Method of Principal Components.

iST506 The Theory of Measure and Probability 3+0 7.5

Lebesgue Measure of Plane Sets; The Concept of General Measure; Extension of Measure Defined on a Semiring to a Measure Defined on the Ring; Additivity and s-additivity of Measure; Measurable Functions; The Lebesgue Integral; Stieltjes Measures; The Lebesgue-Stieltjes Integral; Classification of random Variables for Distributions: Discrete, absolutely continuous and singular distributions; Applications of the Lebesgue-Stieltjes Integral to Probability Theory: Expressions of Mathematical Expectation and Variance of Random Variables by Lebesgue-Stieltjes Integral.

iST507 Circular Data Analysis 3+0 7.5

Circular Data: Diagrammatical representation, Forms of frequency distributions, Examples of directional data; Descriptive Statistics: Measures of location, Measures of concentration and dispersion, Trigonometric moments; Circular Probability Distributions: Uniform distribution, Cardioids distribution, wrapped normal distribution, circular normal distribution; Estimation of Parameters; Tests for Mean Direction and Concentration: Single sample tests, Two and multi-sample tests; Circular Correlation and Regression: Measures of Correlation, Regression models.

iST510 Nonparametric Statistical Techniques 3+0 7.5

The Properties of Nonparametric Techniques; Usage Purposes; Utilities; Limitations; One Sample Non Parametric Techniques; Binomial Test; Sign Test; Rank Sign Test of Wilcoxon; Runs Test; Independent Two samples; Median; Mann-Whitney; Small and Large Sample Tests of Kolmogorov-Smirnov; Dependent Two Sample Tests; Sign; Rank Sign test of Wilcoxon; McNemar Test for Repeated Data; Kruskal-wallis Test for a Few Samples.

iST511 Advanced Regression Analysis 3+0 7.5

Regression Analysis With Matrixes and General Regression Theory and Model Validity; Regression With Dummy Variables; Analysis of Covariance; Comparison of Homogeneity of Two Regression Equations; Examining the Error Terms and Regression Problems; Transportations Used in Regression Analysis; Multiple Colinearity Problem; Biased Estimation Techniques; Ridge Regression; Non-Linear Regression; Calibration; Prediction Intervals.

iST512 Artificial Neural Networks and Statistics 3+0 7.5

Description of Artificial Neural Networks (ANN): Network Architecture, Activation Function, Training Algorithm; Simple ANN Algorithms in Sample Classification: Hebb, Perceptron Net; Some Applications: Connections with Regression and other Statistics Methods; Delta Rule; Multi-layer Perceptron: Back Propagation Algorithm, Generalized Delta Rule; Nonlinear Regression and Multi-layer Perceptron.

iST514 Advanced Statistical Techniques for Researchers 3+0 7.5

Location and Dispersion measurements for Different Measures; Comparison of Sample Distribution With Theoretical Distribution; Contingency Table; Design; Investigation; Levels of Relations Between Variables; Relations Between Differently Measured Data Sets; Linear Regression and Correlation Coefficient; Estimation of the Population Parameters; Significance of Correlation Coefficients; Basics of Experimental Design.

iST517 Multiple Relation Techniques for Questionnaires Analysis 3+0 7.5

Dependent and Independent Variables and their Importance to be Identified in Surveys; Linear Relationships Between Variables; Qualitative and Quantitative Properties; Confidence Intervals for the Relationships; Examination and Interpretation; Inference; Some Special Properties of the Variables; Multi collinearity; Interpretation of the Results; Examination of the Applied and Interpreted Surveys; Critique and Review; Some Applications.

iST520 Maximum Entropy Method and Its Applications 3+0 7.5

Maximum entropy (MaxEnt) method, MaxEnt method for discrete random variables, MaxEnt method for continuous random variables. Entropy: Joint entropy and conditional entropy. Information: Relative entropy and information. The maximum entropy distribution, Application of MaxEnt Method, Application to statistics, Application to economics, Application to regional and urban planning.

iST521 Continuous Markov Processes 3+0 7.5

Stochastic Processes; Markov Processes; Poisson Processes; Markov Property; Properties of the Transition Probabilities; Ratio Matrix and Kolmogorov's Differential Equations; Limit Distribution; Birth and Death Processes; Pure Birth Processes; Branching Processes; Generating Processes in Branching Processes; Probability of Lost Call and Lost Call Time.

Descriptive Statistics; Graphs; Time Series Graphics; Probability Plots; Commands in Minitab; Saving to Output File; Introduction to SPSS; SPSS Menus; Data Input; Data Copy; Determination of Variables; Add New Variable; Remove Variable; Calculate; Cross Tabulation.

İST537 Actuarial Models 3+0 7.5

Calculation of Premiums: Individual and pooled risk models; Measuring Risk: Coherent risk measures; Dependence Between Risks: Sklar's representation theorem; Premiums for Deductibles and Maximum Limits; Calculation of Bühlmann Premiums; Extreme Value Analysis; Generalized Additive Loss Models; Testing Fit of Loss Models by Kolmogorov-Smirnov Test; Measuring Risk with MCMC Methods; Analyzing Loss Tables; SAS Applications.

İST539 Statistical Simulation 3+0 7.5

Concepts of System, Model and Simulation; Random Number Generators: Linear congruential generators; Examination of Some Properties of the Generated Numbers: Run and Gap tests; Generation of Random Numbers from Probability Distribution: Inverse transformation, acceptance-rejection and decomposition methods; Simulation of Some Discrete and Continuous Distributions and Matlab Applications: Binom, Poisson, Gamma; Univariate and Multivariate Normal Distribution; Simulation for Statistical Inference and Matlab Applications: Parameter estimation, Hypothesis test and some applications; Bootstrap and Jackknife Methods and Matlab Applications; Monte Carlo Integration.

İST540 Robust Statistical Methods and Applications 3+0 7.5

Robustluğun Matematiksel Araçları: İstatistiksel fonksiyonel; Fisher Tutarlılık; Differansiyellenebilir İstatistiksel Fonksiyonlar; Robustluğu Ölçme: Etki fonksiyonu; Kırılma Noktası; Robustluk ve Etkinlik Dengesi; Bir Parametrenin Robust Tahmini: M-tahmin edicileri; L-Tahmin Edicileri; Doğrusal Modellerde Robust Tahmin Ediciler: M-tahmin edicileri; GM-Tahmin Edicileri; MM- Tahmin Edicileri; En Küçük Medyan Kareler (LTS) Tahmin Edicileri; Robust Yöntemlerin Bazı Büyük Örneklem Özellikleri; MATLAB ve R Programları ile Uygulamalar.

İST541 Time Series Analysis with Application 3+0 7.5

Fundamental Concepts of Time Series; Time series components/trend, Seasonality, ACF-PACF/autocorrelation tests Bartlett, Box-Pierce Q, Ljung-Box Q, AR-MA-ARMA models and Box-Jenkins methodology; Stationary and Unit Root Tests; Applications with E-views; Structural Break and Structural Break Tests; Applications with E-views; Co-integration and Co-integration Tests; Applications with E-views; Error Correction Models; Causality in Time Series; Granger Causality; VAR Models, Choice of Degree in a VAR Model; Control of Sufficiency; VAR Impact-Response Function; Vector Error Correction Models.

İST542 Sampling Theory and Methods 3+0 7.5

Basit Rastgele Örneklemede Ana Kütle Ortalaması ve Toplamının Tahmini; Güven Aralıkları ve Örneklem Genişliği; Eşit Olmayan Olasılıklı Örnekleme; Yardımcı Veri ve Oransal Tahmin; Yardımcı Veri ve Regresyon Tahmini; Tabakalı Örnekleme; Küme Örnekleme ve Sistemik Örnekleme; Çok-aşamalı Düzenler; İki-Evrelili Örnekleme; Örnekleme Araştırmasında Uygulamalı Problemler; Yakala-Tekrar Yakala Örnekleme, Rastgele yanıt modeli.

İST543 Statistics I 3+0 7.5

Statistics II: Statistics Definition, History, General Information About the Area; Responsive and Non-Responsive Averages: Arithmetic, Geometric, Harmonic, Quadratic, Mode, Median, Quartiles; Variability: Variance, Standard Deviation, Coefficient of Variation; Variables Discrete Probability Distributions: Binomial, Poisson; Continuous Probability Distributions of Variables: Normal Distribution; Symmetry, Asymmetry, and Kurtosis Taper; Moment: Regression Analysis, Categorical Data Analysis, Chi-Square Test.

İST544 Nonparametric Regression Models 3+0 7.5

Basic Concepts: Nonparametric regression; Density Function: Univariate Case, Multivariate Case, Graphical display, Comparison with histogram; Kernel Density Estimation: Properties and applications; K- Nearest Neighbour Density Estimation; Comparison between Kernel Estimation and K- Nearest Neighbour Density Estimation; Splines: Smoothing splines, Regression splines; Local Polynomial Regression.

İST545 Statistical Analysis with Statistical Packages 3+0 7.5

Introduction to Statistical Packages for Statistical Analysis; An Overview of the Software Menu; Data Entry and Variable Definitions; Survey Data, Frequency Tables and Cross-table Entries; Arranging, Processing and Storing Data; Calculation of Descriptive Statistics and Graphic Illustrations; Parametric Tests: Z and Student's t tests, One-way analysis of variance, Two-way analysis of variance; Nonparametric Tests: Chi-square tests, One sample tests, Independent two sample tests, Paired samples tests; Regression and Correlation Analysis..

İST551 Applied Multivariate Statistical Analysis 3+0 7.5

- iST553 Time Series Analysis with Application 3+0 7.5**
Fundamental concepts of Time Series; Time series components: Trend, seasonality; ACF-PACF and Autocorrelation Tests: Bartlett test, Box-Pierce Q test, Ljung-Box Q test; AR-MA-ARMA Models and Box-Jenkins Methodology; Stationarity and Unit Root Tests; Applications with E-views; Structural Break and Structural Break Tests; Applications with E-views; Co-integration and Co-integration Tests; Applications with E-views; Error Correction Models; Causality in Time Series: Granger causality; VAR Models: The Choice of the Degree of a VAR Model, The control of the sufficiency; VAR Impact-Response Function; Vector Error Correction Models.
- iST555 Machine Learning with R 3+0 7.5**
Overview In Machine Learning Basics: Evaluation of basic algorithms, Train and test data sets, Overtraining, Accuracy and confusion matrix and other metrics, ROC; Conditional Probabilities: Conditional expectations and loss function, Discriminative approaches (QDA, LDA), Naive Bayes algorithms, Simple linear regression, Smoothing and matrix algebra: Distance, Cross-validation; K-Nearest Neighbour; Support Vector Machine; Classification; Classification with Two Classes; Random Forest; Principal Component Analysis; K-means Algorithm.
- iST592 Seminar 3+0 7.5**
- iST604 Econometric Models 3+0 7.5**
Traditional Econometric Methodology; The Traditional View of Econometric Modeling; Under fitting a Model; Over fitting a Model; Tests of Specification Errors. Alternative Econometric Methodologies; Learner's Approach to Model Selection; Hendry's Approach to Model Selection. Selected Diagnostic Tests; The Discrimination Approach; The Discerning Approach. Logit; Probit and Tobit Models.
- iST608 Mathematical Methods of Statistics 3+0 7.5**
Line Integrals; Functions of Complex Variables; Derivative and Integral; Power Series; Characteristic Functions of Distributions; Inverse Transformations for Characteristic Functions; Uniqueness Theorem for Characteristic Functions; Continuity Theorem for Characteristic Function in R^1 and R^n ; Some Convergence Theorems; The Normal Distribution in R^n and Some Distributions Connected with Them; Tests of Goodness of Fit; Pearson Theorem.
- iST610 Conjoint Analysis 3+0 7.5**
Some Concept Related to Conjoint Analysis: Factor (Attribute), Interattribute correlation, Level, Orthogonality, Trade-off method; Comparing Conjoint Analysis with Other Multivariate Methods; Stages of Conjoint Analysis: Research question and objectives, Designing a conjoint analysis experiment, Assumptions of conjoint analysis, Estimating the conjoint model and assessing overall fit, Interpreting the results, Validation of the conjoint results; Conjoint Analysis with a Large Number of Factor.
- iST611 Pearson System I 3+0 7.5**
Statistics and Decision Making Theory; Explaining the Decision Problem; Solution Stages in the Decision Problem; Univariate Frequency Distributions; Frequency Distributions; Moments; Density Functions; Pearson System in Frequency Distributions; Obtaining the Common Equation of the Pearson System; Obtaining the Basic Types of the System By the Common Equation; Type I (First Main Type); Type IV (Second Main Type); Type VI (Third Main Type); Proofs of the Main Types; Applications.
- iST612 Pearson System II 3+0 7.5**
Obtaining the Transition Types in Pearson System; Transition Types Which is Produced From the First Main Type Type II; Type VIII; Type IX; Type XII; Transition Function Related to the Second Main Type; Type VII; Transition Function Related to the Third Main Type; Type XI; Special Case of the Type II (Normal Curve); Transition Types Between Main Functions; Type III; Special Case of the Type III; Type X; Type V; Moments of the Overall Types and Obtaining Pearson Criteria; Applications About Transition Types.
- iST613 Artificial Neural Networks and Statistical Models I 3+0 7.5**
Single-Layer Neural Networks, Perceptron; Multi-Layer Feed-Forward Neural Networks: Back-Propagation Algorithms and Statistical Pattern Recognition; Recurrent Neural Networks and Training Algorithms for Pattern Association: Heteroassociative Memory Neural Network; Autoassociative Net; Elman and Hopfield's Net, Bidirectional Associative Memory (BAM).
- iST614 Artificial Neural Networks and Statistical Models II 3+0 7.5**

Radial-Basis Function Networks: Exact Interpolation, Regularization Theory, Relation to Kernel Regression, Comparison with MLP; NN Based on Competition, Fixed-Weight Competitive Nets; Kohonen Self-Organizing Maps; Learning Vector Quantization; Counterpropagation; Adaptive Resonance Theory: ART I, ART II.

iST615 Mathematics Foundation in Regression Analysis I 3+0 7.5

Elements of Matrix Analysis: Generalized Inverse matrices; Idempotent Matrices; Vector, Matrix Norms. General Linear Systems: Gauss Transformation; LU Factorization, Pivoting, Permutations Matrices. Special Linear Systems: LDMT and LDLT Factorization; Banded, Block Systems. Orthogonalization: Householder and Givens Matrices; QR Factorization; The Full Rank and the Rank Deficient LS Problems. The Symmetric and Unsymmetric Eigenvalue Problems: Properties and Decompositions; The Jacobi Methods; Computing the SVD; The Hessenberg and Real Schur Forms; The Practical QR Algorithm.

iST616 Mathematics Foundation in Regression Analysis II 3+0 7.5

Matrix Computations in Linear Regression: Kronecker Products and the Vec and Vech Operators; Generalized QR factorization; Applications for Ordinary and Generalized Least Squares and SUR models. Mathematics Foundation in Nonparametric Regression: A Roughness Penalty Approach; Smoothing and Regression Splines, Kernel Regression and Corresponding Mathematics Concept and Operations; Choosing the Smoothing Parameter. Additive and Generalized Additive Regression's Models (GAM): Estimating Equations for Additive Models and its Numerical Solutions.; Fisher Scoring for GAM; Local-Scoring Procedure; A Roughness Penalty Approach; Choosing the Smoothing Parameters.

iST617 Modern Regression Techniques 3+0 7.5

Linear Regression Analysis; History; Estimation of Coefficients; Model and Model Checking; Least Squares Minimization; Least Absolute Deviations (L₁) Regression; Introduction; Algorithms for Line Fitting; Problems in Algorithms; Estimation of Coefficients; M-Regression: a Regression Sample; Algorithm for Minimization; Line Fitting; Tests for Coefficients; Nonparametric Regression; Line Fitting; Tests for Coefficients; Bayesian Regression; Bayes Approach; Line Fitting; Tests for Coefficients; Ridge Regression; Line Fitting; Standardization; Multi Collinearity; Comparison of Techniques; Comparison Properties; Samples.

iST618 Information Theory and Statistics 3+0 7.5

The Method of Types; The Law of Large Numbers; Universal Source Coding; Large Deviation Theory; Examples of Sanov's Theorem; The Conditional Limit Theorem; Hypothesis Testing; Stein's Lemma; Chernoff Bound; Lempel-Ziv Coding; Fisher Information and the Cramer-Rao Inequality.

iST621 Advanced Circular Data Analysis 3+0 7.5

Nonparametric Testing Procedures: Single Sample Tests, Two Sample Tests; Distributions on Spheres: Spherical Data, Descriptive Measures, Distributions for Spherical Data; Some Inferences for Spherical Data; Circular Correlation and Regression: Measures of Correlation, Regression Models, Bivariate Distributions, Circular Time Series; Modern Methodology in Circular Data Analysis: Outliers, Robust Methods, Bootstrap Methods; General Sample Spaces; Shape Analysis.

iST622 Fuzzy Neural Integrated Systems 3+0 7.5

Basic Operations in Fuzzy Sets; Expansion of Fuzzy Set Concept; Fuzzy Relation; Fuzzy Arithmetic; Fundamentals of Fuzzy Logic; Fundamentals of Fuzzy Logic Control Systems; Projection Methodology; Integrated Fuzzy Systems and Artificial Neural Networks: Basic Concepts; Reasons for Integrating; The Equivalence of Fuzzy Inference Systems and Artificial Neural Networks; Neural-Network-Based Fuzzy Systems: Neural Realization of Basic Fuzzy Logic Operations; Neural-Network-Based Fuzzy Logic Inference; Neural-Network-Based Fuzzy Modeling; Neural Fuzzy Controllers: Types of Neural Fuzzy Controllers; Structure Learning for Neural Fuzzy Controllers.

iST623 Fuzzy Artificial Neural Networks 3+0 7.5

Types of Fuzzy Neurons; Fuzzification of Neural Network Models: Fuzzy Perception; Fuzzy Classification with the Back Propagation Network; Fuzzy Associative Memories; Fuzzy Kohonen Networks; Neural Networks with Fuzzy Training; Neural Networks with Fuzzy Teaching Input; Neural Networks with Fuzzy Parameters; Fuzzy Control for Learning Parameter Adaptation; Fuzzy Neural Classification; Fuzzy Neural Clustering.

iST625 Entropy Optimization Methods With Applications 3+0 7.5

Entropy and Information for Discrete Systems; Conditional Entropy and Mutual Information; Entropy and Information for Continuous Systems; The Method of Variations in Problems with Fixed Boundaries; Variation and its Properties; Euler Equations; Variational Problems Involving a Conditional Extremum; Contraction Mappings; Newton's Method for Lagrange Multipliers; Jaynes' Maximum Entropy Principle with Statistical Applications; Kullback's Minimum Cross-Entropy Principle with Applications.

iST626 Numerical Methods in Modeling with Entropy Optimization Distributions 3+0 7.5

Introduction To Numerical Methods; Linear Equations and Solution Methods for Linear Equations; Nonlinear Equations; Solution Methods for Nonlinear Equations; Numerical Integration Methods; Maximum Entropy Methods for Discrete and Continuous Random Variables; Estimation of Parameters of Statistical Distribution Based on Maximum Entropy Methods; Minimum Cross Entropy Methods for Discrete and Continuous Random Variables; Estimation of Parameters of Statistical Distribution Based on Minimum Cross Entropy Methods.

iST627 Fundamentals of Stochastic Differential Equations 3+0 7.5

A Hilbert Space of Random Variables; Convergence of Sequences of Random Variables, Exercises; Discrete stochastic processes; Continuous Stochastic Processes; A Hilbert space of stochastic processes, Exercises; Stochastic Integrals of the form $\int_0^t \phi(s) dW(s)$, Definition of Brownian motion and its properties, Wiener integral, Conditional expectation, Martingales, Ito stochastic integrals, Approximation of stochastic integrals, Stochastic differential and Ito's formula, Ito's formula for martingales, Applications of Ito formula, Stratonovich stochastic integrals; Multidimensional Ito's formula, Exercises.

iST628 Stochastic Differential Equations and Applications 3+0 7.5

Properties of Solutions to SDE, Some Examples, Bellman-Gronwall Inequality, Existence and Uniqueness Theorem, Ito's Formula and Exact Solutions; Approximating SDE, Systems of SDE; Markov Property, Solutions of SDE, Diffusion Processes, Kolmogorov (Fokker-Plank) Equations, Stability; Parameter Estimation for SDE, Linear SDE, Feynman-Kac Formula, SDE Models in Physical Systems, in Finance and in Biology.

iST629 Stochastic Modeling and Analysis 3+0 7.5

Stochastic Processes: Probability, Distribution And Distribution Function; Expectation, Variance and Covariance; Independence and Dependence; Expectation And Covariance Function for Stochastic Processes; Dependence for Stochastic Processes: Stationary Increments, Independent Increments; Brownian Motion: Defining Properties; Processes Derived from Brownian Motion; Simulation of Brownian Sample Paths; Systems with Stochastic Inputs and the Power Spectrum; Continuity for Stochastic Processes; Differentiation for Stochastic Processes; Integration for Stochastic Processes; Applications.

iST631 Robust Statistical Methods 3+0 7.5

Comparison of Classical and Robust Approaches; Robust Estimates of Location and Scale; Measuring Robustness: Influence function, Breakdown point; Balancing Robustness and Efficiency; Some Robust Estimation Methods: Trimmed least squares, M-estimation, Least absolute deviations (LAD), Least median squares (LTS), Weighted least squares; Partially Adaptive Estimation; Robust Estimation for Regression Model and Parameters of Distributions; Applications in Matlab Program.

iST632 Statistics II 3+0 7.5

Statistics II: Statistical Decision Theory: Hypothesis Testing, Parametric and Non-Parametric Approaches, With Large Sample Hypothesis Testing, Hypothesis Testing With Small Samples; Strength Testing; Chi-Square Distribution: Chi-Square Tests; Simple Linear Regression and Correlation Techniques, T-Test; Analysis of Variance; Analysis of Covariance; Random Block Design; Factorial Experiments; Multivariate Statistical Tests; Factor Analysis; Multivariate Analysis of Variance; Multivariate Analysis of Covariance.

iST633 Data Visualization 3+0 7.5

Some Milestones in the History of Statistical Graphics; Introduction to Visual Literacy: Graphic elements and color theory; Tufte's Principles of Scientific Graphics; Visualization of Temporal Data; Visualization of Spatial Data; Multivariate Data Analysis; Cluster Analysis: Hierarchical and non-hierarchical; Dimension Reduction Methods: Principle component analysis, Correspondence analysis and related methods; Visualization of Textual Data; Networks, Hierarchies and Trees; Big Data Visualization Challenges; Dynamic and Interactive Graphics.

iST635 Advanced Theory of Statistics 3+0 7.5

Location-scale families, Exponential families, Sufficient statistics, Factorization criterion, Minimally sufficient statistics, Completeness, Convex loss functions, Uniformly minimum variance unbiased (UMVU) estimator, Locally minimum variance unbiased estimator (LMVU), Deriving UMVU estimators, Nonparametric families, Information inequality, Invariance and equivariance, Minimum risk equivariant (MRE) estimator, Principle of equivariance, Bayes estimator, Uniformly most powerful tests (UMP), Neyman Pearson Lemma, p-value, Monotone likelihood ratio, Likelihood ratio test, Unbiasedness for hypothesis testing, UMP tests for multiparameter exponential families

iST636 Econometric Modelling 3+0 7.5

Introduction to Econometrics; Linear Regression Models; Nonlinear Regression Models; Spatial Regression Models; Model Selection Criteria; Truncated and Censored Data; Regression Models for Count Data; Truncated Regression; Censored Regression; Censoring and Truncation in Models; Bias Correction Methods; Simulation and Real Life Applications in Matlab Program.

| | | |
|--|--|-----------------|
| iST637 | Stochastic Differential Equations I | 3+0 7.5 |
| Hilbert Space of Random Variables; Hilbert Space of Stochastic Processes; Stochastic Integrals of the Form $\int_a^t f(s, w) ds$; Ito's Stochastic Integrals, Approximation of Stochastic Integrals; Stochastic Differentials and Ito's Formula; Stratonovich Stochastic Integrals; Existence of the Unique Solution of SDE; Properties of Solutions to Stochastic Differential Equations; Ito's Formula and Exact Solutions; Approximating Stochastic Differential Equations; Kolmogorov (Fokker-Plank) Equation; Maximum Likelihood Estimation Method; A Non-parametric Estimation Method. | | |
| iST638 | Stochastic Differential Equations II | 3+0 7.5 |
| Introduction to Modelling by Stochastic Differential Equations; Population Examples in Biology; General Model of Two Interacting Populations; Epidemic Model; Predator-Prey Model; Persistence-Time Estimation; A Population Model with Time Delay; A Model Including Environmental Variability; Stochastic Finance Models; A Stock-Price Model; Option Pricing; Interest Rates; A Goodness of Fit Test for SDE Model; Alternate Equivalent SDE Models. | | |
| iST639 | Fuzzy Statistics and Probability | 3+0 7.5 |
| Introduction: Crisp sets and Fuzzy sets, Fuzzy sets operations, Fuzzy numbers: Type-1 fuzzy numbers, Type-2 fuzzy numbers, Intuitionistic fuzzy numbers, Hesitant fuzzy numbers, Fuzzy central tendency measures: Fuzzy arithmetic mean, Fuzzy mode, Fuzzy median, Fuzzy dispersion measures: Fuzzy standard deviation and fuzzy variance, Fuzzy random variables, Fuzzy probability, Fuzzy discrete distributions: Fuzzy binomial distribution, Fuzzy poisson distribution, Fuzzy continuous distribution: Fuzzy normal distribution, Fuzzy uniform distribution, Fuzzy exponential distribution, Fuzzy confidence interval: Mean and variance, Intuitionistic fuzzy confidence interval. | | |
| iST640 | Advanced Experimental Design | 3+0 7.5 |
| Factorial Models with Mixed Levels; Factors at Two and Three Levels; Factors at Two and Four Levels, Nested and Split-Plot Designs; The Two-Stage Nested Design; The M-Stage Nested Design; The Split-Plot Design; The Split-Split-Plot Design; Response Surface Methods; Location of the Stationary Point; Response Surface Characterization; Ridge Systems; Multiple Responses; Experimental Designs for Fitting Response Surface; Mixture Experiments; Evolutionary Operation; Taguchi's Distributions in Experimental Design. | | |
| iST641 | Advanced Nonparametric Regression Models | 3+0 7.5 |
| Basic Concepts: Linear regression model, Additive regression models, Generalized additive models; Solution Algorithms of the Generalized Additive Models; Selection of the Smoothing Parameters; Degrees of Freedom; Basis Functions; Determining the Number of Knots and the Basis Functions; Hypothesis Testing; Model Selection; Applications of the Generalized Additive Regression Models. | | |
| iST642 | Modeling with Stochastic Differential Equations | 3+0 7.5 |
| iST647 | Reliability Theory | 3+0 7.5 |
| iST649 | Stochastic Differential Equations | 3+0 7.5 |
| iST692 | Seminar | 3+0 7.5 |
| iST790 | Thesis | 0+1 30.0 |
| iST890 | Thesis | 0+1 30.0 |
| iST890-0 | Thesis (Thesis Proposal) | 0+1 30.0 |
| iSL508 | Human Resources Strategies and Applications | 3+0 7.5 |

Establishing human resources department applications, human resources planning strategies, recruitment strategies, selection strategies, orientation strategies, training strategies, performance appraisal strategies, career planning strategies, job safety and health strategies, discipline strategies, employer-employee relations strategies, compensation management strategies and applications.

iSL578 Sport and Facility Business 3+0 7.5

The structure of the sports industry; Basic concepts of business; Entrepreneurship in sports business ; Sports business and investment activities ; Business management functions and management in sports business; Marketing functions and strategies in sports business; Production services and its functions in sports business; Financing functions of sports business; Human resource management in sports business; Public relations in sports business Use of technology in sports business.

iTB501 Biotechnology 3+0 7.5

History of Biotechnology; Recombinant DNA Technology, Manipulation of Prokaryotic Gene Expression, Production of Protein in Eukaryotic Cells, Development and Use of Genetically Modified Plants and Animals, High Protein Production in Recombinant Microorganisms; Fermentation Technology and Regulation, Isolation and Protection of Metabolism in Microorganisms, Preferable Commercial Features of Microorganisms, Coulter Collection; Enzyme Technology; DNA Sensors, Molecular Diagnosis, Gene Therapy in Human Somatic Cells, Genetic Practices in Food Technologies; Gene Engineering, Genetic Transformation Systems, Bioinsecticides; Social Dimension of Biotechnology; Patents and Brands.

iTB503 Biotechnology Laboratory Techniques I 3+0 7.5

Biosafety; Basic Principles of Spectroscopy, UV and Visible Molecular Absorption Spectroscopy, Basic Procedures of Mass Spectroscopy, IR Spectroscopy, Nuclear Magnetic Resonance Spectroscopy (NMR), Chromatographic Analysis Techniques and Separation Procedures, GC, GC-MS, Thermal Analysis Techniques (TG, DTA, DSC), Preparation of Natural Compounds for Structural Analysis, Scanning Electron Microscopy and Microanalysis.

iTB504 Biotechnology Laboratory Techniques II 3+0 7.5

Bacterial Evaluation Techniques, Biomonitoring, Cell Culture Techniques, Purification of Proteins and Analysis Methods, ELISA, DNA and RNA Isolation and Analysis Methods, Principles of PCR, DNA Fingerprints, In Vitro Transcription, In Vitro Mutation, Recombinant DNA Techniques.

iTB505 Biomaterials 3+0 7.5

Introduction, Use of Alumina and Zirconia in Implants, Introduction to Bio-active Glasses; Production, Composition, Properties, Reaction Kinetics and Clinical Applications, A/W Glass-Ceramics; Processes, Properties and Clinical Applications, Ceravital Bio-Active Glass-Ceramics, Machinable Phosphate Based Glass-Ceramics, Dense Hydroxiapatite, Porous Hydroxiapatite, Surface Coatings, Bioceramic Composites, Biometals, Characterisation of Biomaterials

iTB506 Drug Design and Application 3+0 7.5

Planning Drug Development, Chemical Development, Formulation Development, Characteristics of Drug Development: Electronic Properties, Ionization Constants, Hydrophobic Interactions, Steric Parameters, Hydrophobic Interactions and Lipophilicity, Partition Constants as Lipophilicity Index, Effects of Ionization on Partition Constant, Suggestion of Lipophilicity, Suggestion of Ionization, Suggestion of Steric Parameters. Prediction of Drug Receptor Relationship, Prediction of Mutagenesis, Ligand Bonding Studies, Biological Evaluation: Ligand Bonding, Secondary Messenger Measurements, Measurement of Functional Activity, Quantification of Agonist Activity, Quantification of Antagonist Activity, in Vivo Tests, SAR and QSAR Linear Regression and Multiple Linear Regression.

iTB507 Biometer 3+0 7.5

Data Understanding in Biological Research. Calculation of Descriptive Statistics, Introduction to Probability Distribution; Binomial and Poisson Distribution, Normal Distribution and Its Application. Sampling Techniques, Estimation, Tests for Statistical Hypotheses, ANOVA, Regression Analysis, Spatial Analysis, Allometry

iTB508 Applications of High Performance Liquid Chromatography in Biotechnology 3+0 7.5

Important Parameters for Application of HPLC in Biotechnology; Sample Collection and Preparation; Characteristics of Sample and Standards; Selection of Column, Detector, Mobile Phase and Other Important Subjects; Position of HPLC in Purification of Enzymes; Importance of HPLC in Waste Water; Analysis of Protein and Peptide in HPLC and Applications; Applications of HPLC for Terpenoids.

iTB509 Biotechnological Production of Medicine Raw Materials 3+0 7.5

Presences of Secondary Metabolites and Biotechnological Examples; Biotechnological Utilization of Plant Genetic Resources for the Production of Phytopharmaceuticals; Methods for the Biotechnological Pathway for the Active Natural or Semi-Synthetic Derivatives; Analytical and Preparative Methods by Structural Elucidation and Characterization After

Classification of Chromatographic Techniques; Instrumental Chromatographic Methods; Gas Chromatography (GC) and Hybrid Systems; Supercritical Fluid Chromatography (SFC); High Performance Liquid Chromatography (HPLC) and Hybrid Systems; Method Development in Liquid Chromatography (LC); Micro-Nano LC; Fast Protein Liquid Chromatography (FPLC) and Ultra Fast Liquid Chromatography (UFLC) Systems; Application Fields of HPLC: Chromatographic analysis of biomolecules, Drugs and pesticides; Qualitative and Quantitative Analysis Evaluation: Validation.

iTB527 Biological Screening Tests of Natural Products 3+0 7.5

Natural Products and their Sources; Chemistry of Natural Compounds; Antimicrobial Screening Tests: Dilution and Diffusion methods, CLSI and EUCAST; Mechanisms of Action; Natural Anticancer Products; Cancer and cancer therapy; Mechanisms of Action; Anticancer Screening Tests: Preclinical, Cell-based and genotoxicity screening tests; Toxicogenomic Screening Tools; Free Radicals and Antioxidants; Antioxidant Activity Screening Methods.

iTB529 Separation and Purification Techniques of Biomolecules 3+0 7.5

An Overview of Biological Separation and Purification Techniques: Definition, Application areas; Properties of Purification Techniques; Cell Disruption: Physical methods, Chemical methods; Separation and Purification Techniques: Centrifugation techniques, Filtration, Precipitation; Chromatographic Methods: Ion exchange chromatography, Gel filtration chromatography, Hydrophobic interaction chromatography, Adsorption chromatography, Affinity chromatography, High performance liquid chromatography; Purity Analysis: Spectrophotometric analysis, Electrophoretic analysis.

iTB531 Electrochemical Biosensors 3+0 7.5

Definition, structure and classification of biosensors; Advantages and application areas of biosensors; Introduction to electrochemical biosensors; Conductometric biosensors and Potentiometric biosensors; Amperometric biosensors; Performance criteria of electrochemical biosensors; Enzyme-based electrochemical biosensors; Use of nanomaterials in electrochemical biosensors; Use of conductive polymers in electrochemical biosensors; Transducers used in electrochemical biosensors; Preparation of electrochemical biosensors and immobilization of biomaterial; Recent developments in electrochemical biosensors and scientific discussion

iTB533 Gas Chromatography and Applications in Biotechnology 2+1 7.5

Fundamental Principles of Gas Chromatography; Components of Gas Chromatography; Injection Systems; Columns: Types of columns, Column Materials; Detectors: Flame ionization detector, Thermal conductivity detector; Mass spectrometer; Ionization; Mass Analyzer; Analysis: Selecting and preparation of samples, Method development for temperature programming, Qualitative analysis, Quantitative analysis.

iTB592 Seminar 3+0 7.5

iTB790 Thesis 0+1 30.0

iTE502 Sustainable Energy Management 3+0 7.5

Global Energy Policies and Sustainability; Energy and Environment Approaches in the World: European Union and Turkey, Energy-environment relationship, Development plans, Global warming and climate change; Kyoto Protocol: Carbon footprint, Carbon management and planning, Environmental impact assessment; Environmental Impact Assessment Laws and Regulations; Environmental Impacts of Conventional Energy Sources; Energy Management and Environmental Impacts: Energy saving and efficiency.

iTE503 Energy Economics 3+0 7.5

Basic Concepts of Economics; Energy and Economic Dimensions; Economic Analysis of Energy Projects; Financing of Energy Projects; Alternative Energy Sources; Energy Investment Planning: Tariffing and Pricing; Energy Cost Analysis; Energy Trading; Energy Derivatives Markets; Global Energy Potential: Supply and Demand; Energy Balance; Global Energy Markets; Regional Views for the Next 30 Years: Prevailing Trends and Forecasts; Energy Indicators; Energy Policy Analysis and Modeling; Energy and Economic Growth; Liberalization and Competition Arrangements in Energy Markets; Energy and Sustainable Development.

iTE505 Renewable Energy Sources 3+0 7.5

Solar Energy: Solar angles, Solar radiation intensity, Solar collectors, Solar power plants, Heating-cooling applications; Geothermal Energy: Electricity generation, Potential of geothermal energy; Wind Power: Wind turbines; Hydrogen Energy: Energy system, Electricity generation; Wave-Tidal Energy: Electricity generation; Biomass Energy: Biochemical conversion processes.

- İTE516 Petroleum Refinery Engineering 3+0 7.5**
 History and Development of Refining; Petroleum Refinery; Formation and Content of Crude Oil; Classification of Crude Oil; Distillation of Crude Oil; Acquirement of Light Hydrocarbon; Naphtha Hydrogenation; Evaluation of gasoline; Assessment of Gasoline; Acquirement of Aromatic Hydrocarbons; Thermal Cracking; Acquirement of Gas; Obtaining of Cracking Gasoline; Isomerization of Butane; Alkylation; Extraction of Furfural; Hydrogenation of Lubricating Oil; Lubricating Oil and Obtainment of Wax; Removal of Asphalt with Propane; Coking; Asphalt Processing; Wastewater Treatment.
- İTE518 Using of Coal and Coal Technologies 3+0 7.5**
 Coal Formation Petrography and Classification of Coal; Physical Properties of Coal and Other Technological Properties; Thermal Properties of Coal; Methods of Coal Production and Effect of Coal Quality; Desulphurisation of Coal: Combustion of Coal; Preparation of Coal-Water Mixtures and Combustion of coal-Water Mixtures; Coking of Coal; Pyrolysis of Coal; Low Temperature Carbonisation of Coal; Gasification of Coal; Underground Gasification of Coal; Coal Liquefaction.
- İTE519 Solar Energy and its Applications 3+0 7.5**
 Solar Energy; Geometry and Angles of the Sun; Basic Calculations of Solar Energy: Extraterrestrial solar radiation and its calculation, Solar radiation on the earth surface and its calculation; Solar Radiation Measurements; Photovoltaics: Structure of the photovoltaics and production of electricity; Solar energy collectors: Plane collectors, Vacuum collectors, Systems with condenser; Storage systems of solar energy: Heat energy storage systems, Electrical energy storage systems; Solar energy potential in Turkey; Solar energy applications: Cooling, Water distillation, Drying, Greenhouse heating, Cookers, Steam and electricity production, Indoor air heating.
- İTE520 Electrochemical Energy Conversion Systems 3+0 7.5**
 Basic Principles of Electrochemistry; Effect of Concentration on Electrode Potentials: Nerst equation; Concentration Batteries and Electrolysis; Electrochemical Energy Storage; Batteries and Their Working Principles; Accumulators and Their Working Principles; Fuel Cells and Their Working Principles; Electrodes Used in Fuel Cells and Their Properties; Membranes Used in Fuel Cells and Their Properties; Fuels Used in Fuel Cells and Their Properties; Supercapacitors; Electrochemical Hydrogen Production; Areas of Use of Batteries and Accumulators; Areas of Use of Fuel Cells.
- İTE521 Fuels and Combustion Technology 3+0 7.5**
 Fundamentals of Fuels and Combustion Technology; Classification of Natural Fuels; Secondary Fuels; Pulverized Coal, Smokeless Fuel, Chemistry and Technology of Semi- Coke and Coke Production; Liquid and Gaseous Fuels; Combustion Chemistry and Technology; Environmental Impacts and Mitigation Developments Regarding Negative Effects of Solid and Liquid Fuels; Solid, Liquid and Gaseous Fuels Analysis and Quality Control.
- İTE522 Renewable Energy Sources and Smart Grids 3+0 7.5**
 Renewable Energy Sources and Renewable Energy Supply; Electricity Production Methods, Materials Used; Conventional Energy Provision Systems, Materials Used; Benchmarking of Renewable and Conventional Energy Production; Conventional Electricity Network Lines and Smart Grids; Smart Grid Applications; Smart Grid and Its Use in Turkey; Smart Grids in the World; Future of Electrical Energy Management Systems.
- İTE523 Coal Processing Technologies 3+0 7.5**
 The Place of Coal in Energy Resources of the World and Turkey; Sampling; Coal Classification; Physical and Chemical Properties of Coal; Inorganic Materials in Coals; Introduction to Coal Preparation and Coal Technology: Washability curves of coals, Preparation of coal for utilization; Coal Concentration: Physical, physicochemical, chemical and biological concentration; Coal Technology: Coking of coal, Coal liquefaction, Gasification of coal, Briquetting of coal.
- İTE524 Energy Audit for Buildings 3+0 7.5**
 Energy Efficiency Regulations; Standards for Energy Efficiency; Regulations for Energy Audit; Energy Audit Reports; Energy Policies and Energy Management Systems; Examples of Energy Management in the World; Building Energy Identity Documents; Measurement Tools and Metrics Used in Energy Audits; Energy Efficiency for Electric Motors and Instruments; Energy Saving; Examples of Building Energy Audit; Studies on Energy Audit and Energy Efficiency.
- İTE525 Management of Energy Plant Wastes 3+0 7.5**
 Introduction to Waste Management in Power Plants: Concept of waste, Classification and characterization of wastes; Characterization and Management of Thermal Power Plant Wastes: Management of flue gas and bottom ash wastes; Characterization and Management of Hydraulic Power Plant Wastes; Characterization and Management of Nuclear Power Plant Wastes: Management of production and concentration of nuclear fuel wastes, Determinations of environmental risks in nuclear power plant locations, Determinations of security risks in nuclear power plants; Characterization and Management of Renewable Power Plant Wastes; National and International Legislation about Waste Management.
- İTE526 Wind Energy 4+0 7.5**

Introduction to Wind Energy, Structure and Variety of Wind Turbines; Aerodynamics of Horizontal-axis Wind Turbines; Relationship between Wind Speed and Power, Effects of Atmospheric Conditions on Wind Turbines, Calculation of Rotor Efficiency, Generator Systems for Wind Turbines; Speed Control for Maximum Power Operation; Wind Farms; Statistical Distributions of Wind Speed; Forecasting Wind Energy and Capacity Factors; Wind Energy Economics; Wind Power Grid Integration.

İTE527 Energy Efficient Lighting Technologies 3+0 7.5

Photometric Quantities; Light Production Technologies; Lighting Components: Lighting sources, Luminaires, Lighting accessories; Automation and Control Strategies; Lighting Calculation Methods; Energy Efficiency Regulations about Lighting; Economic Analyses and Calculation of Payback Periods in Lighting Systems; Energy Efficient Lighting Technologies for Industrial Plants, Building and Transport.

İTE528 Nuclear Energy and Politics 3+0 7.5

Energy consumption, depletion of reserves, environmental impacts; Source of nuclear energy; Types of nuclear fuel; Nuclear fission and uranium fission; Nuclear power production; Nuclear waste management: Radiation protection standards, Radiations and radioactive materials, Reliability and qualitative risk evaluation, Safety measures in nuclear power plants; Site selection for nuclear power plants and licensing them; Nuclear energy policies of Turkey: Nuclear energy policies of the European Union; Nuclear energy policies in other countries.

İTE529 Different Energy Sources, Sustainability and Life Cycle Assessment 3+0 7.5

Different Energy Sources: Conventional energy sources, Renewable energy sources; Clean Production and Pollution Prevention: Clean production techniques, Pollution prevention planning; Sustainability: Sustainability concept, Relationship between clean production and sustainability; Life Cycle Assessment (LCA): Concept and history; LCA Methodology: LCA and ISO 14040 standards, Goal and scope definition, Inventory analysis, Impact assessment, Interpretation; LCA Software and Applications; Carbon Footprint Measurement Using LCA Approach.

İTE530 Energy Storage Devices and Applications 3+0 7.5

İTE531 Waste-to-Energy Systems Credit 3+0 7.5

Principles of Waste Management; Relationship Between Waste Management and Energy; Thermal Conversion Technologies: Fundamentals of thermal processes, Mass and energy balances of waste combustion, Incineration, Pyrolysis, Gasification, Energy from thermal conversion processes; Biological Conversion Technologies: Aerobic and anaerobic composting processes and technologies, Energy from biological conversion processes; Landfills: Landfill design, Energy from landfill gas; Comparison of Waste-to-Energy Processes.

İTE532 Electromagnetic Energy: From Motors to Laser 3+0 7.5

İTE533 Conventional Energy Resources 3+0 7.5

Energy, Classification of Energy and Importance of Energy; Energy Resources in Turkey and in the World and Their Potentials; Formation, Properties and Preparation of Coals: Formation and structure of coals, Properties of coals, Production methods of coals, Areas of usage of coals and coal technologies; Areas of Usage of Coal: Thermal processes for coals in power plants, heating and industry; Petroleum Production: Theories of petroleum formation, Petroleum reservoirs, Physical and chemical properties of petroleum, Petroleum supply in the nature, Petroleum prospecting, Production, transport, storage and refinery processes of petroleum; Petroleum Refining Processes: Raw petroleum distillation column and products.

İTE592 Seminar 3+0 7.5

İTE599 Semester Project 3+0 0.0

İTE790 Thesis 0+1 30.0

İTN501 Atom and Molecular Structure 3+0 7.5

Structure of Atoms, Periodic Properties of Elements, Electronic Structure of Elements, Chemical Bonds, Interactions Between Particles, Geometry of Molecules, Attraction Forces Between Molecules, Description of Molecules, Doped

Structures and k.p. Calculations of These Structures, Diffusion Equations, Solutions of Boltzman Equations, Basics of Quantum Physics, Photoelectricity, Matter and Wave, Principles of Uncertainty, Schrödinger Equation, Angular Momentum and Spin, Perturbation Theory, Variation Method, Symmetry and Transformations.

iTN502 Nanotechnology 3+0 7.5

Introduction to Nanotechnology, Nanobiology, Nanochemistry, Nanotechnology and Nanomedicine, Nanomaterials, Synthesis of Nanomaterials, Characterisation of Nanomaterials, Nanodevices, NEMS based Nanotechnology, Nanostorage, Nanorecognition

iTN503 Applications of Nanotechnology 3+0 7.5

Electronics; Nanotubes for Nanoelectronics, Vacuum Nanoelectronics, DNA Electronics, Nanoelectromechanical Systems, Molecular Electronic Devices; Health, Nanotechnology and Nanomedicine, Medical Nanomaterials, Biotechnology Devices, Medical Nanorobotics, Polymeric Nanoparticles for Drug and Gene Delivery, Pharmaceutical Nanotechnology, Biocompatible Core-Shell Nanoparticles, Nanocrystals of Poorly Soluble Drugs, Nanoparticles as Drug Delivery Systems, Nanomagnetism for Biomedical Applications ; Physics; Chemistry; Nanochemistry, Sol-Gel Chemistry, Techniques in Electrochemical Nanotechnology, Polymer Nanostructures, Nanostructured Bipolar Organic Polymers; Engineering; Electronic, Computer, Construction, Material, Chemistry, Genetic and Gene Engineering

iTN504 (Eng) Mathematical Applications in Nanotechnology 3+0 7.5

Fundamental Concepts: Vector differential operators, Gradient, Divergence and curl of scalar/vector fields; Vector integral calculus, Green's theorem in plane, Divergence theorem, Stokes's theorem; A brief introduction to partial differential equations, Three fundamental equations, Fourier's method, Basics of integral transforms; Quantum Concepts: Schrödinger equation, Plane wave solutions, Quantum wells, Quantum tunnelling, Eigenvalue problem, Solution of the hydrogen atom; A Brief Account of Elasticity: Stress and strain, Relations in elasticity, Deformations and dynamical behaviour of solids; Essential Concepts in Nanoindentation; Nanoindentation of Thin Films.

iTN505 Nanocharacterisation I 3+0 7.5

Structural Characterization of Nanomaterials, Thermal Conductivity of Semiconductor Nanostructures, Characterization of Magnetic and Electronic Properties, Characterization of Nanostructured Materials by X-Ray Photoelectron Spectroscopy, X-Ray Microscopy and Nanodiffraction, X-Ray Characterization of Nanomaterials, Raman Spectroscopy

iTN506 Nanocharacterisation II 3+0 7.5

Crystallography and Shape of Nanoparticles; Microscopic Techniques; Scanning Tunneling Microscopy (STM), Atomic Force Microscopy (AFM), Scanning Probe Microscopy, Magnetic Force Microscopy (MFM), Scanning Hall Effect Microscopy, Scanning Electron Microscopy (SEM), Transmission Electron Microscopy (TEM)

iTN507 Nanomaterials 3+0 7.5

Metal, Ceramic, Organic Molecular Group, Polymeric or Composite Materials, Nanoparticles, Nanotubes, Nanoporous Materials, Nanoporous Carbons, Nanomembranes, Nanofluids, Nanocontainers, Nanocapsules, Nanocables and Nanojunctions, Ferroelectric Nanomaterials, Nanowires, Nanoceramics (Ceramic Nanopowders), Nanobiomaterials, Nanotransistors, Nanofibers, Nanocrystals, Nanostructured Metals and Alloys, Magnetic Nanomaterials (Soft and Hard), Bismuth Nanostructured Materials, Superhard Nanocomposites, Polymeric Nanomaterials, Protein-Doped Nanoporous Silica Gels, C60-Based Materials, Colloidal Gold, Dye/Inorganic Nanocomposites, Metal Nano-Optics, Multifunctional Nanocomposites, Nanostructured Thin Films, Quantum Dots, Nanolayers, Nanocomposites

iTN508 Synthesis of Nanomaterials 3+0 7.5

Chemical Synthesis of Nanoparticles; Synthesis of Nanomaterials Using Microemulsion Process; Sol-Gel Method; Liposomes; Nanostructures Created by Lasers; Solid-State Synthesis of Carbon Nanotubes; Carbon Nanotube Synthesis by Arc Discharge Technique; Catalytic Synthesis of Carbon Nanotubes and Nanofibers; Synthesis of Inorganic Nanowires and Nanotubes; Synthetic Nanoinorganics by Biomolecular Templating; UHV-SPM Nanofabrication; Electrochemical Synthesis of Semiconductor and Metal Nanowires; Nanopowders Produced Using Microreactors; Nanocrystalline Ceramics by Mechanical Activation; Formation of Nanostructured Polymers.

iTN509 Nano-Biotechnology 3+0 7.5

Bionanodevices; Bionanomotors; Biological Nanomaterials; Biological Molecules in Nanodevices; Biogenic Nanoparticles; Bioelectronics; Nanobiosensors; Nanoanalysis of Biomaterials,

iTN510 Structure Property Relationship in Nanomaterials 3+0 7.5

Photochemistry; Photoconductivity; Photodynamic; Electrochemistry of Nanomaterials; Dynamic Processes in Magnetic Nanostructures; Diffusion in Nanomaterials; Nanoscale Heat Transfer; Catalysis by Gold Nanoparticles; Transport in Semiconductor Nanostructures; Transition Metal Atoms on Nanocarbon Surfaces; Nanomechanics of Nanoscale Materials;

Nanodeposition of Soft Materials; Nanocatalysis; Electronic Structure of Semiconductor Nanoparticles; Kinetics in Nanostructured Materials; Mechanical Behavior of Nanomaterials

İTN511 Properties of Nanomaterials 3+0 7.5

Dielectric Properties of Nanomaterials, Characterization of Magnetic and Electronic Properties, Optical Properties of Nanomaterials, Thermodynamics Properties of Nanomaterials, Superplasticity of Nanoceramics

İTN512 Nanodevices and Design 3+0 7.5

Semiconductor Nanodevice Modeling; Single-Electron Devices; Single-Electron Transistors; Single-Electron Dynamics; Nanorobotics and Nanomanipulation; Mechanical Molecular Nanodevices; Nanocomputers: Theoretical Models; Optical Fibers for Nanodevices; Photochemical Molecular Devices; DNA-Based Nanodevices; Gas-Based Nanodevices; Micro and Nanomechanics

İTN513 Nanotechnology Applications in Textiles 3+0 7.5

Classification of Textile Materials; Textile Fibers and Properties; Type of Yarns and Spinning Systems; Nanotechnology Applications in Fibers and Yarns Production: Nanofibres; Electro spinning and Nanoadditives Used in Fiber Production; Textile Fabrics and Production Methods; Textile Finishing; Fabric Dyeing and Printing Technologies; Nanotechnology Applications in Textile Finishing: Water and oil repellency; Soil Release; Antimicrobial and Flame Retardant Finishes; Physical and Chemical Testing of Textiles; Characterization of Nanomaterials Applied on Textile Materials; Analyzing Textiles By SEM; Some Commercial Textile Products Based on Nanotechnology.

İTN514 Nanomagnetism and Applications 3+0 7.5

Introduction to magnetism; Magnetostatics; Micro-magnetism, domains and hysteresis; Nanoscale-magnetism; Experimental methods in nanoscale; Micro- and Nanoscale Magnetic materials; Application of soft magnets; Application of hard magnets; Application of magnetic nanoparticles; Application of magnetic nanoscale thin films; Spin Electronics, magnetic recording and memory; Special topics; Samples of industrial devices.

İTN515 Epitaxial Crystal Structures and Applications 3+0 7.5

Fundamentals of Ultra-High Vacuum: Vacuum chamber, Vacuum components, Vacuum gauges, Vacuum pumps, Temperature readers, Substrate holders, Extra accessories; Epitaxial Crystal Growth Techniques; Conditions for Epitaxial Crystal Growth; 2D Epitaxial Crystal Structures; 3D Epitaxial Crystal Structures; Characterization Techniques for Epitaxial Crystal Structures; Applications of Epitaxial Crystal Structures.

İTN517 Photovoltaic Technologies and Applications 4+0 7.5

Introduction to Photovoltaics: Past and present of photovoltaic technology; Photovoltaic Materials and Concept of P-N Junction; Physics of Solar Cells; Solar Cell Design and Optimization Rules; Crystalline and Thin Film Solar Cell Technologies; Very High Efficiency Multi-Junction Solar Cells and Concentrated Photovoltaics; Electrolyte and Organic Based Solar Cells; Characterization of Solar Cells and Modules; Economics of Photovoltaic Technologies; Terrestrial and Space Applications; Electrochemical Storage for Photovoltaics; Photovoltaics in Architecture.

İTN518 (Eng) Experimental Techniques for Nanotechnology 3+0 7.5

The Theory of Basic Processing Techniques: Diffusion, Oxidation, Photolithography, Chemical vapor deposition, Physical vapor deposition, Etching and metallization; Wave-Particle Duality: Photoelectric effect, X-ray diffraction, Compton effect, Related characterization techniques; Semiconductor Materials: Their properties and production techniques; Solid State Devices Basic Physics: Transistors, LEDs, Solar cells, Photodetectors and their fabrication techniques; Thin Films: Fabrication techniques, Vacuum technology, Growth mechanisms, Film characterization techniques, Surface treatments.

İTN519 (Eng) Introduction to Nanoscience and Nanotechnology 3+0 7.5

Historical Perspective of Nanotechnology; From Micro to Nanosystems; Introduction to the Concept of Nanoscience and Nanotechnology; Properties of Nanostructured Materials: Quantum dots, Quantum wires, Quantum wells; Synthesis of Nanomaterials; Electronic and Optical Properties of Selected Nanomaterials; Nanoscale Biomimetic Devices and Systems; Nanomaterials for Drug Delivery; Impact of Nanotechnology on the Environment.

İTN520 (Eng) Synthesis of Nanoparticles 3+0 7.5

Introduction to Nanoparticle Synthesis; Bottom-Up and Top-Down Syntheses; Solid Phase Synthesis; Mechanical Activation; Liquid Phase Synthesis; Hydrothermal Method; Solvothermal Method; Synthesis of Nanomaterials Using Microemulsion Process; Sol-Gel Method; Vapor Phase Fabrication; Spray Pyrolysis; Chemical Vapor Deposition; Synthetic Nanoinorganics by Biomolecular Templating; UHV-SPM Nanofabrication; Electrochemical Synthesis of Semiconductor and Metal Nanowires.

İTN521 (Eng) Nanotechnology and Society 3+0 7.5

Leaps in the History of Science and Technology; Nanotechnology: What is nanotechnology? Emerging applications of nanotechnology, Opportunities and challenges, Benefits and risks, Consumer products; Health and Safety Impact from Nanoparticles: Health issues, Environmental issues; Social Issues; Relation Between Technological and Social Changes; Social Acceptance of New Technologies, Public perception and understanding of nanotechnology; Impact of Nanotechnology; Socioeconomic Impacts, Education, Potential benefits and risks for developing countries; Government Support and Regulation of Risk; Nanoethics.

İTN522 (Eng) Introduction to Micro and Nano Fabrication 3+0 7.5

Cleanroom Environment, Safety and processing; Micro-nano Metrology; Silicon: Material Properties, Crystal structure, Growth, Wafers; Thin-Film Processes: PVD, CVD, PECVD, ALD; Thin-Film Materials and Processes: Metallic thin films, Oxide and nitride thin films, Polymer films, Stresses, Coverage metallic thin films, Oxide and nitride thin films, Polymer films; Pattern Generation and Optical Lithography: Photomasks as tools, Lithography process flow, Alignment and overlay, Exposure; Etching: Etching profiles, Anisotropic and isotropic wet etching, Plasma etching (RIE), Isotropic dry etching, Ion beam etching; Thermal Oxidation; Nano and Micro-Fabrication Equipment.

İTN523 (Eng) Physics and Technology for Infrared Detection 3+0 7.5

Electromagnetic Spectrum and Infrared Radiation: Atmospheric transmission and windows; Radiometry: Solid angle, Radiance, Emissivity, Planck's law and black body radiation; Optical Detection Processes; Thermal Detectors: Bolometers, Pyroelectric detectors, Thermoelectric detectors; Photon Detectors: Photoconductors, Photovoltaics, Detector types; Noise in Optical Detection: Noise sources and types; Figures of Merit in Optic Detectors: Responsivity, Signal-to-noise ratio, Noise equivalent power, Detectivity, BLIP and JOLI performance; Imaging Systems: Focal plane arrays.

İTN524 (Eng) Semiconductor Materials and Devices in Nanotechnology 3+0 7.5

Semiconductor Materials: Crystal Structure, Energy Bands, Density of States; Conduction Mechanism: Carrier Concentration, Donors and Acceptors, Mobility, Resistivity; Hall Effect, Carrier Diffusion, Generation and recombination processes; P-N Junction, Current-voltage characteristics; Transistors, LEDs, Solar cells, Photodetectors and their fabrication techniques; Thin films: Fabrication techniques, Vacuum technology, Growth mechanisms, Film characterization techniques, Surface treatments.

İTN525 (Eng) Nano-Electronic Devices 3+0 7.5

Introduction to Nanoelectronics and Nanoelectronics Roadmap: Electronic history, Scaling criteria, Emerging new nanoelectronic devices and concept of mesoscopic structures; Basic Semiconductor Device Physics and Device Architectures; Material Aspects of Nanoelectronics: Junction formation and gating; Fabrication Techniques for Nanoelectronic Devices; Electrical and Transport Properties of Nanostructures; Nanoscale Transistors: Devices, Circuits and systems; Nanoelectronic Memories; Carbon Nanotube and Graphene Electronics; Spintronics: Materials and applications in nanoelectronics; Concepts for Emerging Systems and Architectures.

İTN527 (Eng) Basic Characterization Techniques in Nanotechnology 3+0 7.5

An introduction to the techniques for materials characterization; Scanning probe techniques: Scanning tunneling microscope (STM), Atomic force microscopy (AFM); Imaging characterization techniques: Optical microscopy, Scanning electron microscopy (SEM), Transmission electron microscopy (TEM); X-ray photoelectron spectroscopy (XPS); Secondary ion mass spectrometry (SIMS); Raman spectroscopy.

İTN528 (Eng) Nanotechnology Sensors 3+0 7.5

İTN529 (Eng) Machine Learning 3+0 7.5

Introduction: Machine learning concepts, Software tools; Supervised Learning: k-NN, Linear methods, Naive bayes classifier, SVM, Decision trees, Ensemble methods, Artificial neural networks; Dataset Transformations; Model Evaluation; Feature Selection; Unsupervised Methods: Clustering, Anomaly detection, PCA; Reinforcement Learning; Deep Learning: Convolutional neural networks, Recurrent neural networks, Autoencoders, Generative models

İTN530 (Eng) Nanobiosensors 3+0 7.5

İTN531 (Eng) Computational Approaches in Nanomaterials 3+0 7.5

Introduction to Modelling Materials; Scale and dimensionality of nanomaterials; Simulation methods for different time and length scales; Useful Concepts in Molecular Modelling; Empirical Force Field Models: Molecular Mechanics; ab initio Methods, Density Functional Theory and Solid-state Quantum Mechanics Minimisation and Related Methods for Exploring the Energy Surface: Global and Local Optimisations; Global Optimisation methods: Genetic algorithm, basin hopping

method, simulated annealing; Monte-Carlo simulation methods; Molecular Dynamics simulation methods; Overview of application areas of modelling materials in nanotechnology.

İTN532 (Eng) X-Ray Diffraction in Analysis of Thin Films 3+0 7.5

Crystal structures: Crystal systems, Miller indices, Lattice planes and directions, Crystal defects; Semiconductor heterostructures; Properties of X-rays: Spectrum, Absorption of X-rays, X-ray diffraction, Interaction with matter, Penetration depth; Components of X-ray diffractometer: Geometry of X-ray Diffractometer, X-ray source, Sample stage, Optics, Detector; Thin Film Applications: Rocking curve, Grazing incidence-exit, X-ray reflectivity, Reciprocal space map.

İTN533 (Eng) Nanotechnology and Biological Applications 3+0 7.5

Introduction to nanotechnology and its history; Structure of bionanomaterials: Nanoparticles, Nanorods, Nanowires, Nanofilms; Nanoparticle Production Methods for Different Application Areas; Properties of Bionanomaterials: Characteristics, Identification, Toxicity, Usage of bionanomaterials in disease and health; Medical Nanotechnology and Applications: Biosensor and nanochip applications, Targeted therapy; Electron Microscopic Method in Characterization of Nanoparticle: Size, Surface, Ultrastructure; Overview of Bionanomaterial Cytotoxicity Studies in Nanotechnology.

İTN534 (Eng) Chemistry and Applications of Organic Electronic Materials 3+0 7.5

Synthesis of organic materials (based on): Thiophenes, Tetrathiafulvalenes, Polyacetylenes, Poly(p-phenylene)s, Heteroaromatic materials; Low Band Conducting Materials; Polyphenylenevinylenes Materials; Macrocyclic Metal Complexes; Fullerenes (C60) and Their Optoelectronic Properties; Application of Conjugated Systems: Solar cells, Light emitting diodes, Electrochromic devices.

İTN535 (Eng) Transparent Ceramic and Glass-Ceramic Materials 3+0 7.5

Structural Conditions for Transparency; Introduction to Glass-ceramic Materials; Structure of Glass-ceramics: Transparent nano-crystalline glass-ceramics; Applications of transparent glass-ceramics; Recent Examples to Transparent Glass-ceramics and Their Processing Methods: Sintered aluminate glass-ceramics, Infrared transmitting glass-ceramics, Ce: YAG glass-ceramics for lighting; Introduction to Transparent Ceramic Materials; Optical Transmission Analysis; Characterization of Transparent Ceramics and Glass-ceramics by X-ray Diffraction and Electron Microscopy Methods.

İTN536 (Eng) Atomistic Simulation Laboratory 2+1 7.5

İTN537 (Eng) Deep Learning and Artificial Neural Networks 3+0 7.5

İTN592 Seminar 3+0 7.5

İTN592 (Eng) Seminar 3+0 7.5

İTN609 (Eng) Fundamentals of Semiconductor Devices and Technology 3+0 7.5

Elements of Quantum Mechanics: Basic formalism and Schrödinger equation, Particle in a box and quantum mechanical confinement; Energy-Band Theory: Kronig-Penney model, Particle motion and effective mass, E-k diagrams, Density of states, Fermi function; Semiconductors: Fundamentals, Doped-undoped structures, Fermi level, Electron and hole densities, Generation-recombination processes, Carrier transport; Devices and Operation Basics: P-n junction, Metal-oxide semiconductors, Bipolar junction transistors; Quantum Structures: Quantum wells, Quantum wires, Quantum dots.

İTN610 (Eng) Nano Imaging and Nano Analysis 3+0 7.5

Introduction to Nano Imaging and Nano Analysis: Requirements, Resolutions, Limitations; Specimen-Solid Interaction; Parts of Electron Microscopes: Gun, Lenses, Vacuum; Nano Imaging Techniques: Secondary electrons and in-lens imaging, Backscattered, Angular selective backscattered and energy selective backscattered electron imaging, Bright field, Dark field and high angle annular dark field imaging; Nano Chemical Analysis: Energy and wavelength dispersive x-ray analysis, Analysis with electron energy loss spectrometry; Nano Phase Analysis: Diffraction, Electron backscattered diffraction, Precession electron diffraction.

İTN611 (Eng) Applied Quantum Mechanics 3+0 7.5

Quantum Mechanics and Technology; The Mathematical Formulation of Quantum Mechanics; Particles in Potentials; Tunneling and Applications in Technology; Hydrogen Atom Problem: Applications to doping and excitons in

semiconductors; Physical Symetries and Conservation Laws: Band edges states in optical materials; Identical Particles and Second Quantization: Phonon, Plasmon, Polaron, Magnon; Time Dependent Problems: Electron-photon interactions (light absorptions and emissions), Electron-phonon interactions.

İTN612 (Eng) Molecular Beam Epitaxy:Principles and Applications 3+0 7.5

Epitaxy and Epitaxy Techniques; Molecular Beam Epitaxy: Fundamentals, Historical background; Physics of Epitaxy of Nanostructures: Quantum dots, Quantum wires, Quantum wells; In Situ Analytical Methods: Mass spectrometry, Surface analysis, Optical reflectance; Lattice Matching Considerations: Natural lattice matching, Forced lattice matching, Mismatched epitaxy; Overview of the Technology and Applications of Epitaxy.

İTN613 (Eng) Photovoltaics and Solar Energy Materials 3+0 7.5

Introduction to Photovoltaic and Solar Energy: The past and present of Photovoltaic technology, Photovoltaics: Terrastrial and space applications; Physics of Solar Cells: Concept of p-n junction under dark and illumination, Solar cell design, Characterization and optimization; Material Choices and Solar Cell Generations; Crystalline Material Solar Cells; Inorganic Thin Film Solar Cells; Thin Film Solar Cells Based on Organic and Electrolyte Based Materials; Third and Next Generation Solar Cell Concepts: Emerging new materiald based on nanotechnology in solar energy harvesting.

İTN614 (Eng) Nuclear Magnetic Resonance Spectroscopy 3+0 7.5

The Physical Basis of NMR Spectroscopy: Nuclear angular momentum and magnetic moment, Nuclei in a static magnetic field, The chemical shift: 1H and 13C chemical shifts of compounds, Spin-spin coupling and mechanisms: Spectrum analysis: Assignment of 1H and 13C signals: Relaxation mechanisms: Two dimensional NMR spectroscopy: Dynamic NMR spectroscopy: Interpretation of NMR spectra.

İTN615 (Eng) Electron Backscattered Diffractometry 3+0 7.5

Capabilities and Limitations of Electron Backscattered Diffractometry: Components of an electron backscattered diffractometry, Generation of diffraction patterns in electron backscattered diffractometry, Spatial resolution, The hough transformation, Indexing; Characterization and Representation of Texture: Euler angles, Rotations and orientations, Pole figures, Discrete orientations, Orientation distribution functions; Applications: Quantitative texture analysis, Grain boundary misorientation analysis, Phase analysis, Interpretation of line and planar defects, Stereological analysis.

İTN617 (Eng) Advanced Topics in Nanotechnology 3+0 7.5

Different Types of Materials in the Nanotechnology; Hybrid Inorganic-Organic Electronics, Shedding light on nanoscale materials; Nanophotonics; Plasmonics; Nano-Devices Based on Understanding the Device Physics as Well as the Nanofabrication Techniques Required to Construct Them; Nanostructured Thermoelectric Structures; The Different Dimensions of Nanotechnology: Zero dimensional, One dimensional, Two dimensional and three dimensional nano materials; State-of-the-Arts Devices; Future Trends.

İTN619 (Eng) Computation,Simulation and Modelling in Nanotechnology 3+0 7.5

Computer Simulation and Modelling to Predict the Physical Properties of Materials; Density Functional Theory; Prediction of Electronic, Mechanical, Dynamical and thermal properties of nanomaterials via density functional theory simulations; Molecular Dynamics Simulations and Classical Force Fields; Classical Force Field Generation for Nanomaterials; Prediction of Mechanical and Thermal Properties of Nanomaterials Via Molecular Dynamics Simulations.

İTN620 (Eng) Properties and Synthesis of Carbon Nanomaterials 3+0 7.5

Introduction to Carbon Element: Carbon hybridization and carbon allotropes; Graphite: Crystal structure and physical properties; Diamond: Crystal structure and physical properties; Nano Forms of Carbon: Types and Quantum Confinement in Carbon Nanomaterials; Fullerenes: Structure, Properties, Synthesis methods and applications; Carbon Nanotubes: Structure, Properties, Synthesis methods and applications; Graphene-Based Materials: Structure, Properties, Synthesis methods and applications; Nanodiamond: Structure, Properties, Synthesis methods and applications; Amorphous Nanocarbons.

İTN621 (Eng) Focussed Ion Beam Techniques for Nanofabrication 3+0 7.5

Introduction to Focused Ion Beams (FIB); Ion/Matter Interaction; Imaging With Ions; Micro and Nanofabrication: Milling and deposition for prototyping; SEM Sample Preparation for 2D Imaging and 3D Tomography; 2D and 3D Chemical Maps; 2D and 3D Phase Maps; Ion Implantation Damage and Redeposition During Ion Milling; He Ion Microscopy; Specimen Preparation for Scanning Transmission Electron Microscopy and Atom Probe Tomography; Applications of FIB; FIB/SIMS; Laser + FIB/SEM; Plasma FIB.

İTN622 (Eng) Soft Materials 3+0 7.5

Basic Concepts in Materials Chemistry; Forces Between Atoms and Molecules: Strong intermolecular forces, Weak intermolecular forces; Polymeric Materials: Polymer synthesis, Structure, properties and morphology of polymers,

Characterization of polymers, Polymer physics; Colloidal Materials; Self-assembly; Liquid Crystals; Biological Soft Materials; Applications of Soft Materials in Nanotechnology.

iTN623 (Eng) Reticular Materials 3+0 7.5

Metal-Organic Frameworks: Emergence of metal-organic frameworks, Determination and design of porosity, Building units of MOFs, Binary metal-organic frameworks, Complexity and heterogeneity in MOFs, Functionalization of MOFs; Covalent Organic Frameworks: Historical perspective on the discovery of covalent organic frameworks, Linkages in covalent organic frameworks, Reticular design of covalent organic frameworks; Applications of Reticular Materials: Basics of gas sorption and separation in MOFs, Hydrogen and methane storage in MOFs; Zeolitic Imidazolate Frameworks.

iTN625 (Eng) Advanced Functional Materials 3+0 7.5

iTN692 (Eng) Seminar 3+0 7.5

iTN790 Thesis 0+1 30.0

iTN790 (Eng) Thesis 0+1 30.0

iTN890 (Eng) Thesis 0+1 30.0

**iTN890-0 Thesis (Thesis Proposal) 0+1 30.0
(Eng)**

KiM501 Selected Topics in Organic Chemistry I 3+0 7.5

General Principles of Kinetics and Thermodynamics and Chemical Reactivity; Aromaticity; Antiaromaticity; Hyperconjugation; Tautomerism; Hydrogen Bonding; EDA Complexes; Complexes of Crown Ethers and Related Compounds; Phase Transfer Catalysis; Classification of Reaction Mechanisms and Fundamental Reaction Mechanism Types; Basic Factors Influencing Acidity and Basicity.

KiM502 Selected Topics in Organic Chemistry II 3+0 7.5

Methods for Identification of Organic Reaction Mechanisms; Primary and Secondary Kinetic Isotope Effects; Stereochemical Proofs; Isolation of Reaction Intermediates; Substituent Effects; Chemistry of Organic Compounds Containing Boron; Phosphorus and Sulphur; Pericyclic Reactions; Radical Reactions; Photochemistry; Molecular Rearrangements; Oxidation Reduction Reactions.

KiM504 Chemical Kinetics 3+0 7.5

Reactions Rate and Order; Zero; First-, Second-, Third Order Rate Equations; Kinetics of Complex Reactions; Kinetics of Chain Reactions, Molecular Reaction Dynamics; Collision Theory, Activated Complex Theory; Molecular Activation and Types; Intermolecular Energy Transfer; Catalysis; Heterogeneous Catalysis; Homogeneous Catalysis; Fundamentals of Enzyme Kinetics.

KiM506 Polymer Chemistry 3+0 7.5

Concepts and Definitions; Classification of Polymers; Polymer Molecular Weights and Their Determination; Polymer Isomerism; Thermal Transitions and Mechanical Behavior; Step-Growth Polymerization; Chain- Growth Polymerization; Ionic and Coordinated Polymerization; Copolymers.

KiM509 Carbon-Carbon Bond Formation 3+0 7.5

Carbanion Alkylation; Enolate Alkylation; Acetyl-Cyanide Alkylation; Organometallic Alkylation; Addition to Carbonyl; Replacement Reactions; Aldol and Related Reactions; Claisen and Related Reactions; Organometallic Reactions; Wittig Type Reactions; Acetyl-Cyanide Reactions; Conjugate Addition Reactions; Reactions of Alkenes; Alkenes; Alkynes; and Some Aromatic Compounds; Pericyclic Reactions; and Friedel-Crafts and Related Reactions.

Solution; Interactions at Solid-Solution Interface; Capillarity: Surface Tension and Surface Free Energy; Surface Films; Wetting and Detergency.

KiM522 Bioanalytical Chemistry 3+0 7.5

Introduction to Bioanalytical Chemistry; Physical, Chemical and Biological Properties of Biomolecules; Biological Sampling and Points to Consider While Working with Biomolecules; Bioanalytical Sample Preparation Techniques; Choice of Appropriate Analysis Method by Using Properties of Biomolecules; Analysis of Biomolecules by SDS and Gel Electrophoresis Methods; Analysis of Biomolecules by Capillary Electrophoresis Techniques; Analysis of Biomolecules by HPLC and FPLC Methods; Analysis of Biomolecules by Hybrid MS Techniques; Analysis of Biomolecules by MALDI-TOF-MS; Analysis of Biomolecules by Other Methods; Bioanalytical Validation.

KiM523 Complex Equilibria in Analytical Chemistry 3+0 7.5

Mathematical Methods Used in Equilibrium Calculations; Mass and Charge Balances, Proton Condition; Strong and Weak Acids-Bases; Buffer Solutions and Logarithmic Concentration Diagrams; Hydrolysis of Salts of Weak Acids and Bases; Polyprotic Acids and Bases: Logarithmic concentration diagrams of solutions of polyprotic salts; Mixture of Two Weak Monoprotic Acids and Multiple Buffer Systems; Solubility of Polyprotic Acid Salts; Precipitation and Solubility: Separation with precipitation, Precipitation titrations; Solubility of Weak Monoprotic Acid Salts.

KiM524 Bioinorganic Chemistry 3+0 7.5

Biological Functions of Inorganic Elements; Biological Ligands for Metal Ions; Metals at the Center of Photosynthesis; Catalyses through Hemoproteins; Iron-Containing Biological Proteins; Nickel-Containing Enzymes; Copper-containing Protein; Biological Functions of Transition Metals; Zinc and Enzymatic Catalysis; Biomimic Chemistry; Biominerals; Bioinorganic Chemistry of the Toxic Metals; Chemotherapy, Imaging and Other Applications of the Nonessential Elements.

KiM525 Quantum Chemistry 3+0 7.5

Introduction to Quantum Chemistry; Traveling Waves and Equations; Electromagnetic Theory; Quantum Mechanics of Some Simple Systems; The One-Dimensional Harmonic Oscillator; The Quantum Mechanics Applications of Atoms; The Particle in a One-Dimensional Box; The Particle in a One-Dimensional Box for Wave Functionals and Momentum; The Hydrogen Atoms for Quantum Chemistry; Introduction to Some Concepts of Quantum Mechanics and the Theoretical Basis of the Chemical Bonds; Introduction to Some Chemical Bonds of Molecular Orbitals as Linear Combinations of Atomic Orbitals (LCAO) and Basics Procedure for Quantum Mechanical Mixing of a Atomic Orbitals Solution for Molecular Orbital Functions; Determination of the Molecular Orbitals Wave Functions; Approach LCAO Methods for the P-Bond Systems; Electron Density; Charge Density; Bond Order.

KiM526 Microwave Organic Synthesis 3+0 7.5

Microwave Assisted Organic Chemistry (MAOS) A Brief History; Microwave Theory; Microwave Equipments; Microwave Processing Techniques; Designing Reaction using Microwave; Comparison of Microwave Synthesis and Conventional Synthesis; Practical Applications of CEM Discover Microwave Equipment.

KiM529 Catalytic Chemistry 3+0 7.5

Catalysis in Solutions; Acid-base Catalysis; Catalysis By Electron Transfer; Organometallic Catalysis; Catalysis By Macromolecules; Phase Transfer Catalysis; Catalysis By Enzymes; Structure of Enzymes; Reactions Catalyzed By Enzymes; Catalysis By Polymers; Structures of Polymers; Other Polymer Catalysis; Catalysis on Surfaces; Surface Structures; Adsorption, Surface Catalysis; Catalysis on Metal Surfaces; Other Metal Catalysis.

KiM531 Modern Analysis Methods I 3+0 7.5

Introduction to Molecular Spectroscopy and Differences With Atomic Spectroscopy; Infrared (IR) Spectroscopy and Applications; Microwave Spectroscopy; Raman Spectroscopy and CARS Applications; Electron Spin Resonance Spectroscopy; New Applications of NMR Spectroscopy; Dynamic Nuclear Magnetic Resonance; Double Resonance Technique; NO Technique; NMR With Solid Samples; ¹³C-NMR; ¹⁹F-NMR And ³¹P-NMR Spectroscopy; Thermal Analysis Methods; Thermogravimetry; Differential Thermal Analysis.

KiM532 Modern Analysis Methods II 3+0 7.5

Theory of Atomic Spectroscopy; Atomic Absorption Spectrometry and Applications; Atomic Emission Spectroscopy and Applications; Atomic Fluorescence Spectrometry and Applications; Laser Source Atomic Spectroscopy and Applications, X-Ray Spectrometry; Mössbauer Spectroscopy, ESCA Spectroscopy and Applications; Radiochemical Methods; Spectroscopy, Neutron Activation Analysis and Other Nuclear Techniques.

KiM533 Electroanalytical Chemistry 3+0 7.5

Principles of Electroanalytical Methods; Electrochemical Cells; Cell and Electrode Potentials; Electrode Types; Potentiometric Methods; Potentiometric Titrations; Voltammetric Methods; Linear-Sweep Voltammetry; Cyclic Voltammetry; Polarographic Methods; Puls Polarography; Alternative Current Polarography; Stripping Methods; Analytical

Applications; Amperometric and Coulometric Methods; Amperometric and Coulometric Titrations; Conductometric Methods; Measurement of Conductance; Conductometric Titrations; Spectroelectrochemistry.

KiM534 Organometallic Chemistry 3+0 7.5

Overview of Organometallic Chemistry; Fundamentals of Structure and Bonding; Electron Rule; Carbonyl Ligands; Pi Ligands; Other Important Ligands; Organometallic Reactions I; Organometallic Reactions II; Homogeneous Catalysis; Transitions Metal-Carbene and Transitions-Metal Carbyne Complexes; Applications of Organometallic Chemistry to Organic Synthesis; Other Applications of Organometallic Chemistry.

KiM535 Data Analysis in Chemistry 3+0 7.5

Basic Statistics: a Review; Errors; Accuracy; Precision; Reducing Systematic Errors; Mean and Standard Deviation; Distribution of Random Errors; Reliability of Results; Confidence Interval; Comparison of Results; The T-Test; Analysis of Variance; Signal Detection and Manipulation; Signal Detection; Point Estimation of the Detection Limit; The Wilcoxon Test; Signal Manipulation; Curve Fitting; Smoothing of Data; Least-Squares Polynomial Smoothing; Differentiation of the Signal; Calibration and Chemical Analysis; Comparison With Standards; Constructing a Calibration Curve; Utilizing the Calibration Curve for Chemical Analysis; Resolution of Analytical Signals; Exploratory Data Analysis: Processing Techniques; Graphical Methods; Partial Least Squares Path Modelling; Control and Optimization.

KiM536 Chromatographic Techniques 3+0 7.5

Introduction to Chromatographic Techniques; Classification of Chromatographic Techniques; Planar Chromatographic Techniques and Applications; Gas Chromatography and Hybrid Systems; Supercritical Fluid Chromatography; Gel Permeation Chromatography and Applications; Electrochromatographic Methods; Gel Electrophoresis; Capillary Electrophoresis and Applications

KiM537 Organic Macro Molecules 3+0 7.5

Enzymes, Non-enzyme Soluble Proteins; Calcium Binding Proteins; Integral Membrane Proteins; DNA, RNA, Protein Complex to Nucleic Acid; Virus Components, Immune System, Toxins, Carbohydrates; Unusual Tertiary and Quaternary Structures; Protein Crystals; History of Earliest Crystallographic Structures.

KiM539 Quantitative Structure Property Relationship 3+0 7.5

Molecular mechanics, ab initio, and semi-empirical calculations.

KiM550 Reagents In Organic Synthesis 3+0 7.5

Oxidizing and Reducing Reagents; Oxidizing and Reducing Reagents; Classification and Reactions; Activating Agents and Protecting Groups: Reagents and protecting groups for elimination reactions, Acylation, Ether formation, Protection of diols, Amines, Carbonyl groups and reagents, Sulfonylation reagents; Reagents and Catalysts for C-C Bond Formation: Acetylenes and allenes, Aluminum, Boron, Copper, Cyano, Isocyanato, Diazo, Azido, Dienes, Dienophiles, Enolates, Epoxides, Halo compounds, Imines, Ketenes, Lithium, Magnesium, Phosphorus, Sulfur, Zinc, Nickel; Acidic and Basic Reagents; Acidic and Basic Catalysts; Using Lewis Acid; Hydrolyses and Enzymatic Reagents.

KiM551 Sensors and Their Applications 3+0 7.5

Sensor Technology; Introduction to Chemical Sensors; Optical Methods and Sensors: Sensor techniques in optics, evanescent waves, spectroscopy, surface plasmon resonance, Fiber Optics; Mass Sensitive Sensors: piezoelectric sensors, quartz crystal microbalance, Surface Acoustic Waves; Biosensors: Biomaterials for biosensors, enzymes, enzyme structure, antibodies, antibody structure, production of antibodies, detection of antibody-antigen binding, immobilization techniques of biomolecules, Preparation Techniques of Chemical Sensors, Evaluation of Sensor Signal, General Analytical Applications.

KiM558 Biochromatography 3+0 7.5

Theory of Biochromatography; Gel Filtration; Ion Exchange Interaction Biochromatography; Hydrophobic Interaction Chromatography Of Proteins; Affinity Chromatography; Dye Ligand Affinity Chromatography; Immobilized Synthetic Dyes in Affinity Chromatography; Immobilized Pseudospesific Ligands In Affinity Chromatography; Immobilized Metal-Ion Affinity Chromatography; Intelligent Polymers, Imprinted Polymers; Biomedical Applications of Biochromatography.

KiM560 Alternative Reaction Systems 3+0 7.5

Ionic Liquids; Physical properties of ionic liquids, synthesis of ionic liquids, Multiphasic Solvent Systems; Aqueous biphasic systems, Fluorous biphasic systems, Properties of perfluorinated solvents, Triphasic systems, Supercritical Fluids; Physical properties of supercritical fluids, Chemical reactions in supercritical media, Catalytic Reactions In Alternative Reaction Systems; Hydrogenation, Hydroformylation, Diels-Alder, Oxidation, Carbon-Carbon Bond Formation, Metathesis, Polymerization

- KiM561 Novel Tendencies in Liquid Chromatography 3+0 7.5**
Introduction to High Performance Liquid Chromatography (HPLC); Development of Method in Liquid Chromatography (LC); Qualitative and Quantative Analysis; Column Preparation Techniques in LC; Micro-Nano LC; Fast Protein Liquid Chromatography (FPLC) and Ultra Fast Liquid Chromatography (UFLC) Systems; Researching of Other Novel LC Techniques; Evaluation of Analysis in LC; Applications of LC.
- KiM562 Inorganic Polymers 3+0 7.5**
Definition and classification of inorganic polymers; Polymeric sulfur, selenium, tellurium; Linear polyphosphates, polyphosphazenes, polycarboranes, poly(sulfurnitride); Chalcogen glasses Borate, borophosphate and borosilicate glasses; Boron-nitride and phosphor-oxynitride polymers; Crystalline silicates and aluminum phosphates; Synthetic inorganic fibers; Technological applications of inorganic polymers.
- KiM563 Natural Product Synthesis I 3+0 7.5**
Total Synthesis of Carbohydrates; Total Synthesis of Prostaglandins; Total Synthesis of Pyrrole Pigments; Total Synthesis of Nucleic Acids; Total Synthesis of Antibiotics; Synthesis of Monoterpenes; Total Synthesis of Sesquiterpenes; Synthesis of Triterpenes; Naturally Occurring Aromatic Steroids; Total Syntheses of Isoquinoline Alkaloids; Synthesis of Indole Alkaloids; Alkaloid Synthesis; Synthesis of Insect Pheromones; Total Synthesis of Cannabinoids; Total Synthesis of Ionophores; Synthesis of Prostaglandins; Synthesis of Monoterpene.
- KiM564 Natural Product Synthesis II 3+0 7.5**
Total Synthesis of Macrocyclic Lactones; Synthesis of the Leukotrienes; Synthesis of Monoterpenes; Total Synthesis of Aromatic Steroids; Gene Synthesis; Total Synthesis of Triterpeaes; Total Synthesis of Carbohydrates; Total Synthesis of Pyrrole Pigments; Total Synthesis of Tri- and Tetracyclic Diterpenes; Synthesis of Polysaccharides; Total Synthesis of Naturally Occurring Quinones; Total Synthesis of Spiroketal-Containing Natural Products; Synthesis of Insect Pheromones; Acyclic Sesquiterpenes; Monocyclic Sesquiterpenes; Bicyclic Sesquiterpenes; Tricyclic Sesquiterpenes.
- KiM565 Literature Search in Chemistry 3+0 7.5**
Search for Authors by Using SciFinder Program; Search for Patents by Using SciFinder Program; Search for Journals by Using SciFinder Program; Search by Topics by Using SciFinder Program; Search for Chemical Substances by Using SciFinder Program; Search for Reactions by Using SciFinder Program; Chemical Abstract Search in Library; Search for Topics Using Web of Science; Search for Authors by Using Web of Science; Search for Citations by Using Web of Science; Getting Data from Council of Higher Education and The Scientific and Technological Research Council of Turkey; Using other Search Engines.
- KiM566 Stereo Selective Reactions and Practical Approach 3+0 7.5**
General Concepts of Stereoselective Synthesis; Characterization of Stereoisomers; Analysis of Conformation and Configuration; Stereoselective Catalytic Reductions; Stereoselective Non-Catalytic Reductions; Stereoselective Oxidations; Stereoselective Carbon-Carbon Bond Forming Reactions by Nucleophilic Addition to Carbonyl Groups; Stereoselective Carbon-Carbon Bond Forming Reactions; Stereoselective Carbon-Carbon Bond Formation by Pericyclic Reactions; Stereoselective Formation of Carbon-Heteroatom Bonds; Stereoselective Formation of Carbon-Nitrogen Carbon-Phosphorus; Carbon-Oxygen; Carbon- Sulfur and Carbon-Halogen Bonds.
- KiM567 Applications of Computational Chemistry 3+0 7.5**
ChemOffice Package Program: Molecule drawing with ChemDraw programme; Molecule drawing and the data preparation with chem3D programme; Mopac Package Program: Calculations with mopac programme in chem3D; Calculations with mopac2009 programme; Cache Package Program: Semi-empirical and ab initio; Spartan Package Program: Semi-empirical and ab initio; Gabedit Program: Mopac and gaussian; Gaussian Package Program; GaussView Package Program; Other Computing Programs.
- KiM568 Solvent-free Organic Synthesis 3+0 7.5**
Solvent-Free Reduction; Solvent-Free Oxidation; Solvent-Free Carbon?Carbon Bond Formation; Solvent-Free Carbon?Nitrogen Bond Formation; Solvent-Free Carbon?Oxygen Bond Formation; Solvent-Free Carbon?Sulphur Bond Formation; Solvent-Free Carbon?Phosphorus Bond Formation; Solvent-Free Carbon?Halogen Bond Formation; Solvent-Free Nitrogen?Nitrogen Bond Formation; Solvent-Free Rearrangement; Solvent-Free Elimination; Solvent-Free Hydrolysis; Solvent-Free Protection; Solvent-Free Deprotection; Solvent-Free Reactions under Microwave Irradiation.
- KiM569 Structure Determination of Organic Chemistry 3+0 7.5**
Separation and purification of organic compounds; Determination of physical characteristics; Elemenl analysis of organic compounds; The general principle of Ultraviolet (UV), Infrared (IR), nuclear magnetic resonance (NMR) and mass spectroscopy methods; Importance of structural analysis of organic compounds; Interpretation of NMR; IR and UV spectra together; Structure determination applications of selected specific examples using NMR, IR, UV, and mass spectroscopy.

- KiM571 Molecular and Cellular Biochemistry 3+0 7.5**
Foundations of Biochemistry; Principles of Bioenergetics; Glycolysis, Gluconeogenesis; Principles of Metabolic Regulation: Regulation of metabolic pathways, Coordinated regulation of glycolysis and gluconeogenesis, Analysis of metabolic control; The Citric Acid Cycle; Fatty Acid Catabolism: Digestion, mobilization and transport of fats, Oxidation of fatty acids, Ketone bodies; Amino Acid Oxidation and Production of Urea; Carbohydrate Synthesis in Plants and Bacteria; Lipid Biosynthesis; Biosynthesis of Amino Acids, Nucleotides; DNA Metabolism; RNA Metabolism; Protein Metabolism; Regulation of Gene Expression.
- KiM583 Modern Analysis Methods I 3+0 7.5**
Theory of Atomic Spectroscopy; Atomic Absorption Spectrometry and Applications; Atomic Emission Spectroscopy and Applications; Atomic Fluorescence Spectrometry and Applications; Laser Source Atomic Spectroscopy and Applications, X-Ray Spectrometry; Mössbauer Spectroscopy, ESCA Spectroscopy and Applications; Radiochemical Methods; - Spectroscopy; Neutron Activation Analysis and Other Nuclear Techniques.
- KiM584 Modern Analysis Methods II 3+0 7.5**
Introduction to Molecular Spectroscopy and Differences With Atomic Spectroscopy; Infrared (IR) Spectroscopy and Applications; Microwave Spectroscopy; Raman Spectroscopy and CARS Applications; Electron Spin Resonance Spectroscopy; New Applications of NMR Spectroscopy; Dynamic Nuclear Magnetic Resonance; Double Resonance Technique; NO Technique; NMR With Solid Samples; ¹³C-NMR; ¹⁹F-NMR and ³¹P-NMR Spectroscopy; Thermal Analysis Methods; Thermogravimetry; Differential Thermal Analysis.
- KiM585 Name Reactions in Organic Chemistry 3+0 6.0**
Name Reactions in the Chemistry of Heterocyclic Compounds; Displacement Reactions; Addition Reactions; Coupling Reactions; Name Reactions for the Formation of Olefins; Aldehyde-Ketone Reactions; Condensation Reactions; Cyclic Reactions to Ring Formation; Reduction-Oxidation Reactions; Reactions of Amines.
- KiM586 Sensor Technology 3+0 6.0**
Introduction to Sensor Technology; Types of Sensors; Chemical Sensors; Chemical Sensor Components; Electrochemical Sensors; Biosensors; Biomaterials for Biosensors; Molecular Recognition; Quartz Crystal Microbalance; Surface Plasmon Resonance Spectroscopy; Reflectometric Interference Spectroscopy; Analytic Applications.
- KiM587 Alternative Reaction Systems 3+0 6.0**
Ionic Liquids: Physical properties of ionic liquids, Synthesis of ionic liquids; Multiphasic Solvent Systems: Aqueous biphasic systems, Fluorous biphasic systems, Properties of perfluorinated solvents, Triphasic systems; Supercritical Fluids: Physical properties of supercritical fluids, Chemical reactions in supercritical media; Catalytic Reactions in Alternative Reaction Systems: Hydrogenation, Hydroformylation, Diels-Alder, Oxidation, Carbon-carbon bond formation, Metathesis, Polymerization.
- KiM588 Computational Chemistry Applications 0+3 6.0**
ChemOffice: Use of Chem3D in molecule drawing, Preparing data file on Chem3D program for Mopac, Gaussian, etc.; Mopac: Calculations on Mopac; GaussView: Molecule drawing on GaussView program, Preparing the calculation file on GaussView program; Gaussian: Preparing the calculation file on Gaussian program, Keywords used in Gaussian, Calculation on Gaussian, Analysis of the calculated results, Investigation of calculations results; Other Calculation Software.
- KiM589 Adsorption 3+0 6.0**
Adsorption; Adsorption of Gases on Solids; Heat of Adsorption; Physical Adsorption; Chemical Adsorption; Monolayer Adsorption; Multilayer Adsorption; Adsorption Isotherms; Langmuir Adsorption Isotherm; The BET and Other Isotherms; Surface Area Determination; The Solid-Liquid Interface-Adsorption from Solution; Interactions at Solid-Solution Interface.
- KiM591 Thermal and Surface Characterization Methods 3+0 6.0**
Material: Classification of materials, Importance of material characterization; Surface Analysis by Gas Adsorption: Adsorption, Properties and types of adsorbents, Porosity, Surface area, Adsorption isotherms, BET theory, Surface characterization via BET instrument; Particle Size and Zeta Potential Measurements via Zetameter: Zeta potential, Isoelectric point, Measurements by zetameter; Thermal Characterization Methods: Analyses of thermogravimetry, Differential thermogravimetry and Differential scanning calorimetry, Dilatometry; Microscopic Methods: Optical, Scanning electron, Transmission, Scanning tunnelling and Atomic force microscopy; X-ray Methods: X-ray fluorescence spectroscopy, X-ray photoelectron spectroscopy, X-ray diffraction analysis; Some Spectroscopic Methods.
- KiM592 Seminar 3+0 7.5**

- KiM593 Applications of Modern Analysis Methods I 0+3 6.0**
 Fluorescence and Phosphorescence Spectroscopy: Applications of fluorescence spectroscopy; Elemental Analyzer: Applications of elemental analyzer; Ion Exchange Chromatography: Applications of ion exchange chromatography; Atomic Absorption Spectroscopy (AAS): Applications of atomic absorption spectroscopy; Scanning Electron Microscope (SEM): Applications of scanning electron microscopy; Thermogravimetric Analysis (TGA): Applications of thermogravimetric analysis; Zeta Potential Device: Zeta potential field applications.
- KiM594 Applications of Modern Analysis Methods II 0+3 6.0**
 Refractometer: Finding refractive index of compounds; Polarimetry: Investigating the decomposition kinetics of sugar; Finding the rotating angle of maltose and lactose; UV- Visible Spectroscopy: Its use in qualitative and quantitative analysis; Infrared Spectroscopy: Determination of functional groups in organic compounds and structure of unknown substances; Nuclear Magnetic Resonance Spectroscopy (NMR): Illumination of structure of unknown organic compounds; High Pressure Liquid Chromatography (HPLC): Making quantitative analysis; Gas Chromatography (GC): Making quantitative analysis; Gas Chromatography-Mass Spectrometer (GC-MS): Analyzing the composition of known and unknown compounds.
- KiM595 Analytical Method Development Validation 3+0 6.0**
 Chemical Analysis Method and Its Steps; Steps of Quantitative Analysis; Method Calibration; Analytical Method Development and Validation; Validation Process; Qualification; Good Laboratory Practice (GLP); Current Good Manufacturing Practice (cGMP); ISO 9000 (TickIT); Method Development, Optimization and Validation Approaches; Method Validation; Organisations and Guides for Method Validation; Method Validation: Terminology and definitions: Accuracy, Precision, Error, Standard deviation; Confidence Ranges; Statistical Aids to Hypothesis Testing; Q Test; Method Validation Parameters (ICH/USP): Accuracy, Precision, Specificity, Limit of Detection, Limit of quantification, Linearity and range, Ruggedness, Robustness, Data elements required for assay validation; System Suitability (USP); Method Validation Protocol; Method Transfer and Revalidation.
- KiM596 Chemistry of Main Elements 3+0 6.0**
 General Properties of Main Elements: Classification, General physical and chemical properties; Periodicity: Atomic and ionic radii, Electronegativity, Ionization energy, Electron affinity; Chemistry of Hydrogen Atom; Chemistry of IA Group Elements: Reactivity, Compounds, Daily usage; Chemistry of IIIA Group Elements; Chemistry of IVA Group Elements; Chemistry of VA Group Elements; Chemistry of VIA Group Elements; Chemistry of VIIA Group Elements; Chemistry of VIIIA Group Elements.
- KiM598 Term Project 3+0 0.0**
- KiM601 Investigations of Mechanisms in Organic Chemistry I 3+0 7.5**
 Kinds of Organic Reactions; How Organic Reactions Occur; Aliphatic Nucleophilic Substitution: General features of Aliphatic Nucleophilic Substitution; Ion Pairs as Intermediate in Nucleophilic Substitution; Influence of Solvent; Nucleophile; Leaving Group; Intramolecular Cationic Rearrangements; 1,2-Shifts In Carbenium Ions; Carbonium Ions; Migrations to Carbonyl Group; Rearrangements to Electron-Deficient Nitrogen and Oxygen; Carbanion; Carbens and Electrophilic Aliphatic Substitution.
- KiM602 Investigations of Mechanisms in Organic Chemistry II 3+0 7.5**
 Addition and Elimination Reactions; Electrophilic Addition to Double and Triple Bonds; 1,2-Elimination Reactions; Nucleophilic Addition to Multiple Bonds; Electrophilic Aromatic Substitution; Nucleophilic Aromatic Substitution; Reactions of Carbonyl Compounds; Hydration and Acid-Base Catalysis; Other Simple Additions; Addition Followed By Elimination; Addition of Nitrogen Nucleophiles; Carboxylic Acid Derivatives; Enols; Enrolates, And Addition of Carbon Nucleophiles to C=O Bond; Cycloaddition Reactions; Electrocyclic Reactions; Sigmatropic Reactions.
- KiM603 Organic Synthesis 3+0 7.5**
 Designing Organic Syntheses and the Disconnection approach; The Order of Even Chemoselectivity; Stereoselectivity; Regioselectivity; Protecting Groups; One-Group C-C Disconnections and Carbonyl Compounds; Two-Group Disconnections; 1,2-; 1,3-; 1,4-; 1,5-; 1,6- Difunctionalised Compounds; Use of Acetylenes.
- KiM606 Molecular Symmetry and Spectroscopy 3+0 7.5**
 Symmetry Elements; Symmetry Point Groups; Matrix Representations; Reducible and Irreducible Representations; Character Tables; Representations and Quantum Mechanics; Molecular Vibrations; Molecular Orbital Theory and Symmetry; Hybrid Orbitals; Transition Metal Complexes.
- KiM609 Advanced Polymer Chemistry 3+0 7.5**

Thermal, Mechanical, Chemical, Electrical and Optical Properties of Polymers; Polymer Mixtures; Solubility Parameters, Flory-Huggins theory; Polymer Characterization; Miscellaneous Polymerisations; Polymer Modification; Polymeric Reagents and Catalysts; Commercial Polymerisations.

KiM612 Pericyclic Chemistry 3+0 7.5

Fundamentals of Pericyclic Reactions; Electrocyclic Reactions; Cycloaddition Reactions; [2+2] Reactions; [4+2] Cycloaddition Reactions; Intra and Intermolecular Diels-Alder Reactions; 1,3-Dipolar Reactions; Chelotropic Reactions; Ene and Related Reactions.

KiM614 Conducting Polymers 3+0 7.5

Basics of Conducting Polymers; Doping and Conductivity Properties; Synthesis of Conducting Polymers; Semiconductor Models for Conducting Polymers; Electrochromic Properties; Electrochemistry of Conducting Polymers; Solubility and Processing of Conducting Polymers; Characterization Methods; Application Fields of Conducting Polymers.

KiM615 Chemistry of Drugs I 3+0 7.5

Mechanisms of Drugs Effect on Biological Systems; Relationships Between the Chemical Structures of Drugs and their Biological Effects; Receptor Concept and Structure Specific Drugs; Structure Non-Specific Drugs; Solubility-Ionization Property of Drugs in Biological Systems and Its Relationship With Biological Activity; Steric Properties of Drug Molecules and its Relationship With Biological Activity; Isosterism and its Application on Biological Systems.

KiM616 Chemistry of Drugs II 3+0 7.5

General Reactions Used in Drug Syntheses; Phenylalkylamines; Phenylethylamines; Phenylpropylamines; Allgesics; Arylalkanoic Acid Derivatives; Chemotherapeutics; Sulphonamides; Sulphonamide Diuretics; Pyrazole Analgesics; Azole Antifungals; Symptomimetics Containing Imidazoline Residue; Benzimidazoles; Pyridine Derivatives; Dihydropyridine Antihypertensives; Drugs Containing Quinoline Residue; Pyrimidine Anticancer Agents; Barbiturates; Quinolone Hypnotics; Antihistaminic and Neuroleptics Containing Phenothiazine; Dibenzazepine Antidepressants; Cyclopentanoperhydro-Phenanthrene Hormones.

KiM617 Statistical Thermodynamics 3+0 7.5

Permutations; Thermodynamic Probability; Distribution To Energy Levels of Molecules; Statistic Weight; Most Probable Distribution; Partition Functions; Statistical Correlation To Partition of Thermodynamic Functions; Work And Heat; Enthalpy And Heat Capacity; Entropy And Free Enthalpy; Mixing Entropy; Heat Capacity of Gases; Heat Capacity of Liquids; Statistical Interpretation of Equilibrium Constant; Statistical Approach For Transition State Theory.

KiM618 Molecular Imprinted Polymers and Applications 3+0 7.5

The Purpose And Basic Principles of Molecular Imprinting: Covalent bonding imprinting, Non-covalent bonding imprinting, Metal-coordination imprinting; Synthesis and Characterization of Molecular Imprinted Polymers; Application of Molecular Imprinted Polymers: Separation and preconcentration processes by solid-phase extraction, Application of molecular imprinted polymers on high performance liquid chromatography, Application of capillary electro chromatography, Application of biosensors, Application of Pharmacologic Technology: Separation and purification of chiral compounds, Improving of releasing systems; Bioimprinting: Separation and purification of bromolecules, Improving of mimic enzyme and catalytic applications; Environment Technology Applications; Recovering Valuable Chemicals

KiM619 Organic Electrochemistry 3+0 7.5

Principles and Methods of Organic Electrochemistry; Synthetic and Mechanistic Aspects of Cathode and Anode Reactions of Organic Compounds Classified by Electrophoreses; Electrochemical Classification of Heterocyclic Compounds; Natural Products; Pharmaceuticals and Coordination Compounds; Classification of Electrode Reactions by Reaction Type; Electro synthesis of Amalgams; Reagents; Acids and Bases by Indirect Methods, Present and Future of Electro synthetic Methods.

KiM620 Surface Chemistry 3+0 7.5

Colloidal Systems; Classification of Colloidal Systems; Preparation and Purification of Colloidal Systems; Kinetic Properties; The Motion of Particles in Liquid Media; Osmotic Pressure; Liquid-Gas and Liquid-Liquid Interfaces; Surface and Interfacial Tensions; Adsorption and Orientation at Interfaces; Association Colloids and Micelle Formation; The Solid-Gas Interface; Adsorption of Gases and Vapours on Solids; The Solid-Liquid Interface; Adsorption From Solution; Charged Interface; Colloid Stability; Emulsions and Foams.

KiM621 Supercritical Fluids 3+0 7.5

Definition of Supercritical Fluids; Physical Properties of Supercritical Fluids; Properties at or Near the Critical Point; Properties of the Supercritical Region; Density; Diffusivity; Viscosity; Dielectric Constant; Polarity; Physico-Chemical Properties of Pure Supercritical Solvents; Binary Systems; Reactions in Supercritical Fluids; Influence of Pressure on the Reaction Rate; Catalytic Effects; Solid-Supercritical Fluid Phase Diagrams; Thermodynamic Modeling of Supercritical Fluid-Solute Phase Behavior; Applications of Supercritical Fluids.

KiM622 Ion Selective Electrodes 3+0 7.5

Ions; Formation of Ions, Conduction of Electricity; Strong and Weak Electrolytes; Polyelectrolytes; Electrodes, Oxidation and Reduction; Electrode Potentials; Electrochemical Cells; Electrode Reactions; Electrode Types; Ion Selective Electrodes; Crystalline (Single and Polycrystal) and Noncrystalline (Glass, Liquid Etc.) Electrodes, Molecular Selective Electrodes; Gas Sensors; Enzyme Substrate Electrodes (Biosensors and Modified Electrodes), Application of Ion and Molecular Selective Electrodes.

KiM623 Affinity Chromatography 3+0 7.5

Principles for the Affinity Chromatography; Choice of the Ligand; Utility and Choice of a Spacer Arm; Choice of the Matrix; Principal Methods of Immobilization; Direct Immobilization; Indirect Immobilization; Evaluation of Reactive Groups Anchored to the Matrix; Methods for Determining the Amount of Immobilized Ligand; Experimental Procedures; Separation on Column, Separation in Suspension; Application Fields of Affinity Chromatography; Protein Separation and Purification; Nucleic Acid Separation; Cell Separation; Large Scale Application; Particular Aspects of Affinity Chromatography; Charge Transfer Chromatography; Metal Chelate Chromatography; Covalent Chromatography; Hydrophobic Chromatography; Affinity Electrophoresis.

KiM624 Solvent Extraction Chemistry 3+0 7.5

Aqueous Solutions, Organic Solutions and Liquid-Liquid Systems; Statistical Treatment of Liquid-Liquid Distribution Equilibria; Solvent Extraction Systems; Solvent Extraction of Nonelectrolyte Molecules; Weak Acid and Bases and Ionic Salts; Solvent Extraction with Acidic, Basic and Neutral Extractants; Application of Solvent Extraction in Solution Chemistry; Determination of Thermodynamic Activity of Chemical Species in Solutions; Determination of Association and Dissociation Equilibria in Solutions; Applications of Solvent Extraction in Analytical Chemistry.

KiM642 Photochemistry 3+0 7.5

Organic Photochemistry; Electronic Orbital; Configurations and State; Transitions Between States-Chemical Dynamics; Potential Energy Surfaces; Radiative Transitions; The Absorption and Emission of Light; Photo-physical Radiation Transitions; Theoretical Organic Photochemistry; Mechanistic Organic Photochemistry; Energy Transfer; Photoaddition and Photosubstitution Reactions; Cycloaddition Reactions; Isomerizations and Rearrangements; Photofragmentation Reactions.

KiM643 Named Reactions in Heterocyclic Chemistry 3+0 7.5

Three and Four Membered Heterocyclics: Corey-Chaykovsky reaction, Jacobsen-Katsuki epoxidation, Paterno-Buchi reaction; Five Membered Heterocyclics: Barton-Zard reaction, Knorr and Paal-Knorr pyrrol synthesis, Hofmann-Löffler-Freytag reaction; Fischer indole synthesis, Graebe-Ullman carbazole synthesis, Madelung indole synthesis, Reissert indole synthesis, Paal-Knorr furan synthesis, Feist-Benary furan synthesis, Fiesselmann thiophen synthesis, Paal thiophen synthesis, Fischer oxazole synthesis, Knorr pyrazole synthesis; Six Membered Heterocyclics: Krönke pyridine synthesis, Chichibabin pyridine synthesis, Camps quinoline synthesis, Doebner quinoline synthesis, Pictet-Hubert reaction, Beirut reaction, Biginelli reaction.

KiM644 Stereochemistry 3+0 7.5

Simple Molecules; Hybridization, conformation and configuration, Chirality and stereogenic centers; Chiral Molecules; One stereogenic center, Molecules with two (or more) stereogenic centers Isomerism in carbon compounds; Stereochemistry of carbon-carbon and carbon-nitrogen bonds, Stereoisomerism in cyclic structures, Substitution reactions at saturated carbon: Fischer projections, Absolute stereochemistry: the r/s rules, Optical activity, Recognizing symmetry, Identifying chiral centers, Chirality without stereogenic carbon, Prochirality, enantiotopic and diastereotopic groups and faces: use of nmr spectroscopy in stereochemistry.

KiM645 Bioorganic Chemistry 3+0 7.5

Natural Products and Drug Research; Enzymatic Synthesis and Biotransformation; Carbohydrate Chemistry and Glycobiology; Peptide Chemistry and Applications; Biosynthetic Pathways and Biochemistry; Physical and Analytical Methods.

KiM646 Nanochemistry 3+0 7.5

Introduction: Inorganic Material Chemistry and Properties of Nanostructures; Nanomaterial Synthesis Methods: Bottom-up vs. Top-down Methods; Characterization of Nanomaterials; Nanomaterials: Inorganic Nanoclusters, Quantum-dots and Nanowires; Metal, Metal Oxide and Carbon Nanotubes; Inorganic-Organic and Inorganic-Polymer Nanocomposite Materials; Applications of Nanomaterials.

KiM647 Molecular Structure Calculations and Theories 3+0 7.5

Molecular mechanics, Hydrogen molecule ion, Potential energy surfaces, Born-Oppenheimer approximation, Linear combination of atomic orbitals, Hydrogen molecule, Valence bond theory, Electron density, Self consistent field theory,

Koopman's theorem, Open shell calculations, Unrestricted Hartree-Fock theory, Differential overlap models, Atomic orbitals and choice of atomic orbitals, Ab-initio quantum mechanical calculations, Semi-empirical quantum mechanical calculations, Electron correlation, Application to real chemical problems.

KiM648 Named Reactions in Organic Chemistry 3+0 7.5

Named Reactions of Rearrangement: Chan, Demjanov, Ferrier, Payne, Ramberg-Backlund, Stevens, Tiffeneau-Demjanov; Named Reactions of Addition: Heck, Henry; Named Reactions of Coupling: McMurry, Roush, Sonogashira, Stille, Suzuki; Named Reactions of Olefination: Horner-Wadsworth-Emmons, Nysted, Pearlman, Peterson; Named Reactions of Aldehydes and Ketones: Barbier, Luche, Parkih-Doering, Garner, Seyferth-Gilbert; Named Reactions of Condensation, Stobbe, Ugi, Pechmann, Darzens; Named Reactions of Cyclization: Bergman, Birch, Danishefsky, Glase, Majetich, Paterno-Buchi, Nazarov, Pictet-Spengler; Named Reactions of Oxydation- Reduction: Swern, Julia, Jones, Fleming-tamao, Dess Martin; Named Reactions of Amines: Neber, Shapiro.

KiM649 Organic Functional Group Preparations I 3+0 7.5

Alkanes, Alkenes, Alkynes, Alcohols, Amines, Nitroso Compounds, Nitro Compounds, Nitriles, Isonitriles (Isocyanides), Cyanates, Isocyanates, Carbonyl Compounds, Thiocyanates, Isothiocyanates, Carbonyl Compounds.

KiM650 Organic Functional Group Preparations II 3+0 7.5

Azides, Azo Compounds; Boranes, Borates, Peroxides, Thiols, Sulfides, Disulfides, Sulfoxides, Sulfones, Sulfonik Acids, Sulfonates, Organophosphorus Compounds, Phosphonic Acids, Phosphinic Acids, Phosphines, Phosphates, Phosphites.

KiM651 Biosensors 3+0 7.5

Biosensors and Their Fundamental Properties: Ideal biosensor characteristics and measurement systems, enzyme kinetics; Basic Electrochemical Principles: Cells, electrodes, current-potential curves; Transducers: pH, O₂, CO₂, H₂O₂, ion measurements; Amperometric Biosensors: Mesarument systems and applications; Potentiometric Biosensors: Types of indicator electrodes and applications; Immunosensors: Basic principles and applications; Microbial Biosensors: BOD, gas, hybrid sensors and applications; Thermal Biosensors: Enzyme activity determination, environmental applications.

KiM654 Proteomics and Genomics 3+0 7.5

The Molecular Basis of Heredity: DNA; RNA; Gene; Chromosome; Protein and Heredity; Gene Cloning; Applications of Recombinant DNA Technology; Human Genome Project and Genetic Engineering; Protein Structure; Function and Purification; Affinity Chromatography and Application of Affinity Chromatography; Gel Based Proteomics; Electrophoresis and Principles and Applications of Proteomics; Molecular Analysis and Bioinformatics.

KiM657 Asymmetric Organic Synthesis I 3+0 7.5

Stereo chemical terms; P urpose and importance of asymmetric synthesis; Analytical methods; Resolution; Asymmetric synthesis and rules; General methods used in asymmetric synthesis; Use of natural chiral compounds in asymmetric synthesis; Asymmetric synthesis using chiral auxiliary component; Chiral catalysts and use of chiral catalysts in asymmetric synthesis; Chiral compounds; Bioorganic asymmetric synthesis and use of other methods in asymmetric synthesis.

KiM658 Asymmetric Organic Synthesis II 3+0 7.5

Overview of asymmetric organic reactions; Carbon-carbon bond formation; Asymmetric carbon-heteroatom bond formation; Addition reactions to multiple bonds; Hydrogenation; Cyclization reactions; Reduction and oxidation reactions; Rearrangement reactions; Isomerazation; Applications and industrial importance of asymmetric synthesis; Selected sample reactions in the literature for asymmetric synthesis.

KiM659 Synthesis of Amino Acids and Peptides 3+0 7.5

Sources and Roles of Amino Acids and Peptides; Nomenclature for 'The Protein Amino Acids'; Alias 'The Coded Amino Acids'; Abbreviations for Names of Amino Acids; Conformations of Amino Acids and Peptides; Physicochemical Properties of Amino Acids and Peptides; Examples of Assignments of Structures to Peptides from NMR Spectra and Other Data; Reactions and Analytical Methods for Amino Acids and Peptides; Determination of The Primary Structure of Peptides and Proteins; Synthesis of Amino Acids; Methods for The Synthesis of Peptides; Biological Roles of Amino Acids and Peptides; Some Aspects of Amino-Acid and Peptide Drug Design.

KiM665 Bioorganometallic Chemistry 3+0 7.5

Relationship Between Inorganic and Organic Chemistry; Metals and Chemistry of Metals in Biological Systems: Mn, Fe, Co and Cu, Ni metal identification techniques; Bonding Theories in Organometallic Chemistry: Valance bond, Molecular orbital and ligand field theory, Chemistry of M-C, M-N, M-S and M-O bonding; Supramolecular Ligands and Metal Complexes: Synthesis, Properties, Characterization; Biological Ligands: Metalloproteins, Carbohydrates, Sugars, Lipids; Biocatalysts and Biocatalytic Reactions; Chemistry of Enzyme: Catalase, Peroxidase, Nitrogenase enzymes; Metals in Medicine.

Theoretical Analysis of Complex Process; Stability; Root Locus; Frequency Response Methods; Control System Design by Frequency Response; Bode and Nyquist Diagrams; Advanced Control Techniques; Cascade Control; Feed forward Control; Internal Model Control; Adaptive Control; Predictive Control; Controller Design and Tuning; State-Space Methods; Nonlinear Control; Digital Computer Simulation of Control Systems; Process Control Strategies.

KMH507 Advanced Heat Transfer 3+0 7.5

Process Heat Transfer; Conduction; Convection; Radiation; Temperature; Counter flow; Double-Pipe Exchangers; 1-2 Parallel-Counter flow; Shell-and-Tube Exchangers; Flow Arrangements for Increased Heat Recovery; Streamline Flow and Free Convection; Calculations for Process Conditions; Condensations of Single Vapors; Condensation of Mixed Vapors; Evaporation; Vaporizes; Evaporators and Reboilers; Extended Surfaces; Direct-Contact Transfer; Cooling Towers; Batch and Unsteady State Processes; Furnace Calculations; The Control of Temperature and Related Process Variables.

KMH509 Fuel and Energy 3+0 7.5

Energy; Forms of Energy; Energy Conversion; Energy Sources and Resources; Solid Fuels; The Formation of Coal; The Structure and Petrography of Coal; Sampling and Analysis of Solid Fuels; Liquid and Gaseous Fuels; Crude Petroleum; Physical Processing of Crude Petroleum; Natural Gas; Liquefied Petroleum Gases; Conversion Processes; Cracking Processes; Reforming Processes; Carbonization and Gasification Processes; Carbonization of Coal; The Gasification of Solid Fuels; Fuel Testing; Calorific Value; Tests on Liquid Fuels; Fuel and Flue Gas Analysis; Calculations in Fuel and Energy; Estimation of Fuel Properties from Experimental Data; Mass and Energy Balances; Stoichiometry; Application to Combustion Plant.

KMH510 Advanced Reactor Design 3+0 7.5

Multiple Reactions; Design for Parallel Reactions; Successive Irreversible Reactions of Different Orders; Irreversible Series-Parallel Reactions; Flow Patterns; Contacting, and Non-Ideal Flow; Basics of Non-Ideal Flow; Compartment Models; The Dispersion Model; The Tanks-In-Series Model; The Convection Model for Laminar Flow; Earliness of Mixing; Segregation and RTD; Self-Mixing of a Single Fluid; Mixing of Two Miscible Fluids.

KMH511 Advanced Instrumental Analysis 3+0 7.5

Basic Principles of Spectroscopy; UV and Visible Section Molecular Adsorption Spectroscopy; IR Spectroscopy; Nuclear Magnetic Resonance Spectroscopy; ¹H-NMR, ¹³C-NMR; Chromatographic Analysis Methods; GC; GC-MS; Thermal Analysis Methods; TG; DTA; Application of Thermal Analysis by Spectroscopic and Chromatographic Methods in Chemical Engineering.

KMH513 Advanced Transport Phenomena 3+0 7.5

Conservation Principles; The Control Volume; Principle of Conservation of Mass; The Momentum Theorem; Principle of Conservation of Energy; The Differential Equations of the Boundary Layer; The Integral Equations of the Boundary Layer; Momentum Transfer; Heat transfer; Convective Heat Transfer at High Velocities; Mass Transfer; Formulation of a Simplified Theory; Some Solutions to the Conserved Property Equation; Some Examples of Evaluation of the Driving Force.

KMH516 Physical Operations in Food Technologies 3+0 7.5

Cleaning of Raw Materials; Dehulling; Peeling; Techniques and Equipment of Drying; Particle Size; Size Reduction; Particle Size Distribution; Particle Density; Techniques and Equipment of Classifying; Distillation; Rectification and Extraction; Filtration: Ultra Filtration; Micro Filtration; Supercritical Fluid Extraction; Principles; Applications in Food Industry; Recovering Valuable Components From By-Products.

KMH517 Advanced Stoichiometry 3+0 7.5

Definition of Selected Production Processes; Assessment of Required Physical and Chemical Data and Formula; Determinations of Mass and Energy Balances in the Process Units and their Solutions; Some Examples on Mass and Energy Balances; Balances on Transient Processes; Production of Soda Ash from Brine; The Use of Limestone Slurry Scrubbing to Remove Sulphur Dioxide from Power Plant Flue Gases.

KMH518 New and Renewable Energy Sources 3+0 7.5

Solar Energy; Hydropower; Hydrogen Energy; Geothermal Energy; Wind Energy; Biomass Energy; Biomass Formation; Biomass Characteristics; Biomass Advantages; Biomass Components; Environmental Effects of Biomass; Biomass Sources; Fuel and Chemicals Production From Biomass; Biochemical Converting Processes; Thermo Chemical Converting Processes; Application Areas of These.

KMH519 Advanced Fluid Mechanics 3+0 7.5

Viscosity and the Mechanism of Momentum Transport: Newton's law of viscosity, Pressure and temperature dependence of viscosity, Theory of viscosity of gases, Theory of viscosity of liquids; Velocity Distributions in Laminar Flow: Shell momentum balances, Flow of a falling film, Flow through a circular pipe, Flow through an annulus, Adjacent flow of two immiscible fluids; Transportation and Metering of fluids: Pipes, Fittings, Valves; Pumps: Positive-displacement pumps ,

Centrifugal pumps, Fans, Blowers, Compressors; Measurement of Flowing Fluids: Area meters, Turbine meters, Magnetic meters, Thermal meters, Elbow meters, Weirs.

KMH520 Chromatographic Separation Processes 3+0 7.5

Separation Principles; Dynamics of Zone Migration; Diffusion and Kinetics; Modern Analytical and Preparative Bio separation Techniques of Liquid Chromatography; Elution and Separation Techniques in Liquid Chromatography; Gradient Elution; Adsorption; Partition; Size Exclusion; Ion Chromatography and Ion Exchange; Detectors Used in Liquid Chromatography; UV-Vis; Fluorescent; Refractive Index; Conductivity and Mass Detectors; Column Packing Materials in Analytical and Preparative Scale Liquid Chromatography; Method Development and Validation in Liquid Chromatography; Applications to Food and Bioprocesses; Quantification.

KMH521 Mathematical Methods in Chemical Engineering I 3+0 7.5

Ordinary Differential Equations; Solutions by the Laplace Transform, Solutions by Series; Simultaneous Differential Equations; Functions and Definite Integrals; The Error Function; The Gamma Function; Other Tabulated Functions Defined by Integrals; Evaluation of Definite Integrals; Treatment of Experimental Results; Theoretical Properties; Curve Fitting; Propagation of Errors.

KMH523 Advanced Separations Processes 3+0 7.5

Thermodynamics of Separation Operations; Energy; Entropy; Phase Equilibria; Ideal Liquid Solution Model; Nonideal Thermodynamic Property Models; Derived Thermodynamic Properties From P-V-T Models; Liquid-Liquid; Liquid-Solid Equilibria; Solvent Extraction of Organic and Inorganic Solids; Principles; Equipment; Design Calculation Methods; Algebraic and Graphical Methods; Ideal Stage and Equilibrium; Fluid/Particle Separations; Theory and Practices; Motion of Particles in Fluids; Properties of Fine Particles; Interfacial Phenomena and Rate Equations; Membrane Processes; Supercritical Fluid Extraction; Supercritical Fluid; Principles; Phase Equilibrium; Operation; Effect of Co solvent; Applications.

KMH524 Materials' Synthesis, Characterization and Applications 3+0 7.5

Synthesis and Characterization Methods (Methods Such As XRD, AAS, SEM, AFM, EDS and XPS) and Applications of Micro-, Meso- and Macro-Porous Materials; Nano-Porous Materials and Their Industrial Applications.

KMH525 Supercritical Fluid Extraction 3+0 7.5

Fundamentals of Processing With Supercritical Fluids; Phase Equilibria; Thermodynamics; Equations of State; Critical Behavior; Crossover Effects; Properties of Supercritical Fluids; Viscosity; Thermal Conductivity; Diffusion Coefficient; Solubility in Supercritical Solvent; Extraction of Substances With Supercritical Fluids From Solid Substrates; Extraction Process; Extraction Rate; Influence of Process Parameters and the Conditions of the Solid Substrate on the Extracting Process; The Effect of Modifier on Solvent Power; Selectivity and their Pressure and Temperature Dependence; Supercritical CO₂; Mass Transfer Phenomena in Supercritical CO₂ for Production of Natural Substances; Industrial Applications to Food; Pharmaceuticals; Natural Materials; Supercritical CO₂ Extraction of Vegetable Oils; Process Scale-Up and Economy.

KMH526 Membrane Separation Processes 3+0 7.5

Membrane Materials; Transport in Membrane: Liquid Diffusion, Gas Diffusion, Cascades; Dialysis and Electrodialysis; Membrane Structure: Reverse Osmosis Membranes, Microfiltration Membranes, Ultra Filtration Membranes; Pervaporation; Gas Permeation.

KMH527 Electrochemical Engineering 3+0 7.5

Vector Calculus; Dilute Solution Theory; Cell Potential; Effect of Convection in Mass Transfer; Estimation of Mass Transfer Rates from Nu Correlations; Potential and Current Distribution Problems; Secondary Distribution Problems; Numerical Calculation of Potential Distribution; Reactor Design in Electrochemistry; Differential Mass Balance; Convective Diffusion Problems; Concentrated Solution Theory; Electrode Kinetics: Measurement and Interpretation; Solid State Membrane Reactors; Measurement of Diffusion Coefficient; Impedance Modeling and Data Interpretation; Modeling and Design of Polymer Electrolyte Membrane Fuel Cell.

KMH528 Fuel Cells 3+0 7.5

Principles of Fuel Cells; Efficiency and Open Circuit Voltage; Operational Fuel Cell Voltages; Polymer Electrolyte Membrane Fuel Cells; Alkaline Electrolyte Fuel Cells; Medium and High Temperature Fuel Cells; Fuelling Fuel Cells; Auxiliary Units with Fuel Cells; Delivery of Fuel Cell Power.

KMH529 Numerical Methods in Chemical Engineering I 3+0 7.5

Thermodynamics; Establishment of Non-linear Equation and Equation Systems Frequently Encountered in Thermodynamics; Unit Operations and Chemical Kinetics; Numerical Methods for Solving These Equations; Numerical

integration; Simpson Rule; Method of Successive Substitutions; Newton Method; Jacobi Method; Gauss-Jordan Method; Development of Computer Models.

KMH530 Design of Experiments in Chemical Engineering 3+0 7.5
Design of Experiments and the Taguchi Approach; Definition and Measurement of Quality; Common Experiments and Methods of Analysis; Experimental Design Using Orthogonal Arrays; Experimental Design with Two-Level Factors; Experimental Design with Three- and Four-Level Factors; Analysis of Variance; Experimental Design for Studying Factor Interaction; Experimental Design with Mixed-Level Factors; Combination Designs; Strategies for Robust Design; Analysis Using Signal-to-Noise Ratios; Result Comprising Multiple Criteria of Evaluations; Quantification of Variation Reduction and Performance Improvement; Effective Experiment Preparation and Planning.

KMH531 Bioreseparation Engineering 3+0 7.5
Introduction to Bioproducts: Primary and secondary metabolites; Proteins: Structure and stability; Biosystems: Eukaryotic and prokaryotic cell structure and cultivation; Cell Disruption Methods and Flocculation; Crystallization and Precipitation; Membrane Filtration; Extraction: Organic aqueous, Aqua two-phase, Reverse micelles, Supercritical fluids; Chromatography; Electrophoresis; Solvent Removal and Drying; Bioprocess Design.

KMH532 Biochemical Engineering 3+0 7.5
Bioprocessing; Enzyme Kinetics: Simple enzyme kinetics, Enzyme reactors, Enzyme inhibition; Cell Cultivations: Microbial, animal and plant cell cultivations; Cell Kinetics and Fermenter Design: Batch and continuous fermentation processes, Plug flow, Continuous stirred-tank fermenter, Multiple fermenters in series, Kinetic models; Sterilization; Agitation and Aeration: Basic mass transfer concepts; Measurements of Interfacial Area, Oxygen absorption rate, Scale-up; Downstream Processing: Solid-liquid separation, Recovery and purification processes.

KMH533 Polymer Synthesis 3+0 7.5
Concept of Polymer; Structure and Nomenclature of Polymers; Types of Molecular Weight in Polymers and Molecular Weight Determination Methods; Synthesis of Polymers: Step-growth polymerization, Condensation polymerization, Cationic polymerization, Anionic polymerization; Polymerization Techniques: Bulk polymerization, Solution polymerization, Suspension polymerization, Emulsion polymerization, Interfacial polymerization.

KMH534 New Carbon Materials 3+0 7.5
Carbon Materials: The element carbon, Carbon family, Characterization of carbon materials; Graphite: Natural graphite, Synthetic graphite; Isotropic Carbons: High density isotropic graphites, Glassy carbons; Carbon Fiber: Classification of carbon fibers, Production, Properties, Applications; Porous Carbons; Pore Formation and Characterization, Carbon foam, Activated carbon; Carbon Composites.

KMH535 Porous Materials 3+0 7.5
Definition and Classification of Porous Materials; Natural and synthetic porous materials, Synthesis methods for synthetic porous materials, Characterization methods; Using Porous Materials in Catalysis: As supporting materials and as catalysts; Determination of Internal and External Mass Transfer Mechanisms and Transport Parameters in Porous Materials; Internal and External Mass Transfer Effects on Selectivity in Reactions.

KMH536 Advanced Concrete Admixtures 3+0 7.5
Composition and Production of Cement; Properties of Concrete Making Materials; Properties of Fresh Concrete; Properties of Hardened Concrete; Mineral Admixtures; Classification of Chemical Admixtures Used in Concrete Production; Concrete Mixing Water; Compatibility of Cement and Chemical Admixtures; Plasticizing Admixtures; Set Retarding and Accelerating Admixtures; Air Entraining Admixtures; Water Proofing Admixtures; Anti-Corrosion Admixtures; Biological Admixtures

KMH537 Hydrogen Production from Biomass 3+0 7.5
Concepts of Biomass; Gasification: Thermal, Oxidation, Miscellaneous gasification processes; Biomass-Derived Synthesis Gas Conversion; Supercritical Conversion; Pyrolysis: Production of hydrogen, carbon and methanol; Biological Conversion of Biomass to Hydrogen; Production of Storable Intermediates from Biomass Partial Conversion: Hydrogen from biomass-derived pyrolysis oils, Hydrogen from biomass-derived methanol; Techno-economic and Life Cycle Analysis of the Conversion of Biomass to Hydrogen: Techno-economic assessments, Life cycle analysis; Overview of Hydrogen Production Pathways.

KMH538 Geopolymers 3+0 7.5
Definition of Geopolymers; Geopolymerisation; Geopolymerisation Mechanism; Structures of Geopolymers; Raw Materials for Geopolymer Production; Parameters Affecting Geopolymerisation; Mechanical Properties of Geopolymers; Microstructural Properties of Geopolymers; Applications of Geopolymers: Geopolymer Cement, Geopolymer Concrete; Innovative Applications of Geopolymers.371

|--|---|----------------|
| KMH540 | Pharmaceutical Manufacturing Technologies | 3+0 7.5 |
| KMH592 | Seminar | 3+0 7.5 |
| KMH601 | Stage Separation Processes I | 3+0 7.5 |
| <p>The Staged Process; The Ideal stage; The Staged Separation; Batch and Continuous Processes; Steady-State and Unsteady-State Operation; Equilibrium and Non equilibrium Separations; Distillation; Liquid-Liquid Extraction; The Overall Material Balance; Flow Variables; Phase Flows, Recycle Matrices; Calculation of Flows; The Component Material Balance; Definitions of Phase Compositions; The Sum of Compositions Restrictions; Phase Equilibrium; The Equilibrium Ratio; Equilibrium Equations; Equilibrium Ratio Equations for Some Simple Cases; Computer Programs for Equilibrium Ratios.</p> | | |
| KMH602 | Stage Separation Processes II | 3+0 7.5 |
| <p>Constant Equilibrium Ratio Extraction; The Equilibrium Ratio in Liquid Extraction; Equations for Constant Equilibrium Ratio Extractions; Basic Program for Constant Equilibrium Ratio Extractions; Iterative Methods for Simultaneous Vector Equations; Constant Flow Rate Distillation: a Fixed Flow Model; Distillation Terminology; Bubble and Dew Point Calculation; Bubble Point Correction Method for Constant Flow Distillation; Constant Flow Distillation With Nonideal Liquid Phases; The Fugacity Ratio; Isotropic and Extractive Distillation; Energy Balance Equations; Derivation of the Energy Balance Equations; Calculation of Enthalpy for Vapor and Liquid Mixtures; A Computer Program for Calculation of Enthalpy.</p> | | |
| KMH604 | Petroleum Refinery Engineering | 3+0 7.5 |
| <p>History and Development of Refining; Composition of Petroleum; Refinery Products and Test Methods; Evaluation of Oil Stocks; Physical Properties of Petroleum Oil; Introduction to Processing; Refinery and Distillation Processes; Refinery Corrosion and Metals; Chemical Treatments; Solvent Treating or Extraction Processes; Fluid Mechanics; Vaporization and Condensation; Fractionation and Towers; Heat Transfer and Exchangers; Tubestill Heaters; Thermal Cracking and Decomposition Processes; Rebuilding Hydrocarbons; Catalytic Cracking and Reforming; Natural and Refinery Gases; Economics of Design; Typical Design Calculation.</p> | | |
| KMH605 | Heterogeneous Reaction Kinetics and Reactor Design | 3+0 7.5 |
| <p>Global Rates of Reactions in Heterogeneous Processes; Fluid-Particle Reaction Kinetics; Fluid-Particle Reactor Design; Fluid-Fluid Reactions Kinetics; Fluid-Fluid Reactor Design; Solid Catalyzed Reactions; Rates of Adsorption; Desorption and Surface Reaction; Rate Equations in Terms of Fluid Phase Concentrations; Kinetics of Catalyst Deactivation.</p> | | |
| KMH606 | Advanced Mathematical Modeling in Chemical Engineering | 3+0 7.5 |
| <p>Energy and Mass Balances in Steady-State Systems; Modeling in Unsteady-State Systems with a Single Variable; Modeling in Unsteady-State Systems with Multiple Variables; Modeling of Systems Involving Chemical Reactions; Solution of Finite Difference Equations.</p> | | |
| KMH609 | Synthetic Fuel Production By Thermochemical Methods | 3+0 7.5 |
| <p>Fossil Fuels; Synthetic Fuels; Chemistry of Synthetic Fuels; Thermodynamics of Synthetic Fuels; Reaction Kinetics and Catalysis; Biomass; Biomass Sources, Thermochemical Methods; Pyrolysis: Mass and Energy Balances; Reactor Description; Effective Factors; Liquefaction: Indirect and Direct Liquefaction; Gasification; Oxygen Production; Hydrogen Production; Combustion.</p> | | |
| KMH611 | Advanced Carbon Materials from Biomass | 3+0 7.5 |
| <p>Biomass Feedstocks: The main constituents of biomass, Characterization; Modelling the Thermochemical Conversion of Biomass: Heat and Mass transfer, Kinetics and thermodynamics; Thermochemical Conversion Technologies: Torrefaction, Pyrolysis, Gasification; Industrial Pyrolysis Technologies; Hydrothermal Carbonization and its Role in Catalysis; Green Carbons; Biocarbon as Adsorbents: Liquid and gas phase adsorption processes; Biocarbons for Gas Storage; Biocarbons for Energy Storage; Sustainability of Biocarbon Production and Application.</p> | | |
| KMH613 | Coal Technology | 3+0 7.5 |
| <p>Coal Beneficiation-History, Current Options And Effectiveness; Physical Coal Cleaning Systems; Coal Pre-Treatment-Size Reduction and Screening Techniques; Dry Mechanical Separation Processes; Wet Mechanical Separation Processes; Chemical Coal Cleaning; Coal Combustion; Fluidized Bed Combustion; Coal Briquette; Coal Pyrolysis; Coal Gasification; Coal Liquefaction.</p> | | |
| KMH622 | Mathematical Methods in Chemical Engineering II | 3+0 7.5 |

Partial Differential Equations; Boundary Conditions; Particular Solution of Partial Differential Equations; Method of Separation of Variables; One- and Two-Dimensional Heat Equations; Finite Differences; The Difference Operators ? and E; Linear Finite Difference Equations; Non-Linear Finite Difference Equations; Graphical Solutions.

KMH630 Numerical Methods in Chemical Engineering II 3+0 7.5
 Numerical Methods; Gauss Seidel Method; Solving Nonlinear Equations; Iterations of Newton-Raphson Model; Solving Ordinary Differential Equations; Euler's Method; Runge-Kutta Method; Solving These Equations With Computer Programs.

KMH692 Seminar 3+0 7.5

KMH790 Thesis 0+1 30.0

KMH890 Thesis 0+1 30.0

KMH890-0 Thesis (Thesis Proposal) 0+1 30.0

KOR504 Architectural History and Concepts 3+0 7.5
 Architecture and culture; Architecture and society; Architecture and city; Architecture and art; Architecture and form; Architecture and technology.

KOR506 Technics of Documentation 3+0 7.5
 Traditional Techniques of Architectural Documentation; Latest Techniques of Documentation; Use of Information Technology for Documentation; Formation of Archives.

KOR517 History of Modern Turkish Architecture 3+0 7.5
 Turkish Architecture in the Pre-Republic Period under the Effect of Western Architecture; the First Nationalistic Architecture Period; the First Period of Modern Architecture I; Period of Foreign Architects; the First Period of Modern Architecture II; Period of Turkish Architects; the Second Nationalistic Architecture Period; Architecture of Sedad Hakkı Eldem; The Period between 1950 and 1980 I; the Second Period of Modern Architecture; The Period between 1950 and 1980 II; Importance of 1960s and its Reflections on Architecture; The Period between 1950 and 1980 III; Architecture of 1970s; Architecture after 1980 I; Architecture after 1980 II; Architecture of Today.

KOR518 History of Anatolian Architecture 3+0 7.5
 Historical Continuity and Interaction in Anatolia; Anatolian Civilizations: Prehistoric Period; Anatolian Civilizations 1; Anatolian Civilizations 2; Greek Architecture in Anatolia; Roman Architecture in Anatolia; Byzantine Period and Architecture; Seljuk Period and Architecture; Architecture of Principalities Period; Early Ottoman Architecture, Classical Period Ottoman Architecture and Late Ottoman Architecture.

KOR519 Construction Techniques and Conservation Problems of Ottoman Architecture 3+0 7.5
 Building Types in Ottoman Architecture; Architectural Development; Different Building Types and Typological Features: Regional characteristics, Construction techniques and materials; Analysis of Structure and Building Elements; Discussion and Evaluation of Additions from Different Periods and Restitution Problems: Methods and applications; Challenges Related to Preservation of Original Construction Techniques: Techniques, Applications, Issue of re-usage; Architectural and Typological Characteristics of Historical Buildings; Adaptation of Historical Buildings into Modern Life.

KOR520 The Management of Cultural Heritage 3+0 7.5
 Definition of Cultural Heritage; Principles of International Conservation Laws; International Conservation Regulations and Their Reflections on the Conservation Principles of National Conservation Laws; The Organizations about Conservation in Turkey; The Legal Framework of Conservation in Turkey and the Latest Law of Conservation; Risk Factors in the Conservation Process, Organization and Principles of Conservation Site Management.

KOR521 World Heritage Sites in Turkey 3+0 7.5
 Cultural Heritage and World Heritage; Management of World Heritage Sites; Archaeological and Historical Sites; Related Legislation, Protection Policies and Approaches; Protection of Cultural Heritage in International and National Law;

International Organizations and Conventions; Sustainability of Cultural Heritage; Monitoring of World Heritage Sites; World Heritage Sites in Turkey: Cultural heritage management, Determining and analyzing the current status, Needs, and Related issues; Protection Techniques and Methods; Approaches Specific to Different Countries/Cultures; Examples of World Heritage Sites.

KOR522 Housing During Republic Period 3+0 7.5

Historical References of Traditional Turkish House; Space Organization and Regional Effects on Traditional Turkish House; Effects of Ottoman Westernization on Housing; Modernity in the Early Republic Period and its Effects on Housing; Housing during the World War II; Integration to International System and Housing; Mass Housing between 1923-1960; Housing in Pluralist Period; Searches for Solution to Housing Problem; Housing During Post-Modern Period; Reflection of Architectural Styles and Approaches on Housing Design; Student Presentations I; Student Presentations II.

KOR523 Conservation Project I 2+2 7.5

Determination of Historical, Architectural and Structural Properties of one or some of the Civil, Monumental and Concrete Examples of Cultural Architectural Legacy from Different Historical Periods; Determination of the Conservation Approach and Principles that Lead the Practice in the Same Building(s); Documentation and Historical Research; Formation of Conservation Decisions; Identification of Conservation Methods and Techniques; Proposal for the Conservation Practice.

KOR524 Conservation Project II 2+2 7.5

Documentation of the Current Situation of the Historical Settlements from Different Historical Periods, and Conducting Historical Research; Analysis of Historical, Architectural and Structural Properties of a Historical Settlement; Determination of the Conservation Approach and Principles that Lead the Practice in the Same Area; Formation of Conservation Decisions; Identification of Conservation Methods and Techniques; Proposal for the Conservation Practice.

KOR525 Conservation History and Theories 3+0 7.5

Historical Development of Conservation Problem; Conservation Approaches in the 19th Century; Relationship between Modernism and Conservation; Discussion on History, Memory and Identity, and Conservation Problem; Definition of Cultural Heritage; Conflict between Universality and Local Values; Concept and Approaches of Conservation in the Contemporary World; International Charters and Councils; National Conservation History and Theories, National Legislation for Conservation.

KOR527 Research and Documentation Methods in Protection 3+0 7.5

Introducing and Teaching the Researches, Resources and Methods to Identify Values and Phases of the Historical Structure and Environment in the Preparation Process of Restoration and Conservation Projects; Historical (Religious Courts and Kadi Registers, Charitable Foundation Documents, Decrees, Engravings, Miniatures, Historical Maps, Photographs, etc.), Written and Visual Sources and the Transmission of Usage Possibilities in this Area; Investigation of the Latest Techniques Used in the Documentation of Cultural Assets; Examining the Possibilities of Using Communication Technologies in Documentation; Creation of Archive as a Permanent Information Bank.

KOR528 Conservation of Modern Cultural Heritage 3+0 7.5

History of Conservation of Modern Architectural Heritage; Conservation Problems; Typologies and Ideologies; Materiality and Authenticity; Interior Spaces, Furnishing and Color; Conservation of Industrial Heritage; Conservation of Modern Public Premises; Conservation of Public Buildings; Modern Residences; Stakeholders of Modern Cultural Heritage Conservation and Their Participation in Conservation Processes; Case Studies from Turkey and abroad.

KOR530 Cultural Heritage Buildings and Their Adaptations to Contemporary Museum Function 3+0 7.5

Conceptual Change of Museum and Its Definition in the Historical Process: Current Expansions of Museology Science; Design Input for the Museum Space; the Concept of Contemporary Museum and its Relations with Cultural Heritage: The Concepts of Tangible and Intangible Cultural Heritage and Their Effects to Museum Space Design; The Diversity of Interventions for Adaptations of Cultural Heritage Buildings to Contemporary Museum Function; Interventions for Functional Expansions and Changes; Analyses of National and International Samples.

KOR531 Typological Readings in Conservation 3+0 7.5

Terminological Approach to the Concept of Typology; Understanding the Place and Importance of Typology in Conservation; Determining Data Groups of Historical Structures by means of Various Data Sources; Analysis of the Collected Data with Various Data Evaluation Methods; Arranging the Typology Titles by Evaluating the Groups Formed through Analyses; Forming Typology; Matching the Concepts of Conservation and Restitution (Plan and Facade Setup, Materials, Bearing and Architectural Elements, and Urban Morphology) with Typological Readings; Sharing and Presentation of Readings about Typology.

KOR534 Special Topics in Preservation 3+0 7.5

Contemporary Approaches to Conservation; International Trends in Conservation; National Trends in Conservation; the World Heritage List and Its Criteria; Discussing the Reasons for Conservation of Cultural Heritage; Environmental Effects on Historic Buildings; Sustainable Conservation.

KOR535 Special Topics in Conservation 3+0 7.5

International Trends in Conservation; National Trends in Conservation; the World Heritage List and its Criteria; Discussing the Reasons for Conservation of Cultural Heritage; Effects of Environmental Problems on the Historical Buildings; Concept of Sustainable Conservation; Effects of Tourism on Cultural Heritage; Scope of Conservation in Contemporary World, Sustainable Cultural Tourism and Conservation; Conservation Area Management; the Concept of Protected Area, and Conservation.

KOR536 Preservation Management 3+0 7.5

National Regulations for Conservation; International and National Principals, Regulations and Directives; Conservation Organizations in Turkey; Legal Framework on Conservation in Turkey and the Latest Preservation Law; Risk Factors in the Conservation Process.

KOR539 Construction Techniques and Conservation Problems of Ottoman Architecture 3+0 4.5

Building Types in Ottoman Architecture; Periods and Regional Features; Different Building Types and Typological Features: Construction Techniques and Materials; The Analysis of Structure and Building Elements; The Discussion and Evaluation of Additions from Different Periods and Restitution Problems; The Problems About Conservation of Authentic Construction Techniques: Methods and Applications; Change of Function and Issues of Re-Usage; Examples of Adaptations of Historic Buildings for Modern Use.

KOR541 History of Anatolian Architecture 3+0 4.5

Historical Continuity and Interaction in Anatolia; Anatolian Civilizations: Prehistoric Period; Anatolian Civilizations: Hittite, Phrygian, Lydian, Urartian Civilisations; Anatolian Civilizations: Greek Architecture in Anatolia; Roman Architecture in Anatolia; Byzantine Period and Architecture; Seljuk Period and Architecture; Architecture of Principalities Period; Early Ottoman Architecture; Classical Period Ottoman Architecture I; Classical Period Ottoman Architecture II; Late Ottoman Architecture.

KOR543 World Heritage Sites in Turkey 3+0 7.5

Cultural Heritage and World Heritage; Management of World Heritage Sites, Archaeological and historic sites; Legislation, Conservation policies, Approaches; International and National Law of Cultural Heritage; International Organizations and Conventions; Sustainability of Cultural Heritage; Monitoring World Heritage Sites; World Heritage Sites in Turkey: Site management, Current status, Conservation problems, Needs; Introduction of Various Techniques and Methods; Specific Approaches of Different Countries/Cultures; Examples of World Heritage Sites.

KOR610 Conservation of Rural Architectural Heritage 3+0 7.5

Rural Architecture; Rural Architecture in Anatolia; Formation of the Physical Texture: Rural Landscape, Settlement and plan features;, Building types and Production Relations; Techniques Related to Documenting the Features of Rural Architecture; Analysis of Deterioration at Rural Areas; Conservation and Regeneration of the Rural Areas: Conservation Approaches for Rural Architecture Samples; International Policies for Rural Legacy; Framework for National Solutions; Rural Settlements in the Urban Context; Rural Architecture in the 21st Century.

KOR611 Accessibility of Historic Places and Buildings 3+0 7.5

Historic Places and Buildings Principles: Principles of design, Principles of conservation, Responsibilities; Legislative Context; Improving the Accessibility: Developing an access strategy, Access audit, Access options, The access action plan; Accessibility of the External Environment: Accessible routes, Urban furniture and lighting, Landscape; In and Around Buildings Accessibility: Car parking, Building routes, Entry, Circulation, Emergency evacuation; Providing Accessible Information.

KOR612 Cultural Landscapes 3+0 7.5

Definition of Cultural Landscape Concept and Its History; Tangible and Intangible Qualities of Cultural Landscapes; Conservation Approaches for Cultural Landscapes; Management Problems; Cultural Landscapes and Site Management in the scope of UNESCO World Heritage; Natural Landscape; Artificial Landscape; Historical Urban Landscape; Conservation of Cultural Landscapes in International Legal Framework; Landscape Conservation in National Legal Framework; Methodology of Integrated Conservation of Natural and Cultural Heritage; Management, Interpretation and Presentation of Cultural Landscapes; Monitoring; Stakeholders and Participation; Case Studies from Turkey/abroad.

KOR613 New Touches to The Historical Texture 3+0 7.5

Defining Historical Texture and Protection of Cultural Assets Necessary the Concept in the Light of National and International Opinion; Evaluating the Meeting With the Historic Surroundings of the New Concept; Discussing New Interventions in Historic Surroundings; Discussing New Interventions in Historic Building; Investigating New Historic Texture Touches on Various Samples Examined.

KOR614 **Typological Readings in the Historical Environment** **3+0 7.5**

Terminological Approach to the Concept of Typology; Understanding the Place and Importance of Typology in Conservation; Determining the Data Sets of Historical Structures by the Use of Different Data Sources; Analysis of the Collected Data with a Variety of Data Evaluation Methods; Arranging the Typology Titles by Evaluating the Groups that Emerged according to the Analyses; Forming Typology; Making the Typological Readings Compatible with the Concepts of Conservation and Restitution (Plans and Facade Arrangement, Materials, Transporter and architectural elements and urban morphology); Sharing and Presentation of Typology Based Reading.

KOR615 **Tangible and Intangible Cultural Heritage** **3+0 7.5**

Definition of Tangible and Intangible Cultural Qualities; The Concepts of Tangible and Intangible Cultural Heritage; Tangible and Intangible Heritage in the Scope of Integrated Conservation Methodology; 'Spirit of Place' and Tangible and Intangible Heritage; Integrated Interpretation and Presentation of Tangible and Intangible Cultural Heritage in International Documents; UNESCO World Intangible Cultural Heritage Lists; World Heritage and its Tangible and Intangible Cultural Qualities; Intangible Cultural Heritage in Turkey; Cultural Significance; Values and Narratives, Integrated Interpretation and Presentation of Tangible and Intangible Heritage.

KOR616 **Cultural Heritage and Tourism** **3+0 7.5**

KOR617 **Cultural Heritage Consciousness, Awareness and Participatory Approaches** **3+0 7.5**

KRY501 **Introduction to Urban Risk Management** **3+0 7.5**

Introduction to : Overview & Perspectives of Urban Risk Management;, Hazard, Vulnerability & risks: A Conceptual Approaches to Disaster Management: Definitions, Role and responsibilities; Identifying Risks & Vulnerabilities in the Urbanization; Urban Disaster Risks: Vulnerability Analyses in Urbanization, Risk assessment and mitigation strategies; Perspectives & Approaches & Types Urban disaster risks; Turkey's Urban Risks: Past and future impacts Impact for Present and Future, Lessons I Learned from past disasters; Environmental Impacts of Urban Risk sImpacts; Earthquake Risks: Managing structural and non-structural risks, Mitigation Framework for Structural Safety and Non-Structural Mitigation Measures, GIS and Remote Sensing forin Managing Urban Risks.; Action Planning & Strategies For Urban Disater Risk Reduction.

KRY502 **Emergency and Disaster Regulations** **3+0 7.5**

An Overview of Emergency and Disaster Management An Overview of Legislation Regulations; Importance and Necessity of Knowing Legislation the Regulations; Act no 7269 "Some Important Laws and Implementing Regulations Related to Measures Could to BBe Taken in Case of Disasters Affecting General Public Life and Supports"; Act no 5902 "Some Important Laws and Implementing Regulations Related to Organization and Duties of Disaster and Emergency Management Presidency"; Act no 7126 "Some Important Laws and Implementing Regulations Related to Civil Defence Act"; Disaster and Emergency Councils; Duties and Responsibilities of the Provincial Disaster and Emergency Management.

KRY503 **GIS and RS in Risk Management** **3+0 7.5**

Fundamentals of GIS and RS: Definition and components of; CBS and RS components; GIS Data Features; Satellite Image Characteristics; RS and GIS Integration: Information Extraction fFrom Satellite IImages; Managing Data wWith GIS; Relationship betweenWith the Risk Management and GIS and RS; Pre-Disaster Risk Analysis: Disaster hazard analysis; Elements of Risk and Vulnerability Analysis; Types and Methods of Risk Analysis; Risk Assessment; Cost-Benefit Analysis Methods; GIS and RS Application Examples at the Risk Management: Landslide risk analysis, Flood risk analysis, Earthquake risk analysis, Risk analysis of forest fire.

KRY504 **Microzonation for Municipalities** **3+0 7.5**

Definitions and General Methodology; Seismic Microbzonation; Data Acquisition and Establishing a Database; Data Processing for Spatial Analysis; Geographic Information System: Creating infrastructure for seismic microzonation by via geographical information systems (GIS), Evaluation and completion of the data, Mapping of raw data; Derivation and Creation of Microzonation Maps; Land Use Management; Application of the Seismic Microzonation Maps to Urban Master Planning.

- KRY505 Map Information and GIS 3+0 7.5**
Introduction to Map Information: Map and map types; Scale; Specifications in Maps; Utilization from Maps: Distance and area calculations; Slope and Profile Calculations; Map Projections and Coordinates Systems: Shape of earth; Datum and geoid; Projection Types and Specifications; Geographic and Cartesian Coordinate Systems; Sheet Segmentation; Fundamentals of Geographic Information Systems (GIS): Concepts of data, Geographic data, information and information systems; Definition of GIS; History of GIS; Components of GIS; GIS Data Types and Models: Attributes and spatial data; Raster and Vector Data Models; Topology Concepts and its Rules; Application Area of GIS.
- KRY506 Flood and Drought Hydrology 3+0 7.5**
The Concept of Flood; Factors Affecting Flood; Precipitation and Flow Relations: Flow, Hydrograph analysis; Flood Estimation Techniques: Methods for small scale basins, Unit Hydrograph; Flood Management; The Concept of Drought: Analysis for Low flow conditions: Formation of low flow, Recession curve; Analysis of dry periods; Definition of drought, Causes of drought, Critical drought period, Local Drought Analysis; Drought Management: Methods for increasing water volume, Methods of decreasing water demand, Methods for decreasing the impact of the drought.
- KRY507 Risk Evaluation During Urban Renewal Process 3+0 7.5**
Demolition Approaches: Evaluation of the approaches, Intervention principles, Demolition activities in structural renovation in the demolition activities; Planning and managing projects: Key considerations when aspects on planning demolition projects, Planning and managing for site work, Management and planning tools, Structural hazards: Identification of structural form and features; Structural condition, Health and safety of persons on or off site: Risk assessment-based approach, Site security, Noise and vibration, Falling and projected materials; Demolition techniques: Waste Control, Moving and Recycling Materials: Materials handling and processing: The removal of demolition debris, Recycling techniques and mobile systems for recycling Mobile power plants for recycling of materials.
- KRY508 Environmental Geology and Hydrogeology 3+0 7.5**
Introduction; Earth Processes; Geologic Hazards; An overview of the damages within the scope of environmental geology; Earthquakes: Formation Processes of Earthquakes, Source of the force causing an earthquake; Volcanoes; Meteor Impacts; Floods; Coastal Processes; Slope Failures; Soils; Surface Water Hydrology; Groundwater Hydrology; Resources and Reserves; Mineral Resources; Energy Resources; Military Impacts of Wars on the Environment; Environmental Law and Environmental Impact.
- KRY509 Risk Determination of Underground Structures 3+0 7.5**
Definitions of Concepts: Underground structures and engineering, Sustainability, Hazard and risk; Factors Affecting Underground Development: Engineering the underground Underground engineering for sustainable urban development; Health and Safety in Underground Structures: Human factor effects for health and safety, Managing safety through regulation; Lifecycle Sustainability, Costs, and benefits of underground infrastructure development: Lifecycle sustainability assessment, Lifecycle Economic benefits and costs of lifecycle; Innovative Underground Technology and Engineering for Sustainable Development: Evolution of technology, Technologies for underground site characterization.
- KRY510 Global Climate Change and Meteorological Disasters 3+0 7.5**
Climate; Climate System; Global Climate Change; Observed and Expected Changes in Climate in the World and in Turkey of Climate Change; Natural Disasters; Meteorological Disasters; Causes and Types; Temporal and Spatial Distribution of Meteorological Disasters; Hot Air Waves; Drought and Desertification; Floods and Overflows; Hurricanes; Strong Winds and Storms; Forest Fires; Agricultural Bugs; Early Warning Systems.
- KRY511 GIS Use in Resource Inventory and Analyses 3+0 7.5**
Definitions About Environment; Types and Elements Components of Environment: Physical environment, Natural environment, Cultural environment; Resource and Types of Resources; Resource Inventory; Resource Analyses; Efficient Management of Resources: Global environmental problems, Global climate change, Sustainable development; Resource Analysis; Use of Geomatic Technologies in Resource Inventory and Analyses: Remote sensing, Geodesy, Geographical information technologies.
- KRY512 Urban Transformation Law 3+0 7.5**
An Outline of Urban Transformation: Historical development, Objectives, Definition, Models of urban transformation; Regulations: Legislation, Rationale, Concepts; Urban Transformation Aimed for Disasters: Topics, Authority, Land acquisition, Demolition, supports to rights holders, Appeals and litigation; Urban Transformation Aimed for Improvement of City: Related laws, Aim Objective, Subject, Scope, Authority, Process, History of the City; Urban Transformation Aimed for Protection of History the Cultural and Natural Heritage of the City; Nature and Cultural Heritage: Related laws, Objectives, Subject, Scope, Authority, Construction process; General Evaluation.
- KRY513 Advanced Technologies in Disaster and Emergency Management 3+0 7.5**
Natural and Technological Hazards and Risk Assessment; The Using of Informatic and Communication Technologies in Disasters; Introduction to Advanced Technologies in Emergency Management; Disaster Communications and

Connectivity Connection Networking; Disaster and Emergency Management and the Internet; Video Communications; Introduction to Geographical Information Systems (GIS): GIS Technology for disasters and emergency management; Operational Problems and Technology; Turkey's National Disaster Response Plan; The Disaster Management and Decision Support System.

KRY514 Disaster Law 3+0 7.5

An Outline of Disaster law: Law and its sources, Regulations, Rationale, Concepts; Scope of Disaster Law: Measures to be taken, Supports, Insurance; An Outline of Urban Transformation Law: Historical development, Objectives, Definition, Models of urban transformation, Urban transformation aimed for disasters, Legal matters; Disaster and Emergency Management Presidency: Organization, Duties; Civil Defense and Disaster Law;: International Disaster Response Law; Civil and Criminal Liability: Civil liability, Criminal liability.

KRY515 Spatial Analysis in Urban Risk Management 3+0 7.5

Basic Concepts: Urban risk management and location intelligence, Urban information systems, Spatial analysis, Vulnerability; Geographical Information Systems in Urban Risk Management: Geospatial data, Spatial information, Spatial data creation stages; Remote Sensing in Urban Risk Management: Remote sensing data sources, Using remote sensing in post-disaster impact and damage detection; Geographical Information Systems in Disaster Studies: Geographic data collection, hazard and risk mapping, Spatial analysis with case scenarios.

KRY516 Earthquake Risk Determination in Reinforced-Concrete Buildings 3+0 7.5

Definitions aAbout Earthquake; Location of the Earthquake, Magnitude of the earthquake, Intensity of the earthquake; Structural Irregularities in RC Buildings: Irregularities in plan, Irregularities in vertical direction; Structural Defects in RC Buildings: Strong beam-weak column problem, Short column problem, Corner column problem, Clerestory problem, Discontinuous frame problem, Lack of stir-up problem, Yetersiz deprem derziLack of expansion joints, Workmanship defects, Low quality concrete, Defects caused by users; Earthquake Damages in RC Buildings: Damages in structural carrier system elements, Damages in non-structural carrier elements.

KRY520 Disaster Hazard and Risk Factors of Turkey 3+0 7.5

Definition and types of disaster: Factors affecting the magnitude of disaster, Disaster statistics; Hazard and Risk: Determination of hazard and risk, Maps of hazard and risk; Earthquake: Internal structure of the earth and plate tectonics, Fault and fault types, Earthquake, Earthquake waves, Earthquake parameters, Factors affecting earthquake, Seismicity of Türkiye, Earthquake regions/hazard maps of Türkiye; Flood: What is flooding, how it occurs?, Types of flood; Landslide: What is landslide, how it occurs?; Avalanche: What is avalanche, how it occurs?; Meteorological disaster; Technological disasters.

KRY522 Disaster Regulation for Local Governments 3+0 7.5

Disaster management system of Türkiye: Disaster and emergency management centers, Important institutions and organizations in terms of disaster management; 5216 numbered metropolitan municipality Law, 5393 numbered municipality law and Law no 5302 on provincial special administration duties; 7269 numbered disaster law, Civil defense law number 7126 and 3194 numbered development law duties; Tasks assigned to local governments under the Türkiye disaster response plan; Law No. 6306 on the transformation of areas at risk of disaster; Building earthquake regulation and ground and basic study application principles.

KRY523 Disaster Logistics 3+0 7.5

Content: Components of disaster, Disaster management; Cities Disaster Resilient: The concept of vulnerability and its applications, The vulnerability of cities, Disaster and resilience, Risk, Natural and technological hazards, Natech Risk Assessment and Management, Na-tech, supply chain, Emergency operations, Transportation, Geographic information systems and spatial analysis, Network analysis, Social/institutional network analysis.

KRY524 Sustainable Urban Resilience 3+0 7.5

KRY525 Urban Planning and Geology 3+0 7.5

Urban Planning Definition in Geology and Its Importance; Population and Urban Migration; Urban Planning Structures in Rapid Population Growth: Problems Experienced in the Fields of Economy, Education, Health and Engineering; Growth of Rapidly Migrating Cities Without Engineering Services and Geological Evaluation of Earthquake Risk of These Areas; Urban Phenomenon and Building Quality Question in Our Country After 1999 Marmara Earthquake; Local Geological Characteristics of Cities Where Zoning Plans Are Made / Will Be Planned and Geological Features of the Ground Where Building Foundations will be established; Developments in Urban Planning after TBDY 2019.

KRY526 Rapid Seismic Performance Assessment Methods and Building Inventory Studies 3+0 7.5

KRY599 Semester Project 3+0 0.0

LEE501 Open and Distance Education 3+0 7.5

LEE503 Design of Online Learning Environments 2+1 5.0

Basic Concepts of Online Learning and Teaching, Dynamics of Online Learning Environments, Paradigms Reflected in the Design of Online Learning Environments and Eclectic Philosophy (3 weeks), Online Learning Environments and Active Learning Strategies, Models in the Design of Online Learning Environments and the PDCA Cycle, Design of Online Learning Environments: Plan (2 weeks), Designing Online Learning Environments: Do (2 weeks), Designing Online Learning Environments: Check (2 weeks), Designing Online Learning Environments: Act.

LEE601 (Eng) Technical English 3+0 3.0

LEE603 Learning and Teaching in Higher Education 3+0 7.5

Basic Concepts; Becoming a University Teacher: Expectations and Realities; Characteristics of University Students and Learning Styles; The World of Educational Paradigms and Learning Theories; Course Design (2 weeks); Instructor-Centered Teaching Strategies; Student-Centered and Active Learning Strategies; Managing the University Classroom; Measurement and Grading in Higher Education; Measurement and Assessment; Ethics and Professional Development in University Teaching; Evaluation of Micro-Teaching Activities (2 weeks).

LOJ511 Carriage of Dangerous Goods 3+0 7.5

The place and importance of carriage of dangerous goods in our country and in the world; ADR document, its definition, importance and purpose; regulations and standards in Turkey; Definition of dangerous goods; The importance of ADR Table A; Classification of dangerous goods and their characteristics; Basic packaging for transporting ADR dangerous goods; Transport documents; Accident written instructions; Liable for the transport of dangerous goods. Marking and labeling; Fire extinguishers; Things to be found in vehicles carrying dangerous material; Basic principles in the loading and unloading of dangerous material. National and international regulation of carriage of dangerous goods by railway. General structure of RID

LOJ512 Supply Chain Design 3+0 7.5

Supply Chain Concept and Scope: Definition of Supply Chain and Supply Chain Management, Decision Phases in a Supply Chain, Process View of a Supply Chain; Supply Chain Drivers and Performance Metrics: Drivers of Supply Chain Performance (Facilities, Inventory, Transportation, Information, Sourcing, Pricing), Supply Chain Drivers Related- Metrics, Financial Measures; Network Design in the Supply Chain: Factors Influencing Network Design Decisions, Capacitated Plant Location Models, Gravity Location Models; Aggregate Planning in a Supply Chain: Definition of the Problem, Aggregate Planning Using Linear Programming; Planning Supply and Demand in a Supply Chain: Predictable variability in the Supply Chain, Managing Supply, Managing Demand; Transportation in a Supply Chain: Modes of Transportation and their Performance Characteristics, Design Options for a Transportation Network; Sourcing Decisions in a Supply Chain: The Role of Sourcing, Outsourcing, Third- and Fourth-Party Logistics Providers, Supplier Selection.

LOJ513 Logistics Principles 3+0 7.5

Definition and development of Logistics: Historical Development and Influencing Factors, Logistics Activities: Transportation, Warehouse Management, Stock Management, Customer Service, Demand Forecasting, Handling, Packaging, Marketing Distribution Channels and Logistics: Logistics and Supply Chain Management: Logistics and Information Technologies: Reverse Logistics: Outsourcing in Logistics: Modern Logistics Applications.

LOJ514 Logistics Planning and Modelling 3+0 7.5

Logistics planning and its importance; Operations Research methodology, Modeling with linear programming; Transportation problems and modeling techniques; Finding the basic basic solution to transportation problems; Simplex Method specific to transportation problems; Transportation Simplex Algorithm. Optimization test and finding entering and leaving variables; Transportation Modes and Selection; Facility Location Selection; Determination of fleet types and size; Cargo consolidation and shipping; Basic concepts related to network models; The shortest path problem and the Dijkstra Algorithm; Minimum spanning tree problem; The maximum flow problem; Route determination and models.

LOJ515 Transportation Economics 3+0 7.5

Fundamental Economic Concepts: Necessities, Goods & Services, Production Costs; Introduction to Transportation Economics: Effect of Transportation on Economic Growth; Features of Transportation Industry; Sub-Systems of Transportation; Economic, Social and Political Functions of Transportation; Microeconomic and Macroeconomic Approaches to Transportation Economics; Supply, Demand and Equilibrium in Transportation; Factors Affecting Transportation Demand; Methods of Transportation Demand Forecasting; Internal and External Costs in Transportation Industry; Pricing in Transportation Industry; Transportation Industry and Policies in Developed Countries; Transportation Policies in European Union; Criteria in the Selection Process of Transportation Systems and Analysis of Utility & Cost; Transactions of Transportation Systems with the Environment; Economic Analysis of Transportation Industry in Turkey, Current Conjuncture & Problems.

LOJ516 Corporate Communication In Logistics Businesses 3+0 7.5

The concept, functions and characteristics of cooperation; corporate communication and basic concepts; aim of corporate communication; management of corporate communication: business communication, public relations, organisational communication, management communication; Corporate identity, corporate brand, corporate reputation, corporate image; corporate culture: strategic management in corporate communication; public relations and advertising in corporate communication; social responsibility in corporate communication, sponsorship.

LOJ517 Human Resources Strategies on Logistics Sector 3+0 7.5

Human Resources Management Concept; Transformation from personnel management to human resources management: causes, differences, and strategic evaluation; Systematic and strategic thinking on human resources management; Selection, education, career planning, and performance management of human resources for achieving sustainable success; Strategies for gaining benefit from creative and innovative ideas of human resources, competition conditions and flexible working conditions on the motivation and performance of human resources; Strategies for prevent mobbing and cyberstalking; Future of human resources in the logistics sector; Guided readings on logistics sector's human resources management.

LOJ518 Transportation Systems 3+0 7.5

Basic definitions of transportation systems: Importance of Transportation, Types of Transportation; Transportation with Railway Systems: Components of Railway Systems, Importance of Railway Systems in Logistics; Highway Transport: Basic Concepts, The Importance of Highway for Logistics; Airline Transportation: Major Concepts in Airline Transportation, The Place and Importance of Airway in Freight Transportation; Seaway Transportation: Types of Seaway Transportation, Its Importance in Freight Transportation; Pipeline Transportation; Integration of Transport Types: Current Situation of Transportation Modes in Turkey, Required Steps and Measures for the Integration of the Modes.

LOJ519 Warehouse And Inventory Management 3+0 7.5

Forecasting: Subjective forecasting methods, Objective forecasting methods; Fundamentals of Warehousing; Warehouse Activities; Warehouse Types; Warehouse Equipment and Tools; Warehouse Operations; Performance Measurement in Warehouse; Warehouse Management Software; Inventory Types and Inventory Causes; Inventory Costs; Inventory Counting and Classification Systems; Inventory Models: Basic economic order quantity model, Economic production quantity model; Discount Models: Incremental discount, All unit discount.

LOJ520 Logistics Practices 3+0 7.5

Retail Logistics: Concept, Function And Characteristics; Food Logistics: Concept, Function And Characteristics; Textile And Clothing Logistics: Concept, Function And Properties; Electronic Product Logistics: Concept, Function And Properties; Automotive Logistics: Concept, Function And Characteristics; Project And Construction Logistics: Concept, Operation And Characteristics; Tourism Logistics: Concept, Function And Characteristics; Fair And Event Logistics: Concept, Function And Features; Medicine And Hospital Logistics: Concept, Function And Characteristics; Logistics Of Waste And Recycling: Concept, Function And Properties; Animal Logistics: Concept, Function And Characteristics; Rescue And Disaster Logistics: Concept, Function And Characteristics; Knowledge Logistics: Concept, Function And Features; Military Logistics: Concept, Operation And Characteristics.

LOJ601 Logistics Planning and Modelling 3+0 7.5

MAT502 Analysis 3+0 7.5

Tensor Algebra; Differential Forms; Exterior Derivative and Its Properties; Fields; Orientation; Volume Element; Poincare Lemma; Singular Cubes; Stokes Theorems on Open Sets; Manifolds; Manifolds With Boundary; Differentiable Mappings; Tangent and Cotangent Spaces; Differential Forms and Fields on Manifolds; Stokes Theorem on Manifolds; Classical Theorems of Green; Gauss and Stokes.

MAT503 Topology 3+0 7.5

Topological Spaces; Basic Concepts; Neighborhoods; Base and Sub base; Continuous Functions; Product Spaces; Quotient Spaces; Convergence; Nets and Filters; Separation and Countability; Separation Axioms; Countability Properties; Compact

Integral Equations: Method of sequential approximations, Fredholm's theorems, Integral equations with the Hermitian kernel, Hilbert-Schmidt theorem and its consequences; Boundary-Value Problems for the Equations of Elliptical Type: Eigenvalue problems, Sturm-Liouville problem, Harmonic functions, Fourier's method for eigenvalue problems, Newton potential, Boundary-value problems for the equations of Laplace and Poisson in the space, Green's function, Dirichlet problem, Boundary-value problems from Laplace's equation on the plane; The Mixed Problem: Fourier's method, Mixed problem for the hyperbolic equation, Mixed problem for the parabolic equation.

MAT527 Numerical Solutions of Partial Differential Equations 3+0 7.5

Basic Concepts of Finite Difference Method; Finite Difference Methods for Parabolic Partial Differential Equations; Convergence, Stability and Consistency; Finite Difference Methods for Elliptic Partial Differential Equations; Finite Difference Methods for Hyperbolic Partial Differential Equations.

MAT528 Optimization Methods I 3+0 7.5

Unconstrained Optimization: Functions of One Variable, Functions of Several Variables, Positive and Negative Definite Matrices and Optimization, Coercive Functions and Global Minimizers, Eigenvalues and Positive Definite Matrices; Convex Sets and Convex Functions: Convex Sets, Convex Functions, Convexity and the Arithmetic-Geometric Mean Inequality, Unconstrained Geometric Programming, Convexity and Other Inequalities; Iterative Methods for Unconstrained Optimization: Newton's Method, Gradient Method, Broyden's Method, Secant Methods for Minimization; Convex Programming and the Karush-Kuhn-Tucker Conditions: Separation and Support Theorems for Convex Sets, Convex Programming and the Karush-Kuhn-Tucker Theorem, Karush-Kuhn-Tucker Theorem and Constrained Geometric Programming, Dual Convex Programming.

MAT529 Optimization Methods II 3+0 7.5

Convex Programming and the Karush-Kuhn-Tucker Conditions; Separation and Support Theorems for Convex Sets, Convex Programming: Karush-Kuhn-Tucker Theorem, Karush-Kuhn-Tucker Theorem and Constrained Geometric Programming, Dual Convex Programming, Lagrangian Duality and Saddle Point Optimality Conditions; The Lagrangian Dual Problem, Duality Theorems and Saddle Point optimality Conditions, Properties of the Dual Functions, Formulating and the Solving of the Dual Problem, Getting the Primal Solution, Linear and Quadratic Programs, Least Squares Optimization; Least Squares Fit, Subspaces and Projections, Minimum Norm Solutions of Undetermined Linear Systems; Generalized Inner Products and Norms: The Portfolio Problem, Penalty Methods; Penalty Functions, The Penalty Method, Applications of the Penalty Function Method to Convex Programs.

MAT530 Introduction to the Theory of Nonlinear Optimization 3+0 7.5

Existence Theorems for Minimal Points; Problem Formulation, Existence Theorems, Set of Minimal Points, Generalized Derivatives; Directional Derivative, Gateaux and Frechet Derivatives, Subdifferential, Quasidifferential, Clarke Derivative, Tangent Cones; Definition and Properties, Optimality Conditions, A Lyusternik Theorem, Generalized Lagrange Multiplier Rule; Problem Formulation, Necessary Optimality Conditions, Sufficient Optimality Conditions.

MAT531 Tensor Analysis 3+0 7.5

Tensor fields, tensor product, some specific tensor fields, Tensor at a point, Components of tensor, Contraction, Tensor derivation, Metric tensor, Levi-Civita connection, Curvature tensor, Ricci curvature, Bianchi identities, Some basic differential operators.

MAT532 Functional Analysis 3+0 7.5

Normed Vector Spaces; Examples of Normed Spaces; Product of Normed Spaces; Continuous Functions Between Normed Spaces; Sequences and Completeness; Finite Dimensional Vector Spaces; Banach Spaces; Contraction Mapping Theorem; Integral and Differential Equations; Linear Mappings; Bounded Operators; The Space of Bounded Linear Transformations; Open Mapping Theorem; Closed Graph Theorem; Hahn-Banach Theorem; Inner Product Spaces; Hilbert Spaces; Self-Adjoint Bounded Linear Operators; Compact Operators; Self-Adjoint Compact Operators; Orthonormal Sets; Gram-Schmidt Orthogonalization Process.

MAT533 Differentiable Manifolds 3+0 7.5

Definition of Manifolds and Examples: Atlas; Smooth Structure; Manifolds As Subsets of R^n ; Grassmannian Manifolds and Projective Spaces; Topological Properties of Manifolds. Smooth Mappings: Smooth Mapping between Manifolds; Diffeomorphisms; Partition of Unity. Tangent Vectors: Tangent Vectors on a Manifold; Differential of Maps between Manifolds; Expressing Tangent Vectors in Local Coordinates; Tangent Vectors of Curves. Vector Fields: Vector Bundles; Vector Fields. 1-Forms: Cotangent Bundles; 1-Forms; Push-Forward and Pull-Back of Vector Fields and 1-Forms.

MAT534 Selected Topics in Algebra 3+0 7.5

The Algebra Concept: Definitions and Examples; Structure Constants; Division Algebras; Normed Algebras; Cayley-Dickson Process; Associator; Alternativity; Hurwitz Theorem; Artin Theorem; Quaternion: Geometric interpretations and applications; Octonions: Moufang identities; Double; Triple and Quadruple Vector Cross Products; Characterization of Double Vector Cross Products and Determination of the Dimension in Which They Exist.

of Modules; Free Modules; Large and Small Modules; Injective Modules: Injective Hulls; Projective Modules: Projective covers; Baer's Criteria; Artinian Modules (Rings); Noetherian Modules (Rings).

MAT552 Introduction to Mathematical Elasticity 3+0 7.5

Introduction: Mathematical Preliminaries, Cartesian tensors, Operational tensors; Stress and Equilibrium: State of Stress, Equations of equilibrium, Principal stress, Properties and special states of stress; Deformations: Strain, Physical interpretation of strain tensor, Principal strains, Volume and shape changes, Compatibility; Material Behaviour; Formulation, Uniqueness, Solution strategies; Extension, Bending, Torsion; Two-dimensional Elasticity: Plane Stress Equations, Plain strain equations.

MAT553 Fuzzy Set Theory 3+0 7.5

Fuzzy Sets: The concept of fuzzy set; Operations of Fuzzy Set: Complement, Inclusion, Intersection, Union and other operations in a fuzzy set; Fuzzy Relation: Relation, Properties of relation, Definition of fuzzy relation and extension of fuzzy sets; Fuzzy Numbers: Definition of fuzzy numbers, Characterization theorems for fuzzy numbers, L-R fuzzy numbers, Fuzzy Algebraic Operations: Zadeh's extension principle, The sum and scalar multiplication, multiplying two fuzzy numbers, Difference of fuzzy numbers; Fuzzy Inference: Linguistic variables, The interpolation feature of fuzzy inference systems.

MAT554 Integral Transforms and Their Application 3+0 7.5

Basic Concepts and Definitions; Fourier Transforms: Definition basic properties of the transform, Applications of transform, Fourier cosine and sine transforms with examples, Multiple Fourier transform; Laplace Transforms: Definition basic properties of the transform, Applications of the transform, Finite Laplace transforms; Hankel Transforms; Definition basic properties of transform, Applications of transforms; Melin Transforms: Definition of the transform and examples, Basic properties of transform, Applications of transforms; Hilbert and Stieltjes Transforms, Definition basic properties of transforms, Their applications.

MAT555 Introduction to Chaotic Dynamical Systems 3+0 7.5

The Definition and Examples of Dynamical System; Iteration of Functions: Types of orbits; Fixed points, Periodic points, Contraction mapping and the contraction mapping theorem; Period-3 Theorem; Sharkovsky Theorem; Attracting and Repulsive Periodic Points; The Tent Map; The Doubling Map; The Logistic Map; Families of Functions; Bifurcations; Cantor Set; Symbolic Dynamics: The sequence space, The shift map; Chaos: Sensitive dependence on initial conditions, Transitivity, Topological conjugacy; Two Dimensional Chaos: The Henon map, The horseshoe map.

MAT556 Linear Programming 3+0 7.5

Standard Form of Linear Programming Problem; Karush-Kuhn-Tucker Optimality Conditions; Geometry of an Linear Programming Problem: Convex hull, Polytopes and its facets, Edges and vertices, Feasible descent directions, Finding a vertex; Vertex Minimizers: Finding a vertex minimizer, Uniqueness; Simplex Method: Basic and nonbasic variables, Simplex algorithm; Primal and Dual Solutions; Introduction to Interior Point Methods.

MAT558 Vector Analysis 3+0 7.5

Curves; Multi-Variable Functions: The derivative and Jacobian matrix; Multiple Integration; Surfaces: Parametric surfaces, Curves on surface and surface area, Orientation; Vector Fields: Integral curve, Gradient, Divergence, Rotational; Line Integrals of Scalar Valued Functions; Line Integrals of Vector Fields; Green's Theorem; Surface Integrals: Surface integral of scalar valued functions, Integral of vector fields on surfaces; Stokes' Theorem and Divergence Theorem; Differential Forms on R^n : Basic properties of the forms, Exterior derivative, Basic properties of the induced mappings; Integrals of Differential Forms: Stokes' Theorem.

MAT592 Seminar 3+0 7.5

MAT601 Stability of Linear Systems 3+0 7.5

Linear Systems; Stability of Matrices and Polynomials; Uncertain Systems; Robust Stability; The Value Set Approach; Zero Exclusion Principle; Kharitonov's Theory; Stability Bounds; Stability of Polytopes of Polynomials; Polytopes of Polynomials; Stability of Convex Combinations; Edge Theorems; Convex Directions: Definitions; Rantzer's Growth Condition; Schur Stability; Schur Stability of Interval Polynomials and Matrices; Weak and Strong Kharitonov Regions; Multi linear Structures and Mapping Theorem; Spherical Polynomial Families.

MAT602 Stability of Nonlinear Dynamical Systems 3+0 7.5

Nonlinear Differential Equations; Definitions; Existence and Uniqueness; Geometric Interpretation; Stability: Critical Points and Attractors; Stability and Asymptotic Stability; Linearization and Lyapunov Theory; Stability of Periodic Solutions; Stability of Two-Dimensional Autonomous Systems; Applications; Stability Analysis by the Direct Methods; Lyapunov Functions; Rantzer's Theorem; Bifurcation and Chaos; Hopf Bifurcation; Lorentz Equation; Chaos and Chaotic Maps.

- MAT603 Convex Analysis 3+0 7.5**
 Lower and Upper Semi Continuous Functions; Ekeland's Variational Principle; Convex Sets and Functions; Continuity of Convex Functions; Yosida-Moreau's Approximation; Separation Theorems; Conjugate of the Convex Functions; Properties; Young-Fenchel's Inequality; Dual Problem; Fenchel's Theorem. Directional Derivability of Convex Functions; The Sub differential Concept; Subdifferentiability of Convex Functions; Sub differential Calculus; Tangent and Normal Cones of Convex Sets; Minimization of Convex Functions; Properties of Convex Set-Valued Maps.
- MAT604 Topological Vector Spaces 3+0 7.5**
 Topological Vector Spaces; Convex; Balanced; Absorbing Sets; Neighborhoods of the Zero Vector; Subspaces; Quotient Spaces; Continuous Linear Mappings; Finite Dimensional Topological Vector Spaces; Normability of a Topological Vector Spaces; Locally Convex Topological Vector Spaces; Semi Norms; Locally Convex Topological Vector Spaces Generated by Semi Norms; Barrel Spaces; Convex; Compact Spaces.
- MAT605 Differential Inclusions Theory 3+0 7.5**
 Set-Valued Maps; Differential Inclusion Concept; Existence of Cauchy Problem Solutions of Differential Inclusion With Convex Valued Right Hand Side Set-Valued Map; Closedness and Initial Condition Dependence of Solutions Set; Local Properties of Solutions; Reachable Sets and Integral Funnel of Differential Inclusions; Filippov's Theorem. Existence of Cauchy Problem Solutions of Differential Inclusion With Nonconvex Valued Right Hand Side Set-Valued Map, Relaxation Theorem; R-Solution Concept; Approximate Computation of Reachable Sets; Weakly and Strongly Invariant Sets With Respect to Differential Inclusions.
- MAT606 Riemannian Geometry 3+0 7.5**
 Differentiable manifolds: Differentiable manifold, Differentiable functions, Tangent space, Immersions and Imbeddings, Vector fields, Brackets, Tensors, Orientation; Riemannian Manifolds: Riemannian metric, Riemannian manifold, Affin connection, Riemannian connection, Geodesics, Convex neighborhoods; Curvature: Curvature, Sectional curvature, Ricci curvature, Scalar curvature, Tensors on Riemannian manifolds, Jacobi fields, Hopf-Rinow Theorem; Spaces of constant curvature.
- MAT607 Topological Groups 3+0 7.5**
 Topological Groups; Neighborhoods Systems of a Point in a Topological Groups; Isomorphism and Local Isomorphism; Subgroups; Quotient Groups; Products of Topological Groups; Continuous Homeomorphisms; Direct Product of Topological Groups; Connected and Disconnected Groups; Uniform Structures on Topological Groups; Complete Groups; Completions of a Topological Group; Compactness in Topological Groups; Locally Compact Groups; Topological Transformations Groups.
- MAT608 Analysis on Fractals 3+0 7.5**
 Geometry of Self-Similar Sets; Constructions of Self-Similar Sets; Shift Space and Self-Similar Sets; Self-Similar Structure; Self-Similar Measure; Dimension of Self-Similar Sets; Laplacians on Fractal Sets; Dirichlet Forms and Laplacians on a Finite Sets; Sequence of Discrete Laplacians; Constructions of Laplacians on P.C.F. Self-Similar Structures; Harmonic Structures; Harmonic Functions; Dirichlet Forms on P.C.F. Self-Similar Sets; Green's Function; Green's Operator.
- MAT609 Knot Theory 3+0 7.5**
 Basic Definitions and Notations; Knot in the Plane; Jordan Curve Theorem and Chord Theorem; Torus Knots; Solid Torus; Connected Sums and the Knot Group; Seifert Surfaces; Cyclic Coverings and Torsion Invariants; Knots and Surgery in; S^3 Infinite Cyclic Coverings and the Alexander Invariants; Homomorphisms Sets and Quandle, Invariants Obtained From Quandle; Conway and Jones Polynomials; Knots With 2-Bridges and Insufficiency of Jones Polynomials; Mutants; Generalized Polynomials; Coefficients of Conway Polynomials and Its Relation With Alexander Polynomial.
- MAT610 Basic Topics of the Set Valued Analysis 3+0 7.5**
 Set-Valued Map Concept; Upper and Lower Semi continuity of Set-Valued Maps; Selectors of Set-Valued Maps; Michael's Theorem; Steiner Point; Lipschitz Selectors; Marginal Functions and Properties; Parameterization of Set-Valued Maps; Caratheodory Parameterization; Contingent Cones; Derivative Sets of Set-Valued Maps; Fixed and Equilibrium Points of Set-Valued Maps; Kakutani Theorem; Integral of Set-Valued Maps; Bang-Bang Principle.
- MAT611 Introduction to Gauge Theory 3+0 7.5**
 Principal Bundles; Transition Functions; Bundle Maps and Equivalence; Principal G-Bundles Over Spheres; Hopf Bundle; Vector Valued 1-Forms; Connections Over Vector Bundle; Connections Over Principal Bundles and Equivalence; Curvature and Gauge Fields; The Yang-Mills Functional; Hodge Dual For 2-Forms In Dimension Four; The Modular Space; Matter Fields; Associated Fiber Bundles; Matter Fields and their C Variant Derivatives; Seiberg-Witten Equations.
- MAT612 Fractals and Chaos 3+0 7.5**

Iterated Function Systems; Fractal Dimension; Hausdorff Dimension; The Notion of Chaos; Chaos on Fractals; Symbolic Dynamics; Logistic Chaos And Bifurcation; Henon - Lorenz Exemples; Lyapunov Exponentiels.

MAT613 Clifford Algebras 3+0 7.5
Symmetric Bi-Linear Forms; Quadratic Forms; Tensor Product of Vector Spaces; Tensor Algebra; Tensor Product of Algebras; Definitions of The Clifford Algebra And Its Universal Property; Other Properties of Clifford Algebras; The Involution And The Anti-Involution of Clifford Algebra; Odd And Even Parts of Clifford Algebra; Non-Degenerate Real Clifford Algebras And Their Classifications; Degenerate Real Clifford Algebras; Representations of Real Clifford Algebras; Complex Clifford Algebras And Their Representations; Pin And Spin Groups; Spinors; Triality.

MAT614 Continuous Modules 3+0 7.5
Injectivity and Related Concepts: A-injective Modules; Quasi-injective Modules, Exchange and Cancellation Properties, Decomposition Theorems, Quasi-Continuous Modules: Basic Properties, Direct Sums of Quasi-Continuous Modules, Decompositions of Quasi-Continuous Modules; Internal Cancellation Property, Quasi-Continuity Versus Quasi-injectivity; Continuous Modules: Endomorphism Modules; Endomorphism Rings, Continuous Modules, The Exchange Property.

MAT615 Compact Operators 3+0 7.5
Compact Operators and their General Properties; The Theory of Riesz-Schauder for Compact Operators; Spectral Properties of Compact Operators; Compact Self-Adjoin Operators; Fredholm Andvolterna Integral Equations; Differential Equations; Eigen Value Problems and Green?s Functions.

MAT616 Fiber Bundles 3+0 7.5
Manifolds; Local Triviality; Vector Bundles; Transition Maps; Operations On Vector Bundles; Sub Bundles; Sections of Vector Bundles; Maps Between Vector Bundles; Metric Structures on Vector Bundles; Frame Bundles; Normal Bundles; Covariant Derivative; Curvature Tensor; Lie Groups; Principal Fiber Bundles; Structure Groups; Grassman Bundles; Universal Bundle; Associated Vector Bundles; Vector Valued Forms; Connection; Connection Forms on a Principal Bundle; Curvature Form; Spinor Bundles.

MAT619 Vector Optimization I 3+0 7.5
Convex Analysis: Linear spaces, partially order linear spaces, topological linear spaces and convex sets, Convex maps and differentiability, Some fundamental theorems: Zorn?s Lemma, Hahn Banach theorem, separation theorems, Contingent cones and Lyusternik theorem; Theory of Vector Optimization: Optimality notions, Scalarization, Existence theorems, Generalized Lagrange multiplier rule.

MAT620 Vector Optimization II 3+0 7.5
Duality: A general duality principle, Duality theorems for abstract optimization problems, Specialization to abstract linear optimization problems; Vector Approximation: Simultaneous approximation, Generalized Kolmogorov condition, Nonlinear Chebyshev vector approximation, Linear Chebyshev vector approximation, Duality results; Cotingent Epiderivatives: Cotingent derivatives and cotingent epiderivatives, Properties of cotingent epiderivatives, Cotingent epiderivatives of real valued functions, Generalized cotingent epiderivatives; Subdifferentials: Concept of subdifferentials, Properties of subdifferentials, Weak subdifferentials; Optimality Conditions: Optimality conditions with cotingent epiderivatives, Optimality conditions with subgradients, Generalized Lagrange multiplier rule.

MAT621 Metric Geometry 3+0 7.5
Metric Spaces, Length Spaces, Spaces of Bounded Curvature, Smooth Length Structures, Curvature of Riemannian Metrics, Spaces of Metric Spaces.

MAT622 Characteristic Classes 3+0 7.5
Vector Bundles; Stiefel-Whitney Classes; Stiefel-Whitney Numbers; Grassman Manifolds and Universal Bundles; Cohomology Ring of Grassman Manifolds; Construction of Stiefel-Whitney Classes; Oriented Bundles and the Guler Class; Thom Isomorphism Theorem; Complex Vector Buudles; Chern Classes; Pontrjagin Classes; Chern Numbers; Pontrjagin Numbers.

MAT623 Bochner Technique on Riemannian Manifolds 3+0 7.5
Gradient of a Function; Divergence of a Vector Field and of a $(1,s)$ - Tensor Field; Hessian and Laplacian Operators; Killing Vector Fields; Conformal Killing Vector Fields; Harmonic Vector Fields; Bochner Formula for Any Vector Field; Weitzenböck Formula for Amy Function and its Applications to Eigenfunctions of Laplace Operator.

MAT624 Stability of Switched Linear Systems 3+0 7.5
Switched Dynamical Systems: Switching signals, Switching sequences, Solutions of switched linear systems; Stability, Asymptotic stability, Exponential stability, Lyapunov theorems; Common Lyapunov Functions: Common quadratic lyapunov functions, Switched quadratic lyapunov functions, Piecewise quadratic lyapunov functions, Multiple lyapunov

MAT633 **Measure Theory and Integral** **3+0 7.5**
Measurable Space and Measure Space; Borel Measurable Sets; Regular and Radon Measure; The Jordan and Hahn Decompositions of Measure; The Saks, Alexandrov and Caratheodory Theorems; Measurable Functions; Egorov and Luzin Theorems; Integral of Simple Functions and Integral of Measurable Non-Negative Valued Functions; Bochner Integral; The Lebesgue and Radon ? Nikodym Theorems,;The Banach space , ; Riesz representation of continuous functionals defined on the space of continuous functions; Topological conjugate of the space of continuous functions.

MAT634 **Compactness Theorems on Riemannian Manifolds** **3+0 7.5**
Metric Structure on Riemannian Manifolds; Riemannian Metric Tensor; Length of a Curve; Distance between Two Points; Geodesics; Completeness of a Riemannian Manifold with Respect to a Metric; Definition of the Segment Between Two Points; Calculus of Variations and Compactness Theorems on Riemannian Manifolds; Laplace Comparison Theorems and Compactness Theorems on Riemannian Manifolds.

MAT635 **Graph Theory** **3+0 7.5**
Graphs: Basic definitions, Trees, Counting trees and Cayley's Theorem; Planarity: Planar graphs, Euler Formula, Kuratowski Theorem, Graphs and planarity; Colouring Graphs: Colour-ing vertices, Brooks Theorem, Chromatic polynomials, The four-colour theorem, Colouring edges; Digraphs: Orientations, Directed Euler trails; Ramsey Theory: The graphical case of Ramsey's Theorem, Bounds on Classical Ramsey numbers, The general case of Ramsey's Theorem; Flows in Networks: Transportation networks and flows, Maximal flows, The max flow min cut theorem and algorithm, Supply and demand problems; Some Graph Algorithms: Data structures, Some graph algorithms.

MAT636 **Asymptotic Solutions of Differential Equations** **3+0 7.5**
Matched Asymptotic Expansions: Outer solution, Boundary layer, Matching, Composite solution, Transcendentally small terms, Interior layers, Corner layers; Multiple Scales Expansions: Regular Expansion, Multiple-scale expansion, Forced motion near resonance, Weakly coupled oscillators, Slowly varying coefficients, Boundary layers; WKB and Related Methods: Turning points, Wave propagation and energy methods, Wave propagation and slender-body approximations, Ray methods.

MAT637 **Fuchsian Groups** **3+0 7.5**
Hyperbolic Geometry: Hyperbolic metric, Geodesics, Isometries, Hyperbolic area and The Gauss-Bonnet Formula; Fuchsian Groups: The $PSL(2,R)$ group, Discrete groups, Algebraic properties of Fuchsian groups; Fundamental Regions: The Dirichlet region, Isometric circles and Ford fundamental region; Geometry of Fuchsian Groups: Geometrically finite Fuchsian groups, Co-compact Fuchsian groups.

MAT639 **Differential Topology** **3+0 7.5**
Topological Manifolds, Differentiable Manifolds, Manifolds with boundary, Vector bundles, Fibre bundles, Sard's Theorem, Imbedding theorems, Homotopy and Stability, Dynamical systems, Isotopies, Transversality, Tubular Neighborhoods, Degree of a map, Euler Character-istic, Intersection number, Winding number, Lefschetz fixed point theorem, Poincare-hopf Theorem, Morse functions, Regular levels, Connected sum of manifolds, Classification of surfaces.

MAT641 **Asymptotic Approximation of Integrals** **3+0 7.5**
Properties of Mellin Transforms: Works of Handelsman and Lew, Explicit error terms, A double integral; Distributional Approach: The Stieltjes transform, An oscillatory case, Hilbert transform, Laplace and Fourier transforms near the origin, Fractional integrals, Method of regularization; Uniform Asymptotic Expansions: Saddle point near a pole, Saddle point near an endpoint, Coalescing saddle point, Laguerre polynomials, Legendre function.

MAT643 **Introduction to the Theory of Elastic Waves** **3+0 7.5**
Fundamental Waves of Elastodynamics and Their Representations: Fundamental body waves, Time harmonic body waves, Solution of boundary-initial value problems, Cauchy problems; Reflection and Refraction of Time Harmonic Waves at an Interface: Reflection of P and SV waves, Reflection of SH waves; Time Harmonic Waves in Elastic Waveguides: Waves in infinite plate in plane strain, Mixed conditions on plate faces, Love waves; Transient Waves in an Elastic Half Space: Plane strain problems, Lamb's problem, Axially symmetric problems.

MAT645 **Fractional Differential Equations I** **3+0 7.5**
Special Functions of the Fractional Calculus: Definition of Gamma, Beta, Mittag-Leffler and Wright functions and some properties; Fractional Derivatives Operator: Grünwald-Letnikov, Riemann-Liouville, Caputo and Riesz fractional derivative operators and some properties; Solutions of Fractional Differential Equations: Laplace, Fourier and Mellin transform methods for the solutions of fractional differential equations.

MAT646 **Fractional Differential Equations II** **3+0 7.5**

Resources; Ecological Infrastructure of Some Countries; Pollution and Environmental Health; Protection of Fauna and Flora; The Difference Between Natural and Artificial Planning; Plants for Determining Environmental Quality; The Methods for Plants Protection.

MİM509 Legal Aspects of Urban Planning 3+0 7.5

Design and Realization Processes of Urban Plans; Laws and Regulations Concerned in the Process of Urban Design; Critical Review of Laws and Regulations in Effect; New Approaches to Urban Design Process; Environment Responsive Urban Design.

MİM511 Building Material Failures 3+0 7.5

Definition of Material Damage; Main Causes of Building Material Damage; External Causes of Damage (Climatic, Biological, Causes And Natural Disasters); Internal Causes of Damage And Man-Made Causes of Damage; Building Material Damages And Classification; Corrosion of Metals And Alloys Such As Iron, Copper And Lead; Degradation of Organic And Polymeric Materials Such As Wood, Paper, Leather, Wool, Cotton And Synthetics; Degradation of Inorganic Materials Such As Natural Stone, Brick, Glass, Concrete, Reinforced Concrete And Plaster.

MİM512 Administrative and Legal Aspects of Planning 3+0 7.5

Centralization and Decentralization : Definitions; Advantages and Disadvantages; Comparison; Local Governments in Turkey; Municipalities and its Administrative Units , Tasks, Problems and its Reorganization; Administrative and Implementation problems; Regulations and Problems of Urban Planning.

MİM513 Computer Programming and Introduction to Architectural Practices 3+0 7.5

Computer Graphics Design and Its Terms; Operating Systems; Modeling; Animation; Different Techniques of Virtual Realty; Artificial Intelligent- Expert Systems; Multimedia; Analysis of Different Computer Program; PASCAL Programming Language and Architectural Practices.

MİM514 User Interface Design 3+0 7.5

Introduction to GUI, History of Human- Computer Interaction; Interface Design and Methodologies; Computer Practices; The Principles of Interactive Communications Deal With Computer Technology and Interface Design; Techniques and Program.

MİM515 Solar Energy in Architecture 3+0 7.5

Historical Development of the Relation Between Solar Energy and Building Design; Why Solar Architecture?; The Role of Sun; In the Space Comfort; The Possible Active and Passive Uses of Solar Energy; The Basic Elements and the History of Passive Use; Solar Windows; Solar Walls; Green Houses; The Active Use of Solar Energy; Solar Collectors; Photovoltaic Modules; The History; Development; Construction; Specialties of Pvs and their Use in Architecture and Examples.

MİM516 Building Shell Design in Energy Efficient Buildings 3+0 7.5

The Reasons of Energy Efficiency; Why Renewable Energy Sources; The Energy Efficiency Period; The Design Parameters of Artificial Environment; Place; Orientation; Form; Thermo-Physical Properties; Wall Constructions in the Aspect of Energy Efficiency and Climatic Comfort: Heat Isolation; Storing Heat; Heat Transfer on the Wall Construction; Convection; Conduction; Radiation; Passive Buildings; Low-Energy Building; Zero-Energy Building; Plus-Energy Building Concepts; The Design Principles of Energy Efficient Buildings and the Trend in 21st Century.

MİM517 Architectural Precast 3+0 7.5

Precast Concrete and Advantages of Precast Concrete; Design Concept in Terms of Economy and Usage; Design Evaluations; Product Development; Shape; Form and Dimensions; Color and Texture; Weathering; Structural Design; Hoisting and Transportation; Tolerance; Jointing; Detailing; Application Drawings; Surfaces; Weathering Details; Fixings; Jointing; Joints.

MİM518 Structure in Architecture 3+0 7.5

Structure and Architecture; Structural Design in Architecture; Relationship Between Architectural and Structural Design; Steel Structures; Selection Criteria; Steel Components; Structural Forms; Reinforced Concrete Structures; Selection Criteria; Concrete Technology; Structural Forms; Masonry; Structures; Timber Structures; Selection Criteria; Timber Components; Structural Forms.

MİM519 Housing Architecture 3+0 7.5

Type and Typology Concepts; Development of Housing Typology in Historical Perspective; Shelter and House Concept; Effects of the Industrial Revolution on Housing Planning; Housing Spaces in Utopias; Approaches to Housing in the Understanding of Modernism; Development of the House in Turkey and the World; The Role and the Needs of the Occupant

in Housing Planning; Traditional House and the Turkish House; The Turkish House; Planning Principles; Rooms; Facade Elements; Styles, Interpretation of the Turkish House in Today's Conditions.

MİM520 Architectural Steel 3+0 7.5

Structural Steel in Architecture; Steel Production and Steel Products; Development in Steel Structures; High-Rise Steel Structures; Design and Application Criteria for Steel Structures; Basic Planning Problems; Columns; Wind Bracings; Flooring Structures and Applications; Constructional Elements; External Walls; Roofs; Fire Prevention; Corrosion and Prevention.

MİM521 Environmental Design 3+0 7.5

Environmental Design; Perceiving and Environmental Perception; Theories and Researches; Environmental Cognition and Perception; Theories; Researches; Design and Cognitive Studies; Environmental Behavior; Behavioral Settings; Patterns of Act; Fit and Fitness; Researches; Behavior and Design; Space; Personal Space; Proximity Theory; Researches; Space and Design; Proximity; Intimate; Theories; Territoriality; Defensible Space; Intimate and Design; Environmental Stress; Theoretical Approach; Ecological Fitness.

MİM523 Contemporary Interpretation of Traditional Turkish Houses 3+0 7.5

Primitive Living Spaces, Sheltering Conception of Turkish Society, Differences Between Nomad Period and Settled Period, Rural and Urban Houses, Turkish House Space Configuration, Turkish House and Regional Diversity, Plan, Function, Elevation Formations, Material, and Decorate about Turkish House; Analysing a Turkish House in Contemporary Life.

MİM525 Culture, House and Identity 3+0 7.5

Sheltering; Housing and Mass Housing Concept; Shaping Development from Utopia to Present; The Relationship between Culture; Identity Concept and Housing Space; Approaches for Environmental Behavior on House Based Studies; Cultural Factors Affecting the Process of Shaping Housing Environment in Different Levels; Culture; House and Identity Components in the Settlements in different Cultures.

MİM526 Computer Aided Architectural Analyses Techniques 3+0 7.5

Information Systems; Spatial Information Techniques; Computer Aided Design Applications; 3D Modeling; Computer Aided Architectural Analyses Techniques; Preparation Base Maps with High Resolution Satellite Images; Visualization Techniques; Topographical Analyses; Overlay; Interpretation Techniques.

MİM528 Using of Space around House and House Environment 3+0 7.5

The Relationship between Environment, House and Mass Housing; Shaping Housing Area; Design of Housing Indoor and Outdoor Space: Micro climatic components, Physiological Environment components, Indoor and Outdoor Landscape, Livable Housing Environment, User needs; Quality in Housing Environment, Usability of Housing Environment; Post Occupancy Evaluation; Studying and Evaluation of the Alternative Housing Layout according to Environment; House and User.

MİM529 Urban Space and Handicapped People 3+0 7.5

Planning Approaches for Healthy Cities; Features of the City; Urban Rights and Dependency; Handicapped People in the City; Urban Environment and Handicapped People; Accessibility in Urban Space; Urban Design for Everyone; Applications, Problems and Solutions; Handicapped Persons and Laws.

MİM530 National and International Aspects of Urban Conservation and Renewal 3+0 7.5

The Reasons for Conservation of Historical Environment and Renewal; Historical Development of Conservation and Renewal Awareness in National and International Levels; Context and Concept of Conservation of Historical Environment and Renewal in National and International Level; Actions and Fundamentals of Conservation of Historical Environment and Renewal; Legislative Aspects of Conservation of Historical Environment and Renewal; The Tasks and Authorizations of the Conservation and Renewal Agencies.

MİM531 Architectural Design Methods 3+0 7.5

Architectural Design and Process: Creativity, Analysis, Concept, Definition of the problem; Logic of Design and Methods: The role of perception, The originality of design and expression; The Approaches in Architectural Design; Participatory and Sustainability Design: The problem of place in architectural design, Contemporary Concepts and Evaluation of Environmental Problems: Cultural and historical design.

MİM532 Urban Regeneration 3+0 7.5

National and International Scope of Urban Regeneration; Urban Development Processes and Regeneration Practices; Historical Formation and Structure of Urban Space; Social and Demographic Development Processes in Urban Spaces;

Economic Development Processes; Physical Development Processes in Urban Spaces; Formation of the Urban Culture and Its Effect on Urban Space

MİM533 Methodologies in Architectural Design Research 3+0 7.5

Methodologies In Architectural Design Research, Description of the Concept of Research, Various Approaches, Researches and Techniques; Research Problems in Architectural Design: Description, Planning, Content and procedures, Stating hypothesis, Strategies, Methods and techniques of data gathering, Data analyzing, Hypothesis testing; Tools for Environment-Behaviour Research; Problems of Reliability and Validity in Research, Qualitative and Quantitative Methods; Communicating the Research for Scientific References: Techniques of writing scientific documents.

MİM534 Designing of Housing Areas 3+0 7.5

Problems Related to Mass Housing Construction and Alternative Solutions for Design Principles; Housing Problem and Its Indicators; Housing Policy Indicators; Housing Policies and Housing Systems in Turkey; Physical, Natural and Social Environmental Factors Related to the Location and Site Planning of Residential Areas; Residential Densities; Housing Types Environmental Factors in Housing Design. Problems related to Design of Housing Areas in the Modern Age; Analysis and Evaluation of Mass Housing Applications in Turkey and the World.

MİM535 Urban Design Theory 3+0 7.5

Space, Definition of Urban Space and its Content; Elements of the Urban Pattern: Theories, definitions, man and urban space relations; Sensual Evaluation Systems; Visual perception Action Patterns; Urban Space and User Qualities, Characteristics of the Social, Economic and Cultural Structures, Theories of the Urban Space Design: Decision theory, Perception theory, Theories which bring formal approach and evaluation to the space; Sociological Theories and Ecological Design Theories.

MİM536 Rationalism in Architecture 3+0 7.5

Concept of Rationalism; Rational Architecture in the Ancient Egypt, Ancient Greek and Ancient Rome; Rational Architecture in Renaissance; Rationalism and Rational Architecture in the Enlightenment Period; Structural and Functional Rationalism; Rational Architecture in the Early Modern Architecture; Bauhaus and its Rational Sources; Rational Architecture after the World War II; Rationalist Reactions to Rationalism; Alternative Meanings of Contemporary Rationalism: Neo-Rationalism (Post-modern rationalism), Surrationalism; Rationalism in Turkish Architecture.

MİM541 Architectural Design Studio I 2+4 7.5

Architectural Design Education: Architectural design processes, Architectural design methods; Current Aspects of Architectural Design: Research on global architecture and regional and local architecture, Data collection and analysis, Developing projects as a solution; Responsibility in Architecture; Key Points in Architectural Design: Function, Firmness and Aesthetics; Use of Technology in Architectural Design Process.

MİM543 Building Material Experiments 3+0 7.5

Conventional and Composite Building Materials; Natural stone, Brick, Tile, Ceramic, Natural and artificial wood, Plaster, Mortar, Reinforced concrete, Metal, Rubber, Bitumen and polymers; Physical, Chemical and Mechanical Features of Materials; Effects of Atmospheric Factors on Building Materials, Effects of Various Chemicals and Internal and External Factors; Analogue and Digital Test Equipment Used in the Measurements of Damage, Deformation and Physical Changes of Materials; Measurements and Analyses of Changes on Physical, Chemical and Mechanical Features of Materials and Use of Analogue and Digital Test Equipment for the Measurement and Analyses of Apparent or Unapparent Damage and Deformation Mechanisms in Materials.

MİM544 Architectural Design and Criticism 3+0 7.5

Architectural Design and Criticism: Theoretical Framework; the Architect, and Architecture as a Cultural Product; Architectural Criticism and Architectural Agenda; Architectural Criticism in Architectural Design; Architecture and Autonomy; Criticism as a Tool for Architectural Design Research; Criticism in Private and Public Space; Architectural Criticism in Understanding the City; Current Architectural Trends and Architectural Criticism; Mediatization of Architecture; Evaluation of Cultural and Historical Phenomena through Critical Readings.

MİM545 Architecture Sociological Readings 3+0 7.5

Sociological Understanding of Architecture; Sociological Research; Evaluation of the Society from a Historical Perspective; National and International Status of the Architectural Profession; Sociological Components: Historical awareness, Anthropological and critical perspectives; Responsibility Towards Society and the Built Environment; Architecture and the Phenomenon of Society; Ideology and Power Theory; The French Revolution, the Industrial Revolution, Relationship of Capitalist Production with Modernity and Nation-States; Modernist and Postmodernist Sociological Approaches.

MİM546 Readings of Modernity in the Context of Architecture 3+0 7.5

Discipline of Architecture, Historical Definitions and Confines; Pre-Modernism, Late 19th Century Period Characteristics; Introduction to Modernity: Emergence of Modernity and Characteristics of the Period; Modernist Positions: Modernity and avant-Garde; Modernity and Art; Modernity and Architecture (I); Modernity and Architecture (II); Modernity and Architecture (III); Modernity, City and Spaces of Interaction.

MiM547 Architecture Communication 3+0 7.5

Architectural and Interior Design in Organization of Enterprises; Thinking on Architecture, Communication and Organizations and Conceptual Frameworks; Power of Spatial Relationships; Decision Making by Administrators and Architects in Consideration of Strategic Spatial Planning and Business Needs; Field Studies and Examples; Message Given by Successful Spatial Design to Clients and Business Partners; Impact of Communication and Spatial Design on Business Efficiency and Effectiveness.

MiM549 Accessibility 3+0 7.5

Built-up Environment and Users, Mobility and Accessibility: Accessibility of travelling, Pedestrian spaces, Transportation space and vehicles, Accessibility as a Right: International legislation, National legislation, Accessibility of the Built-up Environment: Architectural space, Urban space, Urban landscape, Design and accessibility for everyone, National and international norms and standards, Accessibility practices and problems, Accessibility and legal conditions.

MiM553 Auditorium Acoustics 3+0 7.5

Basic Information of Room Acoustics; Sound Level in Enclosed Spaces; Direct and Reverberant Sound Levels; Early Reflections and Their Effects; Parameters of Room Acoustics; Requirements Related to Parameters; Measurements Related to Parameters; Acoustical Design of Rooms; Determining Dimensions of the Room; Acoustic Defaults and Precautions in Rooms; Designing Interior Surfaces of Rooms and Selection of Materials; Practices of Architectural Acoustics in Sample Projects.

MiM554 Digital Design and Production in Architecture 3+0 7.5

Digital Design Concept: The history and use of computers in architecture, Virtual-Real Real-Virtual Digital Fabrication: The history of digital manufacturing, Additive, Subtractive, Forming; Prototypes: Alpha and beta, Prototypes in architecture; Material: Geometry and dimension of materials, The relation of materials and fabrication; Digital Tectonics in Architecture: Sectioning, Tessellation, Folding, Contouring, Forming, Assembly; Digital Design in Architecture: Parametric, Performative, Interactive; Digital Design and Form: Blob, Metamorphosis, Genetic; Strategies and Tools: Software, Fabrication, Algorithmic design and coding; Rhinoceros and Grasshopper.

MiM555 Immaterial Architecture and its Elements 3+0 7.5

Basic Arguments and Discussions about the Concept of Material; Evolution of the Concepts of Material and Idea Throughout the History; Explanation of Arguments Related to Material and Memory from the Perspective of Bergson's Philosophy of; Arguments and Explanations Related to the Concepts of Material and Immateriality; Concept of Immateriality in Architecture; Immaterial Elements in Architecture; Immaterial Elements in Architecture and Contemporary Information Technology.

MiM557 Design Principles of Room Acoustics 3+0 7.5

Sound Field Differences Between Open and Enclosed Spaces; Sound Level in Enclosed Spaces; Frequency Response; Subjective and Objective Room Acoustics Parameters; Sound Reflective, Diffuser and Absorptive Surfaces; Combined Space; Presence Effect and Practices on Presence Effect; Acoustic Design Principles of Rooms for Speech; Acoustic Design Principles of Rooms for Music; Acoustic Design Principles of Multi-Purposed Rooms; Use of Computer Modeling in Room Acoustics.

MiM559 Noise Control I 3+0 7.5

Basic Principles of Sound; Noise and Noise Sources; Effects of Noise on Human and Community; Noise Control and Basic Principles; Regulations and Standards on Noise Control; Physical Events Related to Sound; Airborne Sound and Structure Borne Sound; Propagation of Sound; Environmental Factors on Propagation of Noise; Sound Reflection and Absorption; Importance of Sound Absorptive Materials on Noise Control; Basic Principles of Sound Transmission; Practices on Sound Transmission Loss Calculations; Sound Level and Sound Insulation Measurements.

MiM560 Noise Control II 3+0 7.5

Sound Transmission and Noise Control; Sound Reduction on Single, Double or Multiple Layered Building Components, Calculations and Applications; Airborne and Structure-Borne Noise Insulation for Building Components; Basics of Vibration Sources in Buildings and Related Precautions; Outdoor Sound Propagation; Noise Barriers and Calculation Techniques; Computer Simulations and Applications Related to Urban and Building Acoustics.

MiM561 Architectural Design Studio I 2+2 7.5

Architectural Design Education: Architectural design processes, Architectural design methods; Current Aspects of Architectural Design: Studies on global architecture, Research on regional subjects, Data collection, Analysis, Developing projects/solutions; Responsibility in Architectural Design; Key Points in Architectural Design: Function, Firmness and Aesthetics; Use of Technology in Architectural Design Process.

MiM562 Architectural Design Studio II 2+2 7.5

Theory and Applications in Architectural Design; Architectural Examples from the Local to the Global; Approaches to Architectural Design: Scientific research, Design methods; Interpretation in Architectural Design; Methods of Using Architectural Technologies; Current Architectural Issues Related to Economic and Environmental Responsibilities in Design.

MiM571 Advanced Human Factors in Aviation 3+0 7.5

MiM573 Design Process Approaches in Intersection of Architecture and Architecture Education 3+0 7.5

MiM592 Seminar 3+0 7.5

MiM601 Architectural Studio Research I 3+0 7.5

In architecture, to bring together different areas in the basic idea of the systematic design; To ensure the cooperation interdiscipliner with exchange and communication with other disciplines; To do research on and develop upon to produce and to win the community the best qualified information that can be transferred to practice.

MiM602 Architectural Studio Research II 3+0 7.5

In the field of architecture to search configuration of to craeate of global warming, climatic changes, technology and scientific approaches; Depending on the research the future of an experimental project preparation, to work and development of innovative works in theoretical and practical architectural design fields by coming together in the interdisciplinary and the experimental environment.

MiM603 Architectural Research Methods 3+0 7.5

Domain of Architectural Research: Systems of Inquiry and Standards of Research Quality, Literature Review, Theory in Relation To Method, Design in Relation To Research; Seven Research Strategies: Interpretive-Historical Research, Qualitative Research, Correlational Research, Experimental and Quasi-Experimental Research, Simulation and Modelling Research, Logical Argumentation, Case Studies and Combined Strategies.

MiM604 Architecture: Art, Science and Technology 3+0 7.5

Architecture: Art, Science and Technology, Design; Interdisciplinarity, Design Process, Built-in Environment, Construction, Anesthesiology, Esthesiology, Live Art Performance, Benefits Of Society/User/Architect, Theory and Applications, Case Study.

MiM605 Sustainable Architecture 3+0 7.5

Principles of Sustainability, Strategic Design, Ecology, Recycled Building Materials, Eco Building Materials, Lowtech Housing, Hightech Housing, Passive and Active Sustainable Design.

MiM606 Urban Space Design Quality 3+0 7.5

The definition of urban space, the analysis of urban space form, the determination of user- urban space relationship, the user needs and requirements for urban space, the definition of quality, relationship between architecture an quality, urban space quality indicators, the analysis of well-done examples urban space.

MiM607 The Tools and Quality Measurement Methods for Design 3+0 7.5

Definition of design, architecture and design, architectural space, theories of perception, spatial perception and comprehension, spatial quality theory, space is associated with quality measurement methods, quantitative and qualitative measurement techniques in architectural design classification, use of quality indicators measurement method, weighting (multiple criteria method) method of valuation, integrated method, examples of quality measuring tools.

MiM613 Civic Space and Buildings 3+0 7.5

Study on the terminology of "Civic space" and "civic buildings"; Case studies on public and civic spaces such as agora, forum, square, place, piazza, public parks, hippodromes or stadiums, and public parks; significant examples of bureaucracy and cultural institutions such as the parliament, justice buildings, university, theatre, opera, concert hall, academies and art buildings; emphasizing on the twentieth century buildings and capitals.

MiM614 Health Impact Assessment of Space 3+0 7.5

The definition of health and well-being, Physical health, Mental health and well-being, Social health and well-being for open space; The typology of open spaces, according to their function and strategic importance; local and neighbourhood differences; parks: private gardens; natural and semi-natural greenspaces; green corridors; play space for children and teenagers; amenity greenspace; and, other functional greenspaces.

MiM615 Spatial Relationships and Architecture 3+0 7.5

Evaluation Physical Environment and Place: Interdisciplinary different approaches and different readings, Historical and cultural continuity concepts and contributions of historical process to spatial reading, Requirements of multi-aspect readings of spatial relationship; Spatial Relationships and Spatial Continuity: Different dimensions of spatial relationships, Concepts of spatial continuity and interface on different scales, All interfaces from scale of the city to the interior spaces as a place; Importance of Spatial Continuity and Concept of Integrated Design: Use of visual materials, Case studies with students.

MiM616 Boundaries of the House and Modernity 3+0 7.5

Home, House, Housing and Dwelling: Forces determining the house form: Physical Forces, Social Forces; House and its environment; Boundary and the House, Inside- Outside, Inside-inside relationships; Conditions of Modernity and the Change: House and its changing boundaries in first half of the 20th century, Analysis of the houses from Turkey and abroad.

MiM617 Architecture and the Morphological Study 3+0 7.5

The three existential world centers: SUB, OBJ, SEM, A model of fundamental triads, The fundamental triad of SUB, OBJ, SEM, Whitehead's view of the world as system of societies, The structural principle of the Gestalt method, Morphology: a cognitive approach to the general study of pattern, Goethe's morphology, The Kulturmorphologie movement, Cultural pattern stability, transmission, synchrony and diachrony

MiM618 History and Criticism of Contemporary Architecture 3+0 7.5

Modern Architecture I; Modern Architecture II; Modern City I; Modern City II; Postmodern Culture and Architecture I; Postmodern Culture and Architecture II; Trends in Contemporary Architecture I; Trends in Contemporary Architecture II; Trends in Contemporary Architecture III; Trends in Contemporary Architecture and Criticism IV; Effects of Contemporary Architecture on Turkish Architecture I; Effects of Contemporary Architecture on Turkish Architecture II.

MiM619 Contemporary PProjects in Sustainable 3+0 7.5

Analysis of Contemporary Projects on Sustainable Architecture; Definition and Ideas: Ecovillage, Architectural design approaches, Concept; Sustainable Development: Definition, Environmental issues and sustainability, Economic issues and sustainability, Social issues and sustainability; Technology, Project and Application; Research Fields: Sustainability, Sustainable architecture, Logic of investment on sustainability; National and Global Design Policies; National and International Network for Sustainability.

MiM620 Universal Design 3+0 7.5

Introduction to Universal Design; Design and Users; Universal Design/Design for All; Users of Universal Design: People with disabilities, People without disabilities, Elderly; Barriers and Universal Design; Principles of Universal Design; Accessibility as a Right; Accessibility to Products and Services; Accessibility to Built Environment: Indoor public facilities, Outdoor public facilities; Best Practices and Universal Design Guide; Policies Supporting Universal Design.

MiM621 Architecture and Housing 3+0 7.5

Housing: Definition, Concept, Architectural design process, Role of the architect, Design methodology; Housing Typologies: Single family houses, Detached type, Semi-detached type, Row houses, Terrace houses, Apartments: definitions, node apartments, star apartments, block apartments; Mass Housing: Definition, Housing for the elderly and disabled, Lofts, Mobile homes, Youth hostels, Social housing: Definition and Projects; Research Fields: Building types, Housing, Mass-Housing, Affordable housing; Analyses of National Examples; Analyses of International Examples.

MiM622 Urban Acoustic Comfort 3+0 7.5

Basic Information on Sound and Noise; Propagation, Reflection and Absorption of the Sound Outdoors; Fundamental Factors in Noise Propagation; Ambient Noise and its Sources; Evaluation of Urban Acoustic Comfort (Objective and Subjective Evaluation Methods); Noise Measurements, Noise Maps and Simulations; Soundscape and Its Components; Design Principles for Urban Acoustic Comfort.

| | | |
|---|---|-----------------|
| MiM623 | Integrated Design Studio in Architectural Education | 3+0 7.5 |
| Architectural education; Teaching of architectural design; The views on architecture this teaching reflects; principles emerging through its implemented pedagogy; educational objectives; teaching strategies; methods and priorities; a specific framework of thinking: understanding and doing a digital design; a specific architectural paradigm. as lab or as studio: 'integrated' or 'vertical' of the teaching design; the decisive melting pot of architectural education; a framework of thinking, understanding and doing design. | | |
| MiM624 | Integrated Design Studio in Architectural Education II | 3+0 7.5 |
| Architectural education; Teaching of architectural design; The views on architecture this teaching reflects; principles emerging through its implemented pedagogy; educational objectives; teaching strategies; methods and priorities; a specific framework of thinking: understanding and doing a digital design; a specific architectural paradigm. as lab or as studio: 'integrated' or 'vertical' of the teaching design; the decisive melting pot of architectural education; a framework of thinking, understanding and doing design; Conceptual: where the articulation and integration of architectural ideas take place, through experimentation, critique, confrontation, exchange, argumentation, debate or even imposition; the innovative, the experimental design techniques; the extended applications of digital technology. | | |
| MiM626 | Contemporary Approaches in Architectural Design | 3+0 7.5 |
| Relational dimension of Architecture; Interdisciplinary interaction in Architecture; Current research topics in Architectural Design; Comparative perspective on practical and objective, theoretical and literary productions in Contemporary Architectural Design; Case study analysis: conceptual and methodical evaluation of related practical and objective productions; Case study analysis: conceptual, methodical and scientific contribution evaluation of the related theoretical and literary productions; Comparative evaluation of Contemporary Architectural Design Approaches and development of a methodological proposal for improvements and adaptations. | | |
| MiM692 | Seminar | 3+0 7.5 |
| MiM790 | Thesis | 0+1 30.0 |
| MiM890 | Thesis | 0+1 30.0 |
| MiM890-0 | Thesis (Thesis Proposal) | 0+1 30.0 |
| MKM501 | Advanced Heat and Mass Transfer | 3+0 7.5 |
| Introduction to Heat and Mass Transfer; Generalized Continuity Equations; One and Two-Dimensional Heat Conduction Mechanism and Formulations; Transient Heat Conduction; Introduction to Heat Convection, Non-dimensional similarities; Introduction to Boundary Layer and its Properties; Heat Convection Mechanism and Formulations; Heat Convection for Internal and External Flows; Natural Convection; Radiation Process; Mass Transfer and Diffusion; Similarities Between Heat and Mass Transfer. | | |
| MKM503 | Academic Development | 3+0 7.5 |
| History of Science; Ethics and Typical Application Mistakes; How to Choose a Scientific Topic; How to Reach Scientific Information: Web of science, Google academic; How to Write and Present a Scientific Article; How to Prepare a Project: Problem analysis, Objective analysis, Strategy analysis, Method analysis: Originality: Impact; Points to Consider when Preparing a Presentation; Effective Oratory Techniques; Relationship between the Student and the Advisor; Laboratory Safety; Evaluation and Assessment. | | |
| MKM509 | Machining Dynamics | 3+0 7.5 |
| Modelling Technics in Machining; Mechanistic and Analytical Cutting Models; Modal and Structural Dynamic Analysis; Modal Analysis in Machine Tools and Tools; Development of Chatter Model: Chatter models for milling, Chatter models for turning; Dynamic Simulations; Dynamic Simulation Method in Machining with Using Finite Element Methods. | | |
| MKM511 | Advanced C++ Programming | 3+0 7.5 |
| Introduction to Computer Programming; Program Development: Flow chart, Software, Compilation, Debugging; Data Types: Integer, Real numbers, Complex numbers, Characters; Operators and Expressions; Program Control Statements: If, Else, For, While; Arrays; Functions and Modeller Programming; Pointers; Class and Object Oriented Programming; Parallel Programming: OpenMP programming, MPI programming. | | |

MKM513 Experimental Methods for Fluid Dynamics 3+0 7.5
Introduction the Experimental Techniques for Fluid Dynamics and Fundamental Terms; Critical Topics in Measurement Techniques; Steady State and Time Dependent Measurements; Pressure Measurement Methods; Temperature Measurement Methods; Optical Measurement System; Velocity/Turbulence/Flow Rate Measurement Methods; Measurement of Flow Angle; Advance Measurement Methods; Statistical Analysis of Experimental Data; Post Processing Techniques and Understanding of Measurement Results; Fourier Transformation; Cross Correlation of Data; Uncertainty Analysis.

MKM514 Atomistic Simulation of Materials 3+0 7.5
Introduction to Quantum Mechanics; Introduction to Quantum Mechanic Simulations: Hartree-Fock and density functional theory, Lattice constant of Si and C, Bulk modulus, Elastic constants and electronic band structure, Structural and electronic properties of C based nanomaterials; Introduction to Molecular Dynamics; Atomistic Potential Generation Techniques; Introduction to Molecular Dynamics Simulations: Lattice constant, High T properties.

MKM515 Renewable Energy Systems 3+0 7.5
Description and Historical Development of Renewable Energy Technologies Energy Sources; Hydraulic Energy and its Usage Principles; Hydraulic Energy Systems; Wind Energy and its Usage Principles; Wind Energy Systems; Solar Energy and its Usage Principles; Solar Energy Systems; Geothermal Energy and its Usage Principles; Geothermal Energy Systems; Fuel Cells; Analysis of Renewable Energy System; Evaluation of Renewable Energy Systems in Economical Way; Renewable Energy and Environmental Laws.

MKM516 Additive Manufacturing Methods 3+0 7.5
Additive Manufacturing: Basics of rapid prototyping, Reverse engineering and additive manufacturing; Methods and Materials in Additive Manufacturing: Additive manufacturing with fused deposition methods, Stereolithography (SLA) method, Additive manufacturing with laminated object manufacturing, Selective laser sintering, Selective laser melting, Laser deposition systems; Metallic Additive Manufacturing Systems; Composite Additive Manufacturing; Biological Printing; Industrial Applications of Additive Manufacturing.

MKM517 Computer Aided Analysis 3+0 7.5
Introduction to ANSYS Simulation Software; Direct and Solid Modeling; Solution of a Variety of Mechanical Engineering Problems using ANSYS; Static Analysis of Beams and Plates; Static Analysis of Planar and Space Trusses; Temperature Effects ve Non-linear Examples; ANSYS Applications in Structural Analysis; ANSYS Applications of Free and Forced Vibrations; Solution of Contact Problems using ANSYS.

MKM518 Sustainable Manufacturing 3+0 7.5
Introduction to Sustainable Manufacturing; Sustainable Business and Production Models; Product Life Cycle Transformation of Production Systems; Product Life Cycle in Manufacturing; Green Manufacturing; Environment and Health in Manufacturing; Green Design in Engineering; Absence of Products: Recycle and life cycle of product; Business Models in Sustainable Manufacturing; Energy Efficiency and Decreasing of Energy; Modelling of Carbon Foot Print in Manufacturing; Sustainability and Productivity; Effects of Social Factors in Manufacturing Systems; Operations in Sustainable Manufacturing, Tools and systems.

MKM519 Exergy and Entropy Analysis 3+0 7.5
Fundamental Thermodynamics Laws and Principles; Definition of Exergy and Energy; History of Exergy and Usable Energy; Exergy Balance and Exergy Losses; Exergy Efficiency of Thermal Systems; Thermodynamic Applications of Exergy Analysis; Exergy Calculations; Exergy Calculations in Open Systems; Physical and Chemical Exergy Calculations; Exergy Analysis of Typical Thermal Systems; Exergy Analysis of Combined Cycles; Exergy Analysis of Solar Collectors; Adiabatic Systems; Exergy of Steady State Flow Processes; Characteristics of Irreversible Systems and Processes.

MKM520 Computer Aided Engineering 3+0 7.5
Fundamentals of CAD/CAM/CAE and Introduction to Computer Aided Engineering Software; Introduction to CAD/CAM/CAE Systems; Engineering Processes in Design; Geometric Modeling in Engineering Applications; Numerical Methods in Engineering Design Systems; Solid Modeling; Numerical Methods in Structural Analysis; Introduction to Dynamic Analysis; Applications of Numerical Control Machining Systems; G-Codes; Applications of CAD/CAM/CAE Commercial Products in Engineering Projects.

MKM522 Mechanical Behavior of Materials 3+0 7.5
Classification of Materials and Properties; Elastic and Plastic Deformation; Stress and Strain Relationships; Hooke's Law; Von Mises Yield Criteria; Tresca Yield Criteria; Plastic Deformation; Factors Influencing Plastic Behavior; Strengthening Mechanisms; Ductile and Brittle Fracture; Yielding and Plastic Instability; Introduction to Linear Elastic Fracture Mechanics; Fatigue and Fracture; Influence of Environmental Parameters on Mechanical Properties; Fundamentals of Damage.

- MKM523 Vehicle Systems Design 3+0 7.5**
Introduction to vehicle dynamics, tires and their mechanics, drive-train model, braking stability, steering of vehicles, suspension kinematics and vehicle ride models. Design and specifications of brake systems, pneumatic and hydraulic brake systems, disc and drum brakes, elements of brake systems, auxiliary elements of brake systems, pneumatic tires and rims, design of suspension systems, springs and dampers, steering wheel mechanisms. Vehicle design in Matlab - Simulink environment.
- MKM524 Smart Materials and Applications 3+0 7.5**
Definition of Smart Materials; Sensors, Actuators and transducers; Introduction to Different Types of Smart Materials; History and Industrial Applications of Smart Materials; Piezoelectric Materials: Crystallography, Crystal structure, Mechanism of piezoelectricity; Common Piezoelectric Materials; Superelasticity; Superelastic Materials Phase Transformation; Martensitic Transformations, Shape memory effect and superelasticity; Mechanical Behavior and Shape Memory Characteristics of Different Shape Memory Alloy Systems; Ti-Ni Phase Diagrams; One Way, Two Way Shape Memory Effect and General Applications.
- MKM525 Superalloys 3+0 7.5**
Introduction: Definition of superalloys and general concepts; Classification of Superalloys: Superalloy strengthening mechanisms; Properties of Superalloys: Physical properties, Mechanical properties, Thermal properties; Processing of Superalloys: Physical metallurgy and initial processing, Forming and machining, Final processing; Selection of Superalloys: Selection criteria, Example application.
- MKM526 Advanced Powerplant System Technologies and Applications 3+0 7.5**
Introduction; Thermodynamic Laws; The Rankine Cycle; Fossil Fuel Steam Generators; Fuels and Combustion; Turbines; Condensators and Pumps; Gas Turbines; Combined-Cycle Systems (Cogeneration and Trigeneration); Nuclear Energy and Nuclear Powerplant Systems; Geothermal Energy and Heat-Power Production Systems; Solar Energy and Heat-Power Production Systems; Wind Energy and Wind Turbines; Wave Energy; Power Production from Wave Energy, Energy Storage Systems.
- MKM527 Design for Manufacturing and Assembly 3+0 7.5**
Introduction: Overview of engineering design, Engineering design flow, Concurrent engineering; Engineering Design Criteria: Functionality, Strength, Aesthetics, Cost, Time; Overview of Design for Manufacturing and Assembly; Design for Casting and Injection Processes; Design for Forming Processes; Design for Machining Processes; Design for Joining Processes; Design for Additive Manufacturing; Design for Assembly; Example Applications.
- MKM528 Advanced Level Nondestructive Inspection Methodologies 3+0 7.5**
- MKM529 Selected Topics In Mechanics 3+0 7.5**
Stress; Plane stress, General state of stress, Transformation of general state of stress, State of nonhomogenous stress; Strain: Transformation of plane strain, Three dimensional analysis of strain, Compatibility equations, Transformation of three dimensional strain; Linear Elastic Materials-Hooke's Law; Generalized Hooke's law for linear isotropic elastic solids and anisotropic solids, Thermoelastic constitutive relations, Compatibility condition in a state of plane stress; Energy methods: External works, Elastic strain energy, Conservation of energy, Impact loading, Work and energy under several loads, Virtual work, Castiglione's theorems; Theories of Failure.
- MKM530 Vehicle Control Systems 3+0 7.5**
- MKM532 Biomass and Bioenergy Systems 3+0 7.5**
- MKM533 Exergy Analysis in Mechanical Engineering 3+0 7.5**
First and second law of thermodynamics / Concept of Exergy Analysis, Physical and Chemical Exergy / Exergy Analysis Applications on Different Systems, Cooling Systems, Exergy Analysis, Exergy Analysis of Absorption Refrigeration Systems, Vehicle Emissions Exergy Analysis, II. Law of performance indicators, Exergy Analysis of Cooling Towers and Evaporative Coolers, Heating Systems, Exergy Analysis, Exergy Analysis of Thermal Power Plants, Cogeneration Systems, trigeneration systems, Exergy Analysis of Geothermal Systems, Ecological Exergy Model / Exergy-Economic Relations and Analysis.

| | | |
|---|---|-----------------|
| MKM534 | Thermal System Design | 3+0 7.5 |
| MKM535 | Advanced Fluid Mechanics in Mechanical Engineering | 3+0 7.5 |
| Introduction to fluid mechanics; Fundamentals of fluid statics; Introduction to Fluid Dynamics, Streamlines, Streaklines, Pathlines, Flow rate, Mean velocity; Integral Form of Flow Equations: Conservation of mass, Conservation of momentum, 1st and 2nd law of thermodynamics; Bernoulli equation; Differential Formulation of Fluid Flow: Continuity equation, Euler's equation, Navier-Stokes equation, Energy equation, Boundary layer theory and dimensional analysis; Micro-nanoscale fluid mechanics applications. | | |
| MKM592 | Seminar | 3+0 7.5 |
| MKM599 | Term Project | 3+0 0.0 |
| MKM790 | Thesis | 0+1 30.0 |
| MLZ501 | The Structure-Property Relationships in Materials | 3+0 7.5 |
| The Structure of Materials; Levels of Materials Structure; Introduction to Structure-Property Relationships in Materials; Pauling Principles in Ionically Bonded Systems; Crystal Chemistry; Symmetry Operations; Symmetry Components; Point Groups and Their Stereograms; Space Groups; Transformation of Space Groups to Point Groups; Transformation Components for Symmetry Components; Neumann Principle; Analytical Form of Neumann Principle; Heckmann Diagram; Thermodynamic Relations; Specific Heat and Entropy; Pyro-electricity; Stress and Strain; Thermal Expansion; Piezoelectricity and Piezoresistance; Application Examples. | | |
| MLZ502 | Thermodynamic Applications in Material Science | 3+0 7.5 |
| The Zeroth, First, second, and Third Laws of Thermodynamics; Ellingham Diagrams; One-component Phase Diagrams; The Behaviour of Raoultian, Henrian and Regular Solutions; Gibbs Free Energy-Composition and Phase Diagrams of Binary Systems; Statistical Interpretation of Entropy; Reactions Involving Gases: the effect of temperature and pressure on the equilibrium constant, reaction equilibrium as a compromise between enthalpy and entropy; Reaction Equilibria in Systems Containing Components in Condensed Solution: criteria for reaction equilibrium, alternative standard states, binary systems containing compounds, graphical representation of phase equilibria, the solubility of gases in metals, solutions containing several dilute solutes; Electrochemistry: the relationship between chemical and electrical driving forces, the effect of concentration on EMF, formation cells, concentration cells, Pourbaix diagrams. | | |
| MLZ503 | Electrical Properties of Materials | 3+0 7.5 |
| Electrons in Crystal; Electrical Conduction in Metals and Alloys; Superconductivity; Thermoelectric Phenomena; Semiconductors and Semiconductor Devices; Electrical Properties of Polymers, Ceramics, Dielectrics, and Amorphous Materials; Optical Properties of Materials; Applications (Electro-Optical Waveguides, Optical Storage, Complementary Metal/Oxide/Semiconductors (CMOSs), Charge-Coupled Devices (CCDs), LEDs, LCDs, LASERS); Magnetic Properties of Materials; Applications (Permanent Magnets; Magnetic Memory and Recording, Magnetic Detection and Sensors); Thermal Properties of Materials; Thermal Conduction and Expansion in Metals and Alloys; Applications (Thermocouples, Thermal Camera and Detectors). | | |
| MLZ504 | Fracture Mechanics of Materials | 3+0 7.5 |
| Introduction; Fundamentals of Fracture Mechanics; Dislocations, Plastic Flow and Stresses; The Fracture Strength; The Factors Affecting Elastic Modulus in Ceramics; Impact Resistance and Toughness of Ceramics; Critical Crack Size; Fracture Surface Energy; Work of Fracture; The Effects of Coefficients of Thermal Expansion Difference on Mechanical Properties; Thermal Stresses and Fracture; The Determination of Thermal Shock Parameters for the Industrial Applications; Thermal Shock Behaviour; Engineering Design Data. | | |
| MLZ505 | Thermal Analysis of Polymeric Materials | 3+0 7.5 |
| Properties of Thermoplastics, Thermosets and Elastomers, Introduction to Polymer Thermal Analysis, Polymer Physics, Definition of Glass Transition, Melting and Crystallization for Different Polymer Types. Differential Scanning Calorimetry (DSC) and Its Working Principles, Real Life Examples to DSC Applications with Hands on Experiments, Thermogravimetry (TG) Analysis and Its Working Principles, Real Life Examples to TGA Applications with Hands on Experiments, Thermo Mechanical Analysis (TMA) and Its Working Principles, Real Life Examples to TMA Applications with Hands on Experiments, Introduction to Dynamic Mechanical Analysis (DMA), DMA Applications with Hands on Experiments. Introduction Micro-Thermal Analysis. | | |

MLZ506 Mathematical Methods in Polymer Science and Technology 3+0 7.5

Molecular Weights and Numerical Average of Polydispersity Indices and Calculations of Weight Averages; Stoichiometry of Polymerization Reactions, Their Kinetics and Transformations; Crystallization, Polymer Solutions, Polymer Mixtures and Calculations of Miscibility Parameters; Calculations Based on Viscoelasticity; The Use of WLF Equation; Heat Transfer Calculations; Stress-Strain Calculations in Fiber Containing Composites; Calculations in Molding Presses; Extrusion Calculations; Heat Treatment Calculations; Other Calculations in Polymer Production.

MLZ507 Fundamentals of Polymer Engineering 3+0 7.5

Introduction to Polymer Engineering, Engineering Plastics, Polymerization, Copolymers and Cross-Linked Polymers, Physical and Chemical Properties of Solid Polymers, Crystalline and Glassy Polymers, Creep and Stress Relaxation in Polymers, Time Dependent Analysis of Viscoelastic Polymers, Fracture Mechanics of Polymers, Extrusion, Injection Molding, Thermoforming, Blow Molding, Compression and Transfer Molding.

MLZ508 Mechanics of Polymer-Based Laminated Composites 3+0 7.5

Introduction to Polymer Composites, Overview of Constituents Material Forms, Processing and Applications, Macro-mechanical Behavior of A Lamina, Orthotropic Material Properties, Transformation of Coordinates, Lamina Strength Criteria, Micromechanical Behavior of Lamina, Classical Laminate Theory, Thermal Effects, Laminate strength, Delamination, Matrix Cracking, and Durability, Inter-laminar Stresses, Edge Effects, Fatigue and Fracture, Analysis of Laminated Beams, Composite I Beams, Shear in Composite Beams Design Examples.

MLZ509 Advanced Composite Materials 3+0 7.5

Introduction; Classification of Composites; Ceramic Matrix Composites; Nano-composites; Laminate Composites; Metal Matrix Composites; The Properties and Conditions Required for Matrix and Reinforcement Phases in Composite Materials; The Effects of Thermal Expansion Mismatch in Composite Materials; Fracture Strength of Composites; Mechanical Properties of Composites; Fracture Mechanisms of Composites; Toughening Mechanisms; Properties of Interfaces and Thermal Stresses; Thermal Shock Parameters; Stress-Strain Behaviour of Ceramics with the Addition of Reinforcement Phase.

MLZ510 Thin Film Production and Vacuum Technologies 3+0 7.5

Review of Materials Science; Vacuum Science and Technology; Principles of High Vacuum; Thin Film Evaporation Process; Discharge, Plasmas, and Ion-Surface Interactions; Plasma and Ion Beam Processing of Thin Films; Chemical Vapor Deposition; Film Deposition; Substrate Surfaces and Thin Film Nucleation; Physical Vapor Deposition; Plasma Etching; Sputtering; Electron Beam Evaporation; Epitaxy; Film Structure; Electrical Properties; Characterization Techniques.

MLZ511 Dielectric Materials and Devices 3+0 7.5

Transformations and Tensors; Crystals and Texture Symmetry; Curie Principle and Neumann's Law; Polar Tensors; Pyroelectricity; Permittivity; Piezoelectricity; Elasticity; Thermodynamics; Equilibrium Properties; Axial Tensors; Piezomagnetism; Magnetoelectricity; Pyromagnetism; Magnetic Symmetry-Time Reversal, Hysteretic Properties-Domains; Transport Properties; Thermal and Electrical Conductivity; Galvanomagnetic Phenomena; Thermoelectric Phenomena; Thermomagnetic Phenomena; Waves Acoustics and Optics; Optical Activity.

MLZ512 Applications of Crystallography 3+0 7.5

Summary of Crystallography; Stereographic Projections and Their Applications; Slip in Single Crystals and Diehl's Rule, Diffraction, Reciprocal Space, Ewald Sphere, Polymorphism and Polytypes, Rutile and Anatase Crystal Structures and their Applications, Zinc Sulfide Crystal Structures and Piezo and Pyroelectricity, Relationship between Optical Anisotropy?Crystal Structure; Interaction Colours and Photoelasticity, Olivin-Spinel Phase Transitions, Perovskite Structure, Superconductivity, Phase Transformations, ccp?hcp Phase Transformations and Shape Memory Alloys, Silicon Dioxide, Zirconia, Silicon Nitride and Silicon Carbide Phase Transformations.

MLZ513 Raw Materials and Mineral Processing 3+0 7.5

Introduction; Ceramic Raw Materials; Clays, Quartz, Feldspars, Limestone, Marble and Other Raw Materials; Mineral Processing: Crushing, Grinding, Screening, Classification; Sizing Classification and Handpicking Enrichment; Gravity Separation; Magnetic Separation; Electrostatic Separation; Flotation; Chemical Enrichment

MLZ514 The use of Glass Materials in Industry 3+0 7.5

Introduction; Importance of Glass and Glassy Materials in Industry; Introduction to Glaze Science; Certain Raw Materials Used in Glaze Production; Frit Production; Glaze Preparation and Application; Glaze-Body Interactions; Characterisation of Glazed Products; Technologically Important Glazes; Enamel Production; Technologically Important Enamels; Enamel Defects and Their Corrections.

MLZ515 Refractory Technology 3+0 7.5

Classification and Properties of Refractories; Production Process and Test Methods; Industrial Applications; Properties and Application of Basic Refractories; Properties and Application of Acidic Refractories, and Corrosion Resistance; Fundamentals of Fracture Mechanics; Determination of Mechanical Properties; The Effects of Coefficients of Thermal Expansion Difference on Mechanical Properties of Refractories; The Determination of Thermal Stress and Shock Parameters for the Industrial Applications; Thermal Shock Behaviour of Refractories; Preparation of Refractory Samples; Mechanical Testing; Microstructural Examinations in Scanning Electron Microscopy.

MLZ516 Coating Techniques 3+0 7.5

An Introduction to Thin Coating; Coating Types and Process Steps; Evaluation of the Parameters for the Best Coating for a Given Application; Thermal Spraying Methods (Plasma Spraying, Low Pressure Plasma Spraying; Flame Spraying, HVOF Spraying; Their Applications and Coating Properties; TBC Coatings; Chemical Vapour Deposition (CVD); Metal Organic Chemical Vapour Deposition (MOCVD); Plasma CVD; Process Parameters, Application Areas; Physical Vapour Deposition, Process Parameters and Application Areas; Coating Properties; Ion Implantation ; Hardness, Friction and Wear Principles and Mechanisms

MLZ517 X-Ray Diffraction Techniques in Materials Characterisation 3+0 7.5

Importance of materials Characterization; Importance of XRD Techniques in Materials Characterization; Techniques Used in Materials Characterisation and their Difference; Electromagnetic Radiation; The Continuous Spectrum; The Characteristic Spectrum; Absorption; Filters; Production of X-rays; Detection of X-rays; Introduction of the XRD Device; Specimen Preparation Methods; Interpretation of XRD Spectra; Lattices; Crystal Systems; Symmetry; Primitive and Non-primitive Cells; The Stereographic Projection; The Stereographic Projection; Diffraction Theory I: Directions of Diffracted Beams; Diffraction; Bragg Law; X-ray Spectroscopy; Diffraction Directions; Diffraction Methods; Diffraction Under Non-ideal Conditions Diffraction Theory-II: Intensities of Diffracted Beams: Scattering by an Electron; Scattering by an Atom; Scattering by a Unit Cell; Structure Factor Calculations: Multiplicity Factor, Lorentz Factor; Absorption Factor; Temperature Factor; Intensities of Powder Pattern Lines; Application; Determination of Particle Size; Determination of X-ray Density; Depth of X-Ray Penetration; Determination of Crystal Structure; Indexing Patterns of Cubic Crystals; Indexing Patterns of Noncubic Crystals; Determination of the Number of Atoms in a Unit Cell; Determination of Atom Positions, Quantitative XRD; X-Ray Fluorescence (XRF); XRF Applications.

MLZ518 Strengthening Mechanisms in Materials 3+0 7.5

Classification of Materials; In Materials: Mechanical Properties; Mechanical Behaviours; Thermal Properties and Behaviours; Imperfections in Solids; Dislocations and Plastic Deformation; Mechanisms of Strengthening in Metals; Recovery, Recrystallization and grain growth; Imperfections in Ceramics and Mechanisms of Plastic Deformation; Defects in Polymers; Mechanisms of Deformation and for Strengthening of Polymers; Strengthening Mechanisms in Composites.

MLZ519 Atomic Force Microscopy and Applications 3+0 7.5

Basics of Atomic Force Microscopy; Historical Background; Components of Microscope, scanning Modes, Calibration; Tip-Sample Interaction; Imaging and Compositional Analysis; Mechanical Property Analysis; Nano-Indentation and Scratch Resistance Measurements; Electrical Property Analysis; Magnetic Property Analysis; Nano-Production Techniques with AFM.

MLZ521 Fracture Mechanics of Materials 3+0 7.5

Definition, Importance and History of Fracture Mechanics: Historical perspective, Fracture mechanics for design, Effect of materials' properties on fracture; Linear Elastic Fracture Mechanics: An atomic view of fracture, Effect of stress concentration on flaws: Griffith energy balance, Energy release rate, Instability and the R curve; Crack Tip Plasticity Zone; Plastic zone shape; Elastic Plastic Fracture Mechanics: Crack-tip opening displacement, The J integral, Relationships between J and CTOD; Fatigue Fracture Formation: Fatigue diagram, Fatigue plastic zone; Materials Behavior: Fracture mechanism in metals, Fracture mechanism in non-metals, Theoretical and practical research and discussion.

MLZ522 Application of Electrochromic and Photochromic Polymers 3+0 7.5

Fundamental principles of photochemistry and electrochemistry; Modern techniques of electrochemical characterisation; Chromism, Electrochromism, Polyelectrochromism; Electrochromic systems; kinetics and mechanism; Construction of electrochromic device; Organic monomeric chromes, Inorganic chromic systems; Electroactive conductive polymers; Photochromic viologen-based systems; Photochromic liquid crystal polymers; Photoelectrochromism; Matrix polymers; Photostimulated conformation changes of polymers in solution and gel phase; Last developments.

MLZ523 Polymer Chemistry and Physics 3+0 7.5

Basic Concepts of Polymer Science; Microstructure and Molecular Weight; Chemical Bonding and Polymer Structure; Step-growth and Addition Polymerization; Polymerization Kinetics; Probability and Statistics of Polymerizations; Stereochemistry of Polymerization; Reactions of Polymers; Ideal and Real Chains; Thermodynamics of Polymer Solutions and Blends; Flory-Huggins Equation and Cohesive energy Density; Random Branching and Gelation; Predicting Polymer Properties by Computational Methods.

- MLZ524 Electrochemical Characterization of Conducting Polymer 3+0 7.5**
 Conductive mechanism of conducting polymers; Electrochemical properties of conducting polymers; Conducting polymer-based electrochemical sensors; Potentiometric, Conductometric, Amperometric sensors ; Electrochemical/voltammetric sensors; Cyclic voltammetry based sensors; Chronoamperometry based sensors; Differential pulse voltammetry, a branch of square wave voltammetry based sensors; Electrochemical or voltammetric enzyme based biosensors: Glucose sensors, Ethanol electrodes, Urea electrodes and their detection mechanism; Electrochemical / voltammetric enzyme based immunosensors and DNA sensors and their detection mechanism.
- MLZ525 Cutting Tool Materials 3+0 7.5**
 Definition of machining and classification of traditional machining techniques; The effect of cutting forces and heat on properties of materials in machining; Cutting tool geometry and its relations to materials properties; cutting parameters and its relations to materials properties; Wear of cutting tools in machining operations; High speed tool steels and their utilizations; Carbide tools and their utilizations; cubical boron nitride (cBN) and polycrystalline diamond (PCD) ultra-hard tools and their utilizations; Oxide ceramic cutting tools and their utilizations, Non-oxide ceramic cutting tools and their utilizations.
- MLZ551 Mechanical Behavior of Materials 3+0 7.5**
 Mechanical Fundamentals; Stress and Strain Relationships for Elastic Behavior; Theory of Plasticity; Metallurgical Fundamentals; Plastic Deformation of Single Crystals; Dislocation Theory; Strengthening Mechanisms; Fracture; Applications to Materials Testing; The Tension; Hardness and Torsion Tests; Fracture Mechanics; Fatigue; Creep; Brittle Fracture and Impact Testing; Plastic Forming of Metals; Forging, Rolling of Metals; Extrusion; Drawing of Wires; Sheet-Metal Forming.
- MLZ552 Materials Selection For Aircraft Structure 3+0 7.5**
 Significant Factors for Materials Selection; Restriction Factors for Materials Selection; Basic Stages for Materials Selection; Significance of Materials Tests for Materials Selection and Analysis of Test Data; Determination of Significance Rance of Materials Characteristics and Comparison of Their Characteristics; Selection of Nominee Materials and their Comparison.
- MLZ553 Mechanical Behavior of Composite Materials 3+0 7.5**
 Introduction to Composite Materials; Macro mechanical Behavior of o Lamina; Stress-Strain Relations for Anisotropic Materials; Elastic Constants for Orthotropic Materials; Strength Theories for an Orthotropic Lamina; Maximum Stress Theory; Maximum Strain Theory; Tsai-Hill Theory; Micromechanical Behavior of a Macro mechanical Behavior and Laminate; Bending and Buckling Equations of Laminated Plates.
- MLZ554 Structure and Properties of Aircraft Materials 3+0 7.5**
 Atomic Structure and Packing of Atoms In 3D; Atomic Bonding; Dislocations; Dislocations and Plastic Deformation; Relationship Between Atomic Structure and Mechanical Properties; Mechanical Properties and Measuring Methods; Tensile; Compression; Bending, Shear; Impact; Fatigue and Creep; Materials Selection for Different Mechanical Applications; Case Studies for Aircraft Materials Selection.
- MLZ592 Seminar 3+0 7.5**
- MLZ599 Term Project 3+0 0.0**
- MLZ601 Scanning Electron Microscopy and Chemical Analysis Techniques 3+0 7.5**
 Introduction; What is the Importance of Microstructural Investigations?; What are the Reasons for the Use of Electron Microscopes; Which Techniques are Used for the Characterisation of Microstructures; Specimen Preparation for Electron Microscopy; Interactions between Electrons and Specimen; Depth of Signals Produced as a Result of Interactions and their Use; Scanning Electron Microscopes (SEM) and its Parts; Chemical Analysis Techniques: Energy Dispersive X-ray Spectrometers (EDX) and Wavelength Dispersive X-ray Spectrometers (WDX); Parameters to be Known to Obtain Best Quality Images and Reliable Chemical Analysis; Comparison with Enviromental Scanning Electron Microscopes (ESEM) and Other Techniques; Investigation of Different Materials in SEM.
- MLZ602 Transmission Electron Microscope and Chemical Analysis Techniques 3+0 7.5**
 Importance of Grain Boundaries; Classification of Grain Boundaries; Low-Angle Grain Boundaries and Their Properties; High-Angle Grain Boundaries and Their Properties; Grain Boundaries Made by Different Phase Grains; Ceramic-Metal Interface Surfaces; Techniques Used to Investigate Grain Boundaries; Transmission Electron Microscopes; Dark Field; Light Field; Fresnel Unfocused and High Resolution Power Image Techniques; Electron Diffraction; Analysis of Diffraction

Patterns; Chemical Analysis Techniques; Energy Dispersive X-Ray Spectrometer; Parallel Electron Energy Losses Spectrometer.

MLZ603 Special X-Ray Techniques and Their Applications 3+0 7.5

Reflectivity of X-Rays from Soft Matter Surfaces and Multiple Interfaces; Roughness and Density Profiles; Reflectivity Experiments and Experimental Consideration; High Resolution Diffractometers and Reflectometers; Grazing Incidence and Exidence Diffraction and in-Plane Diffraction Techniques; Reciprocal-Space Map and Q-Scan Techniques; Limits on the Use of Powder Diffractometer; High Temperature Powder Diffractometer Techniques.

MLZ604 Inorganic Powder Synthesis Technologies 3+0 7.5

Introduction to Ceramic and Metal Powder Synthesis Methods; Powder Synthesis by Atomization; Powder Synthesis via Precipitation from Homogeneous Solutions; Powder Synthesis in Molten Salt; Powder Synthesis by Sol-Gel Technique; Interpretation of Solubility-pH Diagrams; Nucleation and Growth Kinetics; Size and Shape Control in Powder Synthesis; Composite and Multi-Functional Powder Preparation Techniques.

MLZ605 Sintering of Particulate Materials 3+0 7.5

Introduction to Sintering Terms; Processing of Ceramic and Metal Powders; Microstructure-Sintering Relations; Sintering Analysis Techniques; Solid State Sintering; Liquid Phase Sintering; Viscous Sintering; Herring's Scaling Law; Sintering Maps; Deformations Occurring during Sintering and Approaches to Prevent Them; Pressure Assisted Sintering Techniques (Sinter Forging; Hot Pressing etc.); Other Sintering Techniques (Transient Liquid Phase Sintering, Reactive Sintering; Microwave Sintering, etc.); Examples of Sintering Methods Applied to Ceramic and Metal Particulate Systems; Grain Growth (Normal Grain Growth; Exaggerated Grain Growth; Anisotropic Grain Growth, etc.)

MLZ606 Phase Transformation Reactions of Metals 3+0 7.5

Free energy, interface energy and activation energy terms; Structure of liquids; Liquid-solid interface; Solidification models; Solidification microstructures; Solidification kinetics and industrial control; Chemical partitioning and diffusion direction; Interaction of free energy and phase diagrams; Examples of chemical partitioning reactions of alloy systems; Classification of solid-solid transformation reactions and interface types; Diffusional transformation reaction mechanisms, kinetics, crystallography and morphologies; Industrial examples of diffusional transformation reactions through alloy systems; Mechanism of martensitic transformation, kinetics, crystallography and morphology; Industrial examples of martensitic transformation through alloy systems; Mechanism of spinodal decomposition, kinetics, crystallography and morphology; Industrial examples of spinodal transformation reactions through alloy systems.

MLZ607 Alloy Development-Principles, New Horizons and Extreme Applications 3+0 7.5

Alloy development principles; trends, causes and products at existing alloy systems for conventional applications; Alloy selection examinations at applications that need tough property combinations; Alloy development attempts and products for cutting-edge applications; Alloy theory and microstructures of alloys; Steel types: Complication and expansions at classification; New trends, causes and products at steels; High temperature alloys (superalloys): new trends, causes and products; Aluminium alloys: new trends, causes and products; Titanium alloys: new trends, causes and products; Magnesium alloys: new trends, causes and products; Magnetism and magnetic alloys: new trends, causes and products; Alloys selection examples for extreme applications; Trends and products at alloy development for extreme applications.

MLZ608 Polymer Rheology 3+0 7.5

Rheology in Engineering Applications, Rheology of Polymers, Review of Vector and Tensor Analysis Flow, Newtonian Fluid Mechanics, Isothermal Flow Problems for Generalized Newtonian Fluids, Non-isothermal Flow Problems for Generalized Newtonian Fluids, Shear and Shear-Free Flows, Steady Shear Flow Material Functions, Unsteady Shear Flow Material Functions, Shear Free Flow Material Functions, Linear Viscoelastic Measurements, Parallel-Disk Viscometer, Cone-And-Plate Parallel-Disk Capillary Rheometer Slit Rheometer Newtonian Fluid and Hookean Solid, Linear Viscoelastic Fluids, Linear Viscoelastic Rheological Properties, Experimental Rheological Characterization of Different Types of Polymers with Hands on Experiments.

MLZ609 Modeling of Polymer Composites Manufacturing Processes 3+0 7.5

Introduction to Polymer Composites, Polymer Composite Fabrication Processes, Mass, Heat And Momentum Transfer Equations for Polymer Composite Manufacturing, Introduction to Polymer Composites Process Modeling, Introduction to MATLAB Programming Assisted Numerical Calculations, General Aspects of Advanced Thermoplastic and Thermoset-Matrix Fiber-Reinforced Composites, Introduction to Liquid Composite Molding Processes (Resin Transfer Molding and Vacuum Assisted Resin Transfer Molding), LIMS (Liquid Injection Molding Simulation) Coupled with Hands-on Manufacturing of Composite Parts.

MLZ610 Kinetics 3+0 7.5

Kinetics of Diffusion: Ficks First Law and applications, Ficks Second Law and Semi-Infinite System Applications, Ficks Second Law and Finite System Applications, Ficks Second Law and Laplace Transformations, Multi ? Phase Diffusion; Chemical Diffusion: Boltzman-Matano Analysis, Atomistic Theory of Diffusion, Fast Diffusion Regions, Ionic Diffusion;

Kinetics, Crystallography and morphology, Industrial examples for diffusion controlled transformation mechanisms; Homogeneous and Heterogeneous Nucleation Mechanisms: Kinetics and control parameters; Precipitation Mechanisms: Kinetics, Crystallography, Interphase Analysis; Mechanism of Precipitate Coarsening; Spinodal Transformations; Martensitic Transformations, Industrial Examples for Martensitic Transformations.

MLZ621 Electrical and Magnetic Characterization 3+0 7.5

Electrical: Two point probe technique (TPP), Four point probe technique (FPP), Impedance spectroscopy (IS); Magnetic: Vibrating sample magnetometer (VSM): Magnetic hysteresis, Magnetic Susceptibility, Magnetic Anisotropy, Temperature and Angular Dependence of Magnetization, Zero-Field- and magnetic-field cooling; Spin Paramagnetic Resonance (SPR); Ferromagnetic Resonance (FMR); THz-Time Domain Spectroscopy (THz-TDS); Material and Device Examples: Phase transition materials; Smart Materials; Magnetics Ceramic Materials; Nanomagnetic Materials; Magneto-Resistive Sensors; Micro-Electro-Mechanical Systems (MEMS).

MLZ622 Porous Materials 3+0 7.5

Introduction: The importance of adsorption, Physisorption and chemisorption, Types of adsorption isotherms; Thermodynamics of Adsorption at the Gas-Solid Interface; Methodology of Gas Adsorption; Adsorption at the Liquid-Solid Interface; Classical Interpretation of Physisorption Isotherms at the Gas-Solid Interface; Modelling of Physisorption in Porous Solids; Assessment of Surface Area by Gas Adsorption; Assessment of Mesoporosity; Assessment of Microporosity; Adsorption by Active Carbons; Adsorption by Metal Oxides; Adsorption by Metal-Organic Frameworks.

MLZ623 Structural and Optical Characterization 3+0 7.5

Optical spectrum: Radiation sources, Material-radiation interactions; X-ray diffraction (XRD): Grazing Incidence X-Ray Diffraction (GI-XRD), In-Plane X-Ray Diffraction (IP-XRD); X-Ray Reflectivity (XRR); X-Ray Photoelectron Spectroscopy (XPS); Raman Spectroscopy; Fourier-Transform Infrared Spectroscopy (FTIR); Ultraviolet-Visible Spectroscopy (UV-Vis-NIR); Surface Plasmon Resonance (SPR) Spectroscopy; THz-Time Domain Spectroscopy (THz-TDS); Material Examples: Phase transition materials; Smart Materials; Surface-Plasmon-Supporting Materials; Optical Absorbance Materials.

MLZ651 Materials Science and Advanced Materials Technology 3+0 7.5

Materials Science; Atomic structure; Bonding Between Atoms; Chemical Reactions and Reactivity; The Crystalline State; Elastic and Plastic Behavior; Constitution; Electrical and Magnetic Properties; Materials Technology; The Shaping of Materials; Metals; Ceramics; Thermoplastics; Thermosetting Materials; Composite Materials; The Behavior of Materials in Service; Testing of Materials; Metal-Joining Processes; Macroscopic and Microscopic Examination of Materials.

MLZ652 Fatigue and Creep Behaviour of Aircraft Materials 3+0 7.5

Fracture and Toughness in Aircraft Materials; Fatigue Failure; Mechanism of Fatigue; Fatigue Crack Growth Analysis; Load Interaction; Case Studies for Aircraft Fatigue Failure; Creep and Creep Related Failure in Aircraft Engine; Kinetic Theory of Diffusion; Mechanism of Creep and Creep-Resistant Materials; The Turbine Blade-a Case Study in Creep Failure.

MLZ692 Seminar 3+0 7.5

MLZ790 Thesis 0+1 30.0

MLZ890 Thesis 0+1 30.0

MLZ890-0 Thesis (Thesis Proposal) 0+1 30.0

MOD501 Pattern Design in Textile 3+0 7.5

Importance of Pattern in Fashion Textile; Designing Patterns in View of Current Fashion Trends; Development of Textile Patterns (Imprinted and Woven); Relationship Between Patterns and Motifs; Basic Principles in Pattern Design; Methods of Pattern Design and Multiplication; Industrial Applications.

MOD503 Fashion Theories and Trends 3+0 7.5

Description of fashion concept, Theories of fashion: Bottom-down or class difference theory, Collective selection theory, Changing erogenous areas theory, Mass bazaar theory, Subculture influence theory; Definition of fashion trend and types of fashion trend: Long term fashion trends, Short term fashion trends; Factors influencing fashion trends: Political factors,

Social factors, Economic factors, Technological factors; Current studies on fashion trend analysis, Cycle of fashion, Dissemination process of fashion.

MOD510 Fashion Concept in Design 3+0 7.5

Definition and Development Process of Fashion Concept; Art and Fashion Relation; Development Process of Fashion Concept in Design; Accepting a New Design in Different Levels of Society; Interaction Between Society and Fashion; Applications of Creating a Style According to the Conceptual Recommendations.

MOD511 Intelligent Textiles and Clothing 3+0 7.5

Basic Research and Design Procedure of Intelligent Textiles; Phase Change Materials: Phase change Technology, Thermo physiological comfort, Pcms in textile and clothing; Shape Memory Materials: Principles of shape memory materials, Smms for Textile Applications; Chromic and Conductive Materials: Photo chromic, Thermo chromic and Electrochromic materials, Conductive Fibers and Yarns, Polypro Applications; Solar Textiles: Solar Cells, Photovoltaic, Textile Applications; Electronic Textiles: Principles of Wearable Electronics and Computers, Medical and Monitoring Applications of Electronic Textiles; Nanotechnology for Intelligent Textile Clothing; Future Trends in Intelligent Textile and Garment Applications.

MOD512 Art and Design 2+2 7.5

Creating and Improving Two and Three Dimensional Surface-Form Relations; Approaching Processes Like Subject, Object: Converting Concepts to Visual Language; Interpreted and Re-Commented; Improving Techniques and Abilities to Use Concepts Like Ratio-Proportion, Placement, Form and Volume by Using Study Methods Based on Observation; Forming Conceptual, Cultural and Functional Relations by the use of Separate Subjects Chosen by Individual Students.

MOD513 Advanced Projects in Fashion Design I 2+2 7.5

Scale; Function; Aesthetic; General Design Methods; Project Planning; General Design Strategy of an Organization; Methods and Principles About Creation of a Collection; Project Applications; Analyze of the Design Language; Design Challenging Conditions; Interaction Analysis; Cultural Analysis.

MOD514 Advanced Projects in Fashion Design II 2+2 7.5

Rapid Prototyping Methods and Applications; Formal and Functional Analysis of Potential Trends; Development of Alternative Solutions and Evaluation of Methods Used in Testing Steps; Using High Technology for Product Development and Sample Analysis; Examining Design and Cost Relation.

MOD515 Fashion Design Presentation and Graphic Design Relation 3+0 7.5

Importance of Fashion Design Presentation: Scrutinizing the Tools and Techniques Used in Graphic Design Presentation; Crucial Factors Influencing Fashion Design Marketing: Graphic presentation techniques and graphic design within the changing fashion periods, Marketing and promotion of fashion design; A Semiotic Approach to the Relationship Between Fashion Design and Graphic Design.

MOD516 The Quest for a Form in Fashion Design 2+1 7.5

The Quest for a Form in Fashion Design: Shape, Form, Dimension, Two Dimension, Three Dimension, Modelling, Application, Technical Research; Extraordinary Researches and Applications on Design; Design and Form; Body Art Studies; Formless Applications; Design Solutions; Functional Design; Form Research: Theories of Form Applications on Different Fabrics, Constructivism, Kubism, Analyzing the School of Bauhaus.

MOD517 Design, Art and Fashion Relationship 3+0 7.5

Introduction to Design, Art and Fashion relations: Non-verbal communication between art and fashion, Relationship between artistic creation and design; Assessment of selected subjects by students in terms of design; Intellectual and Functional Relations on Fashion Design and Fashion Fact: Assessment of selected subjects; Student designs and assessment of selected student designs.

MOD518 Computer Based Technologies for Textile and Print Design Simulation 3+0 7.5

Introduction to Textile and Print Design: Background on fabric and print design; Fabric Types and Production Methods; Print Design and Printing Machines: Traditional methods and digital printing; Role of Computer Technology in Textile and Print Design; Main Computer Technologies and Software in Textile and Print Design; Benefits and Limitations of Computer Based Technologies for Textile and Print Design; Challenges and Future Trends.

MOD519 New Approaches to Design of Fashion Accessories 3+0 7.5

Definition of Accessories Design: Place and importance of accessories in fashion design, Sources; Creating a Collection of Accessories; Preparing a Collection; Market analysis, Distribution research, Synthesis of trends, Main idea, Compliance with formal design in accessories, Knowledge of materials, Choosing the correct material for design, Design applications, Project implementation; Determination of Design Criteria; Criticism in a Studio Atmosphere; Seminars and Evaluation by Juries.

| | | |
|--|--|----------------|
| MOD520 | Experimental Draping | 1+2 7.5 |
| MOD521 | Fiber Art I | 3+0 7.5 |
| Introduction to the History of Contemporary Textile Arts; Mini Textile Applications with Plant Fiber: Producing three-dimensional fiber art works in free and modular forms; Examination of Contemporary Fiber Arts Works; Contemporary Interpretation of Traditional Techniques in Textile Arts; Relationship Between Space and Fiber Art; New Creative Quests in Fiber Arts. | | |
| MOD522 | Fiber Art II | 3+0 7.5 |
| Yarn and Fabric Applications in Textile Arts: Examination of contemporary art works by yarn and fabric specimens; Modern Textile Art Applications in Line with Design Principles; Investigation and Discussion of Modern Textile Art Samples; Three-dimensional Surface and Space Practices with the Use of Yarn and Fabric. | | |
| MOD523 | Philosophy of Design | 3+0 7.5 |
| Concepts of Philosophy and Aesthetics; Use of Design Theories and Principles in Fashion and Textile Design; Relationship between Philosophy, and Industrial Textile Design and Fashion Design; Philosophical Analysis of the Reflection of Urban Culture in Public Sphere through Textile and Fashion Products; Critical Evaluation and Interpretation of Contemporary Design Products via Philosophical Methodology. | | |
| MOD524 | Applied Studies on Natural Dyeing | 2+1 7.5 |
| MOD525 | Experimental Printing Design | 3+0 7.5 |
| Information about Printing Techniques: Analysis of textile literature, Block printing applications on fabric, Screen printing applications, Alternative new screen printing, Applications of transferred printing, Digital printing design, Mixed printing applications, Cross techniques applications, Different techniques applied by combined and diagonal methods, New experimental ideas, Preparing a presentation of prints produced, Alternative new prints on fabrics. | | |
| MOD526 | Cultural Approaches in Fashion and Textile Design | 3+0 7.5 |
| Textile as a Craft: The history of textile; The Industrial Revolution: Industrial revolution and the new world order, the industrial revolution, Science, art, Culture and social impacts, New requirement for textile- Training of Fashion Design, Debates on the original- local-conventional, Innovation in Art and Design, The technological developments and the concept of alienation in the 20th Century, Basis of the Development through of Women's Clothing Fashion, Quest for Authenticity and causes of Women's Clothing design in 20th Century of Design, Cultural Propositions in Women's Clothing, The variability of culture, The locality and modernity- Traditional - the original quest of the examination of Fashion's definition, 728 | | |
| MOD527 | Wearable Art | 1+2 7.5 |
| Basic Concepts: Conceptual art, Art and design, Wearable art; Themes: Classical art, New constructivism, Modern art, Textile design, Place and importance of textile design in fashion, Performance arts, Avant-garde fashion, Traditional Japanese art, Sustainable fashion, Concepts of green textile and slow fashion; Research on Wearable Art Materials: Identification of a theme, Methodology, Discussion of literature survey, Determination of techniques and materials, Application process, Report writing and presentation. | | |
| MOD528 | Youth Subcultures and Fashion | 3+0 7.5 |
| The concept of culture and definitions: Judge (ruling) culture, Popular culture, Mass culture, Folk culture, High (elite) culture; Definitions of subculture, Sociology of subculture, Formation of subculture, Fashion from 1950 to 1980, Youth subcultures from 1950 to 1980: Reggae, Ted, Mod, Hipster, Beat, Skinheads, Hippie, Punk, Glam - Rock; Techniques of creating style of youth subcultures, The industrialization of fashion belonging to the youth subcultures, The influence of the clothing of youth subcultures on fashion designers and brand. | | |
| MOD529 | Cultural Approaches in Fashion Design | 3+0 7.5 |
| Clothing History, semiotics, Iconic Community, clothing and aesthetic, Fashion and psychology, The industrial revolution, new world order, textile and fashion design education, the original- local-conventional, Innovation in Art and Design, Development of Textile Industry, Arts&Crafts movement, the aesthetic movement, wearable design suggestion, technological developments, Women's Clothing and Fashion, Cultural Propositions in Women's Clothing, The variability of culture, The definition of fashion as the phenomenon are discussed. | | |
| MOD530 | Creativity in Clothing Design | 3+0 7.5 |

Concepts of Design and Creativity; Creativity in Design Process: Preparation, Incubation, Illumination, Evaluation; Creative Thought Theories: Gestalt theory, Psychoanalytic theory, Perceptual theory, Factorialist theory, Humanistic theory, Cognitive development theory; Features of the Creative Designer; Criteria of Creative Design: Originality, Functionality, Aesthetics, Production quality, Suitability to target group, Flexibility, Fluency; Factors Affecting Creativity: Motivation, Medium, Environment and Society, Family, Attitudes, Doctrines.

MOD531 Textile Surface Applications in Wearable Art 1+2 7.5

Textile Surface Research: Application technique, Printing- Dyeing technique, Sewing- Embroidery technique, Weaving- Knitting technique, Folding- Crushing technique; Modern Art: New constructivism, 2000s, Performance arts, Body art; New Approches on Design: Contemporaray art and wearable art, An importance of textile design; Place of Wearable Art and Importance on Fashion Phenomenia: Technical solutions of wearable art, Contemporary textile surfaces, Wearable art and sustainability, Wearable art avantgarde textile surfaces application; Ecological Textile Surface Applications: Green textile slow fashion, Eco- Design application.

MOD532 Sustainability in Textile and Fashion Design 3+0 7.5

The Concepts and Applications of Recycling, Upcycling, Product Life Cycle, Sustainability, Sustainable Design; Sustainability Practices and Environmental-Friendly Production Methods in Textile and Fashion Industry; New Trends in Sustainable Textile and Fashion Design; Evaluation of Recycling and Upcycling Opportunities for Textile Wastes Through Case Studies; Recycling and Upcycling of Textile Wastes; Reporting and Evaluation of Experimental Studies.

MOD533 Garment Comfort 3+0 7.5

Human-Garment-Environment Interactions; The Concepts of Textile and Garment Comfort; The Importance and Components of Garment Comfort; The Attitude and Expectations of Users Towards Garment Comfort; Classification of Comfort; Factors Affecting Garment Comfort; The Effect of Material, Manufacturing technology and material construction on comfort properties; Comfort Properties of Textile Materials in the Form of Fibre, Yarn and Fabric; Garment Comfort Test Methods.

MOD534 Natural Printing Applications in Wearable Art 1+2 7.5

Definition and History of Wearable Art; Methods and Techniques Used in Wearable Art; Examination of Textile Artists and Their Works in the Field of Natural Printing; Definition and History of Natural Printing Technique; Types of Natural Printing; Types of Plants, Mordants and Application Methods Used in Natural Printing; Natural Printing Applications on Cotton, Silk, Linen, Wool, Leather; Experimental Studies with Rust Printing; Spirit Cloth Design Applications; Evaluation of Applications.

MOD535 Digital Technologies for Textile and Garment Design 3+0 7.5

Introduction to Textile Design: Basics of woven and knitted fabric design; Fabric Types and Production Methods: woven fabrics, preparation processes, weaving process, knitted fabrics, knitting process; The Role of Computer Technologies in Textile and Garment Design; Computer Technologies and Software used in Textile Design: software used in woven fabric design, software used in knitted fabric design, software used in printing design; Software and Technologies Used in Garment Design: three dimensional dimensioning systems, pattern software, 2D garment simulation, 3D garment simulation, fit control; Benefits and Limitations of Digital Technologies Used in Textile and Garment Design; Challenges and Future Trends.719

MOD536 Research Methods and Applications in Textile and Fashion Design 3+0 7.5

Basic Concepts of Science; Scientific Paradigms; Quantitative Research Design: Descriptive and Models, Experimental Methods; Data Analysis in Quantitative Research: Descriptive Data Analysis, Parametric Data Analysis, Non-parametric data analysis; Qualitative Research Design: Ethnographic research, Phenomelological research, Case Study, Historical study, Action research, Narrative research, Grounded theory; Writing Scientific Research, Presenting Scientific Research.

MOD537 Fiber Art 3+0 7.5

Introduction to the history of contemporary textile arts; Mini Textile Applications with Vegetable Fibers: Production of superficial and three-dimensional free and modular forms using fiber-cored structures, Examination of contemporary fiber arts examples, Contemporary interpretations in textile arts, Space and fiber art relations, Yarn and fabric usage in fiber arts: Yarn and fabric usage examination of contemporary art application examples, contemporary textile art applications in accordance with design principles and principles are realized, surface and three dimensional applications obtained by using yarn and fabric are examined.

MOD538 Fashion Sociology 3+0 7.5

MOD 538 Fashion Sociology 3+0 7,5 Fashion and Dress: Etymology of fashion, early fashion research; Fashion and Social Change: The role of fashion in social change, Symbols of Status, Symbols of belonging; Fashion and Gender: Dress and fashion differentiation, Fashion and ambiguity; Fashion Industry: Historical development of fashion industry, Fashion industry as a cultural industry, Fashion cities and events; Fashion Media: Fashion journals, The myth of designer, Gatekeeping.

| | | |
|---|--|-----------------|
| MOD539 | Fashion Design Presentation and Graphic Design Relation | 1+2 7.5 |
| Presentation Fashion Design: Research keywords, Reading, Writing, Illustrative overview, Narrative technique graphic; Thematic Approach: Creating the story, Key words and the symbolic approach, Keywords, and surface design; Graphic Expression in Clothing Design: Fashion design and graphic perception; Presentation of Fashion Design and Illustration : The transfer graphic of the story; The Importance of Graphical Perspective: The methodological approach in the presentation of fashion design; Textile to the Surface of Transfer; Transfer Applications for Graphic; Perceptual Lecture. | | |
| MOD541 | Textile and Garment Comfort | 3+0 7.5 |
| Human-Garment-Environment Interactions; The Concept of Textile and Garment Comfort; The Importance and Components of Textile and Garment Comfort; The Attitude and Expectations of Users Towards Textile and Garment Comfort; Classification of Comfort; Factors Affecting Textile and Garment Comfort; The Effect of Material, Manufacturing Technology and Material Construction on Comfort Properties; Comfort Properties of Textile Materials In the Form of Fibre, Yarn and Fabric; Garment Comfort Test Methods. | | |
| MOD543 | Applied Studies on Natural Dyeing | 2+1 7.5 |
| Sustainability Practices in Textile Dyeing; Principles and Current Status of Natural Dyeing; Sources, Types and Extraction of Natural Dyes; Definition, Classification and Use of Mordans in Natural Dyeing, Determination of Suitable Dyes for Cellulose, Protein and Synthetic Fibers and Relevant Pre-treatments, Extraction of Dyes; Preparation and Dyeing of Different Textile Materials, Optimization of Pre-treatment, Extraction, Mordaning and Dyeing Processes; Measurement of Fastness Properties; Making Proposals to Improve Fastness Properties | | |
| MOD545 | Art and Fashion Concept in Design | 3+0 7.5 |
| Art, Design and Fashion Throughout History; Art Movements: Modern art movements; Design Schools: Bauhaus, Arts and Crafts movement; The industrial Revolution and Development of Fashion Industry; Research on Fashion Movements and Fashion Styles: Anti-Fashion movements, The relationship of subculture fashion with art and design; Analysis of Interaction Between Art, Design and Fashion Throughout History; Evaluation of Research Results. | | |
| MOD592 | Seminar | 3+0 7.5 |
| MOD701 | Research in Area of Specialization | 3+0 4.5 |
| MOD702 | Research in Area of Specialization | 3+0 4.5 |
| MOD790 | Thesis | 0+1 30.0 |
| PLT501 | Aircraft Performance and Operation Analysis | 3+0 7.5 |
| Basic Definitions: Standard atmosphere, General performance requirements, Forces acting on an aircraft and axis; Symmetrical Steady State Flight: Horizontal flight and cruise performance characteristics, Climb performance characteristics, Descend and glide performance; Take-off: Take-off distance and take-off performance characteristics; Landing: Landing distance and landing performance characteristics; Curvilinear Flight: Turn performance and characteristics, Climbing and descending turns, Helicoidal and spiral climb, Descend and spin, Spin recovery; Cruise Range and Endurance. | | |
| PLT503 | Aviation Research | 3+0 7.5 |
| History of Aviation Research: American aviation research, NASA and FAA, European aviation research and space strategy, Turkish aviation research; Needs for Aviation Research; Aviation Research and Development Vision; R&D Politics and Strategy; R&D Methodology; R&D Resources: Human resources, Finance, Technical infrastructure; Know-How, Regulations, etc.; Innovation and Entrepreneurship; Intellectual and Industrial Property Rights; R&D Culture and Education; R&D Organization and Cooperation; R&D Software; R&D Strategic Management; Relationship Between R&D and Economic Development; Innovations in Aviation Industry; Sample Research Studies. | | |
| PLT504 | Aviation Safety Cases | 3+0 7.5 |
| Classification of Factors Affecting Aviation Safety; Flight Operation-oriented Accidents: Flight crew, Communication and procedural errors; Aircraft-oriented Accidents: Design and material failures; Maintenance-oriented Accidents: Personnel | | |

PZL533 Integrated Marketing Communications in Sport 3+0 7.5

Sport and Communication; Concept and context of communication, Communication theories, Globalization and communication, Sport and media relation, Communication dimensions of marketing communication mix in sport, The process of IMC in sport. Applications of Marketing Communication Components in Sport; Sport public relation and management, Advertising activities in sport and management, Personal selling in sport, Sales promotion mix in sport and management, Direct marketing in sport, Sport sponsorship, Event management in sport. Sport Brand Communication; Case studies, Brand placement in sport. Marketing. Communication Planning Process in Sport.

PZL610 Consumer Behaviours 3+0 7.5

Introduction to Consumer Behaviour: Importance of consumer behaviour in marketing, Concept and characteristics of consumer behaviour, Interdisciplinary approach in consumer behaviour, Common pattern of consumer behaviour, Relationship between consumer behaviour and marketing strategy; Psychological Effects: Learning and memory, Motivation and interest, Perception, Manners and changing of manners, Personality, ego and lifestyle; Sociocultural Effects: Counselor groups, Family, Personal effects, Social class, Culture; Consumer Purchasing Process; Society and Consumer Behaviour: Protection of consumer and conscious of consumer.

REK501 Recreation Management and Techniques 3+0 7.5

The Concept of Recreation; Recreation Theories; Causes Affecting the Development of Recreation Activities; Recreation Management; Recreation Management Process; The Principles of Recreation Management; Recreation Organizations; Leadership in the Recreation Organization; Management Approaches to the Recreation Organizations; Indoor Recreation Management; Outdoor Recreation Management

RYL502 Entity in Charge of Maintenance and Certification for Railway Vehicles 3+0 7.5

Quality Management System; Maintenance Management; Relationship and Responsibilities and of Main Actors in ECM Certification Process; Main Actors Responsibilities in Operation of Railway Vehicles; Maintenance Management Systems Before ECM Regulation; ECM Business Models; Management; Maintenance Development; Fleet Maintenance Management; Maintenance Supply; Relationship Between ECM Functions; Purpose of Maintenance Workshop Certification; Certification Process; Checklist for Evaluation of Maintenance Workshops; Procedure Example.

RYL503 Certification of Railway Vehicles 3+0 7.5

Interoperability; TSI; Basic Requirements; ERA; OTIF; UTP; Subsystem; Interoperability Constituent; Actors in the Certification Process; EC Verification of Railway Vehicle as Subsystem; Certification Process of Railway Vehicle Constituents; Notified Body (NoBo); Nando; NB Rail; National Rules; Notif-IT; RDD; DeBo; DDGM; Evaluation Modules; Technical File; APS; Accreditation; ERADIS; NSA; National Vehicle Registration (NVR); IRIS.

RYL504 Energy Management in Rail Systems 3+0 7.5

Energy Terminology: Energy units, Exergy analysis, Energy saving; Measurement and Control: Thermal Value Measurement, Maintenance of Measuring Devices; Turkey and the World Energy Outlook on Renewable Energy; Energy Consumption in Rail Systems; Energy Saving: Comparison of fuels; Energy Efficiency: Energy Efficiency in Transportation; Energy Analysis; Energy Recovery in Rail Systems; Energy Analysis Applications in Rail Systems: Energy flow diagrams, Energy scanning / audit.

RYL505 Introduction to Railway Vehicle and Track Interaction 3+0 7.5

Relationship of Wheelset and Track; Characteristics of Wheel-Rail Contact Geometry; Vehicle Run in a Straight Track; Vehicle Run Through a Curve; Vehicles with Tilting Technology; Vehicle Guiding Through a Curve; Safety Verification Against Derailment; Rail Vehicle Suspension System; Mathematical Expressions of Suspension Elements .Mathematical Expressions of Suspension Elements. Mathematical Expressions of Suspension Elements.

RYL506 Urban Rail Transit System Design and Livable Cities II 3+0 7.5

Urban Rail Transit Stations; Urban Vehicle Units, Array and Configurations; Operations, Performance, and Costs: Vehicle/Train travel control and automation, Performance characteristics of rail modes, Rail transit costs; Urban Rail Transportation System Networks, Lines and Organizations; Operating Elements: Lines, networks, stops and stations, Vehicles, transportation units and fleet, Intervals and frequencies, Capacity, Travel time and speed; Rubber-Tired Rapid Transit; Present and Future Role of Rail Transit.

RYL507 Dynamics of Railway Systems 3+0 7.5

Introduction to Dynamic Analysis; Numerical Methods for Finding Dynamic System Response; Vehicle and Rail Models; Ray-Wheel Interaction: Geometric interaction, Normal interaction, Tangential interaction; Dynamic Response of a Wheel Set; Dynamic Response of a Rail Vehicle; Dynamic Response of Vehicle to Curve; Special Topics in Rail System Vehicle Dynamics; Experimental Study on Rail System Vehicles.

Railway Vehicle Suspension Systems; Function of Suspension Systems; Components of Suspension Systems; Dependent and Independent Suspension Systems; Semi-active and Active Suspension Systems; Air Spring Based Suspension Systems; Kinematic and Kinetic Analysis of Suspension Systems; Instant Rotational Centers; Response of Impact Loading in Suspension Systems; Modal Analysis of Suspension Systems; Linear and Non-linear Suspension Systems; Analytical Modelling of Suspension Systems; Analysis and Design of Suspension Systems.

RYL518 Selected Topics in Vehicle Design II 3+0 7.5

Introduction to Motor Vehicles; Locomotive, Railcar, Tramway and Metro; Rail-wheel Adhesion: Transversal and longitudinal adhesion characteristics, Hertz theory, Creep, Driving dynamics-adhesion relationship; Power Transmission: Mechanical, Hydrostatic, Hydro dynamical, Electrical, Gearbox and connection; Wheelset Drive for Different Drive Types and Different Loading Modes: Forces, Torsional and bending moments analysis; Bogie and Body Connections; Wheelset guiding and primary suspension, Secondary suspension, Wheelset drive systems: Carbody connection, Suspension, Strain analysis; Modern Locomotives and Light Rail Vehicles; Technical Layout Planning.

RYL519 Traction Control in Rail Vehicles 3+0 7.5

Basic Concepts: Traction, Braking, Power, Control; Ray-Wheel Interaction for Traction Control: Geometric interaction, Normal interaction, Tangential interaction; Traction Control and Holding Model in Braking; Introduction to AC and DC Motors and Drive Systems Used for Traction Control; Extraction and Investigation of Torsion Model for Traction Control and Braking of a Wheel Set; Traction Control Under Different Holding Conditions; Investigation of Longitudinal Movement of a Train Set by Traction Control.

RYL520 Vibration and Noise in Rail Systems 3+0 7.5

Vibration Analysis: Free, Damped, Forced Damped Vibration, Multi Degree Of Freedom Systems; Vibration Standards: International Standards for Machinery and Vehicles, International Standards for Railway Vehicles and Components; Vibration Isolation: Dynamic Damper, Isolator Selection; Driving Comfort and Vibration of Human Body: Vibration of Human Body and Related International Standards, Effects of Vibration on Human Body; Vibration Measurement; Vibration Measurement and Maintenance Planning; Noise in Rail Systems: Noise Sources, Railway Noise, Noise Measurement, Preparation of Noise Maps, Noise Barriers.

RYL521 Shell Structures 3+0 7.5

Shell Buckling Behavior and Design Criteria; Shell Modeling; Material Assumptions; Geometric Tolerances and Imperfections; Rules for Plastic Limit Assessment; Rules for Buckling Limit Evaluation with Numerical Analysis; Rules for Buckling Limit Assessment Using Design Stress; Evaluations for Some Special Shell Structures Operating Under Different Load Cases: Cylindrical shell structures, Conical shell structures, Spherical shell structures.

RYL522 Image Processing Applications in Rail Systems 3+0 7.5

Introduction; Detectable Faults on Railways: Wheel defects, Rail cracks and surface defects, Sleeper cracks and misalignment; Change Analysis; Signal Sampling and Quantization; Perspective; Digital Images: Binary, Gray-level, Color, Multispectral; Image Transforms: Geometric transformations, Intensity transformations; Image Restoration: Linear and non-linear filters, Spatial and frequency domain image restoration; Edge detection; Corner detection; Morphological operations; SIFT- keypoints; Object Recognition: Preprocessing, Feature extraction, Bag of words, K-means clustering, Fisher linear discriminant classifier, Naive Bayes classifier, Support vector machines.

RYL523 Tractive Systems 3+0 7.5

Basic Principles; Mechanics of Railway Transportation; Under Vehicle Design and Drive of Traction Vehicles; Brushed Traction Motors and Their Controls; Synchronous Traction Motors and Their Controls; Asynchronous Traction Motors and Their Controls; Electric Traction Vehicles for Main Service Line; Multi-System Traction Vehicles; Commuter and Light Rail Traction Vehicles; Brake Technology; Power Supply of Power Lines.

RYL524 Sensors and Actuators in Railway System 3+0 7.5

Expectations of system; Differences Between Open-loop and Closed-loop system; Introduction of Sensors and actuators; Important Parameters of Sensors; Temperature Sensor and Comparison; Magnetic Sensors; Mechanical Sensors; Hall Effect Sensors; Pressure and Strain Transducers and Strain Gauge; Audio Sensors; Hydraulic and Pneumatic Actuators; Types of Motors: DC and AC motors

RYL525 Signal Processing in Railway Systems 3+0 7.5

Definition of Signal Processing; Sampling; Analog-to-Digital and Digital-to-Analog Signal Transformations; Conversion From Time Domain to Frequency Domain; Signal Processing Methods for Vibration Analysis; Signal Processing Methods for Noise Analysis; Multidimensional Signals and Introduction to Image Processing; Image Processing Methods for Fault Diagnosis; Introduction to Data Classification Methods; Fault Classification; Introduction to Wavelet Transforms; Wavelet Transforms for Fault Diagnosis; Signal Processing Methods for Driver Safety; Signal Processing Methods for Analysis of Driver Behaviours.

- RYL526 Corrosion and Surface Treatment 3+0 7.5**
Corrosion, Principles of Corrosion; Types of Corrosion; Corrosion processes and Their types (chemical, physical, electrochemical); Types of Corrosion attacks; Particular Corrosion Environments. Corrosion Reactions a Corrosion Cells; Corrosions by Stray Current; Electrochemistry Protections; Electrochemistry Cells; Corrosion Resistance of Non-ferrous Metals. Corrosion of Glass and Plastics; Surface Threatment - Metallic Surface Coatings, Electroplating, Non-metallic Surface Coatings, Enamelling, Organic Coatings (paintings), Paintings Testing; Non Conventional Surface Treatment - Diffusion coatings, PVD, CVD, Anodizing, Plastics Coatings; Corrosion Resistant Steels.
- RYL527 Optimization in Railway Systems 3+0 7.5**
Introduction to Optimization: Fundamentals, Models, Exact Solution Methods; Introduction to Metaheuristic Optimization; NP-hard problems, Necessity of Metaheuristic Optimization, Fundamentals; Single-solution based optimization algorithms: Simulated Annealing Algorithm, Tabu Search Algorithm, Implementation and Application to the Railway Systems; Evolutionary Algorithms: Fundamentals, Genetic Algorithms, Ant Colony Algorithms, Bee Colony Algorithms, Programming Algorithm and Application to the Railway Systems.
- RYL528 Durability of Railway Materials 3+0 7.5**
Examination of the Durability of Railway Materials and Its Plasticity; Breakdown Models of Materials; Fatigue Limits of Materials and Brittle fracture; Structural and Mechanical Characters of Materials; Choosing Suitable Rail Materials; Types of Railway Steels and Its Comparison; Wear, Fatigue and Breakdown Mechanism of Railway Steels; Methods for Improving Railway Steels and Its Limitations
- RYL530 Transportation of Dangerous Goods on Railways 3+0 7.5**
Definition of Dangerous Goods; Accidents in the Transportation of Dangerous Goods; National and international regulations on the Transport of Dangerous Goods on Railways; RID General Structure; RID Hazardous Material Classes; Packing Groups and Types of Dangerous Goods; Marking and Labeling of Packages; Types of Transportation of Dangerous Goods; Loading of Dangerous Goods and Characteristics of Transport Vehicles; Marking of Vehicles Carrying Dangerous Goods.
- RYL531 Tribology of Wheel - Rail 3+0 7.5**
Introduction to the Wheel - Rail Interface; Basic Tribology of the Wheel - Rail Contact; Contact Mechanic of the Wheel - Rail; Friction and Wear Simulation of the Wheel - Rail Interface; Rail Materials; Wheel Materials; Wear and Fatigue of Railway Wheels; Rail Wear; Fatigue of RailRail Damages; Rail Welds; Effect of Contaminants on Wear, Fatigue and Traction; Wheel - Rail Isolation; Maintenance of the Wheel - Rail.
- RYL532 Electric Machines in Railway Systems 3+0 7.5**
Induction Machines: Constructional properties, Equivalent circuit models of induction machines, Performance evaluation, Speed control techniques, Motor characteristics, Methods of starting induction motors, Linear induction motors; Traction Motors for Railway Vehicles; Single Phase Machines; Direct Current Machines: Constructional properties, Equivalent circuit models of direct current machines, Commutation and auxiliary poles, Compensation windings; Rotating Field Theory; Synchronous Machines: Equivalent circuit models of synchronous machines, Generator and motor operating conditions, Steady state power and angle characteristics.
- RYL533 Data Analysis and Machine Learning in Rail Systems 3+0 7.5**
Safety, Reliability, Quality and Test Data in Rail Systems; Introduction to Data Analysis; Fundamentals of Probability; Probability Distributions; Univariate and Multivariate Distributions; Estimation Theory; Maximum Likelihood Method; Supervised Learning; Linear Regression; Decision Trees; Artificial Neural Networks; Unsupervised Learning; Clustering; Principal Component Analysis; Hidden Markov Models; Bayesian Decision Systems; Importance of Data Analysis in Rail Systems; Machine Learning Applications in Rail Systems
- RYL534 High Voltage Technique 3+0 7.5**
Introduction to High Voltage Engineering; Conduction and Breakdown in Gases, Conduction and Breakdown in Liquid Dielectrics, Breakdown in Solid Dielectrics, Corona Discharges, Applications of Insulating Materials; Generations of High Voltages and Currents, Measurements of High Voltages and Currents; Overvoltage Phenomenon and Insulation Coordination in Powersystems; Non-destructive Testing of Materials and Electrical Apparatus; High Voltage Testing of Electrical Apparatus, Design, Planning and Layout of High Voltage Laboratories.
- RYL535 Introduction to Railway Systems I 3+0 7.5**
Rolling Stock and Equipments; Bogie and Wheels; Vehicle Suspension Systems; Wheel Arrangement; Pantographs; Maintenance Depots and Workshops; Basics of Brake Technology; Automotic Air Brake Systems; Straight Air Brake Systems; Brake Calculations; Track Infrastructure; Track Superstructure; Ballast; Sleepers; Rail; Rail Welding; Rail Fastenings; Curves; Turnouts; Gauging; Railway Engineering Structures; Viaducts; Bridges; Tunnels; Track Maintenance.
- RYL536 Introduction to Railway Systems II 3+0 7.5**

Railway Electrification Systems; Catenary Equipments; Maintenance of Overhead Lines; Railway Signaling Systems; Block Systems; Train Control Systems; ERTMS; ATS; Railway Communication Systems; Railway Traffic Systems; TSI; TMI; Railway Transportation; Urban Rail Transit Systems; International Standards and Regulations; Liberalization and Restructuring of the Railway Sector.

RYL537 Soil Improvement and Seismic Slope Stability Analysis 3+0 7.5

Importance of Soil Improvement in Civil Engineering Applications; Soil Improvement Techniques: Deep compaction, Dynamic compaction, Preload, Stone column, Injection techniques, Compaction piles, Jet grouting, Deep mixing, Soil improvement by lime, cement and bitumen, Electro osmosis, Sand drain, Reinforcement concrete piles; Slope Stability and Geometric Definitions; Effects of Slope Movement; Slope Stability Analysis Methods; Geotextiles and Geosynthetics in Slope Stability.

RYL538 Infrastructure and Soil Dynamics in Rail Systems 3+0 7.5

Soil Structure and Texture; Earthquakes; Dynamic Loading and Vibration Principles: Fundamentals, SDOF Systems, Two DOF Systems and Basics of Wave Propagation; Stress-strain Behavior and Strength Properties of Soils Under Dynamic Loading; Shear Strength of Soils Under Dynamic Cyclic Loading; Behavior of Soils and Site Amplification; Elastic Behavior; Non-Linear Behavior; Soil Liquefaction and Analysis; Effects of Liquefaction and Liquefaction Related Settlements.

RYL539 Soil Investigation and Soil Mechanics in Risky Fields 3+0 7.5

General Definitions in Soil Mechanics; Soil Samples; Soil Classification and Index Properties: Soil moisture content test, Determination of soil consistency using the Atterberg Limits, Determining volumetric shrinkage of soil, Sieve analysis, Hydrometer test, Determining of soil density in situ, Specific gravity and relative density tests, Compaction-standard proctor test, Consolidation test, Permeability test, California Bearing Ratio test (CBR), Compressive strength test, Shear box test, Triaxial test.

RYL540 Transportation Economics 3+0 7.5

Fundamental Economic Concepts: Necessities, Goods and Services, Production Costs; Effect of Transportation on Economic Growth; Features of Transportation Industry; Sub-Systems of Transportation; Functions of Transportation; Supply, Demand and Equilibrium in Transportation; Factors Affecting Transportation Demand; Methods of Transportation Demand Forecasting; Internal and External Costs in Transportation Industry; Pricing in Transportation Industry; Transportation Policies in European Union; Criteria in the Selection Process of Transportation Systems and Analysis of Utility and Cost; Transactions of Transportation Systems with the Environment.

**RYL541 Condition Assessment of Railway Ballast by Ground Penetratin Radar 3+0 7.5
(GPR) Method**

Railway Infrastructure; Functions of Ballast; Clean and Fouled (Spent) Ballast; Condition Monitoring Methods of Railway Infrastructure; Ground Penetrating Radar (GPR): History of GPR, Basics and fundamental working principles of GPR; Applications of GPR, Relative dielectric permittivity constant; Ballast Assessment with GPR: Distinguishing between clean and fouled ballast and maintenance/repair thresholds, Analysis of a case study from a sample railway infrastructure investigated by GPR, Determination of railway segments to be maintained, repaired and/or renewed as a result of analysis findings.

RYL542 Historical Development of Railways 3+0 7.5

Railway in the Ottoman Period; Ottoman Railway Construction Process; Stations; Locomotives; Passenger and Freight Wagons; Railways of Republic Period; Development process; Railways after 1950; Current state; Transportation Policies; Overview of Logistics, Railway Logistics, Overview of Rail Systems in Various Cities, Railway Logistics, Overview of Rail Systems in Various Cities.

RYL543 Field and Laboratory Tests of Soils Under Dynamic Loading 3+0 7.5

Fundamentals of Dynamic Loading; Geotechnical Soil Properties; Low Strain Tests: Seismic reflection test, Seismic refraction test, Suspension logging test, Steady-state vibration test, Spectral analysis of surface waves test, Seismic cross-hole test, Seismic down-hole and up-hole test, Seismic cone test, Resonant column test, Ultrasonic pulse test, Piezoelectric bender element test; High Strain Tests: Standard penetration test, Cone penetration test, Dilatometer test, Pressuremeter test, Vane shear test, Shear wave velocity test, Cyclic triaxial test, Cyclic direct simple shear test, Cyclic torsional shear test; Model Tests: Shaking table tests, Centrifuge tests.

**RYL544 Investigation of Railway Infrastructure by Nondestructive Condition 3+0 7.5
Monitoring Methods**

Investigation Methods of Railway Infrastructure; Features of Nondestructive Methods: Advantages, disadvantages, application fields; Falling Weight Deflectometer Method; Sonic Echo Method; Impulse Response Method; Parallel Seismic Method; Ultrasonic Pulse Velocity Method; Ultrasonic Echo Method; Infrared Thermography Method; Spectral Analysis of Surface Waves Method; Ground Penetrating Radar (GPR)

| | | |
|--|--|----------------|
| RYL545 | Introduction to Finite Element Analysis | 3+0 7.5 |
| <p>Linear Algebraic Equations; Review of Basic Mechanical Knowledge; Shape Functions: Shape functions in global coordinate systems, Shape functions in local coordinate systems; Equation of Motion and Virtual Work; Linear Spring element; Two Node Axial Elements: Assembling of element matrices, Transformation matrix, Boundary conditions and reaction forces; Torsion element: Boundary conditions and reaction forces; Bending and Frame Element: Two node element, Assembling of element matrices, Boundary conditions and reaction forces, Frame element; Two dimensional elements.</p> | | |
| RYL546 | Detection Methods of Railway Infrastructure Deformations, Maintenance and Renewal Methods | 3+0 7.5 |
| <p>Railway Infrastructure; Functions of Ballast; Clean and Fouled (Spent) Ballast; Condition Monitoring Methods of Railway Infrastructure; Ground Penetrating Radar (GPR): History of GPR, Basics and fundamental working principles of GPR; Applications of GPR, Relative dielectric permittivity constant; Ballast Assessment with GPR: Distinguishing between clean and fouled ballast and maintenance/repair thresholds, Analysis of a case study from a sample railway infrastructure investigated by GPR, Determination of railway segments to be maintained, repaired and/or renewed as a result of analysis findings.</p> | | |
| RYL548 | Business Management in Railway Systems | 3+0 7.5 |
| <p>Rail Systems and Types, Emergence of Railways, Development in Turkey and the World; Definitions and Terms Used in Railways; Definition and Characteristics of Train, Classification of Trains, Definition and Types of Stations, Numbering of Stations, Numbering of Shears, Numbering of Trains, Order of Trains; Domestic Goods Transportation Provisions; Introduction and Issue of Transport Document; Calculation of Transportation and Other Fees, Applications; (COTIF) Uniform Rules for the International Carriage of Goods (CIM-Annex B of the Convention); Some International Railway Organizations and Conventions.</p> | | |

SHA511 Aircraft Performance And Operation Analysis I 3+0 7.5

Fundamental Definitions-Standard Atmosphere; General Performance Conditions-The Forces Effecting Aircraft and Axis Sets; General Flight Motions and Equations; Symmetric, Permanent; Rectiling Flight Motion-Flight Performance Characteristics Horigantal; The Cruising Flight Performance Characteristics; The Climbing Motion and Climbing Performance Characteristics; Descending Motion and Descending Performance Characteristics; Take-Off Motion-Take Off Length and Take Off Performance Characteristics; Landing Motion-Landing Length and Landing Performance Characteristics; Curved Path Flight Motion; The Bend Motion and Bend Performance Characteristics; Studies on the Curved Climbing and Descending Motions-Helisel and Spiral Climbing; Descending and Vrille; The Travel Length; The Travel Time.

SHA513 Oil Analysis Program in Aircraft Maintenance 3+0 7.5

Introduction: Lubrication, Features of Lubrication Oil; Oil Contamination; Different Test Methods; Spectrometric Oil Analysis Program (SOAP); Spectrometric Oil Analysis Techniques; Detectable Failures By SOAP; Important Subject Related to Sample Analysis at Oil Analysis Laboratories; Ferro graph; Ferro graphic Analysis; The Use of SOAP Together With Ferro graph; Importance of Determining the Wear With Oil Analysis; Efficiency of Different Analysis Techniques in Determining the Wear.

SHA515 The Effects of Construction Techniques Aircraft on Performances of Light 3+0 7.5

Introduction; Construction of Light Aircraft; Wing structure; Fuselage Structure; Power plant; Empennage; Landing Gear; Equipment; Typical Construction Materials Used in The Light Aircraft; Wood; Metals; Composite Materials; Basic Performances and Factors Affecting Basic Performances; Basic Performances; Effect of Changing Wing Structure; Effect of Changing Engine Weight; Effect of Changing Engine Power; Examination of the Construction and Performance Features.

SHA524 Modern Control Systems 3+0 7.5

State Variable Analysis of Control Systems: State Variables; State Concept; State Equations; Transfer Matrix; Solution of Time Invariant State Equations; Linear Time Varying Systems; Discrete Time Systems; Controllability and Observability; Controllability and Observability of Linear Dynamic Equations; Output Controllability; Obtaining State Equations in Canonical Forms; Design of Control Systems in State Space; Pole Placement; Observer Design; Optimal Control Problems; Performance Index; Selection of Performance Index.

SHA525 CNS-ATM Systems 3+0 7.5

CNS-ATM Concept: CNS-ATM concepts and stages of development, Global and regional plannings, Communication Systems; Present and future communication systems, Data link communications, Aeronautical Telecommunication Network (ATN), Navigation Systems; Present and future navigation systems, Performance Based Navigation (PBN), Required Navigation Performance (RNP), Surveillance Systems; Present and future surveillance systems, Automatic Dependent Surveillance (ADS), Air Traffic Management (ATM); Air Traffic Services (ATS), Air Traffic Flow Management (ATFM), Airspace Management (ASM), Human factors and ATM Automation, CNS-ATM Applications; FANS 1/A applications, Studies on capacity increasing, ADS and CPDLC applications.

SHA531 Industrial Aerodynamics 3+0 7.5

Wind Energy Resources; History of Wind Energy Appliances; Types of Wind Turbines: Horizontal Axis Wind Turbines, Vertical Axis Wind Turbines, Aerodynamics of Horizontal-Axis Wind Turbines: Betz Limit, Rotor Disk Theory, Angular Momentum Theory, Maximum Power, Rotor Blade Theory, Blade Geometry; Wind Potential Determination; Wind-Turbine Performance and Availability; New Developments and Trends on Wind Turbine Energy.

SHA535 Helicopter Theory and Flight Principles 3+0 7.5

Types of Aircraft; Basic Laws of Mechanics and Aerodynamics; Blade and Rotor; Lift and Drag of a Rotor Blade; Center of Pressure of a Rotor Blade; Forces Acting on a Rotating Blade; Total Rotor Lift (Thrust); Dissymmetry of Lift; Flapping Motion; Lift Control; Collective Pitch; Cyclic Pitch; Tail Rotor; Aerodynamic Behavior of a Rotor Blade; Vortex; Ground Effect; Autorotation; Limits of Rotation Speed; Helicopter Flight Principles; Hover; Forward Flight; Required Power; Flight Ceiling.

SHA536 Flight Control System Design 3+0 7.5

Flight Control; Control Surfaces; Flight Control Systems; The Equations of Motion of an Aircraft; Axis Systems; Linearized Equations of Motion; State and Output Equations; Transfer Function; Aircraft Stability and Dynamics; Longitudinal

Stability; Static and Dynamic Stability; Transfer Functions Related to Longitudinal Motion; Short Period and Phugoid Approximation; Lateral Stability; Transfer Functions Related to Lateral Motion; Control System Design; Generalized AFCS; Parameter Optimization; Stability Augmentation Systems; Actuator and Sensor Dynamics; Longitudinal and Lateral Control.

SHA537 Exergy Analysis 3+0 7.5

1st Law of Thermodynamic: Closed systems; Control Volumes; Energy Balance; 2nd Law of Thermodynamic: Heat machine; Reversible and Irreversible States; 2nd Law Analysis For Control Volumes; Entropy: Entropy Change of Pure Substances; Entropy Change of Ideal Gas; Isentropic Efficiency; Entropy Balance; Exergy: Change of Exergy; Exergy Transfer; Exergy Balance; Chemical Reactions: Stoichiometric Combustion; Thermochemistry; Second Law; Exergy and Irreversibility; Work Production From Chemical Reactions; Chemical Exergy of Fuels; Energy Analysis; Exergy Analysis.

SHA538 Flight Procedures And Airspace Design 3+0 7.5

Conventional Procedures; Area Navigation (RNAV) procedures; RNAV/ Barometric Vertical Navigation; Departure and Approach Procedures for Required Navigation Performance (RNP) Approved Systems; RNP Holding Procedures; Airspace: Criteria for Airspace Sectorisation, Sector Capacity; Terminal Airspace Design: Terminal Airspace Configuration, The Function of Terminal Airspace, Sectorisation of Approach Control and Terminal Airspace, Traffic Flow, The Establishment of SIDs and STARs, Methodology for Terminal Airspace design.

SHA539 Advanced Aerodynamics 3+0 7.5

Basic Relations: Continuity, Momentum and Bernoulli Equations; Potential Flow Theory: Ideal incompressible flow, Stream function, Basic types of flow; 2-D incompressible flow around cylinder: Circulation and lift, General thin airfoil theory, Symmetrical and cambered profiles; Incompressible Flow around Slender Wings: Vortex system, Effect of swept wing, Delta wings, Wing and fuselage configurations; Compressible Flow: Basic definitions, Energy equation, Adiabatic and isentropic flows, Shock waves; Transonic flow: 2-D transonic flow, Transonic flow around wings; Supersonic flow; Unsteady Aerodynamics.

SHA541 Current Issues in Gas Turbine Engines 3+0 7.5

Basic Notions: Classification and structure of gas turbine engines, General definitions; Exergy Analysis: Calculations, Application for gas turbine engines; Methods For Improving Efficiency Of Gas Urbine Engines; Methods For Improving Thrust Of Gas Urbine Engines; Vibration: Basic notions, Devices and cursors used for analysis; Noise; Corrosion; Emission Analysis For Gas Turbine Engines; Gas Turbine Engines Of Unmanned Aerial Vehicles; Auxiliary Power Units (APUs).

SHA543 Parametric Cycle Analysis of Aircraft Propulsion System 3+0 7.5

Introduction; Propulsion; Air-Breathing Engines; Thermodynamics Review; Compressible Flow; Classification of Aircraft Gas Turbines; Factors Effecting Thrust; Thrust Force; Engine Performance Parameters; Steps of Engine Parametric Cycle Analysis; Ideal Turbojet; Ideal Turbojet with Afterburner; Ideal Turbofan; Ideal Mixed Turbofan with Afterburner; Ideal Turboprop engine; Ideal Turboshaft Engine; Component Performance; Variation in Gas Properties; Inlet and Diffuser Pressure Recovery; Compressor and Turbine Efficiencies; Burner Efficiency; Exit Nozzle Loss; Component Figures of Merit; Parametric Cycle Analyses of Real Engines; Real Turbojet; Real Turbojet with Afterburner; Real Turbofan with Separate Exhaust Stream; Real Turbofan with Afterburning-Mixed Exhaust Stream; Computer Programing for Cycle Analysis.

SHA545 Fuzzy Logic Applications in Aviation 3+0 7.5

Introduction to Fuzzy Logic; History of Fuzzy Logic; Overview of Fuzzy Logic; Fuzzy Sets; Classical Control Systems; Fuzzy Systems; Fuzzification and Membership Functions; Rule-Base; Data Base; Defuzziciation; Middle of Maximum Method; Centroid Method; Fuzzy Control; Examples of Fuzzy Control; Applications of Fuzzy Logic; Application of Air-Condition; Application of the Inverted Pendulum; Control of Final Approach of the Aircraft; Application of the Flight Controls; Application of The Longitudinal Control of the Aircraft; Application of the Longitudinal Controller; Application of the Flap.

SHA547 Flight Tests and Instrumentation 3+0 7.5

Fundamentals; Phases of Flight Tests; Flight Performance Tests: Pitot static system performance; Stall speed determination; Level flight performance; Excess power characteristics; Turn performance and agility; Climb performance; Descent performance; Take-off and landing performance; Standard mission profiles; Design of Instrumentation: Factors influencing instrumentation system design; Basic elements of instrumentation; Flight Tests Applications.

SHA548 Experimental Aerodynamics Analysis for Incompressible Flow 3+0 7.5

Introduction; Fundamental of Aerodynamics; Aerodynamics Forces and Moments; Dimensional Analysis; Flow Similarity; Types of Flow; Applied Aerodynamics; Models of Fluid: Control Volume and Fluid Elements; Continuity Equation; Momentum Equation; Energy Equation; Incompressible and Compressible Flows; Fundamentals of Incompressible Flow; Bernoulli's Equation; Incompressible in Duct: The Venturi and Low-Speed Wind Tunnel; Pitot-tube: Measurement of Airspeed; Measurement Equipment for Aerodynamics Experiments and Experimental Error; Flow Over a Circular Cylinder;

Flow over Airfoils; Incompressible Flow over Finite Wings; Pressure Distribution and its Evaluation on the Aerodynamics Shapes; Boundary Layer Measurement; Velocity and Pressure Measurement over Finite Wings; Aerodynamic Analysis of Some Industrial Shapes

SHA549 Gas Turbine Combustion 3+0 7.5

Introduction; Combustion and Thermochemistry; First Law of Thermodynamics; Ideal Gas Mixture; Adiabatic Flame Temperature; Second Law of Thermodynamics; Chemical Equilibrium; Introduction to Mass Transfer; Chemical Kinetics; Simplified Conservation Equations For Reacting Flows; Introduction to Turbulent Flows; Premixed Turbulent Flames; Turbulent Nonpremixed Flames; Fundamentals of Aircraft Gas Turbine Combustor Design; Combustors for Low Emissions; Heat Transfer Mechanism for Combustors.

SHA550 Preliminary Design of Unmanned Air Vehicle and Its Propulsion System 3+0 7.5

Introduction; Unmanned Air Vehicles; Engine Types Used in Aeronautics; General Utilization Limits of Engines; Engine Selection by Mission Profile; Basic Parameters of Engine Design: Flight and aircraft system parameters, Design constraints, Design choices; Parametric Cycle Analysis of Engines: Component behaviour and efficiencies, General engine performance output parameters; Unmanned Air Vehicle Sizing; Performance Calculations for Unmanned Air Vehicle.

SHA551 Airline Operations and Scheduling 3+0 7.5

Planning Optimization: Networks, Network flow models, Shortest path problem, Minimum cost flow problem, Maximum flow problem, Multi-commodity problem, Integer programming models, Set covering/partitioning problems; Flight Scheduling: Hub-and-spoke, Route development and flight-scheduling process, Load factor and frequency; Fleet Assignment: Indicator definitions, Mathematical model; Aircraft Routing: Maintenance requirements, Mathematical model; Crew Scheduling: Crew pairing, Crew pairing mathematical model, Crew rostering, Crew rostering mathematical model.

SHA552 Experimental Methods and Data Processing Techniques for Turbomachinery 3+0 7.5

Introduction; Description of Measurement Chain and Its Components; Terminology Associated with Measurement Techniques; Pressure Measurement Techniques; Temperature Measurement Techniques; Velocity Measurement Techniques; Measurement of the Flow Angle; Optical Measurement Techniques; Classification of the turbine test rigs, Flow field measurements; Performance Measurement of Basic Engine Components; Fundamentals of Statistics; Frequency Analysis; Data Processing of Periodic Signals; Uncertainty analysis.

SHA553 Air-conditioning Systems for Aircraft 3+0 7.5

Introduction; Air-conditioning and Ventilation; External and Environment Conditions; Effects of Cabin Internal Conditions on Staff, Device and Hardware; Thermodynamics Conditions, Temperature, Humidity, Pressure; Indoor Air Quality, Comfort Parameters, Psychometry; Heat Loads in Aircrafts, Heat Stress Indices, Thermal Comfort for Heat Balance; Thermal Loads on Aircraft Cabins; Heat Balance in Flight Cabin, Air Distribution and Velocity, Fog and Permeability; Air-conditioning Systems in Aircrafts; Air Flow Open Systems and Closed Systems; Vapor-compression Refrigeration Systems; Environmental Control Systems in Aircrafts.

SHA554 Aviation Lighting Technics 3+0 7.5

Fundamentals of Photometric and Radiometric Quantities; Interior and Exterior Lighting; Lighting Calculations; Importance of Lighting in Aviation: Visual performance, Energy and cost effectiveness; Lighting Parameters: Lighting level, Uniformity, Luminance distribution, Glare, Colour temperature, Colour rendering; Lamps; Luminaires; Lighting Used in and on Aircraft; Airport Lighting: Public areas, Runways, Taxiways; Inspection and Maintenance of Lighting in Aircraft; Visual Illusion.

SHA555 Airport Information and Communications Technology Service Management 3+0 7.5

What is Information Technology Infrastructure Library: Service design, Service transition, Service operation; Airport Information Technology Infrastructure: Network systems, System rooms, Telecommunications, Database systems, Integrations, Message flow; Computer Applications of Airports: Flight info systems, Operational database, Resource management, Common use systems, Revenue management; Helpdesk Design: Service Level Agreements, Support system suggestions.

SHA556 Mathematical Programming in Air Transportation 3+0 7.5

SHA557 Multidisciplinary Research Topics in Aviation 3+0 7.5

Scientific Research Methods; Indexes and Search Engines; Journals and Classifications; Peer Review and Editorship; Mini and Micro UAV Technologies; Bio-Inspired Drone Design; Sustainability Indicators for Aviation; Green Airports and Technologies; Electrical-Hybrid Aircrafts and Fuel Cells; Battery Management Systems; Management Strategies and

Cost Concepts; Time Value of Money Operations; Interest Calculations; Single Sums of Money; Series of Cash Flows; Multiple Compounding Periods in Year; Continuous Compounding; Equivalence; Variable Interest Rates; Consideration of Inflation; Principle Amount in Loan Payment; Measuring the Worth of Investments; Methods of Measuring Investment Worth; Capital Recovery Formula; Comparison of Alternatives; Defining Investment Alternatives; Defining the Planning Horizon

SHA608 Optimization Methods in Flight Mechanics 3+0 7.5

Maximum and Minimum Theory, Maximums and Minimums of Multi Variable Functions, Lagrange Multipliers; Optimization; Optimization Conditions of Performances in Steady State Flight; Turns in Level Flight; Maximum Rate of Climb in a Constant Radius Helicoidal Climb; Maximum Bank Angle in a Helicoidal Climb; Minimum Radius of Turn in a Helicoidal Climb; Maximum Angular Velocity in a Helicoidal Climb; Calculation of Flight Altitude for Maximum Level Flight Speed; Maximum Range for a Given Flight Altitude; Optimization of Rate of Descent in a Helicoidal Descent; Minimum Flight Path Angle in a Helicoidal Descent.

SHA614 Airport Design 3+0 7.5

Airport Planning; Airport System Planning Airport Master Planning; Airport Site Selection; Airport Characteristics Related to Airport Design; Airport Capacity; Forecasting in Aviation and Airport Planning; Airport Configuration; Geometric Design of the Airfield; Passenger Terminal Design; Air Cargo Terminal Design; Heliports; STOL Ports and Vertiports; Airport Lighting and Marking; Structural Design of Airport Pavements.

SHA615 Advanced Mechanical Vibrations 3+0 7.5

Non-dispersive Behaviour of Uncoupled Vibrations; Pure Torsional Vibrations; Pure Shear Vibrations of Beams; Dispersive Behavior of Uncoupled Vibrations; Transverse Vibrations of Euler-Bernoulli Beams; Transverse Vibrations of Timoshenko Beams; Dispersive Behaviour of Uncoupled Vibrations, Approximate Solutions; Transverse Vibrations of Euler-Bernoulli Beams; Free Wave Propagation in Uniform, Infinite and Periodic Structures.

SHA617 Sliding Mode Control Theory 3+0 7.5

Switching Strategies for Linear Time-invariant (LTI) Systems; Driving LTI Systems Into the Sliding Mode and Making Them Track Desired Trajectory; Chattering and its Elimination; Relay Control; Robustness; Modeling Errors; Disturbances; Switching Hierarchy in MIMO Systems; Driving Nonlinear Systems Into the Sliding Mode and Making Them Track Desired Trajectory; Two-Link Robot Arm Example; MATLAB Implementation of Sliding Mode Control Techniques; Discrete Time Sliding Mode Control.

SHA618 Fault Tolerant Flight Control System Design 3+0 7.5

Introduction; Some Aircraft Accidents and Importance of Fault Tolerant Control; Fault Tolerant Control; Definitions and Concepts; Fault Detection; Fault Isolation; Reconfiguration; Methods Used in Fault Detection and Isolation; Full-Order Observers; Reduced-Order Observers; Unknown Input Observers; Fault Detection Using Observers; Fault Isolation Using Observers; Fault Detection Using Unknown Input Observers; Fault Isolation Using Unknown Input Observers; Kalman Filter; Flight Control System; Equations of Motion And Pitot Static System; Sensor and Actuator Fault Detection; Isolation and System Reconfiguration in Flight Control System; State Estimation; Fault Detection; Isolation and System Reconfiguration In Flight Control System Using Unknown input Observers; Practical Applications

SHA619 Cogeneration -Combined Heat Power Systems 3+0 7.5

Thermodynamic Principles of The Combined-Cycle Plant; Otto Cycle; Carnot Cycle; Diesel Cycle; Rankine Cycle; Brayton Cycle; Combined Cycle Concept; Single -Pressure Cycle; Preheating; Dual-Pressure Cycles; Triple-Pressure Cycle; Triple-Pressure Reheat Cycle; Application of Combined-Cycle; Combined Heat Power Systems's Components; Gas Turbine; Heat Recovery Steam Generator; Steam Turbine and Other Components; Comparison of Thermodynamic Performance of Combined Heat Power Systems; Economic Analysis of Cogeneration.

SHA620 Aircraft Performance and Operational Analysis II 3+0 7.5

Fundamental Definitions, Limit Airspeeds; Limit Loads; Structural Maximum Weights; Flight Maneuvering Envelope; Engine Limitations; Take-off Performance And Limitations, Factors Effecting Take-off Performance; Cruise Performance, Cruising Speed, Range And Endurance, Factors Effecting Cruise Performance; Landing Performance And Limitations, Factors Effecting Landing Performance; Weigh And Balance, Determination of The Center of Gravity; Mission Profile; Operational Analysis of The Mission Profile Phases; Flight Preparation; Fuel Calculations; Airworthiness Regulations.

SHA621 Advanced Gas Thermodynamics 3+0 7.5

Basic Concepts: Maxwell correlations, Clapayron equation, Internal energy, Entropy, Enthalpy, Equations of state, Joule Thomson coefficient; Changes of Thermodynamic State in Gases, Enthalpy Change in Real Gases, Entropy Changes in Real Gases, Gas Behaviors, Formation Entropy in Gases; Combustion Analyses in Reactive Systems, First Law Analysis, Second Law Analysis; Phase and Chemical Balance in Combustion, Chemical Balance and Analyses in Gases, Phase Balance in Gases.

SHA625 Fatigue of Thermal Barrier Coating Systems 3+0 7.5

Introduction to Gas Turbine Engines: Principles of Operation; Compressor; Combustion Chamber; Turbine; Thermal Efficiency; Introduction to Thermal Barrier Coating Systems: Substrate; Bond Coat; Thermally Grown Oxide; Top Coat; Materials Used in Thermal Barrier Coating Systems; Coating Techniques: Thermal spray; PVD; CVD; Gas Turbine Engine Applications; Microstructure of Thermal Barrier Coating Systems; Testing of Thermal Barrier Coating Systems: Isothermal ageing tests; Thermal Fatigue Tests; Thermal Mechanical Fatigue Tests; Isothermal Low Cycle Fatigue Tests; Hardness Tests; Creep Tests; Thermal Conductivity Tests.

SHA626 Genetic Algorithms and Applications of Control Systems 3+0 7.5

Introduction to Genetic Algorithm; Traditional Optimization Techniques; The Goals of Optimization; Genetic Algorithms as a Optimization Process; How are Genetic Algorithms Different From Traditional Methods; A Simple Genetic Algorithm; Theoretical Basis of Genetic Algorithms; Basic Theorems; Computer Coding of Genetic Algorithms; Reproduction; Crossover; Mutation; Some Applications of Genetic Algorithms; Application Areas of Genetic Algorithms in Control Systems.

SHA627 Sizing of Propeller-Driven and Jet-Powered Aircraft 3+0 7.5

Performance Objectives; Sizing Procedure; Speed Prediction; Airport Performance; Stall Speed; Landing/Take-Off Performance; Climb Performance; Cruising Performance; Aircraft Lift-Drag Characteristics; Engine Characteristics; Cruise Matching; Off-Design Cruise Operation; Aircraft Matching; Take-Off and Climb Calculation; Gross Weight Estimation; Weight Relationships; Useful Weight Fraction; Gross Weight Estimation; Range and Fuel Fraction; Aircraft Sizing.

SHA628 Airspace Management 3+0 7.5

The Concept of the Flexible Use of Airspace; Flexible air Space Management and Civil/Military Coordination; Airspace Management Levels; Flexible Airspace Structures And Procedures; Strategic Level; Conditional Routes; Temporary Segregated Areas; Pretactical Level: Airspace Management Cell Authority; Airspace Allocation Process; Harmonization of Airspace Management/Air Traffic Flow Management; Centralized Airspace Data Function; Tactical Level; Operational Requirements; Technical Support; Air Traffic Services Organization; Publication of Air Space Management Information; Airspace Use Plan; Updated Airspace use Plan; Conditional Route Availability Message.

SHA629 Non-Destructive Inspection Methods for Aircraft Maintenance 3+0 7.5

Advantages of Non-Destructive Inspection in Aircraft Maintenance; Capacity of Non-Destructive Inspection Methods for Structural Defects; Special Non-Destructive Inspection Methods; Non-Destructive Inspection of Aircraft Elements; Fuselage; Wings; Tail Group; Landing Gear; Power plants; Inspection of Circular Holes With or Without Fasteners; Inspection of Bolts and Rivets; Inspection of Corrosion and Fatigue Defects; Inspection of Thermal and Impact Defects; Inspection of Composite Structures.

SHA630 Current Issues in Gas Turbine Engine Combustion Systems 3+0 7.5

Basic Notions: Classification and structure of gas turbine engines, General definitions about fuel systems; Low NOx Combustion Systems; Knocking In Combustion Chambers; Catalytic Combustion Systems; Methods for Improving Efficiency In Combustion Chambers: Water injection, Vapour injection; Noise In Combustion Chambers And Methods For Preventing; Hydrogen Utilization In Aviation; Fuel-Cell Utilization In Aviation; Synthetic Gas Fuel (Syngas) Utilization In Aviation; Biofuel Utilization In Aviation.

SHA631 Aerothermodynamic Optimization of Aircraft Propulsion Systems 3+0 7.5

Classification of aircraft gas turbines; Turbojet engines; Turboprop; Turboshafft engines; Propfan engines; Advance ducted engines; Factors effecting thrust; Introduction; Thrust force; Jet nozzle; Air speed; Air mass flow; Altitude; Ram Effect; Engine performance parameters; Propulsive efficiency; Thermal efficiency; Propeller efficiency; Overall efficiency; Take off thrust; Specific Fuel consumption; Aircraft range; Range factor; Specific thrust; Optimization of turbojet engine cycle; Thermodynamic analyse; Ideal cycle; Real cycle; Afterburner effect; Optimization analyses of turbojet cycle; Optimization of high bypass turbofan engine cycle; Thermodynamic analyse; Ideal cycle; Real cycle; Optimization of high bypass turbofan cycle; Optimization analyses of turbofan engine with afterburner cycle; Thermodynamic analyse; Ideal cycle; Real cycle; Optimization analyses of afterburner turbofan engine cycle; Optimization analyses of turboprop and turboshafft engine cycle; Thermodynamic analyse; Ideal cycle; Real cycle; Optimization analyses of turboprop and turboshafft engine cycles

SHA632 Free Flight Concept and Analysis 3+0 7.5

Definition and Concept Description; Environment; Scheduling; Routing; RTCA Workshop Report; Free Flight with Airborne Separation Assurance (ASAS); User Preferred Separation Assurance; User Preferred Local Traffic Flow Management Conformance; ASAS with Cockpit Display Traffic Information; Overview on Conflict Detection and Resolution Methods; State Estimation and Conflict Detection; Conflict Resolution Methods; Flight Rule Evolution and Optimization Process.

| | | |
|---|--|-----------------|
| SHA633 | Operational Risk Management in Aviation | 3+0 7.5 |
| Basic Concepts Related to Risk Management in Aviation Operations; The Culture of Safety-Risk-Reporting; Evaluation of Primary and Secondary Risks in Operations; Data Collection and Assessment for Risk Management; Risk Matrix and Analysis of Probability and Severity; Operational Risk Tools and Techniques; Bow-Tie Risk Analyze Tool; Elimination of Risks; ALARP Principle in Aviation; Problem and Scenario Based Practices for Operational Personnel. | | |
| SHA634 | Project Management in Aviation | 3+0 7.5 |
| SHA635 | Trending Topics in Unmanned Aerial Vehicle Technology | 3+0 7.5 |
| Introduction to Unmanned Aerial Vehicle Technology; Classification of UAVs; UAV Missions; Target UAVs; Lighter Than Air UAVs; Importance of Modularity in UAVs; Morphing UAV Structures; Amphibious UAVs; Solar Powered UAVs; Hydrogen Fuelled UAVs; Bio Inspired UAVs; Micro Rotary Wing UAVs; Micro Fixed Wing UAVs; Swarm Technologies in UAVs; Formation Flight of UAVs; Flying UAVs with Motion Control. | | |
| SHA636 | New Approaches in Air Traffic Management | 3+0 7.5 |
| SHA637 | Performance Analysis of Aero Engines | 3+0 7.5 |
| Air Vehicle: Aircrafts, Helicopter/Chopper, Unpowered Airvehicle, Unmanned Aerial Vehicles; Aero Engines: History and Development, Engine Types, Engine Simple Drawing; Aviation Performance Metrics: Specific Fuel Consumption, Specific Impulse/Power/Thrust, Overall Pressure Ratio, Thermal Limiting, EGT limiting; Energetic Performance Metrics: Enthalpy Limiting, Energy efficiency, Energy Losses Ratio; Exergetic Performance Metrics: Exergy Efficiency; Waste Exergy Ratio, Fuel Exergy Waste Ratio, Productivity Lack Ratio, Exergetic Improvement Potential, Environmental Effect Factor, Sustainability Index. | | |
| SHA638 | Network, Fleet and Schedule Planning in Aviation | 3+0 7.5 |
| SHA640 | Single Score Life Cycle Assessment (LCA) | 3+0 7.5 |
| SHA642 | ICT Project Management for Airports | 3+0 7.5 |
| PMI Project Management Method: Initiation, Planning, Monitoring, Control, Close out; Scope of Airport IT Project: Scope of work, Grouping the sub systems, Definition of the specifications; Managing of: Budget, Integration, Risk, Quality, Tests; System Installations and Commissioning: Hierarchy in between systems, Integrations of the systems, System tests, ORAT - Operational Readiness and Transfer. | | |
| SHA692 | Seminar | 3+0 7.5 |
| SHA790 | Thesis | 0+1 30.0 |
| SHA890 | Thesis | 0+1 30.0 |
| SHA890-0 | Thesis (Thesis Proposal) | 0+1 30.0 |
| SHY508 | Air Traffic Management | 3+0 6.0 |
| History of Air Traffic Control and International Authorities; Air Traffic Management Definitions and Components: CNS/ATM concept, Air traffic control services, Alerting services, Information services, Air traffic flow management, Airspace management; Elements of Air Traffic Control System: Airspace, Technique equipment, Staff, Aero plane; Operational Air Traffic Management: Air traffic management functions, Organization, Planning-control, Co-ordination; Capacity and Efficiency: Recent problems and solution techniques in air traffic management, Simulation models and SIMMOD; Free Flight Concept; EATCHIP Programme. | | |

SHY517 Aviation Safety Management 3+0 7.5
Safety Fundamentals; Factors Affecting Aviation Safety; Human Factors: SHEL model, Factors affecting human performance; Error Management Models: Reason model, Threat and error management model; Resource Management Programs: Communication, Leadership, Team work, Stress management, Conflict management, Situational awareness; Improving Safety Culture of Aviation Organizations; Safety Management System; Accident and Incident Investigation; Case Studies.

SHY527 Air Transportation Economics 3+0 7.5
The Concept of Air Transportation Economics; Structure of Air Transportation Industry; Economic Regulations in International Air Transportation Industry; Supply, Demand and Balance in Transportation Service; Market Structure and Competition; Airline Costs; Traffic Forecast and Capacity Management; Network Management: Network design; Scheduling; Fleet management; Tariff Structure and Pricing; Revenue Management; Airline Operations Performance; Case Studies: Network carriers; Low cost carriers; Other models.

SHY529 Cost Management in Aviation Companies 3+0 7.5
Introduction to Cost and Management Accounting; Cost Concepts: Definition of cost; Variable; fixed; and mixed costs; Cost Behavior and Cost Allocation; Activity Based Costing; Cost Volume Profit Relationship; Profit Planning and Budgeting; Overview to Cost Management Systems in Services; Cost Elements of Airlines and Airports; Cost Control Techniques; Cost Analysis and Assessment in Aviation Industry; Relevant Costs and Decision Making; Management Control Systems and Performance Measurement; Case Studies.

SHY531 Crisis and Risk Management in Aviation 3+0 7.5
Concepts of Crisis and Risk Management; Understand the Linkage Between Crisis, Risk Management and Organization; Effect of Ethics; Corporate Governance; Internal Control and Regulation; Risk Management Policy and Framework Development; Risk Management Principles and Methods; Identify Risks; Risk Situation is Influenced by Human-behavior and Culture within the Firm; Develop the Competencies and Capabilities to Both Manage Risk and Crisis; Crisis Management; Develop and Implement Organization-based Framework Models for Aviation Organizations; Best Practice of the Process are Investigations.

SHY534 Service Marketing in Airline Industry 3+0 7.5
The importance of the concept of service and the service sector; Airline industry and services; Classification of services; Airline marketing mix and elements of product; Distribution and price; Promotion and advertising; Sales promotion; Public relations; Personal selling and direct marketing; Personnel; Airline service and the customer; Physical evidence; Capacity and demand management; Service quality; Service encounters and real life experiences; Relationship marketing.

SHY536 Aviation and The Environment 3+0 7.5
The State of Aviation Industry; ICAO, EASA, ACI, SHGM latest trends, developments and challenges on environment; Regulatory Framework; Overview of regulatory issues; International and national bodies involved in the development of aviation environmental policy; Operational Measures; Managing the growing demand and increasing adverse traffic impacts; Economic Measures; The role of external costs and economic measures on environmental policy; Technological Measures; Technological advancements and approach to environmental issues; Social, Economic and Environmental Impact; Social and economic contributions of aviation related activities and main environmental impacts of each actor in this industry; Environmental Management System; Guidelines for developing airline and airport environmental management systems; Sustainable Aviation; Contributions of Aviation to sustainable development; Environmental vision for the near and far future; Case studies among aviation stakeholders.

SHY538 Case Studies in Aviation Management 3+0 7.5
Airline Business Models; Traditional Carriers, Low Cost Carriers, Regional Carriers, Unscheduled Carriers; Airline Competition and Competitive Strategies; Boeing and Airbus Competition; Relationship between Airports and Airlines; Airline Markets in Selected Countries; Current Issues in Airline Management; Airline Alliances; Successful Cases in Airline Industry.

SHY540 Air Transportation Management 3+0 7.5
Concept of Air Transportation; History of Air Transportation Industry; Cost and Production Analyses; Airline Infrastructure; International Economy and Aviation; Open Skies and Global Alliances; Structure of Air Transportation Market; Pricing and Revenue Management; Low Cost Carriers; Charter Airlines; Regional Airlines; Air Cargo Airlines.

SHY541 Marketing Management in Airlines 3+0 7.5
The Marketing Concept; Airline Industry-Marketing Environment; Airline Marketing and Features; Customer Marketing Strategies; Product in Airline Market Pricing and Yield Management; Distributing the Product; Airline Advertising and Promotional Policies; Brand Management in Airline Marketing; Evaluation of the Air Transportation Market.

SHY542 Financing Applications in Air Transportation 3+0 7.5
Financial Management Within Today's Air Transportation Industry; Accounting in Air Transportation; Finance Organization in Air Transportation; Financial Ratio Analysis in Air Transportation; Sources and Uses of Funds in air Transportation; Financial Control in Air Transportation; Cash Management in Air Transportation; Case Study 1; Case Study 2; Case Study 3; Case Study 4.

SHY544 Airport Safety, Operations and Management 3+0 7.5
Basic Concepts; Airport definition, Airport classifications; Airport Safety: Basic concepts of safety, Safety management; Airport Physical Characteristics: Runway, apron and taxiways, Markings and markers, Lighting; Airport Facilities and Services; Airport Operations: Passenger services, Ground operations and handling, Baggage operations, Ramp, Security, Cargo operations, ARFF, Crisis management, Emergency management, Snow removal, Air traffic services, Wild life management, Disabled aircraft; Airport Commercial Management.

SHY545 Operations Management in Aviation 3+0 7.5

SHY546 Management and Leadership 3+0 7.5
Management Concept and Functions; Management, Manager, Leader, Management functions; Overview of Leadership Theories; Traits approach, Behavioral leadership theories, Contingency leadership theories; Strategic Management and Leadership; Leadership in Empowerment and Empowerment Practices; Globalization and Leadership; Leadership Practices in Aviation Organizations; Case Analysis.

SHY547 Supply Chain Management in Aviation 3+0 7.5
Logistics and Supply Chain Concepts; Logistics Management; Scope of Supply Chain Management; Structure of Supply Chain and Models; Decisions of Supply Chain; Role of Supply Chain Management in Aviation Business; Integrated Supply Chain Management; Supply Chain and Inventory; Supplier Selection in Supply Chain Management; Reverse Supply Chain Management; Supply Chain Management Practices in Aviation: Airline companies, Airport operators, Ground handling companies.

SHY549 Strategic Management and Planning in Aviation 3+0 7.5
General View of Aviation Industry: Industry stakeholders, History, Regulatory framework, International and national policies; Concepts and Principles of Strategic Management and Planning for Civil Aviation; Transport Policy and Intersystem Coordination; Environmental Analysis in Aviation: Global, regional and national changes, Aviation and society; Strategic Analysis Techniques: SWOT; Strategic Planning and Strategic Thinking: Planning, Plan types, System plans, Master plans; Strategy Formulation: International and national industry level aviation strategies; Corporate, Business and Operational Level Strategies.

SHY551 Contemporary Approaches to Management 3+0 7.5
Concept of Management: Definition of management, functions; Evolution of Management Thought and Practices; Modern Management Approaches; Post-Modern Management Approaches; Core Competence and Competitive Advantage; Outsourcing; Restructuring of Organizations and New Organization Structures; Learning Organizations; Benchmarking; New approaches to Leadership; Total Quality Management; Knowledge Management; Innovation Management; Management in Digital Age: E-Business, Virtual organizations, Network organizations, Business models; Globalization and Strategic Alliances; Governance, Sustainability and Corporate Social Responsibility.

SHY592 Seminar 3+0 7.5

SHY609 Airport Planning 3+0 7.5
Airport Planning: Airport system planning, Airport master planning, Airport site selection; Impact of Aircraft Characteristics into Airport Design; Financing Airport Construction; Airport Capacity; Demand Forecasting Methods in Air Transportation; Airport Components and Layout; Geometric Design of Airport Airside; Design of Passenger Terminal; Design of Cargo Terminal; Heliport, STOL Port, and Vertiport.

SHY610 Airport Operations and Management 3+0 7.5
Airport Organizational Structure; Airport Revenues and Expenses; Airport Marketing; Service Quality and Its Measurement; Public Relations; Management of Passenger and Cargo Terminal Buildings; Ground Handling of Passengers and Baggage; Airport Capacity And Delay; Sustainable Airports Management; Social Impacts of Airports, Economic impacts of airports, Environmental impacts of airports; Environmental Management System; Airport Privatization; Airport Benchmarking.

- SHY612 Corporate Strategies in Aviation Business 3+0 7.5**
 The Nature of Corporate Strategy: Concepts and approaches; Concentration Strategies; Integration Strategies: Vertical integration and horizontal integration strategies; Diversification Strategies; Geographical Expansion Strategies: Internationalization and globalization strategies; Entry and Exit Strategies; Aviation Industry Analysis: Industry structure, Current trends and problems; Major Drivers of Corporate Strategy in Aviation Businesses; Corporate Strategy Formulation and Execution in Aviation Businesses; Case studies.
- SHY613 Fleet Planning and Aircraft Selection Practices 3+0 7.5**
 General specifications of airline transportation and importance of fleet planning: Structure of market, Types of fleet planning, Fleet planning elements, Fleet planning phases, Financial dimension of fleet planning; Determination of flight network and agreements; Factors IN aircraft selection in fleet planning; Aircraft specifications: Performance specifications, Aircraft characteristics, Technological specifications, Aircraft evaluation; Safety and maintenance in fleet planning; Fleet planning analyses and aircraft selection practices.
- SHY615 Current Marketing Practices Air Transportation 3+0 7.5**
 New Approaches to Airline Marketing; Postmodern Marketing; Value-Based Marketing; Market Orientation; Customer Satisfaction; Niche Marketing; Database Marketing; Direct Marketing; Internet Marketing; Customer Relationship Management; Mobile Marketing; Event Marketing; Social Marketing; Marketing Communications.
- SHY616 Current Management Practices in Air Transportation 3+0 7.5**
 Historical Development of Management Approaches and Practices; External Factors Affecting Air Transport Management Practices; Industry and Internal Dynamics of Air Transportation; 20th Century Management Philosophy and Practices in Air Transportation; 21st Century Management Philosophy and Practices in Air Transportation; Effects of Industrial Structure and Characteristics of Air Transportation on Management Practices; Successful Practices in Air Transportation; Relationship between Strategic Choices and Management Practices in Air Transportation; New Developments Affecting Air Transportation Management Practices; Air Transport Dynamics in the Future; Management Practices.
- SHY617 Simulation and Applications in Aviation 3+0 7.5**
- SHY619 Digital Transformation in Aviation 3+0 7.5**
 E-Business, E-Commerce, Digital Firm Concepts and Tools; New Digital Technologies; Ethical, Legal, Social, Cultural, Economic and Global Dimensions of E-Business; Management of Innovation and Technology; Knowledge Management in Aviation; E-Business Tools; Airline E-Business Applications; Airport E-Business Applications; E-Business Applications in Other Aviation Enterprises; Innovation in Aviation: Innovation Types, New business models; Opportunities, Threats and Problems of Digital Age; Case Studies.
- SHY620 Human Resources Applications in Aviation 3+0 7.5**
 Personnel and Human Resource Management; Human Resource Management Responsibilities; Human Resource Plannig: Factors in forecasting personnel needs; Job analysis; The Recruitment Process; The Selection Process; Building Employee Commitment; Orientation and socialization process; Training and Development; Performance Appraisal; Career Management; Comparation Management: Basic aspects of compensation, Basic factors in determining pay rates; Personel Discipline.
- SHY621 Airline Cost Analysis 3+0 7.5**
 Decision Making; Measurement of Operations in Service Industry; Cost Concepts and Classifications; Cost Elements of Airlines; Costing Methods; Cost Analysis Methods; Cost Analysis and Investment Decisions in Airlines; Network and routes costs, Fleet and aircraft selection; Price Decisions and Cost Analysis in Airlines; Performance Management and Cost Analysis in Airlines; Profit analysis for network and route, Aircraft operating costs and profit analysis, Staff cost analysis, Profit analysis for passenger; Cost Analysis Examples for Unexpected Events.
- SHY622 Airline Management Strategies 3+0 7.5**
 Fundamentals of Strategic Management; Fundamentals of Airline Business; Contemporary Management Approaches for Airlines; Costs and Revenues in Airlines; Positioning School for Airlines: Cost leadership strategy, Differentiating strategy, Focus strategy; Airline Business Models; Airline within Airline Strategy; Outsourcing as an Airline Strategy; Effects of the Liberalization on Airline Management; Strategic Airline Alliances; Airline Mergers and Acquisitions; Globalization of Airlines; Revenue Management of Airlines.
- SHY623 Micro Organization Theory and Aviation Practices I 3+0 7.5**
 The Main Paradigms of Organizational Behavior: Organization-human interactions; Individual Characteristics: Cognition, Perception and Individual decision making, Personality and Values, Emotions; Introduction to Organization: Socialization and Organizational Culture; Theories of Motivation; Leadership Theories; Groups and Teamworks; Organizational Policy;

Power and Influence; Stress; Positive Organizational Behaviors: Negative Organizational Behavior: Cases and Practices in Aviation Organizations.

SHY624 Organization Theory and Applications in Aviation 3+0 7.5

Overview of Organization Theory: Organization, theory and organization theory, Historical development of organization theory, Comparative organization theories; Contingency Theory; Resource Dependence Theory: Basic assumptions and basic concepts of resource dependence theory, Management of dependency relations in organizations; Organizational Ecology Theory: Organizational communities, Structural inertia and organizational change, Density dependence, Niche width dynamics, Demographic processes; Economic Theories of Organization: Transaction cost theory, Agency theory; New Institutional Theory; Postmodern and Critical Theory; Applications in Aviation Organizations.

SHY626 Change Management in Aviation 3+0 7.5

Aviation Industry; New Management Approaches in Aviation; Emergence of Change Management Concept; Chaos; Change Management and Aviation Industry; Case Study in Aviation in Change Management; Turkey Application Change Management, Change Management Practices Europe, Asia-Pacific Application Change Management, Change Management Practices in North and South America; Understanding Change Management; Change Management and the Future.

SHY628 Micro Organization Theory and Applications in Aviation 3+0 7.5

The Main Paradigms of Organizational Behavior: Organization-human interactions; Individual Characteristics: Cognition, Perception and Individual decision making, Personality and Values, Emotions; Introduction to Organization: Socialization and Organizational Culture; Theories of Motivation; Leadership Theories; Groups and Teamworks; Positive Organizational Behaviors: Extra role behaviors, Positive deviation and Organizational citizenship; Negative Organizational Behavior: Stress, Burnout and Counterproductive behaviors; Organizational Policy: Power and Influence; Practices in Aviation Organizations.

SHY630 Micro Organization Theory and Aviation Practices II 3+0 7.5

Recent Concepts in Organizational Behavior; Psychological Contract; Psychological Capital; Organizational Trust; Organizational Justice; Organizational Citizenship and Organizational Commitment Relationship; Emotional Labor; Mobbing; Organizational Silence and Organizational Cynicism; Burnout Syndrome; Organizational Alienation; Counterproductive Work Behaviors; Glass Ceiling Syndrome; Organizational Identification; Whistleblowing; Cases and Practices in Aviation Organizations.

SHY632 Airline Marketing Strategies 3+0 7.5

Marketing Thought and Strategic Thinking; Marketing Planning in Airlines; Industry and Competitive Analysis in Airlines; Measurement of Market Opportunities and Market Attractiveness Analysis in Airlines; Marketing Strategies for New Products in Airlines; Marketing Strategies for Growth Stage in Airlines; Marketing Strategies for Maturity Stage in Airlines; Marketing Strategies for Decline Stage in Airlines; Marketing Strategies for Market Positions in Airlines; Marketing Strategies to be Applied in Crisis Periods in Airlines; Strategic Control and Evaluation of Marketing Performance.

SHY692 Seminar 3+0 7.5

SHY790 Thesis 0+1 30.0

SHY890 Thesis 0+1 30.0

SHY890-0 Thesis (Thesis Proposal) 0+1 30.0

SPY501 Sport Management Approaches 3+0 7.5

Management, Basic concepts, Characteristic of sport activities; Historical Development of Management Science; Early Scientific Period, Scientific management, Movement of scientific management, Management process approaching, Bureaucracy approach; Human Relationship Approach: Research of Hawthorne, Studies of Harwood; Modern Management: System approach, Modern management approach; Sports Management: Basic concepts, Development of sport management, Sport management and manager, Planning in sport management, Organization of sport management, Leadership in sport management, Coordination and controlling in sport management.

SPY502 Sports Economy and Analysis 3+0 7.5

Importance of Economics in Effective Sport Management, Current Issues in Sports Economics, The Economist's General Approach to Issues, Basics Tools: Supply and Demand, Applying Supply and Demand: Optimal Ticket Pricing Strategies, Market Structures: Measuring the Competitiveness of an Industry; Industrial Organization of Sports: Identifying Revenues, Expenses, & Profits, Effects of Revenue Sharing on Team Behavior, Importance of Leagues, Monopolistic Practices of Leagues, Competitive Balance Issues; Labor Economics of Sports: What Determines Players' Salaries?, Attempts to Restrict the Competition for Players: Monopsony, Labor Unions and Labor Relations, Discrimination: Causes, Forms, and Effects; Public Finance and Sports: Competition for Teams across Cities.

SRM501 Ceramic Forming Techniques 3+0 7.5

Ceramic Powder Specifications and their Importance in Terms of Forming; Considerations for Selection of Suitable Forming Techniques; Forming Techniques; Dry Pressing; Isostatic and Semi-Isostatic Pressing; Slip Casting; Pressure Casting; Tape Casting; Extrusion; Injection Molding; Gel Casting; Forming and Densification Techniques; Hot Pressing; Hot Isostatic Pressing; Machining and Finishing Processes; Choosing the Right Equipment Depending on the Problem. Each Forming Technique is Explained as Follows; Advantages and Disadvantages; Selection of Suitable Processing Additives; Equipment; Product Properties; Cost; Possible Defects; Their Cause and Control.

SRM502 Rheological Behavior of Ceramics 3+0 7.5

Definitions of Colloids; Colloidal Systems and Importance of Interfaces; Electric Double Layer; Electrophoretic Mobility and Zeta Potential DLVO Theory and Stabilisation of Slurries; Processing Additives; Water, Organics; Surfactants; Deflocculants; Stability of Clay Systems; Effect of Anions and Cations; Flow and Deformation; Rheologic Behaviours; Pseudoplasticity; Dilatency; Thixotropy; Yield Point; Factors Affecting Viscosity; Practical Usage of Rheological Properties.

SRM503 Dielectric Materials and Devices 3+0 7.5

Transformations and Tensors; Crystals and Texture Symmetry; Curie Principle and Neumann's Law; Polar Tensors; Pyroelectricity; Permittivity; Piezoelectricity; Elasticity; Thermodynamics; Equilibrium Properties; Axial Tensors; Piezomagnetism; Magnetoelectricity; Pyromagnetism; Magnetic Symmetry-Time Reversal, Hysteretic Properties-Domains; Transport Properties; Thermal and Electrical Conductivity; Galvanomagnetic Phenomena; Thermoelectric Phenomena; Thermomagnetic Phenomena; Waves Acoustics and Optics; Optical Activity.

SRM506 Structure-Property Relationships in Ceramics 3+0 7.5

Introduction to Crystal Structure of Ceramics; Packing of Atoms and Ions in the Crystal Structures (e.g., Fcc, Hcp, Perovskite, Spinel, etc.) and Variation of Physical Properties of Ceramics as a Function of Atom Positions (e.g., Anisotropic Properties, etc.); Point, Line and 3-D Defect Formation in Ceramic Crystals (Ionic and/or electronic Disorders, Defect Chemical Reactions, etc.) and Influences of Those Defects on Physical Properties of Ceramics (e.g., Color and Color Centers, Gas Sensing Ability of Some Ceramics, etc.); Review of Microstructure Development in Ceramics (i.e., Sintering, Capillary Forces, Grain Size and Morphology, Removal of Pores from the Microstructure, etc.) and Influence of the Microstructure on Properties (e.g., Effects of Pore Size, Grain Size, or Grain Boundary on Mechanical, Thermal and Electrical Properties of Ceramics, Secondary Phase Effects on Physical Properties of Ceramics, etc.); Ceramic Materials Selection Criteria for Specific Applications.

SRM510 High Temperature Properties of Ceramic Materials 3+0 7.5

Basics; Chemical Bonds in Ceramic Materials and Their Effect on Mechanical Properties; The Parameters Effecting the High Temperature Properties of Ceramic Materials; High Temperature Properties of Ceramic Materials: Strength, Creep, Fatigue, Oxidation, Corrosion, Mechanical Wear; Application of Ceramic Materials for High Temperature; Improvement of High Temperature Properties of Ceramic Materials.

SRM513 Making of Heavy-Clay Products 3+0 7.5

Introduction; Heavy Clay Product; Building Bricks; Face Bricks And Engineering Bricks; Roofing Tiles; Hollow Floor Blocks; The Raw Materials For Brick And Tile Making; Preparation of Raw Materials; Shaping; Surface Treatment; Cutters; Drying; Firing; Treatment of The Finished Product; Measurement And Control Technology; Quality Control of Products; Planning of Heavy-Clay Plants; Future of Brick as a Building Material.

SRM517 Ceramic Body and Glaze 3+0 7.5

Classification and Production of Ceramics; Earthenware, Stoneware; Sanitary ware; Porcelain and Tiles; Body Composition; Methods of Body Preparation for Shaping in the Liquid; Plastic and Dry States; Glazing; Body-Glaze Relationship; Glaze Composition and Calculation; The Properties of Glazes; Special Glazes; Opaque; Matt; Crackle; Salt; Luster; Crystalline; and Aventurine. Ceramic Colors; Preparation and Application Ceramic Stains and Engobes; Glaze Defect and their Control.

SRM520 Ceramic Tiles and Sanitary ware Production 3+0 7.5

An Introduction to Ceramic Industry; Tiles: Wall Tiles, Floor Tiles, Porcelain Tiles; Raw Materials and Preparation, Milling and Granulation; Pressing, Glazing and Decoration; Sintering and Kilns; Frit Production and Glazes; Product

Characterization, Standards and Testing; Sanitary Ware: Products, Raw Materials and Preparation; Production Methods: Slip Casting, Pressure Casting; Slip Preparation and Slip Casting; Drying; Sintering and Kilns.

SRM521 X-Ray Diffraction Techniques in Materials Characterization 3+0 7.5

Importance of Materials Characterization; Importance of XRD Techniques in Materials Characterization; Techniques Used in Materials Characterization and their Difference; Electromagnetic Radiation; The Continuous Spectrum; The Characteristic Spectrum; Absorption; Filters; Production of X-rays; Detection of X-rays; Introduction of the XRD Device; Specimen Preparation Methods; Interpretation of XRD Spectra; Lattices; Crystal Systems; Symmetry; Primitive and Non-primitive Cells; The Stereographic Projection; The Stereographic Projection; Diffraction Theory I: Directions of Diffracted Beams; Diffraction; Bragg Law; X-ray Spectroscopy; Diffraction Directions; Diffraction Methods; Diffraction Under Non-ideal Conditions Diffraction Theory-II: Intensities of Diffracted Beams: Scattering by an Electron; Scattering by an Atom; Scattering by a Unit Cell; Structure Factor Calculations: Multiplicity Factor, Lorentz Factor; Absorption Factor; Temperature Factor; Intensities of Powder Pattern Lines;

SRM526 Ceramic-Metallic Thin Films and Coatings 3+0 7.5

The Semi-Classical Theory of Conduction in Metals and Ceramics and the Electronic Band Structure of Selected Metals and Ceramics; Dielectric Properties of Insulators; Magnetic Ordering; Films-Coatings and Surface Effects; Growth Modes and Zone Models for Coatings and Films; Plasmas; Magneto-Electronic and Mechanical Properties of Selected Metal and Ceramic Films and Coatings.

SRM528 Advanced Composite Materials 3+0 7.5

Introduction; Classification of Composites; Ceramic Matrix Composites; Nano-composites; Laminate Composites; Metal Matrix Composites; The Properties and Conditions Required for Matrix and Reinforcement Phases in Composite Materials; The Effects of Thermal Expansion Mismatch in Composite Materials; Fracture Strength of Composites; Mechanical Properties of Composites; Fracture Mechanisms of Composites; Toughening Mechanisms; Properties of Interfaces and Thermal Stresses; Thermal Shock Parameters; Stress-Strain Behavior of Ceramics with the Addition of Reinforcement Phase.

SRM592 Seminar 3+0 7.5

SRM599 Term Project 3+0 0.0

SRM602 Transmission Electron Microscopy and Interphase Boundaries 3+0 7.5

Importance of Interphase Boundaries; Classification of Interphase Boundaries; Low Angle Boundaries and their Properties; High Angle Boundaries and their Properties; Interphase Boundaries between Different Crystals; Interphase Boundaries between Metal and Ceramics; Techniques to Characterize Interphase Boundaries; Transmission Electron Microscopy; Energy Dispersive X-ray Spectroscopy; Parallel Electron Energy Loss Spectroscopy; Dark Field; Bright Field; Fresnel Defocus and High Resolution Imaging Techniques; Diffraction of Electrons.

SRM604 Ceramic Sensors 3+0 7.5

Physical-Chemical and Technological Principles of Ceramic Sensors; Physical and Chemical Bases of Ceramic Sensor Operation; Technological Principles of Ceramic Sensors; Ceramic Humidity Sensors; Semi Conductive Humidity Sensors; Pore Structure Control and Control of the Sensitivity of Ceramic Humidity Sensors; Testing and Stabilization of Ceramic Humidity Sensor Parameters; Ceramic Humidity Sensors Made of Solid Electrolytes; Ceramic Gas Sensors; Ceramic Alcohol Sensors; Ceramic Oxygen Sensors; Ceramic Sensors for Other Gases; Ceramic Temperature Sensors; NTC-Thermistors; PTC-Thermistors, CTR-Thermistors (Critical Temperature Resistors); Capacitive Ceramic Temperature Sensors; Ceramic Pressure Sensors; Multifunctional Ceramic Sensors; Application of Ceramic Sensors.

SRM606 Structural Advanced Ceramics 3+0 7.5

Importance of Structural Advanced Ceramics; Classification of Structural Advanced Ceramics; General Properties; Processing Techniques and Applications of Non-oxide Structural Advanced Ceramics; Examples for Non-oxide Structural Advanced Ceramics; Silicon Carbide; Silicon Nitride; Sialons, Boron Nitride; Boron Carbide; Aluminum Nitride; General Properties; Processing Techniques and Applications of Oxide Structural Advanced Ceramics; Examples for Oxide Structural Advanced Ceramics; Alumina, Mullite; Zirconium.

SRM608 Ferroelectrics Materials and Devices 3+0 7.5

Crystal Structure and Ferro Electricity; Origin of Spontaneous Polarization; Origin of Field Induced Strain; Electro Optic Effect; Applications of Ferroelectrics; High Permittivity Dielectric; Pyroelectric Devices; Piezoelectric Materials; Piezoelectric Resonance; Piezoelectric Transformers; Ultrasonic Transducers; Surface Acoustic Wave Devices;

Piezoelectric Actuators; Ultrasonic Motors; Electrooptic Devices; Wave Guide Modulators; PTC Materials; PTC Phenomenon; PTC Thermistors; Grain Boundary Layer Capacitors; Composite Materials.

SRM609 Scanning Electron Microscopy and Chemical Analysis Techniques 3+0 7.5

Introduction; What is the Importance of Microstructural Investigations?; What are the Reasons for the Use of Electron Microscopes; Which Techniques are Used for the Characterization of Microstructures; Specimen Preparation for Electron Microscopy; Interactions between Electrons and Specimen; Depth of Signals Produced as a Result of Interactions and their Use; Scanning Electron Microscopes (SEM) and its Parts; Chemical Analysis Techniques: Energy Dispersive X-ray Spectrometers (EDX) and Wavelength Dispersive X-ray Spectrometers (WDX); Parameters to be Known to Obtain Best Quality Images and Reliable Chemical Analysis; Comparison with Environmental Scanning Electron Microscopes (ESEM) and Other Techniques; Investigation of Different Materials in SEM.

SRM612 Crystal Anisotropy 3+0 7.5

Introduction and Overview; Permittivity; Polarization Mechanism; Dispersion and equivalent circuits; High Voltage Insulators; Electric Breakdown Mechanisms; Substrates and Packaging; Thick and Thin Film Processing; Resistance; Electronic Conduction; Fixed Resistors, PTC and NTC Thermistors, Varistors and Barrier Layer Capacitors, Humidity and Chemical Sensors; Ceramic Electrodes and Superconductors; Ionic Conduction and Batteries; Capacitors; Disk, tubular, Multilayer; Low k Ceramics: Temperature coefficient, Microwave dielectric resonators.

SRM614 Colloid Chemistry and Rheological Behaviour 3+0 7.5

Introduction to Colloid Chemistry and Classification; Colloidal Systems and Importance of Interface; Kinetic Properties; Surface Tension and Surface Energy; Gibbs Adsorption Equation; Adhesion, Cohesion, and Diffusion; Physical Adsorption by Solids; Physical Adsorption by Solids; Langmuir Isotherms; Freundlich Adsorption Isotherm; BET Adsorption Theory; Electrical Phenomena at Interfaces; Electrical Double Layer and Zeta Potential, DLVO Theory; Colloid Stability; Flotation; Surfactants; Wetting; Rheological Behaviour; Pseudo Plasticity; Dilatant Flow Behaviour; Thixotropy, Effective Parameters on Viscosity; Rheological Applications; Stability of Clay Based Mud; Slip Casting; Ceramic Glazes.

SRM692 Seminar 3+0 7.5

SRM790 Thesis 0+1 30.0

SRM890 Thesis 0+1 30.0

SRM890-0 Thesis (Thesis Proposal) 0+1 30.0

SYR512 Customer Relationship in Sport 3+0 7.5

Definition of Customer Relationship Management in Sports; Components in Customer Relationship Management in Sports; Characteristics of Customer Relationship Management in Sports; Customer Relationship Management Process in Sports; Strategies in Customer Relationship Management; Data Mining; Customer Orientation in Sports; Relationship Marketing; Purposes and Benefits of Customer Relationship Management in Sports; Electronic Customer Relationship Management in Sports; Fan Relationship Management; Electronic Fan Relationship Management; Relationship Quality Concept in Sports; Characteristics of Relationship Quality in Sports.

SYR513 Leisure and Recreation Analysis 3+0 7.5

Etymological Definitions of Leisure; Experiential Definitions of Leisure; Work and Leisure; Uses of Leisure: Essential elements of leisure, Abnormal leisure, Serious, casual and project-based leisure; Leisure and Consumption: McDonaldization or Ikeaization; Yin-Yang Theory in Leisure Researches: Qualitative and quantitative approaches, Uses of qualitative and quantitative approaches in recreation, Objective and subjective approaches; Life Style and Leisure.

SYR514 Brand Management and Sports 3+0 7.5

Changing Competition and Brand: Brand and Branding Process from Past to Present; Basic Concepts Related to Brand: Associations, Awareness, Image, Personality; Brand Management in Sports and Configuration: Brand identity planning models in sports, Communications strategies, Brand positioning in sports and factors affecting brand positioning; Brand Management in Sports and Integrated Communications: Features of sports consumers and brand, Corporate communications and brand management; Case Studies of Sports Brands.

- SYR515 Recreation Project Management 3+0 7.5**
 Project and Introduction to Project Management: What is project?, Classification of projects, What is project management?, The basic functions of project management, Project stakeholders, Project life cycle; Project Initiation: Project initiation document, Identifying stakeholders, Project kick off meeting; Project Planning: Time management, Planning process, Creating an effective project team, Types of cost, Budgeting, Risk management and planning; Execution of the Project; Project planning, Technical management and approaches, Quality management in project; Project Monitoring and Control: Establishment of project monitoring and control system, Monitoring and control of risks; Project Closure; Project closure formats, Sub-processes of project closure, Termination of the project.
- SYR516 Leisure Education in Theory and Practice 3+0 7.5**
 Introduction to Educational Sciences: Culture, Culturalization, Types of education, Teaching, Learning, Education and teaching program; Theoretical Perspective to Leisure Education: Relationship between education and leisure, History of leisure education, Leisure education need in society; Leisure Education Approaches and Applications; Leisure Education Components: Awareness, Motivation, Time management, Social interaction skills, Problem solving; Leisure Education in the World; Original Applications of Leisure Education; Scientific Studies on Leisure Education.
- SYR517 Theoretical Approaches on Leisure 3+0 7.5**
 Historical View on Leisure Education: Leisure in prehistoric ages, Leisure in ancient times, Leisure in middle age, Leisure in new and modern eras; Understanding of Leisure Concept: Time based approaches, Activity based approaches, Quality based approaches, Attitude based approaches; Leisure Theories: Flow theory, Self determination theory, Leisure constraints theory, Serious and casual leisure, Theories on politic ideological values of leisure; Scientific Studies on Leisure: Studies on leisure in the domestic literature, Studies on leisure in the international literature.
- SYR518 Research Methods and Applications in Sports Management and Recreation 3+0 7.5**
 Basic Concepts in Research: Knowledge, Science, Scientific method, Scientific research, Types of scientific research; Basic Concepts in Scientific Research: Assumptions, Structures, Proposition, Variable, Hypothesis, Assumption, Theory; Research Planning Principles: Defining the problem, Determining methods, Concepts related to the universe and sample, Data types and data collection methods, Data collection and organization; Reporting of Scientific Researches: Types of text writing, references and bibliography; Methods and Contents Used in Sports Management and Recreation Research; International Indexes, Publications and Case Studies in Sports Management and Recreation.678
- SYR519 Therapeutic Recreation Program and Practices 3+0 7.5**
 The Meaning and Importance of Recreation and Sport for the People with Disabilities; Variety, Reasons and Classification of the People with Disabilities; The Effects of Recreative Activities and Sport for the People with Disabilities; Sport and Recreative Activities: Recreation and sport practices for the people with intellectual disabilities, Recreation and sport practices for the people with orthopedic disabilities, Recreation and sport practices for the people with visual impairments, Recreation and sport practices for the people with hearing impairments; Examination of the Literature of Recreation and Sport Practices for the People with Disabilities.
- SYR520 The Therapeutic Recreation Leadership 3+0 7.5**
 Leadership in Therapeutic Recreation: The meaning of leadership; Basic Leadership Components: Leadership and Power, Basis for Leadership Power and Influence; Leadership Theories: Trait theories, Behavioral theories, Situational theories, Interactional theories; Leadership Styles: Principles and Methods of Leadership; Qualities and Traits of the Therapeutic Recreation Leader; The Role of the Therapeutic Recreation Leader: Individual and group leader, Recreational therapy groups and structure, Group elements and relationship, Group dynamic, Evaluation group, Principles for group leadership; Leadership, Activities and Program Planning in Therapeutic Recreation: Goal setting and activity selection, Specialized activities and treatment techniques; Strategies for Growth and Learning in Therapeutic Recreation Leadership: Motivational strategies, Instructional strategies, Growth promoting strategies. 905
- SYR521 Sport Consumer Behaviors 3+0 7.5**
 Introduction to Consumption: Types of consumption; Sports Consumption; Consumer behavior; Theories of Consumer Behavior: Classical Behavior Models, Modern Behavior Models; Consumer Behavior in Sports; Consumer Groups in Sports: Active sports consumers, Passive sports consumers, consumer of tangible sport products, consumer of sport events; Consumer Behavior Model and Components in Sport: External environment, Organizational / organizational environment, Customer context, Brand attitude, Buying behavior and behavioral intention, Post-purchase reactions-evaluations; New consumer trends.
- SYR522 Leisure and Ageing 3+0 7.5**
 Leisure and Time; The Importance of Leisure; Leisure Throughout Life Cycle: Lifestyle and leisure, Leisure need of older adults; The Ageing: Biological processes, Cognitive processes, Psychological ageing; Theoretical Perspectives on Ageing and Leisure Involment: Leisure patterns, Constraints and social support; The Importance of Leisure; Leisure Benefits on Ageing; The Leisure Experience: Meaning and motivations on ageing; Planning a Leisure Lifestyle: Leisure in retirement.

| | | |
|--|--|----------------|
| SYR523 | Leisure and Consumer Culture | 3+0 7.5 |
| Leisure Industry. In Consumer Society: Contemporary patterns, Leisure and Cultural structures. Participation in Leisure Activities: Identity, Gender, Social class, Race and Ethnicity effect. Evaluation of Participation Forms in Leisure Activities in Different Societies. Urbanization, Mass Media. Economic, Environmental and Political Analysis of Leisure Culture. 363 | | |
| SYR525 | Leisure and Healthy Living | 3+0 7.5 |
| Disadvantages of Still Life. Quality of Life and Sports of All Ages: The main goals of exercise, Scientific foundations of quality of life. Sport as a Leisure Tool. Effects of Regular Lifelong Sports Practices on Human Health; Aerobic exercise, Life-long sports applications. Exercise Examples: Obesity and exercise, Weakness and exercise, Children and sports. Exercise Programs That Can Be Recommended in Healthy Life Activities. | | |
| SYR592 | Seminar | 3+0 7.5 |
| SYR601 | New Trends in Recreation | 3+0 7.5 |
| SYR610 | Event Planning and Project Management | 3+0 7.5 |
| An Overview of Sports Events and Planning; Structure and Types of Sports Events; Development of Sports Organizations; Phases and Planning of Sports Organizations and Events; Project Management and Basic Terms Related to Project Management; Effective Project Management Techniques; Characteristics of Project Management and a Project Manager; Process of Project Management: Planning, Monitoring; Control Related Methods, Approaches, Applications; Project Teams; Project Budgeting. | | |
| SYR611 | Contemporary Approaches in Sport Management | 3+0 7.5 |
| An Overview of the Concept of Management; Concept of Organization and Its Importance; Classical and Neoclassical Management Approaches; Contemporary Management Approaches and Contingency Theory; System Approach; Characteristics of a System; System Model; Post-modern Management Theories; Transformational Management and Transformational Leadership; Learning Organizations; Coaching Style Management Approach; Charismatic Leadership Approach; Effects of Contemporary Management Approaches on Sports. | | |
| SYR612 | Modern Sport Marketing Applications | 3+0 7.5 |
| Paradigm Changes in Marketing; Analysis of Environmental Changes Influencing Marketing in the New Era; Projections Towards Sports Marketing; Newly Emerging Areas of Marketing in Sports Business; Relationship between Management and Customer Relationship Marketing (CRM) in Sport; Database Marketing and One-to-One Marketing; Data Mining Application in Sport Contexts; Consumer Behavior Models in Sports; Electronic and Mobil Sports Marketing Applications; New Sports Marketing Trends in the Future. | | |
| SYR614 | Risk Management in Sport Organizations | 3+0 7.5 |
| Relationships Between Sport Organizations and Risk Management; Identification of Risks; Valuation: Valuation of Risk; Decision Making and Risk Management; Problems in Risk Management; Developing and Implementing Risk Management; Medical Emergency Action Plans; Protecting Children; Lightning Safety; Drug Testing; Equipment, Premises, Construction and Supervision; Ground Safety; Insurance in Sports Activities and Its Applicability. | | |
| SYR615 | Strategic Sport Communication | 3+0 7.5 |
| Relationships Between Sports Management and Sports Communications; Growth and History of Sports Communication; Strategic Sports Communication Model (SSCM) in Sports Communication; Personal Sports Communications; Organizational and Leadership Communication in Sports; Integrated Marketing Communications in Sports; Publishing and Print Communication in Sports; Electronic and Visual Sports Communications; Online Sports Communication and New Sports Media; Social Media; Sports Advertising; Public Relations and Crisis Communication in Sports; Sports Communication Research. | | |
| SYR617 | Measuring Tool Development | 3+0 7.5 |
| Definitions of Questionnaire and Scale; Preparing Questionnaire and Scale; Performing Questionnaire or Scale; Determining Sample; Sources of Bias; Definition of Validity in Types: Content validity, logical validity, Concordance validity, Construct validity, Definition of Reliability; Reliability testing techniques and estimations, Item Analysis; Exploratory factor analysis: Assumptions and techniques, Factor loadings, Rotation techniques, Confirmatory factor analysis: Assumptions and techniques, Practice. | | |
| SYR618 | Recreational Leadership | 3+0 7.5 |

SYR619 Leisure Economics and Applications 3+0 7.5
 Economic Analysis of Organizations; Activity dimensions, Mass participation, Social dimensions. Economic Effects of Participation Dimensions; Modeling, Consumer preferences. Public and Private Sector Analysis; Theoretical and practical examples, Expenditure, Economic effects, Market structure, Pricing, Materials. Volunteers; Profile, Dimensions, Restrictions. Motivation Elements. Evaluation of Local Government Examples.

SYR621 Psycho-Social Issues In Leisure Research 3+0 7.5
 Relationship Between Psychology And Leisure: Personality and leisure, Subjective well-being and leisure, Satisfaction and leisure, Emotional disorders and leisure, Stress and the role of leisure in stress management; Relation of Sociology and Leisure: Gender and leisure participation, Socio-economic factors and leisure participation, Social problems and leisure participation; Psychosocial research with theoretical basis: Basic theories of psychology and leisure research, Basic sociology theories and leisure research; Specific Applications In Leisure-Time Psycho-Social Issues; Academic Research On Psycho-Social Issues For Leisure.

SYR623 Strategic Human Resources Management and Applications 3+0 7.5
 The importance of human resource management strategies in globalizing world; Analyzes and applications for people working in sports facilities; Case studies of recruitment strategies in sports facilities; Performance evaluation strategies and applications in sports organizations; Investigations related to employment and job areas in sports organizations.356

SYR625 Sustainability in Sport Management and Recreation 3+0 7.5
 Introduction to Sustainability: Basic dimensions of sustainability, environmental sustainability, social sustainability, economic sustainability, sustainable development; Relationship between Sport and Sustainability; Relationship between Sport Management and Sustainability; Sustainability in Sports and Recreation Activities; Sustainability in Sports Facilities: Sustainable facility management within the social, environmental and economic dimensions; Sustainable Approaches in Sports Organizations: sustainability practices in national and international organizations, case studies.

SYR627 Customer Relationship Management Strategies and Applications 3+0 7.5
 Analysis of the effectiveness of relational marketing; Effective relational marketing components; Analyzing strategies and practices related to customer relationship management; Six critical success factors in managing customer relations; Fan relationship management strategies in sports clubs; Examining the strategies and applications related to the management of electronic customer relations in sports organizations and introducing new ideas.

SYR629 Management in Therapeutic Recreation Services 3+0 7.5
 Therapeutic Recreation Management: Characteristics of management, Theories of management, Functions of management; Therapeutic recreation manager: Leadership, Leadership theories and styles, Integrative leadership, Vision, Mission, Philosophy and objectives, Organizational behavior in therapeutic recreation; Operational Management: Financial management and budgets, Decision making, Problem solving and conflict management, Therapeutic recreation and marketing; Human Resource Management: Effective communication, Motivation, Performance appraisal, Staff training and development; Consumer Management: Service delivery management, Risk management, Quality service management.

SYR692 Seminar 3+0 7.5

SYR790 Thesis 0+1 30.0

SYR890 Thesis 0+1 30.0

SYR890-0 Thesis (Thesis Proposal) 0+1 30.0

TAÇ701 Thesis Research Study Course 3+0 7.5
 Introduction: The Laboratory/Studio Facilities; Teaching Staff; Expectations from Graduates within the Framework of Qualifications for Master of Science; Interdisciplinary Studies and Their Importance; Laboratory/Studio Planning; Scholarships and Project Opportunities; Scientific Research projects, National and International projects/competitions, Industry oriented projects; Project Writing, Managing and Concluding; Determining a Research Question; Patent / Design

Registration Research and Writing; Scientific Databases; Journal's Impact Values and Importance; Writing Articles; Plagiarism Software Programs.

TAÇ701 (Eng) Thesis Research Study 3+0 7.5

Introduction: The Laboratory/Studio Facilities; Teaching Staff; Expectations from Graduates within the Framework of Qualifications for Master of Science; Interdisciplinary Studies and Their Importance; Laboratory/Studio Planning; Scholarships and Project Opportunities; Scientific Research projects, National and International projects/competitions, Industry oriented projects; Project Writing, Managing and Concluding; Determining a Research Question; Patent / Design Registration Research and Writing; Scientific Databases; Journal's Impact Values and Importance; Writing Articles; Plagiarism Software Programs.

TAÇ801 Thesis Research Study Course 3+0 7.5

Introduction: The Laboratory/Studio Facilities; Teaching Staff; Expectations from Graduates within the Framework of Qualifications for Phisopy of Doctorate; Interdisciplinary Studies and Importance; Laboratory/Studio Planning; Scholarships and Project Opportunities; Scientific Research Projects, National and International projects/competitions, Industry Oriented Projects; Project Writing, Managing and Concluding; Determining a Research Question; Patent/Design Registration Research and Writing; Scientific Databases; Journal's Impact Values and Importance; Writing Articles; Literature Review; Plagiarism Software Programs.

TAÇ801 (Eng) Thesis Research Study 3+0 7.5

Introduction: The Laboratory/Studio Facilities; Teaching Staff; Expectations from Graduates within the Framework of Qualifications for Phisopy of Doctorate; Interdisciplinary Studies and Importance; Laboratory/Studio Planning; Scholarships and Project Opportunities; Scientific Research Projects, National and International projects/competitions, Industry Oriented Projects; Project Writing, Managing and Concluding; Determining a Research Question; Patent/Design Registration Research and Writing; Scientific Databases; Journal's Impact Values and Importance; Writing Articles; Literature Review; Plagiarism Software Programs.

TER501 Advanced Thermodynamics 3+0 7.5

Summary of Thermodynamics: First Law of Thermodynamics, Second Law of Thermodynamics, Entropy, Analysis of The Second Law of Thermodynamics, Gas Power Cycles: Brayton Cycle, The Brayton Cycle With Regeneration, The Ideal Jet-Propulsion Cycle; Thermodynamic Property Relations; Gas Mixtures: The Ratio of Mole and Mass of a Gas Mixture, P-V Behavior of Gas Mixtures, Properties of Gas Mixtures; Gas-Vapor Mixtures and Air Conditioning: Dry and Atmospheric Air, Specific and Relative Humidity of Air; Chemical Reactions: Fuels and Combustion, Theoretical and Actual Combustion Processes.

UBE901 Research in Area of Specialization 5+0 7.5

UBJ701 Research in Area of Specialization 3+0 4.5

UBJ702 Research in Area of Specialization 3+0 4.5

UBJ901 Research in Area of Specialization 5+0 7.5

UBJ902 Research in Area of Specialization 5+0 7.5

UBM701 Research in Area of Specialization 3+0 4.5

UBM702 Research in Area of Specialization 3+0 4.5

UBM901 Research in Area of Specialization 5+0 7.5

UBM902 Research in Area of Specialization 5+0 7.5

UCS506 Methods of Numerical Analysis 3+0 7.5

Linear Transformations: Approximation and matrices; Linear Geometry: Lines and Vectors; Linear Geometry in Space and Perspective; System of Linear Equations: Gauss and Gauss-Jordan Elimination Methods; The Rank of a Matrix and The Simplex Algorithm; Basic Matrix Algebra: Matrix multiplication and its properties; Determinants; LU Factorization; The Key Subjects of the Linear Algebra; Linear Composition and Subspaces; Linear Independence; Basis and Dimension; Vector Geometry: Scalar Product; Angles and Projections; Vector Product; Eigenvalues and Eigenvectors; Eigenspaces and Diagonalization; Symmetric Matrices and Probability Matrix; Matrices and Linear Transformations; Change of Basis, Orthogonalization and The Least Square Method; Orthogonality and the Gram- Schmidt Orthogonalization Method; Orthogonal Projections.

UCS508 Interpretation and Analysis Techniques on Geographic Information Systems 3+0 7.5

The Quality of Graphic Data; Graphic Data Preparation for Analysis And Modeling Studies, Topological Analysis Applications: Neighborhood Relationship, Location Modeling Techniques; Raster and Vector Data Interactions with Database; Recoding Analysis on Raster and Vector Data; Physical Interactions Between Graphic Data: Union, Subtraction and Intersection and Neighborhood Relationship Between Vectorial Areas; Three-Dimensional Analysis and Modelling Techniques; Evaluation of the Data in Three-Dimensional Space; Data Interpolation Techniques In Two-dimensional (pixel) and Three-dimensional (voxel) Space Analysis and Modeling on Topographic Surfaces: Analysis of Slope, Aspect and Visibility, Evaluation of Elevation.

UCS511 Remote Sensing and Geographic Information Systems Techniques in Disaster Management 3+0 7.5

What is Natural Disaster?; Types of Natural Disaster: Flood, Landslide; Earthquake; Remote Sensing Applications after Disaster; The Relationship between Emergency Management and GIS at Disaster; Using of Disaster Related Data in GIS; Use of RS and GIS for Geotechnical Research Regarding Earthquake; Use of GIS in Seismic Risk Analysis; Use of GIS for Regional and Local Analysis; Use of GIS Before and After Earthquakes.

UCS512 Special Topics in the Natural Resources Management with the Use of GIS 3+0 7.5

Application of GIS for Different Natural Resources; Software and Hardwares Used for Natural Resources Management; Data Types for Geological and Mining Fields; Spatial Data Modelling: Raster Model, Vector Model; Attributes Used in Natural Resources; Spatial Data Structures in GIS; Use of Natural Resources Data in GIS; Using Different Formatted Data in the Same Project; Topology Concept; Map Analysis by Using GIS; Third Dimension in the Natural Resource Analysis; 3-Dimensional GIS; 3-D Modelling of Drilling Logs; 3-D Analyse and Interpretation.

UCS513 Special Topics on City Information Systems 3+0 7.5

General Concepts for Planning and Design Terms; City Planning System; Planning Information Systems; Data Resources: Raster data, Vector data, Surveys; Base Map for City Information Systems: The layers for base map production according to the study coverage, Base map production techniques using GIS capabilities, Thematic maps as base maps for city information systems; GIS Aided Decision Making Mechanisms For City Information System; Inventory Preparation For City Planning System, Important Analyses Techniques Used For City Information Systems; Computer Support On Decision Making Progress.

UCS514 Environmental Management and Integration With Geographical Information Systems 3+0 7.5

GIS Use for Air Quality Management: GIS Use for Air Pollution Inventory Studies; Preparation of Pollution Maps And The Clean Air Plans; GIS As A Tool For Water Quality Management; Water Quality Monitoring Studies On The Lake, River And Sea and Preparation of The Water Pollution Maps; GIS Use For Waste Management: Selection of the landfill area and monitoring of the pollution originating from the landfill area using GIS; Importance of the GIS applications for Solution of The Environmental Problems; GIS applications for Environmental Impact Assessment (EIA).

UCS519 Automated Mapping and Facility Management Systems 3+0 7.5

Computer Aided Two Dimensional Drawing Applications; Proper CAD Drawing Preparations Techniques for Geographical Information Systems: Drawing cleanup, Creating topology; Proper Geo-data Base Preparation for AM/FM Systems: Preparation of database, Linking the data; Surveying for mapping purposes; Application Development for AM/FM System: Application development for automated mapping, Application development for facility management; Examples for AM/FM System Studies.

UCS525 Digital Photogrammetry 3+0 7.5
Principles of Photogrammetry; Optics on Photogrammetry; Stereoscopic Vision; Principles of Stereo Photogrammetry; Preparation of Flight Plan to Take Aerial Photographs; Photogrammetric Triangulation; Digital Photogrammetry and Digital Map; Orthophoto.

UCS527 Multicriteria Decision Making Methods 3+0 7.5
Introduction to Multiple Criteria Decision Making Analysis; Components of MCDM Methods: Decision making concept and methodology, analytic hierarchy process and principles, analytic network process and principles; Combined Application of Geographic Information Systems (GIS) and Multiple Criteria Decision Making Methods; GIS and MCDM Applications on Environmental Decisions; Software Applications in AHP and ANP.

UCS533 Fundamentals of Mapping and Geographical Information Systems 3+0 7.5
Essential Definitions for Mapping; Surveying; Measurement Units; Angle Units; Arc Units; Unit Conversion; Scale; Measurement Errors and Reason of Error Increase; Simple Measurement Instruments and their Use; Area Calculation; Volume Calculation; Vertical Coordinate System; Projection; Map Sheet Names; Basic Map Features; Topographic Maps; Photogrammetry; Photogrammetry Applications; GPS Usage; Definition of Geographical Information Systems; Planning; Spatial Data Processes; Map Data and Elements; Digital Map; Layer Sense; Graphical Data and Properties; Topology; Elements of Topology; General Topology Concept; Topology Data Model; Analysis Functions; Classification; Feature Class Definition and Database; Database Approaches and Designing of a Database; Database terminology; Database models.

UCS534 Geostatistics 3+0 7.5
Probability; Normal Distribution Test; F Test; Variance Analysis; Chi-Square Test; Regression of Least Squares; Map Analysis; Geologic Maps; Distribution of the Points; Contouring; Trend Surfaces; 4 Dimensional Trend Surfaces; Moving Environments and Kriging; Comparison of the Maps; Data Analysis with Multiple Variables; Multiple Regression; Discriminant Analysis; Grouping Analysis; Factor Analysis.

UCS535 Integration of Geographic Information Systems and Global Positioning Systems 3+0 7.5
Introduction to Global Positioning System (GPS): Principals of System Operation; GPS Segments: GPS space segment, GPS control segment, GPS user segment; GPS Signal Structure; GPS Performance and Error Effects; Differential GPS; GNSS, GLONASS, GALILEO; Augmentation systems: WAAS, EGNOS, MSAS; GPS Navigation Applications: The utility of GPS on land, Navigation with GPS and a map, GPS navigation with or without a compass; Principals of Outdoor GPS Operation; The Use of Outdoor GPS and Applications; Evaluation of Received Data from GPS and Integration with GIS Graphical Database

UCS536 Remote Sensing 3+0 7.5
History of Remote Sensing; Database Structure ; Spectral Resolution; Basic Image Processing Analysis; Remote Sensing Methods; Parameters in the Visual and Digital Image Analysis; Model Building for Remote Sensing Projects; Remote Sensing Satellites; Material and Electromagnetic Wave Interaction in Remote Sensing; Spectral Reflectance Properties of Objects; Evaluation of Softwares and Hardwares for Remote Sensing; Properties of obtaining color images; Obtaining of screen view; Statistical Analysis Techniques for Remote Sensing Studies; Geometric and Radiometric Correction of Remote Sensor Data; Image Enhancement; Classification Techniques in Remote Sensing.

UCS537 Geographic Information Systems in Social Sciences 3+0 7.5
Thinking spatially in social sciences; Spatial analysis at individual and household levels: micro level spatial modeling; Neighborhood level analysis; Region level analysis; Spatial analysis of regional income inequality; The role of spatial analysis in demographic research; Geographical approaches in reconstructing past human behavior from prehistoric roadways.

UCS538 Geographic Information Systems and Health 3+0 7.5
Introduction to GIS and health research; Spatial statistics and analysis of health data; Statistical methods and spatial epidemiology; Health research and geographical data base; Modeling spatial variations in air quality using GIS; time geography and health; GIS and public health; Improving health need assessment using patient register information in a GIS; Applications: Atlas of Turkey Mortality Maps.

UCS542 Raster and Grid Modeling on Remote Sensing 3+0 7.5
Properties of Raster and Grid data. Data Sources and Techniques of Data Production. Point, Line, Polygon Projections on Data Formats. Geographic Sensitivity and Resolution. Change Detection Based on Time for Same Coordinate. Digital Elevation Model Practices. Algebraic Functions Used for Data Modelling. Grading and Recoding in Data Analysis; Multifactor Modelling Techniques.

- UCS543 Applications of New Technologies in Geographic Information Systems 3+0 7.5**
 What is geoinformatics? Geodatabase structures On-line data collection for GIS What is GPS? GIS and GPS integration Applications for GIS and GPS integration: Mobile tracking What is wireless sensor networks (WSN)? Wireless sensor network applications: Pollution mapping, noise mapping
- UCS544 Seismic Data Acquisition Techniques and Quality Control 3+0 7.5**
 Seismic sources and receivers. Field configuration in seismic refraction and reflection methods. Acquiring land and marine seismic data. 3-D data acquisition techniques in seismic reflection. Seismic data quality control and criteria.
- UCS545 Bore-Hole Seismic Methods and Professional Software 3+0 7.5**
 Bore-hole seismic sources. Bore-hole three-component geophones and hydrophones. Sonic and density logs. Down-hole and up-hole shooting methods. Determination of seismic P and S wave velocities. Generating synthetic seismograms and correlation. Related professional software.
- UCS546 Seismic Tomography and Professional Software 3+0 7.5**
 Essentials of cross-hole tomography. Generation of coefficient matrices. Methods of matrix inversion: Singular-value-decomposition, Gauss-Newton method, damped least-squares and Lagrange coefficient, rank deficiency. Related professional software.
- UCS547 Seismic Surface Waves 3+0 7.5**
 Properties of body and surface waves. The concept of absorption and dispersion. Absorptive and dispersive properties of surface waves. Surface waves in earthquakes, structure ground interaction.
- UCS548 Data-Processing in Seismic Refraction Methods and Professional Software 3+0 7.5**
 Concept of critical angle and critical distance. Horizontal single-layer problem. Horizontal multi-layer problem. Dipping-layer problem. Blind-layer, hidden-layer problems. Intercept-time, cross-over distance, and time-distance equation solutions. Delay-time method. Related professional software.
- UCS549 Data-Processing in Seismic Reflection Methods and Professional Software 3+0 7.5**
 Concept of shot-gather and CDP-gather. Digital filters and gain. Data editing and muting. Geometry definition. Static and dynamic corrections. Velocity analysis and stacking. Deconvolution and migration processes. Time-to-depth conversion. Related professional software.
- UCS550 Seismic Interpretation and Professional Software 3+0 7.5**
 Factors affecting the seismic wavelet, Geometrical spreading, reflection and transmission coefficients, seismic absorption, interference; Pitfalls in seismic interpretation: Velocity pull-up, velocity pull-down Multiples. Definition of bright-spot, dim-spot, flat-spot. Related professional software.
- UCS551 Seismic Stratigraphy and Tectonics 3+0 7.5**
 Display of seismic sections. Concept of vertical and horizontal resolution. Incident-angle dependency of the reflection and transmission coefficients. Terms used in seismic stratigraphy: On-lap, top-lap, down-lap, truncation surfaces, etc. Determination of normal, reverse and strike-slip faults.
- UCS552 Satellite Technologies and Communication 3+0 7.5**
 Satellite Types and Orbits; General Principles of Satellite Telecommunication; Satellite Platforms; Introduction of Satellite Sub-Systems: Payload (Transmitter Sub-System); Electrical Power Sub-System; Impulse Sub-System; Avionics and Location Control Sub-System; Thermal and Structural Sub-System; Process and Tests of Satellite Production; Launching Services; Satellite Location Control Systems
- UCS553 Satellite Managership 3+0 7.5**
 Fundamental Principles of Satellite Managership; Individual and Institutional Services Presented via Satellites; Competition and Cooperations in Satellite Managership; Marketing Strategies in Satellite Managership; Contact Administration in Satellite Managership; Customer Relations Management in Satellite Managership; Satellite Managership in the World and Satellite Producers: Countries that have Satellite Managers and their Numbers; Leading satellite producers in the world; Firms that provide launching service; Satellite Purchasing and Ensuring
- UCS554 Geodatabase 3+0 7.5**
 Basic Database Concepts: Database Management System, Database Components, Database model; Spatial Data Models: Geodata, Geoinfo, Steps of geodatabase establishment; vector data model: Attribute Domains, Topological relations, Feature Dataset; Raster Data Model: Resolution, Pixel value, Raster dataset, Raster catalog, Mosaic Dataset; Extraordinary

Estimation and Microzonation; Infrastructure Design for Seismic Microzonation Using Geographic Information System; Evaluation and Completion of Data; Mapping of the Raw Data; Application of Seismic Microzonation Maps to Urban Master Plans.

UCS567 Introduction to Remote Sensing 3+0 7.5

Basic Concepts of Remote Sensing: Definition, History; Components of Remote Sensing; Electromagnetic Spectrum: Spectral signature of objects; Sensor Systems of in Remote Sensing: Sensors systems and platforms, Satellite systems and orbits; Remote Sensing Types: Optical remote sensing, Thermal remote sensing, Microwave remote sensing; Digital Image Processing: Digital image specifications, Resolution concept, Image processing, Classification; Application Areas of Use of Remote Sensing: Land applications,; Water Applications,; Air and Atmospheric Applications.

UCS568 Statistical Applications in Geographical Information Systems 3+0 7.5

Basic Statistical Concepts: Definition, Derivation, Classical descriptive statistics (Single Variable), Classical descriptive statistics (Two Variable); Central Weight Statistics; Center Average, Centroid - center of gravity, Weighted average center, Standard distance deviation; Point Pattern Analysis: Quadrat Analysis, Nearest Neighbor Analysis; Spatial Autocorrelation; Correlation and Regression (Two Variable): Standard, Spatial.

UCS569 Computer Aided Mapping 3+0 7.5

Basic Cartography Information Knowledge; What is a Map?; Map Components; Map Design; Map Sheet Segmentation; Map Labeling; Map Projections; Map Projection Selection; Deformation; BÖHNBÜY Regulation; Software Usage; Software Usage; Software Architecture; Basic Commands; Editing Commands; 2D and 3D Modeling Commands; Data Transformation Commands; Project Design; Design of Map Elements; Submission of Maps as Output.

UCS571 Open Source Geographic Information Systems Applications 3+0 7.5

Open Source Software Using at GIS: Introduction and software architectures; Software Functions; Data Productioning: Raster georeferencing, Database design, Creating layer; Vector Data Productioning; Queries: Attributes queries, Spatial queries; Transformations: Projection transformations, Data format transformations; Thematic Map Productioning: Related Table and spatial data association, Producing different types of thematic maps; Vector Based Spatial Analysis; Raster Based Thematic Spatial Analysis; Producing LayoutOutputs: Generating graphics and report, Producing map layoutoutputs.

UCS572 Remote Sensing and Geographical Information Systems in Environmental Management 3+0 7.5

Introduction to Environmental Management; What is Environmental Management?; Components of Environmental Management; Environmental Legislation; Environmental Impact Assessment; Strategic Environmental Assessment; Risk Assessment; Life Cycle Analysis; Water Quality Management; Air Quality Management; Waste Management; Use of Geographical Information Systems in Environmental Management; Use of Remote Sensing in Environmental Management.

UCS573 Open Source Remote Sensing Applications 3+0 7.5

Open Source Software Using in Remote Sensing: Introduction and software architectures, Software functions; Satellite Image Specifications; Image Preprocessing: Geometric correction process, Radiometric correction process; Satellite Image Analysis Methods: Arithmetic band operations, Vegetation indices, Principle components analysis, Spatial filters; Classification of Satellite Images: Unsupervised classifications, Supervised classifications; Topographic Analysis: Producing of slope, aspect, Shaded relief and contour map; Model Development for the Purpose of Study; Creating a Map Output.

UCS574 Map Production and Use 3+0 7.5

Map introduction: Introduction to map features; Determination of working methods; Introduction of software and hardware; Introduction of map elements; Map production: Map production methods; Determination of rules in map production; Map generation from remote sensing data: Obtaining data; Use of Data; Internet-based cartography: use of Internet data; On-line Map production.

UCS575 Spatial Analysis 3+0 7.5

Introduction to Spatial Analysis Methods; Buffer Zone and Proximity Analysis; 3D Surface Creation; TIN, DEM, DSM and DTM Concepts; Slope, Aspect, Visibility etc. Analysis; Three Dimensional Surface Analysis; Density Analysis; Continuous Surface Generation from Point Data; Spatial Interpolation; Weighing with Inverse Distance Weighted; Reclassification Techniques; Registration Overlay Analysis; Optimal Place Selection Analysis.

UCS576 Data Mining in Remote Sensing 3+0 7.5

Data Mining: Data, introduction to data mining concepts; Classification of Data; Classification Methods; Clustering Methods; Remote sensing data analysis: Data acquisition; Applications with remotely sensed data.

UCS577 Basic Programming and Introduction to Python Language 3+0 7.5

Basic programming: Basic Concepts in Programming; Data Types; Variables; Conditions; Error Catching; Object Oriented Programming: Classes; Methods; Data Analysis: Image Processing; Machine Learning; Advanced Applications with Python.

| | | |
|---------------|---|----------------|
| UCS578 | Digital Elevation Models and Applications | 3+0 7.5 |
| | Representation of Digital Elevation Surfaces, Digital Elevation Models, Digital Elevation Modeling; Elevation Descriptors and Sampling Strategies; Acquisition Techniques for Digital Elevation Model Source Data: Photogrammetry, Radargrammetry and SAR Interferometry, Airborne Laser Scanning (LIDAR); Digital Surface Modeling: Approaches for Digital Surface Modeling, The Continuity of Digital Elevation Model Surfaces, Triangular Network Formation for Surface Modeling, Grid Network Formation for Surface Modeling; Quality Control in Elevation Data Acquisition; Accuracy of Digital Elevation Models; Visualization of Digital Elevation Models; Interpretation of Digital Elevation Models; Applications of Digital Elevation Models. | |
| UCS582 | Evaluation of Climatic Factors and Bioclimatic Comfort | 3+0 7.5 |
| UCS584 | Introduction to Google Earth Engine | 3+0 7.5 |
| UCS586 | Remote Sensing and Geographical Information System Applic. in Urban Climate Res. | 3+0 7.5 |
| UCS588 | Machine Learning in Geographic Information Systems and Remote Sensing | 3+0 7.5 |
| UCS592 | Seminar | 3+0 7.5 |
| UCS594 | National Geographic Information System Data Themes and Institutional Applications | 3+0 7.5 |
| UCS599 | Term Project | 3+0 0.0 |
| UCS601 | Use of GIS in Earth Sciences | 3+0 7.5 |
| | Fundamentals of positional data models, Applications of positional data models, positional data structures, positional data input, display of positional data, inquiry of positional data, transformation of positional data, applications of positional data transformation, tools needed for single map analysis, tools needed for map pairs analysis, tools needed for multi-maps analysis. | |
| UCS602 | Earth Systems | 3+0 7.5 |
| | Global changes, energy equilibrium and greenhouse effect, atmospheric circulation system, circulation in oceans, modeling of atmosphere-ocean systems, plate tectonics, carbon cycle, ecosystems and biodiversity, effect of life on atmosphere: increase in oxygen and ozone, long period climate changes, paleobiodiversity, glaciations in Pleistocene, short period climate changes, global warming, ozone layer, human effect on biodiversity, climatologic stability in Earth and Earthlike planets. | |
| UCS603 | Advanced Photogeology | 3+0 7.5 |
| | Stereoscopy, stereoscopic vision, stereoscopes, radial displacement concept, air photographs, types of air photographs, informations printed on aerial photographs, taking areal photographs, handling of areal photographs, photogeological symbols and abbreviation, photointerpretation in geology, fundamentals of photointerpretation, essential interpretation elements in photointerpretation, application of photointerpretation to geology, structural analysis, lithologic interpretation. | |
| UCS604 | Environmental Hydrogeology | 3+0 7.5 |

- UCS628 National Standards, Legislations and Public Applications 3+0 7.5**
 Basic Definitions and Concepts, European Union countries status, Inspire directives, Current institutional structure of geographic information systems in our country, Spatial data producing public institutions, National spatial data standards, TUCBS, National legislation in cadastral studies, Mapping, Cartography, Planning and geographical information technologies, Infrastructure facilities, National studies, public applications, Future sectoral approaches.
- UCS630 Geographical Information Applications for Water Resources Planning 3+0 7.5**
 Digital Elevation Model (TIN and GRID) Concepts; Drainage Basin Extraction and Determination of Properties; Various Spatial and Three-dimensional Analysis: Soil and Land Use Mapping, Point-to-area distribution (rain / snow / soil moisture / dirt etc.), Site selection and dimisioning for water structures; Disaster (flood, landslide, etc..) Risk Mapping; Geographic Information Systems Applications on the Field of Water Resources.
- UCS632 Government Projects and Spatial Relations in Turkey 3+0 7.5**
 E-Government Structure: E-government elements, The application purpose and the factors which the transforma-tion, The benefits of the application, History, Spatial e-government practices in the world; E-Government and E-Transformation Process Adaptation Studies in Turkey: Information society strategy action plan, Integration stan-dards, Data sharing standards, IT and security standards; Spatial Data Infrastructure and E-Government: TUCBS, Spatial e-government projects sample and applications.
- UCS634 Property Law and Introduction to Land Survey Applications 3+0 7.5**
 Introduction: The basic concepts of law, Real and personal rights, Property law and possession, The turkish civil code, People law, Family law, Inheritance law, Real law, The right to property, Real property; Title Deeds and Land Registry: Land registry in Turkey, Principles and elements of the land registry, Transactions in the land registry, Land registry organization; Cadastre: Definitions and concepts, Definitions used in the cadastre, Land ownership relations, Cadastre types, Cadastral functions implemented in Tur-key, Cadastral works in Turkey.
- UCS635 Satellite Image Processing 3+0 7.5**
 Basic Concepts: Platforms and sensors, Basic image principles, Pixel, Band, Resolution; Earth Observation Satellites: History; Satellite Image Processing Steps: Image registration, Rectification, Ortho-rectification, Image download and pre-processing, Image filters, Image pan-sharpening, Radiometric and atmospheric correction; Image Analysis from Satellite Image; Image classification, Accuracy assessment, Digital elevation model analysis; Satellite Image Interpretation: Image interpretation techniques; Applications: Building extraction, Vegetation cover detection, Thermal remote sensing images.
- UCS636 Project Management in Geographic Information Systems 3+0 7.5**
 Introduction: What is project, What is project management; Project Life Cycle and Organization: The features of the project life cycle, Project phases, Stakeholders; Project Management Processes in The GIS Project: Orientation process groups, Starting processes, Planning processes, Execution processes, Monitoring and control processes; Project Integration Management: The development of the project management plan, The realization of the integrated change control; The Project Scope Management; Project Time Management; Project Cost Management; Project Quality Management; Managing The Project Team; Project Risk Management; Project Procurement Management.
- UCS637 Remote Sensing and Geographic Information Systems Studio I 6+4 7.5**
- UCS638 Remote Sensing and Geographic Information Systems Studio II 6+4 7.5**
- UCS639 Remote Sensing with Google Earth Engine Remote Sensing 3+0 7.5**
 Introduction of Remote Sensing Techniques; Data Selection; Data Collection; Google Earth Engine: Introduction of google earth engine techniques; Database Introduction; Data Access; Image Processing: Image reading; Image Processing; Image Export; Geo-Information Systems; Opening Vector File; Working with Vector Data; Image Classification: Classification methods; Classification; Sample Collecting; Accuracy Analysis; Image Use: Multi-temporal changes; Monitoring Environmental Events; Disaster Monitoring.
- UCS640 Gis Applications in Agriculture 3+0 7.5**
 Basic Concepts: Agriculture, Agricultural activities, Natural factors affecting agriculture, Human factors affecting agriculture, Agriculture and technology, Historical development of agriculture: The first agriculture revolution, The second agriculture revolution, The third agriculture revolution, Conventional agriculture, Ecological agriculture, Agricultural policies, Sustainable food and nutrition, Agricultural planning, agricultural production mapping, Agricultural workforce mapping, Agricultural population mapping, agricultural needs mapping, Agricultural product market analysis mapping, Determination of optimum agricultural pattern.

| | | |
|--|---|-----------------|
| UCS641 | Deep learning in Remote Sensing | 3+0 7.5 |
| Fundamentals of machine learning and deep learning; Models and hyperparameters in deep learning; Fundamentals of computer programming with Python programming language; Image classification with deep learning; Image classification application with deep learning; Object detection with deep learning; Object detection application in remote sensing images with deep learning; Pixel-based classification with deep learning; Pixel-based classification application in remote sensing images with deep learning; Deep Learning Project. | | |
| UCS642 | Machine Learning Applications in Geographic Information Systems and Remote Sensing | 3+0 7.5 |
| UCS643 | Advanced Geographic Information System Applications in Urban Climate Research | 3+0 7.5 |
| UCS692 | Seminar | 3+0 7.5 |

|--|--|----------------|
| UGM501 | Advanced Human Factors in Aviation | 3+0 7.5 |
| UGM510 | Failure Analysis of Aircraft Structures | 3+0 7.5 |
| Introduction; Definitions, Common causes of failures, Deficiency in design, Manufacturing defects, Deficiency in inspection and maintenance, Abnormal conditions, envi-ronmental effects, Failure analysis methodology and sta-ges, Examination methods of failure analysis; Nondestruc-tive inspection, Destructive inspection, Characterization, Special techniques, Failure analysis of aircraft structures; Fatigue, Creep, Corrosion, Fracture, Fretting, Wear, Dis-tortion failures, Case studies of failures. | | |
| UGM511 | Mathematical Programming and Aviation Applications | 3+0 7.5 |
| Linear Programming: Basic terms, Geometric solution; Linear Algebra: Convex analysis, Polyhedral sets; The Simplex Method: Extreme points and optimality; Mathematical Modeling: Coding of linear programming problems in LINDO and analysis of computer solutions; Integer Programming Models; Aviation Applications: Labor force planning in the airport, Aircraft route planning, Aircraft maintenance planning, Airline crew scheduling. | | |
| UGM512 | Electric - Hybrid Propulsion Systems and Aviation Applications | 3+0 7.5 |
| Introduction; Electric Vehicles; Types of Electric Vehicles: Battery Electric Vehicles, Plug-in Electric Vehicles, Fuel Cell Electric Vehicles; Hybrid Propulsion Systems and Types: Serial Hybrid Vehicles, Parallel Hybrid Vehicles, Serial-Parallel Hybrid Vehicles, Advanced Hybrid Vehicles; Comparison of Hybrid Electric Vehicles with Other Electric Vehicles; Existing Electric and Hybrid Propulsion Vehicle Examples in Aviation. | | |
| UGM513 | Propeller and Windmill Aerodynamics | 3+0 7.5 |
| Introduction, Propeller theories: Momentum theory, Blade element theory, Power losses, Blade angle, Blade geometry, Blade loading, Blade shank geometry, Compressibility effects, Propeller performance, Ducted propellers, Propeller noise, Propeller selection, Propeller design: Betz minimum energy loss condition, Glauert, Larrabee, Adkins and Liebeck propeller design methods, Propeller analysis, Wind turbine technology, Aerodynamic design of wind turbines, Aerodynamic analysis of wind turbines. | | |
| UGM515 | Advanced Manufacturing and Assembly Technology for Aircraft Materials | 3+0 7.5 |
| Contents: Introduction of aircraft materials, Assembly; Aluminum; Magnesium and Beryllium; Titanium; High Strength Steels; Superalloys; Polymer Matrix Composites; Adhesive Bonding and Integrally Cocured Structure; Metal Matrix Composites; Ceramic Matrix Composites; Structural Assembly: Framing, Shimming, Hole drilling, Fastener selection and installation, Sealing, Painting. | | |
| UGM517 | Sustainability Analysis at Airports | 3+0 7.5 |
| Introduction: Airport organization structure, Airport air-and-land-side areas, Sustainability management models; Standards: National and international standards (ISO 50001, ISO 14001), Green airport certification; Sustainability: Economic sustainability, Environmental sustainability; Social sustainability; Economic Analysis: Estimation of investment, Principles of economic evaluation, Life cycle cost analysis; Energy Analysis: Determination of energy consumption and calculations, Modeling and analysis for process monitoring; Environmental Analysis: Determination of environmental impacts and damages, Life cycle assessment; Sustainability Analysis: Combination of method economically and environmentally, holistic life cycle analysis. | | |
| UGM519 | Batteries and Battery Systems | 3+0 7.5 |
| Fundamentals: Introduction to Aircraft Electric Storage; Fundamentals of Aviation Battery and Electrochemistry; Aircraft Battery Architecture: Lead Acid Batteries, Li-Ion Batteries; Super Capacitors and Applications; Battery Systems Integration; Battery Applications: Network Connected Electric Storage, Aviation; Battery Modelling And Simulation; SOC Calculation; Future Electric Energy Storage Technologies; Second Life of Batteries and Recycling; Battery Standards and Tests; Battery Safety. | | |
| UGM521 | Momentum and Heat Transfer | 3+0 7.5 |
| Introduction to Momentum Transfer; Systems and Control Volumes; Flow Models: Finite control volume, Infinitesimal fluid element; Basic Tools: The substantial derivative, The divergence of the velocity, The Reynolds transport theorem; Fundamental Governing Equations: Continuity equation, Momentum theorem, Energy equation; Angular Velocity; Stream Function; Circulation; Velocity Potential; Inviscid-Viscous Flow; Introduction to Heat Transfer; Conduction: Differential equations of heat transfer, Steady-Unsteady conduction; Convective Heat Transfer: Parameters, Dimension analysis; Radiation Heat Transfer: Emissivity, Absorptivity, Black bodies, Radiation from gases. | | |
| UGM523 | Physical Ergonomics in Aviation | 3+0 7.5 |

Introduction to Ergonomics; Human Anatomy; Anthropometry; Physical Ergonomics; Work Systems and Classifications of Work; Model of Workload-Strain; Human Performance Capacity; Static and Dynamic Work; Human Energy Requirements and Continuous Performance Limit; Heart Rate in Dynamic and Static Work; Fatigue and Work Breaks in Workplace; Effects of Environmental Factors; Displays and Control Elements; Ergonomic Principles in the Design of Work Tools and Instruments; Aircraft Accidents and Literature Studies on Physical Ergonomics in Aviation.

UGM592 Seminar 3+0 7.5

UGM601 Environmental Impact of Commercial Aircraft 3+0 7.5

Fundamental Combustion Thermodynamics; Emission Types: NO_x, HC and CO; Emission Mechanisms; Emission Regulations; Emission Inventory Investigations: ICAO, SAGE, AERO2K, DLR; Actual Emission Tests; Emission Abatement Techniques in Engines; Emission Analyses with Flight Data; Engine Power and Emissions; Effect of Flight Phase on Emissions: Cruise, Climb, Descent; Emission Estimations Based on Airport; Emissions and Air Traffic Management.

UGM603 Advanced Heat Transfer Calculations in Aviation 3+0 7.5

Basics of Heat Transfer; Heat Conduction: Steady-state heat conduction, Concept of heat resistance, Determination of temperature distribution, Unsteady heat transfer, Lumped system analysis, Infinite and semi-infinite matters, Fundamentals of heat convection, Dimensionless numbers, Energy equation, Momentum equation, Mass equation, Forced convection, Forced external convection, Forced internal convection, Natural convection; Heat Transfer Analyses for Aviation Applications.

UGM605 Advanced Exergy Analysis in Aviation 3+0 7.5

Basic Concepts; Conventional Exergy; Exergoeconomic and Exergoenvironmental Analyses and Exergy Destruction: Definitions of the theoretical system and the unavoidable thermodynamic irreversibility, Endogenous and exogenous exergy destructions, Unavoidable and avoidable exergy destructions, Avoidable endogenous, avoidable exogenous, Unavoidable exogenous, unavoidable endogenous exergy destructions, Exogenous exergy destructions, Application of advanced exergy analyses to exergoeconomic and exergoenvironmental methods in aviation.

UGM606 Fuel Flow Rate Prediction Models and Optimization for Commercial Aircraft 3+0 7.5

Fundamental equations of aircraft motion; Aircraft performance parameters; Study of climb, cruise, and descent phases; Jet engines; Thrust; Specific fuel consumption; Fuel flow rate prediction models in the current literature; Logarithmic derivatives of aircraft performance parameters; Classical optimization by Lagrange multipliers; Non-conventional optimization methods; Thrust modelling; Fuel flow rate prediction using genetic algorithms; Modelling of fuel flow rate by the use of artificial neural networks; Fuel flow rate prediction using particle swarm optimization; Fuel flow rate prediction via cuckoo search algorithm.

UGM607 Aircraft Performance Modelling and Parametric Optimization 3+0 7.5

UGM610 Thermo-economic and Thermo-environmental Optimization in Aviation 3+0 7.5

Thermal system design, Life-cycle design, Economic and environmental studies in aviation; Thermodynamic Analysis: Energy and exergy analysis, Heat transfer, modeling, and design analysis; Economic Analysis: Estimation of investment, Principles of economic evaluation; Environmental Analysis: Determination of environmental impacts and damages; Thermo-economic Analysis and Evaluation; Thermo-environmental Analysis and Evaluation; Aviation Application of Thermo-economic and Thermo-environmental Analysis: Piston-prop engines, Gas turbine engines; Optimization: Determination of optimum points.

UGM612 Sustainable Aviation Fuels 3+0 7.5

Conventional Jet Fuels and Alternative Fuels in Aviation; Basic Characteristics: Specific energy, Energy density, Density, Viscosity; Drop-in and Neat Using; Synthetic Paraffinic Kerosene Fuels: Coal-to-liquid, Gas-to-liquid, Biomass-to-liquid; Hydroprocessed Renewable Jet Fuels: Jatropa, Camelina, Algae; Aviation Fuel Standards; Test Flights; Airport Infrastructure Compatibilities; Gaseous and PM Emissions; Range and Payload Effects; Alternative Fuel Targets.

UGM614 Finite Volume Method 3+0 7.5

Introduction; Conservation Equations for Fluid Flow: Continuity equation, Conservation of momentum equation and conservation of energy equation; Turbulence and Modelling; Fundamentals of Finite Volume Method (FVM); FVM for Diffusion Equation; FVM for Convection-Diffusion Equation; Solution Techniques for Steady Flow; Solution Techniques

for Unsteady Flow; Solution of Linear Equations; Implementation of Boundary Conditions; Error Analysis; Engineering Application Examples of Finite Volume Method.

| UYB701 | Research in Area of Specialization | 3+0 4.5 |
| UYB702 | Research in Area of Specialization | 3+0 4.5 |
| YBL501 | Earth Sciences | 3+0 7.5 |
| | Introduction to Earth Sciences, Information about the earth, Earth's surface, Earth's internal structure, Atmosphere, Minerals and rocks, Volcanic rocks, Sedimentary rocks, Metamorphic rocks, The earth's general properties, Formation of the universe, Geologic time, Rock cycle, Motion of tectonic plates that make up the earth, Soil formation, Environmental geology. | |
| YBL502 | Geotechnical Earthquake Engineering | 3+0 7.5 |
| | Earthquakes, Measurement and distribution of earthquakes, Characterization of seismicity, Engineering models of strong motion, Attenuation relations, Seismic risk and hazard, Response spectra, Stress-strain and shear strength characteristics of soils under earthquake excitations, Liquefaction and counter measures, Site amplification and microzonation, Earthquake codes related to geotechnical design. | |
| YBL503 | Geophysical Methods in Civil and Environmental Engineering | 3+0 7.5 |
| | Introduction to Geophysical Methods, Geophysical applications in civil engineering: Determination of Seismic P and S Wave Velocities, Seismic quality factor Q, Computation of static and dynamic soil parameters, Concept of bed-rock and seismic-basement, Geophysical applications in environmental engineering: Determination and Prospecting of Dump-sites, Implementation of seismic and ground penetrating radar techniques. | |
| YBL504 | Shallow Marine Geophysics | 3+0 7.5 |
| | Comparison of Land and Marine Geophysical Methods and Instrumentation; High-resolution Seismic, Multibeam-echosounder and side-scan-sonar techniques in shallow marine geophysics, Implementation of gravity and magnetic methods in marine environment, Seafloor classification, Geotechnical studies in marine environment: Docks, Bridges, Tunnels, Cables, Pipes, Offshore oil platforms, Dredging, Search for industrial materials and mines. | |
| YBL505 | In-situ Testing and Evaluation | 3+0 7.5 |
| | Borings and Soil Sampling; Standard Penetration Test (SPT); Cone Penetration Test (CPT); Plate Loading Test; In-situ Density Measurements; In-situ California Bearing Ratio Test (CBR); Pressuremeter; Dilatometer Tests; Field Shear Vane | |

Test; In-situ Permeability Testing; Groundwater Pressure Measurements; Dynamic Soil Properties based on in-situ Measurements; Microtremor Measurements in Geotechnical Engineering; In-situ Stress and Deformation Measurements.

YBL506 Geosynthetics 3+0 7.5

Introduction to Geosynthetics, The history and development of geosynthetics, Standards and selection of geosynthetics, Geosynthetics- soil interaction, Geometrical, Physico-mechanical chemical and hydraulic properties of geosynthetics, Production technology of geosynthetics, Project realization, Soil reinforcement, Drainage, Bank and bed protection, Roads and railways, Lining system.

YBL507 Experimental Soil Mechanics 3+0 7.5

Introduction to Experimental Soil Mechanics, Information about soil samples, Contents of laboratory report, Determination of water content of soil, Atterberg limits of soils, Particle size analysis-mechanical method and hydrometer method, Specific gravity of soils, Relative density determination, compaction test, California bearing ratio (CBR) test, Coefficient of permeability, Consolidation test, Unconfined compression test, Triaxial test, Direct shear test.

YBL508 Theoretical Soil Mechanics and Soil Models 3+0 7.5

Rock Cycle and The Origin of Soil, Soil composition, Classification and identification of soil, flow of water in soil, Capillary rise in soils, Engineering properties of soil, Effective stress concept, Stress-strain behaviour of soils, Compressibility of soil, Yield criterion of soils, Some theories of failure, Classification.

YBL509 Engineering Properties of Soils 3+0 7.5

Evaluation of Site Conditions, Sampling of soil, Classification of soil and index properties, Composition of soil, Consolidation, Theory of consolidation, Consolidation and settlements of soil, Flow of water in soils, Permeability concept, Compaction of soils, Stress and strain properties of soil stress and strain behavior of soils, Shear strength of soils, Shear strength properties of soils.

YBL510 Groundwater Hydraulics 3+0 7.5

Definitions of Basic Concepts, Geological and hydrogeological classification of groundwater reservoirs; Aquifer Types, Unconfined, Confined, Leaky, Perch; Well Types, Small diameter, Large diameter, Deep, Shallow, Drilling, Completely and partially penetrations, Non-penetration; Groundwater Flow Types, Laminar, Turbulence, Steady, Unsteady, Compressible flows; Aquifer Parameters, Hydraulic conductivity, Specific yield, Specific retention, Storage coefficient, Transmissivity; Darcy Law, Hydraulic load, Piezometers, Well losses.

YBL511 Geological and Hydro-meteorological Hazard Analysis 3+0 7.5

Concepts Related to Natural Hazards; Fundamental Mechanism of Earthquakes; Seismic Hazard Analysis; Fundamental Mechanisms of Landslides and Erosion; Landslide Hazard Analysis; Erosion Hazard Analysis; Applications of Landslide Hazard Analysis and Erosion Hazard Analysis; Flood Hazard Analysis; Application of Flood Hazard Analysis; Multi-hazard Assessments.

YBL512 Earth Systems 3+0 7.5

Global Changes, Energy equilibrium and greenhouse effect, Atmospheric circulation system, Circulation in oceans, Modeling of atmosphere-ocean systems, Plate tectonics, Carbon cycle, Ecosystems and biodiversity, Effect of life on atmosphere: Increase in Oxygen and Ozone, Long period climate changes, Paleobiodiversity, Glaciations in pleistocene, Short period climate changes, Global warming, Ozone layer, Human effect on biodiversity, Climatologic stability in earth and earthlike planets.

YBL513 Project Preparation and Management 3+0 7.5

Project Cycle Management; Logical Framework; Needs Analysis; Problem Analysis and Strategic Planning Techniques: Stakeholder analysis, Problem analysis, Analysis of objectives, Analysis of Strategies, Communication strategies; Indicators of Success; Operational Planning; Quality Factors; Project Implementation; Project Monitoring and Evaluation; Designing a Monitoring System; Project Reporting.

YBL514 Sustainability of Cities 3+0 7.5

City, Urban geography, origins of city, urban geographic views, urbanization, features and concepts; Physical environment and urban population; Spatial regulation patterns of city and urban land use models; regions depending on cities, cities domains; classification of cities; Horizontal and vertical developments of city, geographical approach of urbanization problems: Squatters and earthquakes, etc.; Urban transportation, Management of urban resource, Urban renewal, Urban conservation; Urban tourism; Quality of urban life.

YBL516 Geomorphology 3+0 7.5

Definition and relationship with other disciplines of geomorphology; Structural geomorphology; Fluvial geomorphology; Karst morphology; Coastal morphology; Geomorphology of arid and semi-arid regions Volcano morphology, Glacial

morphology; Main geomorphological features of Turkey; Geomorphology applications: Paleogeographic evolution of the archaeological site, erosion detection, identifying landslide risk areas, identifying the flood areas, road constructions.

YBL518 Soft Computing and Data Mining in Earth Sciences 3+0 7.5

Introduction; Soft Computing and Data Mining; Fuzzy Set Theory; Fuzzy Set Theory and Earth Sciences literature review; Application of Fuzzy Set in Hydrology and Hydrogeology; Application of Fuzzy Set in Landslides and Earthquakes; Artificial Neural Networks; Artificial Neural Networks and Earth Sciences literature review; Application of Artificial Neural Networks in Hydrology and Hydrogeology; Application of Artificial Neural Networks in Landslides and Earthquakes; Hybrid Systems; Hybrid Systems and Earth Sciences literature review.

YBL519 Introduction to Data Science with Python for Earth Sciences 3+0 7.5

Introduction: Python Programming Basics, Learn to use earth science and other data in Python; Data Science: machine learning algorithms, data processing, statistical research, Python for data analysis: Introduction to Numpy, Introduction to Pandas, Introduction to Matplotlib, Indexing, Operations, Exercises; Linear Regression Models; Nonlinear Regression Models; Classification; Clustering; Big Data Analytics.

YBL520 Spectral Analysis of Earthquake Waves 3+0 7.5

Seismology: Structure of the earth's interior, Seismic waves, Travel times and distance; Dispersion: Normal Dispersion; The dynamic and structural properties of the earth and faulting mechanisms; Seismic Network: General properties of recording systems, Structure of seismic network and management, National and international seismic networks; Strong Ground Motion; Microtremor and Application of Microtremor; Spectral Analysis.

YBL521 Geotechnical Earthquake Engineering 3+0 7.5

Basic Concepts: Seismicity, Magnitude and Intensity of Earthquake, Plate Tectonics, Fault Types; Dynamic Soil Properties: Stress-Strain Behavior of cyclically loaded soils and strength properties, Measurement of dynamic soil properties, Evaluation of the effect of local soil properties on earthquake damages; Ground Motions: Amplitude, frequency and duration parameters of ground motion, Attenuation relationships; Seismic Ground Response Analysis: Analysis methods, Response Spectra, Site Amplification, Design Spectra and Turkish Earthquake Code; Soil Liquefaction: Liquefaction analysis, Post liquefaction ground deformations.

YBL522 Numerical Methods in Geotechnical Engineering 3+0 7.5

Review of Analytical, Numerical and empirical Methods; Application of Numerical Methods in Geotechnical Engineering Topics; Definition of Geotechnical Problems; Preliminary Studies and Design Consideration in Geotechnical; FEM Numerical Methods: Plaxis; Introduction to Plaxis; Exercises and Case Studies Based on Plaxis Software; Solving Geotechnical Problems by Plaxis Program; An Underground Project Design by Using Plaxis Program.

YBL523 Active Faults of Turkey and Their Earthquake Potential 3+0 7.5

Active Fault Definition and Classification of: Earthquake surface rupture, Holocene fault, Quaternary fault, Probable Quaternary fault or lineament; Active Fault Map of Turkey: Source of data, Method, Principles of mapping; Active Faults in Turkey and its Vicinity: Dead Sea Fault Zone, Aegean Arc System, Cyprus Arc System, Causasian thrust belt, Pontid escarpment; Distribution of Turkey's Active Faults, General Characteristics and Their Earthquake Potential: North Anatolian Fault Zone, East Anatolian Fault Zone, South East Anatolian Thrust Zone, Active faults of East Anatolian Compressional Province, Active faults of Central Anatolia.

YBL524 Introduction to Earthquake Engineering 3+0 7.5

Engineering Seismology: Plate tectonics, Earthquake source, Earthquake parameters, Tsunamis; Earthquake Ground Motion: Instrumentation, Earthquake ground motion parameters, Ground motion prediction equations, Simulation of ground motion, Effect of local site conditions on earthquake ground motion; Earthquake Early Warning and Rapid Response Systems: Analysis methods; Seismic Hazard Analysis: Deterministic and Probabilistic hazard analysis, Seismic hazard deaggregation; Response of Structures to Earthquake Ground Motion: Single and multi of-freedom systems, Earthquake design spectrum; Seismic Design Codes: Turkish seismic design code.

YBL525 Engineering Geology and Construction in Earth Sciences 3+0 7.5

Sub-Division of Applied Geology Engineering Geology and Construction Relations; The Importance of Engineering Geology in Developing Societies Due to Increasing Energy, Transportation and Settlement Requirements; Engineering Geology in Underground and Surface Excavations, Rock and Ground Problems in Engineering Projects Regarding Construction of Building and Building Type Structures; Basic Applications During and After Construction in Geotechnical Field Investigations in Bridges, Tunnels, Dams and Highways. Importance of Engineering Geology in Earthquake Resistant Design.

YBL526 Hydrogeochemistry 3+0 7.5
